Enter all the system frequencies, not just the control channel(s). Set each frequency to the correct mode and set the bank to the correct mode (MOT, ED, LTR). It will be easier if you program the radio with Win92 from www.starrsoft.com.

"Banks"
Bank# system Mode
0 any town EDACS

"Channels"

The bank mode setting and the channel mode setting has to match in order to be able following any trunking system. I hope I have not confuse you any further.

That's the negative side of hand held scanners. I've used small amplified speakers made to be used with walkmans. I haven't bought any recently so can't tell you exactly where to get them but feel quite sure they are still available. They do make a hand held sound like a real radio. RM~

PS I might add , my only experience with hand helds are, Pro-34, Pro91 and a Pro94. It's quite possible that some of the others may sound like "Real Radios".

Most can be modified by putting a small jumper wire, from the ground side of the antenna, to the ground side of the earphone jack. Many of the earphone jacks have a resistor, in series, on the ground side. Shorting this out to true ground, gives you full output. This is a protection device, so people don't damage their ears.

Hello Victoria.

Sorry. I don't know a website you are looking for. Laws are changing faster than rabbits make babies... ;-) So it would be a sysiphus work to keep such a list up to date.
If you are interested in the german laws regarding to scanners i would email them to you on request. Or just join to the german speaking group on news:de.alt.radio-scanner
There's a lot of well knowing people on that subject. Please feel free to post questions in english. But as you are familar with the german language it is much easier to explain something in german ;-)
Basic thing in germany is: You are allowed to "own" everything(!) on receivers and(!) transmitters (wich was forbidden 8 years ago, in case not having a licence).
Nowadays the use(!) of scanners in germany is restricted on CE-confirmation and to receive only transmissions directed to the public. So listening to any other services may cause some difficulties if cought _in_flagranti_. Some laws are somewhat indifferent. So some judges (with rare basical technical knowledge) tend to say: Services who don't want to be listenable on (widely used) scanners will have to use real encryption (not only voice inversion) to prevent unwanted listening. But do not count on this....
Carrying a used(!) radio(-scanner) with you for personal use is no problem on the customs. They are not interested in technical issiues like CE-confirmation, frequency range, etc. But not having the CE, just powering it up would be illegal. But who should bring an action on you for this....? ;-)

regards,
Volker

Can you have too many scanners? Probably, but who's to say:

The wife comes home and asks "What are those police cars doing in front of the house?" I look out and there are two cruisers, but no cops around. I grab my Pro 95 and dial up the East Side talkgroup. Before long I see the two officers heading back to the cars, and hear one of them request the dispatcher call the residence. I grab my Pro 26 and scan for a cordless phone ringing. Dispatcher says "No answer." He asks her to try again. I don't hear any cordless signals, rats.

A few minutes later, the dispatcher says "He's angry, and refuses to come to the window. He wants PD to leave." Yeah, like that will work. I'm thinking they are serving a warrant or something, since they parked out of sight.

The officers request a supervisor to the location. While waiting, I see them circling the house, looking for a way in. I'm thinking I'm missing some communication, so I grab my Pro 92 and scan while the Pro 95 stays on the main talkgroup.

I wasn't looking for EMS, but heard a request mentioning one of our cross streets as I was scanning for a talkaround channel. Fortunately, the paramedic didn't hear the transmission and asks for a repeat. It turns out there was a suicide threat. The officers request another unit, and before I know it, there are 6-7 cruisers and an ambulance blocking the street.

They make entry (bust in?) and I don't hear anything for a while. I figure the EMS is the best bet for info, so I lock on to this group. All of the neighbors are out, and one know where to come for info. She tells me her daughter plays at the house in question, and thinks the grandfather is the one they're talking about.

As the scene clears, sure enough the paramedic is the one with the details. He claims he didn't take any pills or anything, but he did want the police to hurt him. He said all of the medication in the house is accounted for, and the guy seem OK. The police took him in to the county hospital for evaluation. Fortunately, the ambulance left empty.

My provider is trying to block my post because it thinks this is not a for sale group, so the subject line is not what I would like it to have.

Like new R8500 scanner, covers 100Khz to 2Ghz (cell blocked), 1000 memories, all modes, computer interface built in. A very premium scanner/receiver with all the bells and whistles. Still have the plastic on the display. I have the wall wart power supply, the dc cable, the dc jumper plug and the manual on CD.

$900 or trade towards TS2000 or FT847 or IC746Pro2, or other high quality gear.

## 1036. Speaker Amplifier Question

I am looking to mount several speakers in a console with individual volume controls, any ideas about what to use as an amplifier for them? I'll be using about 5 speakers for 5 individual scanners and two-way radios, and want to have them all of the controls close together.

Also, I recall seeing consoles that have an LED that flashes while a particular speaker is active, any ideas on how to hook those up?

Thanks in advance.

Though this doesn't address your question directly, you
might be interested in the NCS-3230 Multi-Rx receiver console:

http://www.ncsradio.com/m_rx.html

It is a somewhat pricey commercial mixer/controller which supports
up to 6 receivers or other audio sources and crossconnects them to 2
speakers. There is an activity LED for each source and a myriad of other
features.

I reviewed an NCS-3230 in January 2004 Monitoring Times though I
don't own one.

you better HOPE the ebay "Radio Police" doesn't read your auction the
line: "Provides continuous coverage from 25-520 and 760-1300 MHz" will
get your auction pulled in a heartbeat for FCC violations...these
gents comb the auctions daily just looking for something like

FYI, the headset is pretty cheap. I would just ignore that in
considering the price. The first unit I got from them was defective
(digital card didn't work) but I don't think it was there fault. I
ordered a replacement and sent them the other as a return. Ordering was
easy, shipment was fast and my return was credited promptly.
Unfortunately, the return meant it actually cost me $50 more than it
should have but I guess that's life.

While I do appreciate all of the responses, maybe I didn't make myself clear.
I know how to program the FREQUENCIES to scan and I use GRE Scanner Data Manager which works for me. I am talking about TALK GROUPS, the three, four, or five digit codes, not the frequency. There is a way to scan those and I cannot get it to work.

Make sure you have both the Bank mode and the Talk group mode set to the same one. That may be your program. I know when I first started I kept hearing the noise from the Control change. I re-checked my programming found that when I programmed in the frequency. I did not have it set to the right PL. For example in a EDACS system (855.2375 Freq tag name/ Mode set to EDACS. You do this in the channel set window. When in the Bank set up window. The Bank name then mode set to EDACS.

I hope I am understanding your question about your problem correctly. If not I wish to appolozie for any problems caused. If have Yahoo Messenger My ID is below and I be glad to chat with you and try to help you more. Hopefully without confusing you any more.

Take care.

If a scanner was built and sold BEFORE the "Law" for cell phones came into being
it is a LEGAL unit and NOT required to comply with that law!!

I have downloaded the PRO-96 CQPSK upgrade for the local system and
it misses a lot of the transmissions. I have the BC796D and it catches
everything while the PRO-96 is deaf or catches part of a transmission
and then magically starts scanning.
I used scanrec to monitor the digital system for a 24 hour period for
each radio. About 75% of the transmission monitored with the BC796D
were not detected by the PRO-96.

While you are totally correct in it being legal for the present owner, didn't the same law make it illegal to resell it?

The Realistic Pro 2006 Scanner did not come from the factory with cell
phone frequency coverage...it's specifications lists a reception gap
of 868.945 MHz-898 MHz...it required a modification to restore this
frequency gap (open up, clip 1 diode) very simple mod...but making it
technically illegal to own, operate, or sell. As the previous
Gentleman pointed out the seller can get the point across by adding
"YES. IT DOES"...if the seller lists "continuous coverage"...does eBay
pull the auction?..."YES.THEY DO!"

I Just purchased a Realistic Pro-2036 Scanner on eBay. I'm scanning all the popular frequencies but all I get it noise, it doesn't pick up anything. Every once in a while, after I take the plug out and put it back in, it will pick up some conversation (cell) but the background noise is very loud. Any suggestions?

Not to defend, but you better look at that auction again, and open you eyes this time... There is a "Buy-It-Now" price listed, therefore it is in fact FOR SALE as well as FOR AUCTION...

atleast the radioshack/gre team attempted to make the upgrade.
most companies wouldn't have bothered and would have released a whole new

maybe this will be one of those things where you will have to update it

I thought it was to control your radio from your PC? Please let me know if that is not the case. I have not yet had the time to check it out and see what it does and the sales person had no clue.

>As the previous
>Gentleman pointed out the seller can get the point across by adding

>pull the auction?..."YES.THEY DO!"

This has been covered several times.

eBay *does* allow the sale of pre-ban scanners which *can* be modified to receive cellular frequencies.

eBay *does not* allow the sale of such scanners which are advertised as modified, cellular capable, full 800Mhz, open, receives cell phones, modifiable, or any similar verbiage.

They have also been known to pull auctions where "YES IT DOES", "if you know this scanner, you know what it can do", "one of the good ones", etc.

Ditto for items including photos which show a cellular frequency being displayed. (I always thought this was a very clever way of getting the point across, BTW.)

If you want to sell a pre-ban scanner on eBay, simply list the model number and the date code. Those who will bid highest are familar with the date codes and know which scanners are modifiable, based on the combination of model number and date code.

Do not make ANY reference to the scanner being modified or modifiable. Do not make ANY reference to cell phones, cellular, or cellular-capable. Do not reference ANY frequency range other than that provided by the manufacturer (with the required cell gaps.)

This will allow you to sell your scanner without incurring problems from the eBay police.

It is 2:25pm EST (1925z)
RAZOR 66 sounds like he is getting ready to RTB Robins. He is getting the wx there from Cape Metro (344.6).
So much to hear today I have not had time to log it all. F-15s (BUDs) and F-18s (GATORs) have been coming into Patrick, AWACS is controlling many flights in the Whiskey Areas, including the Dutch F-16s (KILLERs), FANGs, SNAKEs, BUDs, HOBIEs. JSTARS "StrikeStar" is talking to the Northrop Grumman ground station "Star 1," as well as to the AWACS ("Darkstar"), to fighters. The Dutch are also working at Avon Park, using SPIDER callsign. And of course the mainstay US State Department acft (BRONCO OV-10Ds) are flying the Patrick pattern, accompanied by a CHS C-17, LIFTER 35. USN ASW SH-60F helos (AW 602) have been transiting southward. And of course, Eglin's WIDGET 48 stopped by, ICE's N741SK transited, and assorted transports passed through.
WHAT a day !!
Any freq you plug in will work today, but 267.5, 284.5, 292.2, 364.2, 225.8, 237.15, 301.0, 225.725 are some of the busiest in addition to the UHF ATC freqs.
Stay the quest.

/ / But the Pentagon's OWN energy support center pointed out that it also was delivering some gasoline to Iraq - for only ABOUT $1.00 a gallon. THE PENTAGON'S audit agency then asked halliburton officials for internal documents to justify its pricing - but the officials refused. \ \ (Not Democracy)

Imagine this is why the bushite soldier states the Humans must not be allowed to disagree with anything the bushmob in Iraq does, because then we'll all know together how pathetically weak and cowardly they truly appear as criminally acting with such betrayals as an ungodly evil tyranny, without any true leadership to speak about. Robbing their own nation of America as immediate family in the process. Dying. All for intolerant war monger bush's hatred for the American dream, and contempt for all human good will as kindness.

Just another PUBLIC bushmob act of sedition against the old red, white, and blue, to sacrifice an American Patriot as measured worthless with. So American Soldier, what are you going to do for US payers being

robbed in the open by the bushmob in Your dying brother's name like that?, as one American Citizen censored from speaking publicly at length like all the rest of US are also in corporate america? Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

He is what is referred to as a bigot, and likely therefor, a probable racsist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too,

Amerka. Haven't you heard? Bush's Amerka will be freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

/ / commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." \ \

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?

An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)

Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to

promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian Aid giving illegally to double biller commi Halliburton.

But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11. You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. -ba)

Communicating knowledge is powerful stuff let me tell you. (Roar!) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead

of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and implements to not work for public criminal investigations regarding the murder of thousands of American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly, and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me

I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

DYING!

/ / When seeking reasons for the cuts and bruises on the scalp, chest and mouth, why is murder-made-to-look-like-suicide not properly explored? Presumably pathologists employed by the Home Office know better than to mention such a scenario. \ \

This whole Britain Blair thing is so disturbing when parlayed with the facts outlaid. Look, MI6 (C) confesses the 45 minute thane was really just based on how long it might conservatively take for the Iraqi

military to get small caliber weaponry, like grenade launchers, to anywhere along the Iraqi border. (With an additional report alleging MI6 obtained those timings from an out of date Russian military manual. (Likely therefor, a bit of a brag)) If that is not 'sexing up' by the devote bushite Blair warranting his immediate resignation he promised, nothing is. Huge penis shaped nuclear warheads, as apposed to a sweet pea shooter aimed at space invaders? Hutton should be considered for treason when you think about the time spent privately reading the 45 minute, Weapons of Mass Destruction thane over and over again, never mind the fact he is blatantly, nakedly, attempting to cover up the murder of a Brit. (The British can't be played as stupid collectively as bush's America, because they're not. Kinda like Canadians, Norwegians, the Swedes, Belgians, France, and most other developed, and semi-developed nations. Hundreds of countries, comprising near 7 billion People. (Thousands of millions wiser together, than Americans without public heath care) US: that Ashcroft, bush and rumsfeld dictate by ungodly decree, are not of true Human values when talking about protecting our Justice and Freedom ruling our ways.. into the mystic. With King Johnny somewhere partying not stop with women, wine, and song.)

Now, with this Chalabi debater telling US, no, it was him alone who provided the false information to Britain personally, in private, illustrates again, intelligence gathering among war criminals leaves little left to the imagination. Like imbeciler bush's Chalabi on the bombing of the UN, that he and his gang knew well of before it happened, but didn't seem to tell anyone who cared to listen?, that I'm aware of so far. Now, why do you suppose that would be Annan? Annan., be a leader and speak up for our political climate in Iraq for Christ's sake. Demand to know who Chalabi personally warned of the imminent attack before it happened, to protect such a dreadful reoccurrence happening as whomever. Asking our world to step up to the podium for Allah's sake would be a good thing to save your brother Saul, and our friend(s) future. Nudge nudge "Jesus says Allah is Gggggreat!!!"

I ask Humanity, shouldn't Annan, if anyone, be speaking up scientifically on American soldiers eating rummy's radio-active depleted plutonium, while being blowed up by landmine cluster dud? now that I come to think of it... how is this to fit in any public American school text book without mentioning the dying for nothing as evil bushites part? Can't fit without some

revolutionary process of evolution to the betterment of
America as dreamt of by big picture planning, no?

Now, can someone, at least, lend me some credit for the
time being?

To you, for now,
I bid,
adieu.

"...defaulting as cowards into ungodly tyranny?"

Upon reading this with another go, I laughed, then when
reminded of the results, I realized,. we haven't yet
failed to please our forgiving Nature. (Or the great
lovable, nothing to speak of) By living to do something
good for this world, we hope we can bring happiness to

Beautiful. As I wrote then, when I first learned of the Arar relationship, I postulated that in fact, the official RCMP, or CSIS, likely played no part in the terrorist bush jinx. Now, I'm not saying their could possibly be one blind devote bushite among the millions of Canadians that make our nation great, but truly I believe, we will get the enemy of freedom in America by just being ourselves. Blind bushite ideology centered on international criminality has it's downfalls in

/ / The Senate Committee on Banking, Housing and Urban Affairs, found corporate America sold Iraq anthrax, VX nerve gas, West Nile fever germs and botulism, right up until March 1992, on hopes apparently, to risk further American soldier causalities, who were at that present time engaged in battle with poisoning themselves mostly...

...While we now learn from public disclosures on Connie Chung, apparently, George Tenant, had only 3 CIA officers investigating Laden just prior to 9/11. While I remember last year it was alledged on PBS, the CIA had taxed the American public nearly 10 billion on those investigations regarding Laden over the previous year, but, hmmm, bush forbade police agencies, the pursuit of such investigations with his secret W199i directive. country of America as undefended financially., extending
"their" risk to do nothing; by the further needless
SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly
dying WORTHLESS WITH as da dumdums. Armed American
Soldiers should be bravely going after Baathist bremer
with DEMANDS for immediate democratic elections and the

immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)

God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi savages, while desecrating all of Humanity by fighting against a just rule of Law, (instead of protecting America's America), forces the continued REAL WORLD sacrifice of true Liberty, until the bushmob gang is brought up by US for war crimes., as the 9/11 perpetrating, super evil as ungodly, demon antiChrist in disguises. (I very much would feel welcomed to play my part in those public proceedings.) Hmmm.. maybe CNN or CBC can become publicly convinced we should have our own news programs on what's truly happening?, to compete against the 'evil bushites' in this competitive free market place of ideas? Who knows..

Take care of the business, by getting US in on our news-casts., as these principles here standing in words, are a dreamers dreams, just waiting for You to bring to reality., by standing proud, strong, and forever free as a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America
is America. You, as an American, have a sworn right to
demand for America, bush not be allowed to further
miscarriage Justice blindly back to the dark ages, by
not correcting himself on behalf of established
publicly, where American intelligence stood, stands, and
ultimately strives. Freedom is not protected by letting
the "bad guys" go, to further toll more innocent lives
for criminal sacrifice. Sometimes, the real simple
things are over looked as profound meaning. The Magna
Charta of 1215 states that a freeman should not be
imprisoned. Simple right? Not for the bushites who
side instead to faith in pope bush, who deliberately
unminds a timeless universal principle that exists also
in the 1700 B.C's, Code of Hammurabi, where all
individuals are to be found equally under the Law, to be
fair minded about our business. Simple right? No,
corporate america says being fair, is not to care one
way or the other between commercials., and the result?
The available 9/11 evidence is not publicly disclosed as
relevantly important, for Laden did the whole thing by
himself, (bush, cheney, and rumsfeld said they know
better than everyone else put together so don't even
bother to form your own conclusions on your present
state devaluating) case closed, now blindly pay your
further tithes to bush, cheney and rumsfeld for letting
the crime go publicly undetected, while with 13303, we
will silently watch bush make himself tyrannical
dictator over the rest of our Humanity, where he tells
US, to escape, he will with evil american nazi bushite
soldiers in tow, get this: not be found accountable to
Ourselves anywhere by law to witness, or to an all
knowing God even. Spooky, strange and somewhat
disturbing, siding to show, bush really is dim-witted as

archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition.

The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation

to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or don't side to help a plead for mercy regarding yourself truly included.

Can the bushites possibly think, we're all not ever possible to stand together without a true Loyal President, or, make believe King named Johnny, on the facts firmly established regarding the treasonous war monger antiChrist lying to Patriots dying US as victim for?

America, I will now leave the rest of Our job in your hands for the time being.

Yours again,

Johnny Wizard

the Newsweek report of February 24, 2003 was the first to
publicize Kamel's testimony that the weapons had been destroyed,
US and British intelligence (as well as UN officials) had had
that information since August 1995. If you were not given a full
account of what Kamel said before it appeared in Newsweek, your
advisers should certainly have given you the whole truth when
Newsweek did break the story three weeks before you sent US
troops into Iraq to destroy those same weapons. If they did not
tell you, heads should roll. If they did, it becomes necessary
to explain why the information from Kamel had no apparent effect
on your decision to launch the invasion. \ \

From Johnny

/ / ..then call
themselves heroes in my name after the carnage for
blindly dropping bombs from the sky on everyone.
Heroes? More like typical american nazi cowards,
willing to murder their own families as themselves, than
bravely put their lives on the line standing to protect
Justice as freedom for everyone, as to what true
bravery, and heroism has always been. While the world
watched CNN broadcasting, American nazi teen soldiers
celebrating joyously in contempt for God while singing,
right after the unreported dropping of thousands of
pounds of bombs on everyone in Afghanistan, body parts
everywhere, while knowing directly as individuals, every
single, there was no evidence offered that anyone there
was responsible for any crimes whatsoever, including the
Afghanistan women who worked for the newspaper, but for
to be victims of fanatic nazi american barbarity,
disguised as human, like bush almost gets away with as
pure evil deceived, now completely impossible to
believe. Oh, by the way, I am now taking new
memberships for al-Qaida.

As I say, there isn't a real man in the
American Marines, or the Army willing to protect America
with their lives, for if there were, rumsfeld and bush
would be rightly dead for the murders continuing against
those they know as innocent. As even with their
continuing threats against more innocent people as
American lives they brag to throw away as just soldiers,
as all these other nations they try to make ready to
sacrifice millions for, while propagandizing that our
Justice we need not believe in to grant us freedom from
oppression, nor evidence no longer a requirement to
convince us who is evil, and who is not lying. Nobody
deserves to be murdered, but a murderer escaping to
recommit. \ \

US Firms STEALING Money
http://thestar.com.my/news/story.asp?file=/2003/12/7/nation/6859213&sec=nation

/ / ``KBR is charging Iraq US$180,000 (RM684,000) for each school they

them just US$20,000 (RM76,000) to do the job. \ \

Any being would not want to be deprived the rights to
living, by living to not deny the same rights of others.
(First commandment is a fundamental of understanding
space-time reality, as it pertains to the politics of an
actual sustainable World, indivisible, and eternal.)

To have US exercise denial of rights granted through the
protections of Freedom, asks naturally for reason to
being ones own commitment kept. To leaderlessly faith
in tyrant bush's faulty public judgement to committing
US to indiscriminate murders so he can rob Iraq of all
her riches going nowhere he silently contends as an
illiterate demon liar, exposes Your Mr. bush Jr. as
unfit to preside in Anyone's name. (Walla: Americans

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumdum evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just

like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumdum losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who

will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe

evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime
of such magnitude, it would 'justify' a war mongers
criminal invasion to thwart Enron's impending CRIMINAL
bankruptcy, THIEVING FROM MOMS AND POPS, to then,
ATTEMPT, to close the surviving, armed with knowledge
for good reason Police investigations. All of this
setting a lowly nazi bushite war criminal, frothing
publicly at more than six billion + of US, to state
without opinion, that We, as Humanity, are no longer
afforded God's GIVEN Human Rights to defend ourselves,
nor is the criminal dictates of the demon antiChrist
accountable to any rules of law. Universal they
publicly quip, as the not-so 'secret' ungodly bushite
doctrine of tyranny as enslavement of all that is
Righteous and Holy in this World, because, hey, there is
no God to speak of... and the King of kings, Son of God
fellow, well.. that's all just ninepence fiction. No,
WE, as all the make believers of this World, will no
longer have ANY legal recourse to defend our own loved
family from being stolen from through a bush bitch
buford blount doing whatever criminally with dumdum
loyal nazi teen bushites leading to sacrifice for, for

demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that

is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq
http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a

savior of the american way of life, and The People?,
they ate it again when in 1950, at the age of 70,
defying Truman, launched a win sumtin at all costs
attack against China, that quickly during the unreported
stupid needless slaughter of countless American teens,
forced Truman to concede defeat by begging for a
immediate truce with China while firing MacArthur, who
came home to giant demonstrations of love and affection
for sacrificing American lives forgotten to the
accolades of corporate america's unsung hero.

Deadly suppositions

/ / That's right. American troops are now being used to destroy private property of "suspected Iraqi guerrilla fighters." / / We must act, even if the threat is nonexistent - because of the potential danger. If "self-defense" consists of necessary "preemption," then what would happen if we started acting on this Bushian principle domestically? After all, killers, robbers, and rapists don't announce their intentions, politely putting us on notice before they strike. Why not just jail them before they have a chance to commit a crime? This principle, if applied within the U.S., would lead straight to totalitarian rule. Applied abroad, it means perpetual war. \ \

This is why I plead with armed Americans to kill the
unarrested bush for the love of children everywhere.
Look, we know directly who the bushites are who PUBLICLY
advocate the murder of innocent People through corporate
censorship, who support furthering the demon
antiChrist's senseless crimes against my America, and
our World. Example: You'd think Art Bell figures none
of his listeners could in no other way, learn of traitor
bush murdering thousands in New York City, and his
contemptuous silence on the issue forbidding anyone else
from publicly mentioning it. I have dominated
alt.fan.art-bell for years, while Art Bell, like
Canada's Peter Warren, will continuously advertise open
line calls, but abruptly end calls topicing on KNOWN
FACTS surrounding their evil false deity bush, 9/11,
Iraq, depleted plutonium, Halliburton, and the deaths of
our innocent lives fallen to their personal inaction
depicting our community as uninterested. Art Bell in
FACT has pre-screened his "open line" calls since bush
stole power, and does so, to make appear Americans

aren't clued in, on the now hundreds of thousands of innocent lives bush has murdered as war criminal. A good nazi bushite, is a dead nazi bushite, halted from advocating further war crimes constituting the murder of our innocent families. The dumdum bushite parasites have been PURPOSEFULLY blowing themselves up with mined cluster bombs as suicide bombers! Not dying for any noble cause, but to only further toll more American Patriot lives. We should ask all soldiers, who are they loyal to, the 9/11 perpetrating American cop killer bush, or the People's America, as so enshrined by the Bill of Rights, and true Justice to actually protect the freedom of US people by following a leader?

These OUTNUMBERED and OUTGUNNED nazi bushites are indiscriminately bombing residential communities with radio-active toxic waste for nothing but to please their evil false deity, Our Mr bush Jr.. No rational reason but for a hatred to Your Humanity, and God if you believe.

Example: that evil nazi terrorist buford blount confesses to murdering thousands of innocent Iraqi People for nothing, no reason he proudly professes as wicked evil heinous traitor. Think of the lives You could save Patriot, by justly killing the unarrested buford blount, on hopes a person to take his place could at the very least consider being honorable in defending Your America? Demon buford blount is truly the enemy to American soldiers, for, if your family was murdered by buford blount irrationally commanding mindless bushite soldiers for nothing but to further rob the dying American tax payers, would you not too, spend your will hunting the evil nazi fuck down personally to spare further another innocent family suffering? To kill the unarrested unAmerican buforld blount is to stop him from ordering the practically dead already, nazi dumdum treasonous bushite brethren teens, from victimizing again US as the innocent undefended.

While CNN still insists it's better for them to misinform and ignore, than to expose the demon bush as the true target for any Patriot's rage. American soldiers are being sacrificed to die for no known good reason, but for bad leadership as evil bushite war profiteers.

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The
evil is in plain sight, the danger only increases with
denial."

Remember: Demon bush doesn't forget signing his soul to
the invade Afghanistan plan by not following the 911
evidence, but would top secretly attribute to Laden for
blame, authored by himself, rumsfeld, Condoleeza, and
General Ahmad two days prior to the public event of
murdering "thousands" in wealthy corporate America, a
secret plan that has been confessed publicly to US as
fully implemented by the White House right from the
start to Jim at MSNBC, months after the fact when the
demon antiChrist was caught with American blood in his
breath.

Not to follow the criminal leads surrounding evil bush
as mass murdering antiChrist, is what the White House
confesses to Americans today as official policy under

every circumstance. Karma. Demon bush tells corporate america that they'll persecute the innocent in any country by denying our fundamental human rights of Freedom and Justice, while now dropping 2000 pound bombs in God's World containing children, while corporate nazi bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems

sometimes, as too, how terribly it truly is for life
whose love isn't appreciated by our will anymore as the
living in america, oh yeah, I mean America.

As an American then, what life will you forsake where
bush'll rob you over and over as the never living for
something better? These american bushite nazi fuks,
think your gonna wash their feet, and instead of
defending yourself and family, just turn the other cheek
right before the bushites drop a two thousand pound bomb
or two on your innocent neighbor next door? Done for
nothing but feeding the bushmob?, as unarrested buford
blount contends in God's presence? Then to think,
buford blount figures I as a real man will not seek him
out one to one to the ends of this universe for payback.

What can God do to help, if your refuse to help
yourself? The true danger to America increases with
American doubts on bush's blatant, true naked evilness,
or humoring God as Johnny, and betting on yourself for a
change by supporting me as the time being? Look, what
could you do for your freedom, when I demand the pursuit
of Justice by following evidence to truly protect this
World we share? Support my demand to raise the news
media's ignorance on what you shout even louder?

Think this: demon bush makes no public mention of where
almost half of the monthly 4 billion dollar tax payer
bill is quietly disappearing while grandma loses her
cable television, or only grandson? Is that Leadership
I ask every American Soldier to be brave and forward
this letter on terrorism to your fellow comrads
secretly. Then, we'll see...

Jail for Bush: Holding the Greatest Traitor in American History
http://www.jail4bush.org/

--

The money for reconstruction is being misplaced as stolen, while
corporate america demands bush not be held accountable.

American Soldiers, you'd think, wouldn't stand for it, right? It isn't
Art Bell, or Bill Hemmer who's paying with their lives, but a poor,
dumbass soldier along with the general tax payer, whos ignorance is
ignored, sacrificed, as not relevant to Art, or news worthy to Bill. I
will send this email like most others to Art, and maybe I'll phone up
Bill again to remind him that the FBI states bush's business partner,
General Ahmad funded Atta, the 911 mastermind. But you know what
they'll say as traitors to your America? Nothing but hang up on You,

while pretending we have no concern for the senseless murder of our families, or the robbing of American principles.

The bushite soldiers don't steal the Humanitarian Aid for themselves, or purposefully let the bushmob steal their parents pensions, no, they do it blindly to please their false deity, the demon bush Jr., because their weak and cowardly, stupid and truly dying... Not for America and freedom they die, but for the antiChrist, Our Mr. bush Jr, the most hated and despised war criminal of history.

GET BUSH

Officers fault air strategy as ï¿½timidï¿½
http://www.freerepublic.com/focus/f-news/842417/posts

/ / Jim Wilkinson, director of strategic communications at Central Command, responded by saying, "We don't discuss plan specifics for reasons of operational security. However, I can tell you the plan is comprehensive, modern and flexible, and Gen. FRANKS continues to work closely with all the services." \ \

...The officers said the plan deviates in significant ways from the 1991 38-day air campaign during Operation Desert Storm, in which telephone communications, power systems and bridges were targeted from the first day to isolate Saddam Hussein and his military forces.

The reason for the change: The Bush administration wants to spare hardships to Iraqi civilians and to show that the real target of the bombing campaign is Saddam. \ \

--

GET BUSH

So, to IRRATIONALLY target the telephone exchanges, power grids, water dams, pipe lines, and residential communities with thousands of toxic, radio-active cluster bombs to blindly murder a person like You, (that would later, blow up nazi bushite soldiers by landmine), would be considered TRULY evil by demon bush standards too?

Why does Johnny call the huge war criminal traitors puny dumdum bushite soldiers? They die truly as cowards for the demon bush liar, being enemies of God and Humanity, because prior to the war, (as outlined on March 7th), we had completely unrestricted access to go wherever in Iraq, without delay. So, demon bush sabotaged America's ability to effectively disarm Iraq, and to bring peaceably, freedom in the region through JUST causes,

all so he could STEAL further the lives of AMERICANS by continuing with his murder rampages against the innocent. We remember, Saddam offered the demon antiChrist, Our Mr. bush Jr. unfettered access to the Iraqi national media to preach his deceit against God and Humanity freely, but bush refused to publicly condemn Universal health care and education, along with what has been described as Humanity's greatest food distribution network. Instead, bush sacrifices bushite soldiers to steal OUR Humanitarian Aid, to double pay commi Halliburton, an american company found repeatedly by Our ARMED Police agencies, defrauding all Americans in criminal contempt for the People payers. All the while condoning the torture and enslavement of those known innocent still, but beyond american borders as our Humanity. Morally equating the rest of Humanity outside of Universal Justice as US fairly represented? Mr. bush tells God his plan is to victimize Humanity in America's name, by hiding behind who's flag again?

Destroy the war criminating, unarrested American cop killer, our offensive Mr. bush Jr. instead my friend, and be thanked by God in person.

Look, Mr. bush, rumsfeld, and franks have STOLEN food and medicine from Iraqi children by confiscating "Saddam's Money", and, it is now publicly understood that tommy franks, sabotaged the ORHA plan to create insecurity and chaos so to rob the central bank of billions. For tommy and his private banker friends to do this, he as a bushite had to sacrifice the lives of LEADERLESS American Soldiers as too weak and cowardly to say, "For God's sake, I'll wise up and destroy bush and rumsfeld myself instead to defend my loyal Brothers and Sisters I will, till the end, giving of everything for a life worth living", at least that is what a truly proud American Patriot who fights gloriously for a just battle as the good guys would. Instead as the dishonorable bushites, robbing blindly themselves and their own dying brethren, while bombing our homes with radio-active toxic waste, that contains among other things, deadly plutonium. Enemies of God as the bushite disciples.

Wow! Wouldn't it be cool if America stoop UP and destroyed the war criminals bush and rumsfeld by simple supernatural Human Will power?

Tough luck so far for corporate news america continue to slog that America is so ungodly stupid as the uninformed, and have never heard of this Johnny Wizard artist taking center stage as makeshift creator

antiChrist demon slayer.

Of course we should not forget to mention again, in addition, like the same, Saddam offered the demon antiChrist, Our Mr. bush Jr. unfettered access to the Iraqi national media to preach his deceit against God and Humanity freely, but bush refused, so too just like CNN and CBC censors do today by refusing communicating community interaction on our top priority war issues. Instead, we must, they claim, continue sacrificing bushite soldiers to steal Humanitarian Aid, to then double pay commi Halliburton, or WorldCom; companies found repeatedly defrauding all Americans in criminal contempt for the dying American tax payers. All the while watching now in real horror, as bush OPENLY steals almost all of the National Iraqi assets for his private auctions, but for the exception of the already claimed, iraqi Halliburton oil reserves. Why?, Ho ho ho, because, he said so, in writing. 13303 states bush is the lawless demon from scriptural references, and why Christians don't stand in service for the cried mercy begged from God, the Son, and Humanity, I'll never understand, but Johnny'll tell You, he's gonna march home even if it means I'll do it all by my lonesome. My soul isn't for sale, nor are my righteous Universal principles stealable as a true Human defender to the last bushite standing who foolishly would choose to be my mortal enemy.

To my friends in Iraq, don't let corporate american media divide yourselves from community as equal participators. An Iraqi, is foremost, a member of our Humanity, and just like the rest of US, hate the God betraying anti-American demon antiChrist bush, more than anything else in the Universe for persecuting the innocent while killing coppers to steal our assets undefended without a leader to speak out everywhere for our living rights included. HUNDREDS, if not thousands of American soldiers have already DIED in Iraq stupidly as evil nazi vermin, GAME OVER MAN, for nothing but their cowardly ignorance on our ability to communicate FREELY for Freedoms thought died for already. Dying for bush as too cowardly to protect themselves as their own friends, and sacrificing families they silently watch criminally plundered further by their leaderless inaction on truly protecting America. Again, bush isn't America, America is America.

Justice for all, and let's name this time our own with my writing as a make believe King of Kings who's done it all already, just for the fun of it, whatdoyasay?

Imagine this on a CNN spot speaking for our Justice as
an equal to all beings, and like, wouldn't that be
super interesting for everybody as the unjustly
suffering and dying as victims under the demon bush
dictates of criminal enslavement and global tyranny?

Christ, take care of yourself by killing bush,
please?

And, when that evil monster told us instead he would rely on secret evidence, but couldn't tell us why, as too the FBI or CIA, it turned out to be nothing but another wicked evil deception against the great American people, Tony Blair, bin Laden, and law enforcement officers everywhere, to even further give him cause to close investigations into 9/11 as Reuters told us, and rob directly from American soldier families, their lives, pensions, life savings, and blind faith, in bush, the false diety, super evil anti-Christ.

One More Thing

So, that demon bush, the American cop killer and his cohorts, are continuing to work destroying Humanity's gains in civility, by evilly dividing Our humanity with their blatantly open criminal intent to murder untold millions as US innocent, and as of yet, have not been executed by American Patriots for mass murder of God's Family in New York City. Traitors to US all on 9/11 without contention, for Our truth speaks as Ourselves, and witnessing just CNN's silence on General Ahmad,

speaks volumes on their contempt for US as worthy of Justice. Refusing to do what is good for Humanity by offering the central facts as publicly recognized by Our Police Agencies to be actually documented. According to the FBI: the vacationing General Ahmad financed the alleged 9/11 mastermind, Atta, and also developed the criminal war strategy against Afghanistan with the bush administration, to boost the heroin trade, and save Enron to commit further frauds against American soldier families, while murdering over a hundred thousand American flag wavers, and then leaving US for further ruin with plans to continue on against 59 more countries in the same deceitful illegal manner against all Churches, as an evil nothing short of eternally crowning Our Mr. bush Jr., the super evil anti-Christ, the most hated and despised parasitic murderer in the entire annals of Humanity's History. Cool eh? Kill bush now! Why?

The bushmob have done nothing short of confessing to the entire terror event, but for jokes on our strained credulity to publicly press for further stalls. With the rights of kissinger left to be a public investigation official? (Gee, thanks for highlighting your partner like that for US bush, you nazi dumdum.) Mr. bush Jr.'s america destroys themselves without Love for wisdom, or respect for intelligence as a Peace plan initiative. We publicly witness the blind and tormented dying bushmob slave whore charade, of contempt for living free in Our names. The two evil doers, bush and sadistic nazi rotten rumsfeld, are known publicly as documented, to continue leveraging the ignorance of the CNN ready to be broadcasted repeatedly, tranced dimwit marines, the true dumdums of this world as weak and pathetic cowards to themselves as their own brothers they watch murdered for bush helplessly, communicated in CNN's un-American false image as the evil bush nation hiding in falsehoods as death squad recruiters against the practically defenseless as unarmed children, nazi vermin criminals, being unbiased as Blitzer about protecting your freedom Patriot, to lose your real life savings reader, truly too weak and stupid to stand up in protection for the flag as the living American Dream for anyone. Because witness again, CNN keeps not saying Justice is important as principle to hold our reflections.(CrossFire is getting better though.) Fortified behind locked doors in their bombed out bunkers, Blitzer and Hemmer sit rooted for the evil side to lose further to themselves by continuing to not respond to our communication know how. America, the

People, rarely gain press time coverage as should be top priority always, while being paraded publicly as sold out as not deliberated, corporately represented as privately principled to stay ignorant of Justice to protect living personally, as actually worth something to the bottom line. Yours. Brought down Hell bound as cheated by corporate news america's valueless interest in the price of your living to continue on our behalves. What does CNN think of 2% Social Security? cheating a Soldier's Grandmother to pay tithes to the bush demon as criminal dictator?, american nazi death squads?, insider stock trades?, arming bush's heroin partners?, rotten rumsfeld and bush murdering devout corporate cultists like a would be, still silent Hemmer?, no opinion? Or the working for the People in our names OFFICIALLY, as the FBI and CIA officers actually involved in uncovering the evil bushmob deeds, like the warrant sabotage, Odigo, stolen passports of alive so called highjackers as once American trained as still Saudi pilots, or Anthrax made to look Muslimized, is not failure to connect the dots ever, or insufficient funding then is not less payment for our law enforcement now to nab the prime suspects. As Mueller, or mueller has not publicly commented of, but to say, he hasn't seen or heard anything of this police work, leaving the FBI unrepresented publicly as a threat by himself as a terrorist supporter, an devout member of the bushmob cartel. Why?, we must investigate Mueller if we should have him arrested for publicly obstructing the FBI asking the important questions. IT IS THE FBI, not pissant mueller, WHO CONCURES THE BUSHMOB'S AHMAD FUNDED ATTA. Or how about the dumb ass Ashcroft assault against every American to save his embarrassment of being completely unqualified and never elected?, no concern to mention on this either? Who suffers for CNN's refusal to demand Enron give back the billions that were criminally stolen from all American Families still sitting in the Cayman Islands? My God.

Somebody call the cops.. again!

I have personally spoken to hundreds, and written thousands regarding bush's guilt, and we can't seem to find any fault with what I am saying... How about You? Check out usenet group, "us.military.army" on the internet to see for US all, what questions if any are asked. Know also, CBC and CNN management staff will not contribute their disagreement as none present, but for continuing disregard for Your interests during Our news cast of the facts. THINK. I tell gun clubs, police officers, Biker gangs, and the general public to kill

bush today for 9/11 and his death squads, against the helpless and undefended while arming heroin dealers and selling terrorist handbooks, with all the evidence one would need or asks for, and CNN with CBC corporate management does not, to my knowledge, call Our Police agencies to complain about my free speech capabilities, or will allow US public discussions with Our History as documented. Why? Those nazi bastards, Walter Issacson, Robert Habinovitch, and the two Coast to Coast godless vermin parasites know personally, they propagandize our communities with deceit to keep us divided as the plundered and murdered for the private banker buildings who sell weapons in bush's name to kill the innocent as ourselves unheard from. I can barely survive watching US ignore them as King to this World, my sweetie baby sugar dumpling, but, I think it's time to let Arron Brown in on a little secret... Johnny wants a word with his living responsibility to Americans on Patriotism. Instead of what we currently witness, a reluctance to not relentlessly pursue the truth to provide US the facts, (Look, it's true, Johnny has an ass.) but a censorship of control to falsely prop up the unelected nazi war mongering criminal, Our Mr. bush Jr., a terrorist of tyranny through criminal impropriety in violation with the American Constitution as a death bringer heroin dealer, at a seating that truly holds no vacancy, nor a Buddha, but a deception to plainly hide, the actual, got to be for real, super evil anti-Christ of all religion ever mentioned. Wow eh, even gentle jolly Buddha wants bush squashed! Seriously, please kill the bush demon to save US as victims friend. Justice must prevail as is truth eternal, that of what will be as God is.. just how many more as Humanity will be sacrificed in cowardice for the evil bush demon, before an American Patriot kills the mortal nazi dictator for treason as an American cop killer, and betrayer to all of our Humanities? Don't let tomorrow's news story be about Your murder as another, no longer heard from bush victim. For, my reason is as evidenced to actually be known, easily, while the CNN corporate cult product lies to themselves as Our public fact finders to leverage more ignorance than is found now.. as Our public voice to suffer by criminal dictates to destroy God as life giver. Fuk you america.

Heaven is on the Horizon.

We can teach ourselves as the uninformed by CNN standards to misinform and ignore. CNN's continuing silence on Ahmad, bush and rotten rumsfeld, only supports further our claim in their contempt for

American Soldiers, and Our Families as not represented as worthy business investment. God, don't you just love me? Hemmer?

Mr. bush's publicized war strategy of no evidence requirement to hold American convictions for murdering Ourselves is evil all around everywhere, as understood without question to every honest Cop, the most serious of all criminal behaviors, of which, they carry guns for in just this sort of political development to halt reoccurrences. But bush, the anti-Christ, as america, says no for ALL Americans, they can no longer hold onto Justice as their own with him in their charging everyone as the enemy bush refraction. Just like, "bomb wherever" tommy franks would do with his own American family death squaded, like he did intentionally to our children, as his contempt for America will never stifle our voice with his silence regarding our aimed veracity to seek out and destroy the evil nazi bushmob fuks individually with God as Justice Supreme. The True American Way, for, the rare and few Marines, the one or two, are with US loyally to know so. See, there was a time when the Marines were taught diligently, so much so it was proudly ingrained as the moral fiber of their character, that an American Soldier's responsibility to America was to defend the Constitution as the Freedom to be America, with their lives if need be to protect their soul brothers as family, for the greater good by God, (just like the Taliban Rule Man) while today, Ashcroft, albeit muted, murmurs as rotten rumsfeld chuckles, Americans must instead as slaves give their lives unthinkingly as cowardly evil war criminals to protect the unelected bush mobster from criminal arrest for mass murders in New York City, and stealing that 50 billion, seeing that that stupid Justice thing in the American Constitution and Bill of Rights idea has now got to go instead of evil bush as demon traitor war monger, terrorist recruiting false god anti-Christ, but that aside... There is a guide book for leadership in the American Marines entitled, "Guidebook for MARINES", and inside, it contains 14 principles to strive for as an American Soldier wanting to be a True Patriot as leader of Soldiers prepared to die for love of country, and our fellow man as friend or stranger, and here they are:

Integrity, Knowledge, Courage, decisiveness, Dependability, Initiative, Tact, Justice, Enthusiasm, Bearing, Endurance, Unselfishness, Loyalty, and Judgement.

For integrity it states:

"1. Integrity. The stakes of combat are too high to gamble leadership on a dishonest man. Would you accept a report from a patrol leader who had been known to lie? Of course you wouldn't. All your statements, official or unofficial, are concidered by your men to be plain, unadorned fact. Make sure they are. When you give your word, keep it. There are people depending on you to come through with the goods."

Now, I could go on further about what kind of lifeless degenerate a lawless cowardly mute soldier in bush's nazi death squads would have to be, to serve under bush as slave and traitor to home and family, as against God, the Flag, and all that we represent as equals through Justice, but I won't.

Mr. bush's america is uncontrollable by anyone. CNN figures if they never mention US, we'll never know who was invited as participators. (Example: CIA officers have had to PUBLICLY contact British News Services as the CIA, (Never done that I know of likewise before), regarding American interests in apprehending the TRUE 9/11 culprits ignored by american corporate dictates, and tenant also. One should remember, bush and rumsfeld would want to secretly murder any persons involved in 9/11 to clean up the huge crime scene, and tenant, is no brave and True Christ like figure as a living person, so what can we expect in all reality? Tenant will pay dearly if the evidence further indicates, as his continuing silence does label him already a willing traitor to all America, as too, his personal meeting with 9/11's Ahmad just prior seems suspicious also as not mentioned by himself in defense, along with his refusal to disclose the insider stock trades while leaving the fine CIA officers personally involved in the dark, as abandoned American Patriots, armed and ready to defend America as they should immediately for themselves, by executing bush and rumsfeld as terrorist cop killer, drug running freedom haters.)

America's false deity, the super evil anti-Christ, Our Mr. Bush Jr., doesn't think for me to be sacrificed without opinion by John, for I am free to act for my own beliefs as understanding, as I live in defense for living as all things created I am of honestly, simply amazing God is. However, I, as any truly living person would, can't help hate Our Mr. bush Jr. to death for what he and rotten rumsfeld is criminally doing, and further proposing against Our living in my name as unheard from dying without cause as murdered, but for bush's criminal contempt for my Awesomeness to beg once again friends, someone out there please, for the Love of

Yourself and God, help US destroy Our Mr. bush Jr. quickly before he kills more as Ourselves unrepresented by corporate values in our commitments to freedom for living through Justice for all persons. Our Mr. bush Jr. has indiscriminately murdered more than 100,000 innocent souls with only a contemptuous smirk to his credit, while fully committed to more robbing and heroin dealing by blaming Laden for whatever without any evidence. Leaving Our true willingness silenced by corporate demands to propagandize and censor our truths, allowing bush, the dumdum traitor, to continue demonizing America into a hell hole of ignorance through his hatred for life, Science and Nature. CNN's silence for America regarding the bushmob publicly stealing from their Own Family their freedom of Rights to be living, while committing Americans to a dictatorial crime ridden government, that bush and rumsfeld proclaim, is no longer applicable to the Law of any Land, is an abomination against Christ as living is Ourselves Being. America isn't America anymore, it's the bushmobbed universe of injustice and blind self hatred against all of Humanity, committed to leave none to survive but as slaves to be terrorized for the dummy bush demon as their false deity, a traitor in my midst, disguised to no one but himself as personally expendable. Again, where are the American Patriots we all hear so much about in the big screen to take down the seriously anti-American demon bush monster cop killer heroin pusher for treason, as all understood widely now factually with evidence and everything? Kill the war criminal evil doers, bush and rumsfeld today and be loved by yourself to be of Human Nature, or hunker to hell as a coward and betrayer to yourself and your own family, while watching the bushmob openly rob and murder further from our World, and on all of which we stand strong united. Justice for You.

This living plan of mine empowers others to learn their Rights as eternally established to be Kings and Queens on equal footing to be as all in all of gods forever dreaming, while demon bush intends the destruction of individual freedoms while robbing and murdering Americans from the inside, like sharon with US Jews does, as underrepresented, a condemning onslaught on Your better Judgement as reasoned on anything factual they figure blindly to be spinable, without your word contested. Your God Given Living Rights my friend. Without a rule of Law principled in the fashion of Justice for all to be sought as measured, bush's nazi amerika will continue to suffer ourselves needlessly for

their corporatized self contempt in Our living Humanity as censored, without a thought for Justice, or the American Bill of Rights as God acting out eternally for prophets to wonder endlessly. See, I came up with this wacky Idea one day to make all my equal as self created to be so normally, in this Universe as we exist for Happiness ultimately as eternal, so, You or i will work this challenge to speak out for ourselves as Creation about bush's america, and it's responsibility as publicly advertised, to gather the facts on who suffers for bush's criminal misdeeds, and overall ignorance on everything. Mr. bush's irresponsible tax scam for example, is to put America's public money into the hands of private bankers, as the extremely rich already, while taking money away from those who spend the highest percentage of their paycheck on basic necessities as a gambled to be advertised, "stimulation package". HOW? The HOW is never explained with understanding as clearly regressive like the bush rule is, because.. Who spends MORE in taxes as investment at the grocery store to pay the cashier for his babysitter: 20,000 volunteer Janitors all named Rich, who ride the bus for convenience, or a mechanical billionaire private bank machine operator, who doesn't earn any nation's moola by working something for it?, and couldn't eat 20,000 cans of re-fried beans at one cruise lining to timbucks three without losing themselves, havening his tax manner over take in YOUR luxury. See, when America prints more money at the Treasury to give Greenspan to loan BACK to the Government illogically, the dollar value falls for everyone as investor, inflation, let alone the incurred bogus debt owed with real sweat as labor. Clearly, to every informed citizen not as democratic. Of course, National corporate news America, is genuinely not trying as capable by themselves to commit The living interest in Government as ourselves with oversight to manage US fiscally responsible, (like CNN regarding Justice and the Congress, or no Chomsky ever, E. Ann Clark as geneticist, or just research for experts as example), so, we do indeed, live in trying times due to ignorance as corporate america's disrespect for wisdom saught as yearning. It's like private bankers don't want the public to think about what we are doing as worthwhile knowing, eh? Or, I'm the only one on this planet who can almost read my own writing as the, one of a kind, good boy God freak. Anyway, the bushmobster scam leaves less finite wealth for all as taxable exchanges, while suggesting disposing of what dwindling national resource can be obtained, be given to create further debt by devolving into a military apparatus to make more

enemies. Our Mr. bush Jr. is just plain stupid as destructive to everyone, but especially Americans to not stand up in defense of Ourselves. (Officially, rotten rumsfeld's criminal plan, "P2OG", is to encourage terrorist acts against Your Family, but you guessed it, not up to CNN's standard to report US as viable news material.) It's like saying fewer people educated, will keep us stupid enough as a Nation to blame the weak and poor as ourselves deprived till death as murdered, and, bush says makes sense secretly, as the all knowing for the blind and ignorant to faith in without thinking about what money is either. Our Governments should always be working to make the poor richer as a successful representation of our will as the public to improving our living condition, but the dumb and ignorant, talentless and monosyllabic, believe, someone else must be cheated and devalued, divided and murdered, in their universe for them to succeed without effort, or skill whatsoever.. Especially defense. Have you ever heard of the rock solid certainty of Universal "inverse variation" constants? (Canadian High School.) This is why in America, in a time where the nation was more literate as informed, Corporations were taxed at 85% and were happy about it for themselves as American citizens. It's understanding also, most as almost all of the most wealthy multi-nationals competing from military dictatorships against American minimums, run in continuous private bank debt, (your savings and pension as leveraged weaker being the entire Nations) but gross billions in profits. 99.9% of every private bank building in the Western World is mortgaged, not however in Iraq, or the Muslim World where interest is not charged on good standing loans made in Our names. (Sideline: Now recollect bush's puppet forcing Afghanistan to borrow from the World Bank for terrorist handbooks and heroin junkets, but not food, shelter or clothing, while spending in addition, 4-5 billion a month in godless bushfuked american Patriot Dollars, American Celeb Dollars, American TAX PAYER Dollars, to run deaths squads with tommy franks against teachers and children.) It's a strange idea to the dying to be corporately driven without thinking because, you wouldn't automatically think it could be more profitable to stay in cheaper as serviceable debt being a brick building, but it is by private banker swindle with National inflation succeeding personal interest rates. We lose personal wealth to the pirate banker fees without even privately using their/OUR National currency services, because truly, we can't go somewheres else. As of course in america, an Enron can always be pulled,

where it goes bankrupt as a toxic non-living entity, but
leave richer as crooks than they did before calling an
end to paybacks, with the People stuck to take the loss
together for sure as the victims. While bush, says
corporating America, his america, should learn for next
time, maybe, while the CRIMINALLY STOLEN money is still
siting in the Cayman Islands!!! See the Depression, a
Canadian High Schooler, or watch bush act in direct
opposition to his word almost consistently as American
death harborer terrorist psychopath. Then ask yourself,
why can none of our defenses be publicly discussed as
important deliberations?

Love Justice by allowing others to read this paper, to
judge the truth for themselves as worth something for
all persons, and I will be truly grateful you cared to
believe in a better future, for together, we could find
a new hope for freedom, as happiness and prosperity for
Yourself included. We only need believe in ourselves as
unstoppablly stupid, and the Universe is ours as God is
now testifier.

I am my word,
and make believe King to this world I call home,

Yours forever,

Johnny Wizard

Anyone see this on their unit? I'll set the 785D to scan, and later (like after I wake up), it will be stopped on a conventional frequency (never stops on the trunked channels). Squelch adjustment has no impact.

In an effort to combat the recent influx of paid access scanner feeds, and the loss of many decent free public safety audio feeds to these sites, I have started Online Scanner.com ( http://www.online-scanner.com ).

As of yesterday (2/4/04), the site has direct dedicated feeds covering Boston, MA Police, Boston, MA EMS and Boston, MA Fire and a direct feed covering the Greater Providence, RI fire departments. Dedicated feeds of the Boston, MA area notification networks (Citywide Fire Radio and the Metro Radio System), Providence, RI Police, Providence, RI Fire and Attleboro, MA PD/FD are planned for the near future.

Also featured are several links to non direct feeds from around the country.

I am looking for people that believe that online public safety audio should remain free, and are willing to volunteer to host feeds (either dedicated or general coverage) from their area. Please stop by and check out the site, and if you are willing to host a feed (it's really very easy), please feel free to contact me for more info.

If your using the PRIORITY feature, this may be what's causing the scanner to LOCK UP!
My BC 250D locks up and won't resume scanning some times, when I try pushing the SCAN key
or RSM button, nothing happens! The only way to get the BC 250 D to start scanning again is to toggle a bank of frequencies ,by pushing one of the numbers on the key pad! Then it will start scanning again, and I turn off the PRIORITY feature. Some times just hitting RSM or SCAN will get it scanning again. This may be different for each BC 250D and BC 785D user due to there particular set up of banks and frequencies. Also ALPHA TAGS seem to have an effect too!

This has been covered, several months again at strongsignals.net.

Good Evening ...
I've just moved into Florida from Hawai'i ... And yes I'm still wondering why I did it, but we're not here to discuss my sanity! :-)

I will be migrating up to a Uniden 296 or the 796 if I can figure out a way to put it in my car.

So my trusty 245xlt along with all the boxes, manuals, and cables is up for sale. I'll also include a NiMH battery pack that has proven to give me about 12 - 14 hours of listening and it comes with the Uniden leather case. It's been in the case since day one, so there's very little marking on the body, although the screen shows normal wear and tear.

If any one is interested you can contact me at litepixels at earthlink dot com. Just type it as a regular email address and you'll get through. Grove has these for $199.00 in the box, so with the extras, if I can get $170.00 plus the shipping and insurance, I can have it on your doorstep by Wednesday of next week FEDEX if speed is of the essence.

I can also ship photos very quickly to anyone who expresses an interest.

And I also have a charger and battery pack for a BC 200xlt that's been sitting in my closet for a while. $25 obo + shipping - it's yours.

Thanks
David

I'm looking for a Cobra SR-15 handheld scanner.
This is a late 1980s model. 100 channels in 10
banks. Covers VHF-Lo/Hi, UHF Lo/Hi, Airband.
Must be working, clean, in nice condition, and
preferably with original charger and antenna.
MUST come with the manual. OK if it needs new
NiCd batteries, I can take care of that.

Thanks and 73,

If I was going to spend money for this type of information, I would get police call. It seems very complete and the CD has all 50 states included with the database. Plus it is exportable and with a little manipulation you can virtually import it to any scanner loading software.

But for that $20 more it wont include the NiMH battery and the case
(around $50-$60 value). Are you the new price cop on the newsgroup or

Turn the unit off. Press the MANUAL, 2, and 9 keys at the same time, and
turn it on. This will erase all channels.

you have to love stupid radiohack employees

the back of the radio has a DB-9 connector already, just buy a 9pin female to 9pin male cable for $10 or less elseware. the software that came with that packae you bought can not be used.

you can download software off the net for free for the radio.

the shack does sell software available to order, i tried it and did not like it though, i still have it, adn hasnt seen use in 2 years. the scanner is excellent i have 2 of them, cheap price and good for military air monitoring

I could respond to your criticisms, but you should really read your
responses in the context of the original message, before you post it.

So, if you were looking for a 245, and this deal popped up, what would you
two "experts" pay! Burr ... JER1538A, let's see where your brain is ...

My guess is that if you were the seller it would be right about where I have
priced it. But, if you were looking to buy, it would be around $100 less
than that. How close am I?

You know what's nice about internet shopping and selling? I simply say,
"Sorry guys the store doesn't want your business", then I get to smile and
move on!

God bless you both for the time and effort you took to respond.

Here's some threads about the so called PRIORITY bug in the BC 250D, BC 785D BC 296D and BC 796D.

And another thread, this one pertains to the BC 296D. It appears this "bug" continued on with this new line of scanners!

I hope you will join in the groups, at strrongsignals, that support the Uniden digital scanners.

Can anyone offer a reason why 620-630 MHz. would be blocked on a VR-500? It clearly is not a cellular range. Thanks.

Maybe it's not intentionally blocked...just not enabled. What I mean is, many scanners do not have true, continuous coverage. They have portions of the spectrum left out, because there is nothing in that range to listen to. I'm not aware of anything that would be using those frequencies, 620~630MHz. I think they do this in an effort to optimize the receiver for the areas of the spectrum that it does cover. I used to think they were left out, to prevent us from finding out what's really going on, in those frequencies. However, having true, full coverage receivers/scanners, I found they were void of any activity.

The FCC won't permit a scanner to be sold in the USA unless it
can reject cellular telephone signals by a 38 dB margin, no matter
to what frequency the radio is tuned.

The VR-500, VR-120, and other radios block frequency ranges
in which they would not be able to attenuate cell signals
sufficiently to meet FCC specs.

The lack of selectivity is a shortcoming in their design.

I have a Pro-2020 that works well with a couple of exceptions.

1 - while scanning there is a slight low volume "popping" sound as the unit scanner from one memory to another. It only does this while scanning. When it stops the sound stops as well.

2 - The audio is fairly raspy with anything other than a low volume.

Any input is greatly appreciated since I don't have a schem

Hi,
I bought a used 200xlt yesterday and it works perfectly. (I paid it 75e, that's about 70$ is that too much?)
Only problem is that it's a europena version (made for Belgian market).
So it has cell unlocked (not that there are any cells in Europe on that freqs
anyhow :) ), but insted of 29-54mhz it has stupid 66-88mhz !!! Is there any way to change that??? On mods.dk there is a picture of a resistor that needs to be cut in
order to receive cell (and it's correct, because i don't have that resistor on my radio and i receive cell).

But also there are a some different ressistors and caps around CPU. I wonder, if i removed and moved those parts to match the picture on mods.dk would that make my radio an "USA model" ? Is that a smart thing to do?

I would be grateful for any advice, and if someone has a ubc200 service manual PLEASE PLEASE mail it to me! Also, a detailed and close-up picture of a pcb with cpu of a us version would be of great help.

Best regards,
Scotty

Lots. If you are familiar with the Caribbean drug interdiction comms that
are on hf freq 8971 (USB), you know that many of the participating acft are
based in Jacksonville FL. I get to hear, on UHF and VHF,the USN P-3s from Jax
and the HH-60s from Mayport and Georgia bases, as well as RAID helos as they
travel south on Coronet Oak missions. Many stop for their last refueling at
Palm Beach IAP.
I also hear the ICE (formerly US Customs Svc) acft that are based at Cecil
Field in Jacksonville, including the drug surveillance P-3s and the
interdiction helos.
Most importantly because I live right off the departure end of Patrick
AFB's Rnwy 20, I get to watch and hear the US State Dept's International
Narcotics Mission OV-10Ds and UH-1N helos that fly the coca eradication
(spraying) missions in Columbia, several of which have been shot down lately by
the drug lords there. We also have that unit's C-27A Trojans and CE-208
Caravans here at Patrick. They might not seem as glamorous as the OV-10s and
Hueys, but their UHF/VHF comms are every bit as interesting when they come and
go on drug missions.
If folks are interested I will make it a point to post some of the drug
comms logging I do. But if they are active missions, I always delay posting
until the mission is over.

If I were to buy some product similar to Icom R3, but less its simplicity and its "toy"-grade quality. What do I really need?

I know I do need a good radio scanner, one TV convertor, and a LCD display.

Anyone with good hardware recommendation?

Saw someone talked about aportable b/w monitor with auto frequency scanning capability? Just don't know its make and model.
Any clue?

Bob Parnass published a mod for the PRO-43
years ago that provided a significant boost to
the high-frequency response of the audio amp.
A lot of scanners' audio is too bassy. To get
decent volume, you have to turn it up and then
the excess bass overloads the amp. By boosting
the highs, you don't need to use as high of
a setting to get the same perceived volume.

What the mod did was to remove a bypass cap
from the input of the audio amp chip, thereby
letting the amp chip amplify the high frequencies
that would never normally make it through
to the speaker.

If you can find the amp chip in your scanner, do
a google search for the chip number. Get the
pinouts. Look for a bypass cap on the input of
the audio amp chip and remove it. The cap is
usually a .015 to .001 mfd 0603 size surface mount
part.

I've done this mod on many scanners, and the volume
is usually satisfactory afterward.

Good Luck

(All credit for this mod goes to Mr. Parnass!)

I think the new ICOM IC-R20 is very disappointing. No trunking, no digital, and way over priced! What market is this going to appeal to, that has not already been met by many others, at a more reasonable price?

If you're considering buying one, hold off for awhile, as I'm sure you will be seeing deep discounts when inventories don't move.

Unfortunately, Fairhaven RD500 was limited to a ceiling of 1750MHz,
all those signals between 2.3-2.6Ghz was missed, otherwise an great
scanner.

Yes, it's great. I reside in an housing plan in Myrtle Beach where the

I would enjoy reading some of the info you offered.

I found a web site that has a searchable database where you can
get any frequency you want, they also show the trunked frequencies in

Good point Bill, regular scanners are a dime a dozen. I really don't care that it can record. My experience with the wideband scanners is that they are very slow at scanning. so that's probably the case with the R20. So just what is the the chief selling point of the R20? I'll have to wait for the reviews before I consider something like that.

do much of ANYTHING well...with one exception. It's a terrific way to test

I didn't say it was a scanner. Everyone knows Icom can't build a
scanner...their scan is way to slow.

Yeah! If you want to pay $9.95 a month for data available for free all over
the net.

Can you say rip-off, I knew you could boys and girls...

How are you connected with this site?

Try this site:

<http://www.strongsignals.net/index.cgi>

Over on the left is FAVORITE PAGES click on MESSAGE BOARDS!

Scroll to the FREQUENCY board and TRUNK board , down the bottom of the boards, under the
message pain there is lots of information, frequency data bases and state listings.

That right. Icom, by their own admissions, make high end receivers. They have no interest in competing with Uniden and Radio Shack.

i just programmed my new PRO-95 with the GMRS frequencies, but when i key my GMRS radio, even from across the room, the scanner stops on the freq but produces only static and a barely readable signal. any idea why that might be? shouldn't i be picking up the signal perfectly?

my two Vertex VX-400 radios, which i'm using for GMRS, communicate perfectly with each other and with several off-the-shelf FRS/GMRS radios.

thanks for any ideas why this might be happening!

One can be made easily for VHF and UHF, not as easily for other bands.

If the signal you need to locate the origin of is VHF or UHF then make a Yagi antenna. Since this will be a receive -only antenna you can skip the matching transformer (or balun) and you can use a simple half-wave dipole instead of a folded dipole. A few feet of wire, a plastic or wood pole, and a short piece of any type of coax are all you will need.

Possibly your overloading the scanner transmitting so close.Try it with
them further apart.Another guess do you have the attenuator on for that

You didn't say what freq you want to search on.

BUT there are a number of tricks you can use with what you already have. FIRST, I assume that you can hear the signal with the stnadard rubber duck.

The first 'trick' is called "body fade". Hold the radio close to your chest and listen to the interference. Now, slowly turn around in a 360 deg circle as you stand in the same spot. At some point in the circle the signal should either fade, or cut out altogether. When this happens keep turning and see if it comes up. If so, stop and turn back and try to find the deepest "null". STOP. The interference is directly behind you.

If you have a map of the area now would be a good time to draw a line on the map in that direction. But if the source is fairly close it's not necessary.

Do this a number of times in different locations to see if all the "lines" point in the same general direction .. if so move toward that location and repeat the procedure.

If you get so close that you don't hear any "null" when doing this, try removing the antenna from the radio. If you are so close to the signal that you can remove the antenna and still hear it, you can keep doing the procedure without the antenna.

Another 'trick' is useful when getting close ... instead of listening to the primary freq. (interference is strongest on xxx.xxxx mHz) listen to a multiple of that freq (harmonic) say 2 times xxx.xxxx or even 3 times xxx.xxxx if your radio goes up that high. This may not work if the offending interference is broadband and you can't pin down the freq.

Good luck

I don't know what's happening in Ventura but the CHP is shifting to repeated frequencies in the area of 39 MHz. They may have done this in your area.

It looks as tough they quit selling them. They never did make them. Radio Shack's scanners are made by Uniden, and GRE. Uniden still makes scanners for mobile use, check here:

# 1180. Dead charger for BC235XLT -- anyone have this problem ?

Recently the charger for my BC235XLT went dead. The battery packs are 4.8 vDC, but the charger is only charging at a rate of about 4.1-4.3v.

I believe that it's the charger and not the batteries. I have owned since new and I generally run the battery pack completely down before using the next battery pack. There are only 4 components on the circuit board which step down the voltage from 12.0 v. to the 4.8/5.0 charging voltage, so I believe that one of the 4 components have gone bad (2 diodes and 2 resistors).

Has anyone else had this problem? Can someone point me to which component is bad so that I don't have to de-solder all the components off the board to figure out which is defective ?

I just bought a Pro-96 and want to buy some software to go with it. Is
Win96 the best, or is there something else I should buy?

I'm interested in increasing the functionality of the scanner.

Thanks,

Win96 is the only real alternative. It allows you to unlock a couple
of undocumented scanner features (including expanded band coverage and
a personalized greeting when the scanner is turned on). It also is
ergonomically excellent and fully takes advantage of every available
feature of the scanner. Support on the PRO-96 mailing list (on
YahooGroups) is also excellent.

NASCAR and Nextel already came out with a press release stating that there would be no change in the communications plan "for the foreseeable future", basically to reassure all the scanner owners and racing radio businesses.

My bet is we're safe for at least this season and maybe even next. I don't doubt they're working really hard on a system they can brand as their own, though. But, I do think that will be a difficult task for them to do without alienating a *lot* of scanner users, me included.

The CHP has ZERO interest in moving off of the 39/42/45Mhz band. The main reason is it WORKS. Works in canyons, up/down the coast and thru the desert. Check for *NEW* channel "pairing"..but dont expect them to move anytime soon...Eddie

Dana,

If you go to this website, Tracy has a long article to answer your question: http://www.freqofnature.com/

Once you are there, wait for the menu in the left hand column to load up. Then click on the following: "Frequencies", "California" "CHP".

Once you are on the CHP page, scroll down and you will see the article.

Input voltage before going into charger (coming out of the power
supply): 15.01 v.

Voltage at battery jack (no battery connected): 14.62 v.
Voltage at battery jack (dead battery connected*): 3.97v
*where battery has initial charge of about 3.80v.

With the dead battery connected, the input jack voltage (raw voltage
coming out of the power supply) drops to 12.61v.

(All voltages are with the scanner NOT connected to the pass-through
jack.)

Funny thing happened over night -- one of the batteries charged-up to
5.89v. This makes me think that there is a cold solder joint in the
charger since the charger completely charged-up one battery. I'll see
if the second battery charges-up over night).

Thanks in advance

# 1209. Intermod with the BC785D

When I connect my BC785 to an external mobil antenna, the intermod will come through on many channels. I live in So. Calif and it is mainly in the metopolitan cities such as downtown LA and the San Fernando Valley where I work. I suspect that Bearcat puts too much gain in the front end. Even putting the attenuator in does not help. Any solutions other than just using the small antenna that came with it?

My apologies.

^ They still HAVE the use of 39.60mhz, but they only use it
^ when thy can't get thru on the trunked system.

Does that mean that VHF is working better for them than the trunk system? If so, why use the trunk system? For interoperability.

So that why they are testing team communication this weekend ?????
If you are at the track just go by the Nextel Experience they have a setup
in there, You can try it..
And yes I see scanners (analogue) going bye bye in the next year or two....
Racing radio and Racing electronics has no say in it...

It is 11:24am EST (1624z) and range clearance activities have begun in preparation for today's Titan 4 launch.
Weather One arrived from Orlando, entered the Restricted Zone at the Cape a short while ago and has been transmitting cloud conditions to Range Weather on the ground.
JOLLY 1, an HH-60G, launched from Patrick AFB and is also flying over the Cape area. Likewise PATROL 1, and FAA security acft, departed Patrick for the Cape area. Both of these acft are in contact with Cape Control on 133.8 now.
USCG freqs are also alive with launch-related comms, including 156.8, 157.1, and 157.175. Cape Security is advising personnel of the acft via 173.6875.
A short while ago, SAM 7010 arrived at Cape Canaveral AFS; this could be related to the launch, or perhaps related to POTUS arrival tomorrow for the Daytona 500 race.
If you are within range, my freq site, shown below, will give you some of the best freqs to tune to.

AL STERN Satellite Beach FL (28-11N 80-36W) monitoring
Patrick AFB (KCOF) NASA-KSC Shuttle Landing Facility (KX68)
Avon Park Bombing Range (KAGR) Cape Canaveral Air Force Station (KXMR)

In Europe NFM (4 Watts) on the 40 CEPT channels.
But also AM (1 Watt carrier, 4 Watts modulated) on channels 4-15.

In Germany:
SSB upper and lower sideband on channels 4-15 with 4 Watts ERP.
Digital modes (mostly packet radio 1200Bd) on some specified channels.
Additional 40 channels (FM only) below(!) the CEPT channels.

Many "freebanders" above 27.405 mostly in USB...

That is the price without the UT-106 module, Bill. Add another $139.95 for the DSP unit and the price is very similar to what he described. However, I would not pay near new price for an "as is" radio. I would want a guarantee on both looks and operation. If that wasn't freely offered, I'd clearly go for the new item instead - especially since it is only a few dollars more.

Is the scan rate the only thing that determines if it is a scanner or a

It does scan but slowly.

No ... a "communications receiver" generally has a wider frequency coverage than a scanner. It may also have more modes of recption than just FM.

Scanning is just an added feature, not the prime mode of recption as in a scanner.

My Yaesu VR-500 will receive signals in the VHF and UHF TV band. Along with TV sound (wide FM) many wireless mics are scattered in those freqs. Also it will receive broadcast AM & FM stations, and shortwave stations. A far cry from a 'normal' scanner.

It would help if you measured and posted the dimensions of the
antenna. How long
is the vertical element (assembled) and how long are the radials
(assembled)? It would
be easy to figure out what freq. it is cut to if we knew these, since it
doesnt look like
there are any loading coils in the pic. Is it a shunt fed antenna (does it
show a dead short
from the center conductor to the radials) or is it open?

I have a handheld scanner with continous coverage from 100khz to
2.060Ghz with modes NFM, WFM, AM and SSB known as 'Trident TR-2400' and
sold under other brand other names such as 'Albrecht AE300'(wich is
mine). And I bet this IS a 'normal' scanner. It scans with 24 steps/sec
with preprogrammed or selfprogrammed stepwidth of 1-999khz from every
frequency you want it to start.
On the other hand the ICOM PCR-1000 -wich has very good scanning
capabilities- is named a 'communications receiver' by ICOM.
So where to make a dividing line....? :-) It's just the way _you_ use it.

I have a Radio Shack PRO-38 and I can receive the GMRS and FRS Frequencies, if I try to listen to myself while using the GMRS/FRS radio in the same room as the scanner I get some static in my reception of the signal.

Nice try, but no dice. I got a note some time ago that the guy that
was hosting Northwestradio lost his job; and the site was hosted where
he worked. So he had to pull the site when he left.
Hopefully it'll be back soon. The mobile antenna comparison page
they did is a very good one...73s Mike

I saw this on a web site, with a price, but I can't find it now. Possibly the FCC made them pull the price, because it hasn't been approved for import to the U.S. yet. As I recall, the price was around $595.00.

I think the R20 is too little, too late. In an earlier post, I criticized it for not having trunking and/or digital capability. I was quickly corrected by a few, that pointed out; "It is a professional communications receiver, not a scanner". Which is another way of saying, it's an overpriced, under featured scanner.

Granted, it does have wider band coverage than the typical "police scanner", and SSB, but so does the Icom IC-R10, the Alinco DJ-X10T, and DJ-X200T, as well as the Yaesu VR-500, and AOR AR8200 Mark III B.

IMHO, I think the most disappointing aspects of the new Icom IC-R20 is lack of extra bandwidth/filter options (if the specs we're seeing are the final version? It looks like it just has one bandwidth option per mode). Considering the a wide freq coverage, 150KHz-3.3GHz.

The AOR 8200MKIII has more filter options & it's coverage is up to 3.0GHz, as an example. AM N, AM W, NFM, SNFM, WFM, USB, LSB, CW.

They may be using the Motorola trunkig feature known as " i-Call" put your Bct-8
into
TRUNK SEARCH mode when they say "private cal" and look for new and previously
unknown talk groups with chit chat traffic. An i-Call takes two (2) talk groups and

often you will only hear one side of the conversation. Also some systems have
telephone patch capabilities. Again when you here them say private call
PUNCH TRUNK and switch to conventional mode and scan the system's frequencies to
see if you get a telephone inter link. If they run phone patches this should last
several minutes
and will stand out on the system. Is there any mention of i-Calls or phone patch
frequencies
in descriptions of your system?

The i-call is active on the Nashua, NH Motorola mixed 3600 baud 800 MHz trunking
system with both analog and digital voice traffic. And the i-Cll comes in great
using a BC 250D with BCi25D digital card .I hear what appears to be i-Calls with
the PRO-90 when in TRUNK SEARCH again
just one sided conversations, this may be due tot he DELAY being on!

Using a NEXTEL is defiantly another possibility, around New England when folks
want to transition to NEXTEL they will say sot or ask if one has there CELL PHONE
with them, to give or take a call from the base or another moble unit !

I have a Pro95 and a Pro 92. The 95 is certainly easier to program,
only control channels need to be entered. The 92 does PL tone
decoding, and will allow you to filter some transmissions,
particularlly handy for business band monitoring.

In a side by side comparison, both tracked very well. Both hit on
transmissions that the other missed occasionally. I'm not sure if I'm
lucky, but my 92 doesn't seem weak in the 800MHz band as others have
reported. Both tracked identically with a distant TRS.

I've had both for a few weeks, and still haven't decided which one I
can live without.

.ps the Pro 94 has no text tags. Following a large system would be
pain.

where can i find these?
i bought a 780xlt from ebay to only find out there is no power adapter or
antenna :(
i see on the back the power supply calls for DC 13.8V so could i pick one up
from radioshack?
what about the antenna?

there's suppose to be a big snow storm here in a few hours.

any 12-14vdc plug in psu will do as long as it can give out about >300mA
just make sure you get the power plug for the scanner wires correctly.

I can't believe that in this day and age there are no scanners that have a remote head feature for mobile installation. I know that scannermaster has been working on a remote head project for the 780, but you would think that Uniden would just throw together a remote head package for some high end scanners.

Anyone have any links or information on this topic ???

It does make alot of sense. Scannermaster has been working on it for quite
some time.

Scannermaster says it won't be cheap. Because they have spent alot of time
and engineering time on it.

But would it be reliable as it will be available as a kit for the 780.

But one does wonder why Uniden doesn't offer a control head / detachable
faceplate version for the BC780 in the
first place, since the radio is made for them, and it's alot easier to have
them made during the primary manufacturing process
rather than reley on others to come up with something that hasn't been
factory tested. It's just me I'm a stickler for
quality assurance.

Makes sense so you can detach the control head and put in the glove
compartment to thwart theives. You can take off
the radio now, but that means disconnecting things and reconnecting the
power, antenna and possibly the external speaker
wire when you've put away the grocery bags of milk, meat, brussell sprouts,
Count Chocula, etc.

A control head makes sense for a mobile application. Even Motorola did that
with the old Motorola Motrac radios that were a fixture in emergency
vehicles. TV viewers saw the Motrac control head mated to a Motorola speaker
and Federal Signal Interceptor siren control box in Adam-12 and Emergency!

If Uniden did make a control head version, they would be able to use a
larger case and more circuitry inside to make
the scanner more powerful and add additonal features to make the radio more
sensitive. The 780XLT is a great radio,
but could use more sensitivity. I've noticed the Pro-95 is more sensitive
than the 780XLT.

But Uniden could have added alphanumerics to the BC245XLT too, eh?

Just my three cents (two cents Canadian at current exchange)

The $4000 AOR AR-ONE has a detachable control
head, but it cannot be sold to ordinary US citizens
due to the cellular phone frequency coverage:

From:

http://aorusa.com/aronefaq.html

"Q: At the Dayton Hamvention in May 2002, your displayed model
of the AR-ONE had a remote control head. However, your brochure makes no
mention of a remote head. Why is that ?"

"A: The AR-ONE control head is detachable. By using an
optional separation cable, you can mount the control head away
from the main receiver...."

What do you think about just replacing the batteries inside with new Ni-Cads from the store? Any problems just soldering them together, or should I buy "shaver" batteries with the terminals built in, though they are much more money?
Here in Canada a replacement bat pac for a BC80xlt costs over $100.00 with tax at Ratty Ole Shack, and their rebuild service costs just under the $100!!! Perhaps there are Canadian readers here who can direct me to a cheap supply??
Thanks all.

If the 'signal' radio is at a fixed location, a loop antenna on your handheld will give you alot of information about where the 'signal' is. A loop antenna is usually an easy antenna to fabricate.
Direction finding with loops was used extensively during WWII. The 'signal' will be somewhere along a line corresponding with the null of signal strength. You will need to move the location of your hand held to two or more locations, as you have already figured out.
The null will be along a line perpendicular to the plane of the loop. The 'signal' will be maximum when the loop is pointed with its edges toward the 'signal'.

Most batteries are very difficult to solder to if they do not have the
solder tabs built on. The material does not seem to take solder very well
and also you can over heat the battery. The solder tabs are usually spot
welded on.

Kimmitt in collusion with the bushmob perhaps? To cover up an investigation set up to encourage the blind murder of America as bushite by attempting to divide all the People of Iraq as Iraqi?, na... not in a tribal based, enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all the bad guys for thinking, the blind bushite bigots would conclude illegitimately., and I would say to yourself: no, the People with equal rights to stay united for good times, are a people sworn to uphold law that serves our freedom's best. Iraqi assets are not bush and bremer's right to steal without question, nor either, American generosity swindled by WorldCom, Enron, Dutch-Shell or Halliburton is the final, be all answer to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi Halliburton pocketed Humanitarian Aid? Go ahead, ask'em?! Then ask'em why they die as cowards by rummy cluster dud for the bushmob to rob their own direct families left unprotected? Ask'em! You know what they'll tell you? They're not happy about these bushmob war crimes truly destroying America in America,

"freedom", "democracy", Johnny Wizard or otherwise., Or instead they'll mumble something incoherently while jaunting away to murder some one found defenseless, or innocent to pay further while dying to slave under the criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring the innocent by stealing your human values truly.

We need to see an apology to come from America, an apology to Humanity for this carnage waged unnecessary, but for these contemptible war profiteering practices as direct assaults to all as God is. Assaults that we have been unable to remedy by openly communicating to bush's secret White House, rumsfeld's secret Pentagon, or Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest of US, by arresting bush and rumsfeld immediately for high treason?, or will they cower and DIE as the innocent, in false gratitude to the lying traitors bushmob? Evidence is a must to establish a crime scene provocateur, to deny such privilege is to deny freedom be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no struggling democracy entirely.

Look, the thing about God coming down, and having it out with humanity on some various critical issues, isn't like going to happen, it is doing.

We had complete unrestricted access throughout Iraq prior to murdering any innocent child in america's name.

1) We call for an end to U.S. occupation, and withdrawal of American troops. Because the U.S. invasion destroyed the governing capacity in Baghdad and undermined security for civilians throughout much of the country, the withdrawal of the U.S. forces should be followed by a temporary combined mandate for the United Nations, Arab League, and OIC (Organization of the Islamic Conference) to provide direct support for Iraq's reclaiming of sovereignty. That would include election assistance, humanitarian and reconstruction aid (including control over all international funds, including those coming from the U.S. Congress, designated for Iraqi rebuilding), and peacekeeping/security deployment. \ \

Ann Coulter - "Liberals just call Republicans names."

Her suggestion is against the common sense of a literate segment of humanity who knows something is a farce about this tart, and for me, entertains for words to gain a better understanding for proper acknowledgment.

Coulter is bigot rousing on purpose I think, just to get all the american corporate monetary gratitude, in selling herself not present as a significant baitor unaddressed publicly in our corporate news circles. She sells excuses to cowards, of not addressing specific acts of treason committed by individual traitors, like rummy or Ashcroft, and instead, suggests all people have

no ability through bushite america to recognize themselves being robbed their freedoms or murdered directly for the furthering of the evil bush demon war lies.

Interesting.

A repuglicon nazi bushwhore, who will say anything to allow bush to steal further from America, is not a tried and true Republican blue collar. Is it in Ann's contention, that all Republicans can't imagine themselves having any independent opinions? Or, is Ann saying that every Liberal blames Republicans of every stripe throughout History instead lawless bush personally for sacrificing the nation as evil incarnate?, committing to murder individual New Yorkers as America sacrificing, then further acquiescing to needlessly feed toxic waste to all American soldiers, while loyally blowing themselves up dead as individuals to pieces with sexy rummy cluster dud, all for being blind disciples of the unAmerican bush demon antiChrist, their ungodly evil false-deity as enemies of God's love, America, and our good names?

Naming the repuglicon demon bush a terrorist recruiting cop killing heroin pusher, who played a central part in the murder of thousands of New Yorkers is well established factually, and publicly confessed as all planned to act upon before hand. Who says? MSNBC's Jim reported with the White House, as a 'top secret' [Oops, deceived America wasn't suppose to read this one Condi] strategy of not following the 9/11 crime scene evidence, and confessed as 'fully implemented'. A General Ahmad plan to blame bin Laden as innocent of to secure invasion of Afghanistan. For Enron et 'al, the treasonous g-e-t-t-i-n-g . . . a-w-a-y. ... Pension thievers. Remarkable to say the least.

Anyway, solid, documented evidence including the circumstantials, like cheney's "The Dabhol Working Group", Niaz Niak, and the quietly contacting of allies publicly to attempt legitimacy of faked collusion, as such, with rummy's Pentagon arranging a same-time, what if a 9/11 occurred plan involving everyone misled, like also dummy rummy's P2OG, where dummy rummy writes to commit terrorist acts against our innocent families, he prefers if any connections have to be made, they be made with the widest banner of "The Pentagon", as to hide himself from corporate american news scrutiny, who

list, including the Iraqi Central Bank, which is now a burned-out shell filled with twisted metal beams from the collapse of the roof and all nine floors under it. \ \

(Also, to succeed in assisting in robbing the Central Bank, and museum, the nuclear facilities containing radio-active contaminants were left unguarded, as not centrally relevant to franks why soldiers were told they're still sacrificing their lives for. "Duh, why are we here to kill good people needlessly so the bushmob back home can further rob our undefended families bro? Bro?")

--

This is for all to agree settled as official History.

America devolving into the criminal tyranny of the evil bushmob is happening. All the while, we witness, the LEADERLESS nazi bushite soldier cowering as cowardly sell outs to their very own friends and family being robbed back home, left undefended through blatant over billing as UNACCOUNTED, leaving their own sons and daughters to dutifully eat plutonium, and going further silent when it comes to rumsfeld and franks needlessly dropping thousands of land mine cluster bombs to murder us people indiscriminately, which, kills their own aplenty, in a more way than one knows. Karma. (rummy's pentagon is misleading soldiers on how many have so far died to allow Halliburton to criminally steal humanitarian aid from The People, as one example,) Again, as bushite fascist nazi vermin, they let those responsible for destroying America through the bushmob war crimes, still sit in the, for sale freedom captain's chair, high-jacked from US true Loyalists, attempting to get away the bushmob is doing from 9/11, by going real fast .. nowhere.

Second, if Liberals include whomever, how could Ann possibly assess that all would consider calling ourselves anything but, unique as individuals? Bizarre.

The American Constitution is our souls included in those timeless thoughts of Justice for all as The People. The bushmob is destroying freedom by persecuting the innocent as terrorists, when they, in AMERICA'S NAME, throw out the concepts of Justice for any. No publicly understood evidence to form our conclusions, is a corporate demand your faith be in the unjust bushmob 'cabal', and not in Freedom for all through establishing the actual "bad guys". Closing the public criminal investigations on 9/11, is a critically essential part

documented as the evil cabal's "top secret" criminal
treason plans, put together prior to the murder of
thousands of American citizens. Prior to the event as
hidden question, and, confessed as never considered.
Ya, right.

Playing to Win

Bush declared, "and he wouldn't let them in. And,
therefore, after a reasonable request, we decided to
remove him from power."

So, there was indeed no imminent threat posed by Saddam
to Amerka, and inspectors had complete unrestricted
access throughout Iraq without delay prior to the, bush
demon's further war crimes. So, what was the reason for
all the pointless mass murder and destruction again? Oh
right.. to sacrifice American soldiers so terrorist
bush's war profiteering can feed off themselves as
family without leadership present as spoken for. Hey no
problem if Bechtel or Halliburton never actually gets
anything done, or at a good price after their magic
trick "pay here for what?" commissions eat up most of
the investment, it's only the dummy American People bid
payers again left unaccounted to DIE intentionally. The
bushites could make more killings for decades to come,
while flogging the now desecrated American flag as the
new bushmob's being intolerance, greed and true contempt
for all US as Humanity. US, a dying dream that once was
the great American way of living; now war crime bush's
personal enslavement for global tyranny.

The devote bushites tell a Loyal but dumb Soldier to
quietly eat plutonium and get blowed up by rummy cluster
dud, because, it's harmless. Again the marines have got
to come in and save our day, by arresting bush and rummy
for 9/11 now, with truth as the all time word of God

exists within yourself included. Look, don't think I'm gonna fly down to Washington like some comic hero, and arrest the entire bush administration, going through them, one by one from their holding cells, on where all the stolen cash and American values went all by myself.

GOD NEEDS YOU

All the deaths of American Soldiers in Iraq today, (like the People who died for the bushmob's 9/11), are caused from their leaderless weakness to not face bremer and the bushmob as war criminals continuing to transgress in America's name high-jacked.

Mr. bremer fired Iraqi school teachers, and hired up Saddam's secret service, those, who if any, would have closer relationships to charges of criminal impropriety in the name of the baathist banner, than any other group would be. If an American soldier in Iraq today, feels those from the Saddam Baathist regime should face American Justice (the real way by thinking) why then, is bremer not behind bars awaiting his public court appearance? Mr. bremer as the director of Kissinger Associates, is as, directly tied to "CRIMINALLY" providing Saddam his WMD knowhow. The first "Iraqgate".. [I apologize as Creator for being partially responsible for this worse than B movie but true plot line scenario, however, looky here!, there is so much more to believe!!!]

The bushmob tricks are too cunning to comprehend, see? Again, for those who can, bush must be stopped from murdering American Patriots for no good cause, because, it's really getting US royally miffed way up here also as the true beings actually committed to Justice as Freedom for all. That's all folks.

out that it also was delivering some gasoline to Iraq -
for only ABOUT $1.00 a gallon. THE PENTAGON'S audit

agency then asked halliburton officials for internal documents to justify its pricing - but the officials refused. \ \ (Not Democracy)

Imagine this is why the bushite soldier states the Humans must not be allowed to disagree with anything the bushmob in Iraq does, because then we'll all know together how pathetically weak and cowardly they truly appear as criminally acting with such betrayals as an ungodly evil tyranny, without any true leadership to speak about. Robbing their own nation of America as immediate family in the process. Dying. All for intolerant war monger bush's hatred for the American dream, and contempt for all human good will as kindness.

http://www.alternet.org/story.html?StoryID=17671

/ / The Corps unilaterally issued a waiver of Halliburton's requirement to provide "any cost and pricing data." The Corps says it issued the waiver at the request of Halliburton. How convenient. \ \ (N.D.)

Just another PUBLIC bushmob act of sedition against the old red, white, and blue, to sacrifice an American Patriot as measured worthless with. So American Soldier, what are you going to do for US payers being robbed in the open by the bushmob in Your dying brother's name like that?, as one American Citizen censored from speaking publicly at length like all the rest of US are also in corporate america? Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

/ / Steven Russell said that "protests are not authorized and that participation in protests is punishable." \ \

/ / Steven Russell. "These People have always hated US in this area. It is not surprising that they hate US." \ \

He ain't kidding me he is completely unqualified to hold any leadership position. A real de-generative paranoid delusionist, mared likely early on from corporate neglect he suffers still from. He is what is referred to as a bigot, and likely therefor, a probable racsist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad

guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too, Amerka. Haven't you heard? Bush's Amerka will be freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

/ / commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." \ \

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another

expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?
An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)
Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian Aid giving illegally to double biller commi Halliburton.
But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11.
You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand

the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. - ba)

Communicating knowledge is powerful stuff let me tell you. (Roar) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and

implements to not work for public criminal investigations regarding the murder of thousands of American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly, and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

This whole Britain Blair thing is so disturbing when parlayed with the facts outlaid. Look, MI6 (C) confesses the 45 minute thane was really just based on how long it might conservatively take for the Iraqi military to get small caliber weaponry, like grenade launchers, to anywhere along the Iraqi border. (With an additional report alleging MI6 obtained those timings from an out of date Russian military manual. (Likely therefor, a bit of a brag)) If that is not 'sexing up' by the devote bushite Blair warranting his immediate resignation he promised, nothing is. Huge penis shaped nuclear warheads, as apposed to a sweet pea shooter aimed at space invaders? Hutton should be considered for treason when you think about the time spent privately reading the 45 minute, Weapons of Mass Destruction thane over and over again, never mind the fact he is blatantly, nakedly, attempting to cover up the murder of a Brit. (The British can't be played as stupid collectively as bush's America, because they're not. Kinda like Canadians, Norwegians, the Swedes, Belgians, France, and most other developed, and semi-developed nations. Hundreds of countries, comprising near 7 billion People. (Thousands of millions wiser together, than Americans without public heath care) US: that Ashcroft, bush and rumsfeld dictate by ungodly decree, are not of true Human values when talking about protecting our Justice and Freedom ruling our ways.. into the mystic. / / Except that the United States has absolutely no intention
of actually getting out of Iraq. It wants its troops to remain,
and it wants Bechtel, MCI and Halliburton to stay behind and
run the water system, the phones and the oil fields. \ \

Never ever land more like. Imagine that: Arabic
WorldCom phone bills, Halliburton gas bills, with the
only store "legally" open to US public will be Bechtel,
who will demand through bushite tyranny, you pay your
wages for something unjustly over billed as, but put
together at less than five dollars a day wages offered,
being as the only jobs available through not publicly
accounted bushite middleman directly chancing the whole
country of America as undefended financially., extending
"their" risk to do nothing; by the further needless
SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly
dying WORTHLESS WITH as da dumdums. Armed American
Soldiers should be bravely going after Baathist bremer
with DEMANDS for immediate democratic elections and the

immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)
God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as

much as any real Creator of this world, or any other
should.

With such real inaction on old promises [lies] made by
the dishonorable and dishonest leaderless bushite nazi
savages, while desecrating all of Humanity by fighting
against a just rule of Law, (instead of protecting
America's America), forces the continued REAL WORLD
sacrifice of true Liberty, until the bushmob gang is
brought up by US for war crimes., as the 9/11
perpetrating, super evil as ungodly, demon antiChrist in
disguises. (I very much would feel welcomed to play my
part in those public proceedings.) Hmmm.. maybe CNN or
CBC can become publicly convinced we should have our own
news programs on what's truly happening?, to compete
against the 'evil bushites' in this competitive free
market place of ideas? Who knows..

Take care of the business, by getting US in on our

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an apology for his misdeeds to destroy our true American value with? I don't know how else to simply word this to the still sleeping, but bush isn't America, America is America. You, as an American, have a sworn right to demand for America, bush not be allowed to further miscarriage Justice blindly back to the dark ages, by not correcting himself on behalf of established publicly, where American intelligence stood, stands, and ultimately strives. Freedom is not protected by letting the "bad guys" go, to further toll more innocent lives for criminal sacrifice. Sometimes, the real simple things are over looked as profound meaning. The Magna Charta of 1215 states that a freeman should not be imprisoned. Simple right? Not for the bushites who side instead to faith in pope bush, who deliberately unminds a timeless universal principle that exists also in the 1700 B.C's, Code of Hammurabi, where all individuals are to be found equally under the Law, to be fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition. The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying.

My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for

indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or don't side to help a plead for mercy regarding yourself truly included.

Can the bushites possibly think, we're all not ever possible to stand together without a true Loyal President, or, make believe King named Johnny, on the facts firmly established regarding the treasonous war monger antiChrist lying to Patriots dying US as victim for?

America, I will now leave the rest of Our job in your hands for the time being.

Yours again,
Johnny Wizard

written into the National Intelligence Estimate:
"The NIE ...has the yellowcake story in it, had the

doubts were not communicated to the president, to the

Washington Post defends Bush, Iraq war against Paul O'Neill's
exposures
http://www.wsws.org/articles/2004/jan2004/wash-j16_prn.shtml

/ / Until the middle of March 2003 Bush came before the American
public claiming that he had not ``made up his mind'' about war
with Iraq, that diplomacy would be pursued, that military force
would only be a last resort when all other options were exhausted,
etc., etc. O'Neill's exposures, including the existence of
documents, prepared months before the September 11 terrorist

attacks, that outlined plans for a ``post-Saddam'' Iraq and the handing out of lucrative contracts, reveal Bush's performance as a charade filled out with falsehoods. \ \

The Real National Security Threat: The Bush Economy
http://www.alternet.org/story.html?StoryID=17547

/ / While it is unlikely, it is not totally impossible that the Bush administration's policy of locking up anyone called Mohamed and favoring Israel might drive the Arab countries to try an oil embargo again. It is, however, quite feasible that they may simply decide to follow in the footsteps of Saddam's Iraq and demand payment in Euros in the future. The math is simple: if they had done so a year ago, for every 85 cents (one Euro, at the time) they put in the bank, they would now have earned a $1.30. \ \

Memo for the President:
Your State-of-the-Union Address
http://www.dissidentvoice.org/Jan04/VIPS0117.htm

/ / It is important that you be completely clear on timing. While the Newsweek report of February 24, 2003 was the first to publicize Kamel's testimony that the weapons had been destroyed, US and British intelligence (as well as UN officials) had had that information since August 1995. If you were not given a full account of what Kamel said before it appeared in Newsweek, your advisers should certainly have given you the whole truth when Newsweek did break the story three weeks before you sent US troops into Iraq to destroy those same weapons. If they did not tell you, heads should roll. If they did, it becomes necessary to explain why the information from Kamel had no apparent effect on your decision to launch the invasion. \ \

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.
As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumdum evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next. Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example

with, as an illiterate barbaric enemy of "The Man", just like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumdum losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our

humanity, and on behalf of the rare American Patriot who will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11. All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe

evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a love for the American cop killer traitor bush demon robbing their very own grandparents they demand by threat of your murder, for US all as Humanity to do likewise degenerating, sacrificing our World as cowardly slaves to benefit the ungodly bushmob 'cabal' of parasites, the enemies of everyone, including that as God's will.

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime
of such magnitude, it would 'justify' a war mongers
criminal invasion to thwart Enron's impending CRIMINAL
bankruptcy, THIEVING FROM MOMS AND POPS, to then,
ATTEMPT, to close the surviving, armed with knowledge
for good reason Police investigations. All of this
setting a lowly nazi bushite war criminal, frothing
publicly at more than six billion + of US, to state
without opinion, that We, as Humanity, are no longer
afforded God's GIVEN Human Rights to defend ourselves,
nor is the criminal dictates of the demon antiChrist
accountable to any rules of law. Universal they
publicly quip, as the not-so 'secret' ungodly bushite
doctrine of tyranny as enslavement of all that is
Righteous and Holy in this World, because, hey, there is
no God to speak of... and the King of kings, Son of God
fellow, well.. that's all just ninepence fiction. No,
WE, as all the make believers of this World, will no
longer have ANY legal recourse to defend our own loved
family from being stolen from through a bush bitch
buford blount doing whatever criminally with dumdum
loyal nazi teen bushites leading to sacrifice for, for

demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on. All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq
http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

Winning he did, corporate banking's recognition and praise as a savior of the american way of life, and The People?, they ate it again when in 1950, at the age of 70,

defying Truman, launched a win sumtin at all costs
attack against China, that quickly during the unreported
stupid needless slaughter of countless American teens,
forced Truman to concede defeat by begging for a
immediate truce with China while firing MacArthur, who
came home to giant demonstrations of love and affection
for sacrificing American lives forgotten to the
accolades of corporate america's unsung hero.

/ / We must act, even if the threat is nonexistent - because of the potential danger. If "self-defense" consists of necessary "preemption," then what would happen if we started acting on this Bushian principle domestically? After all, killers, robbers, and rapists don't announce their intentions, politely putting us on notice before they strike. Why not just jail them before they have a chance to commit a crime? This principle, if applied within the U.S., would lead straight to totalitarian rule. Applied abroad, it means perpetual war. \ \

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The
evil is in plain sight, the danger only increases with
denial."

Remember: Demon bush doesn't forget signing his soul to
the invade Afghanistan plan by not following the 911
evidence, but would top secretly attribute to Laden for
blame, authored by himself, rumsfeld, Condoleeza, and
General Ahmad two days prior to the public event of
murdering "thousands" in wealthy corporate America, a
secret plan that has been confessed publicly to US as
fully implemented by the White House right from the
start to Jim at MSNBC, months after the fact when the
demon antiChrist was caught with American blood in his
breath.

Not to follow the criminal leads surrounding evil bush
as mass murdering antiChrist, is what the White House
confesses to Americans today as official policy under
every circumstance. Karma. Demon bush tells corporate
america that they'll persecute the innocent in any
country by denying our fundamental human rights of
Freedom and Justice, while now dropping 2000 pound bombs
in God's World containing children, while corporate nazi

bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems sometimes, as too, how terribly it truly is for life whose love isn't appreciated by our will anymore as the living in america, oh yeah, I mean America.
As an American then, what life will you forsake where bush'll rob you over and over as the never living for

something better? These american bushite nazi fuks,
think your gonna wash their feet, and instead of
defending yourself and family, just turn the other cheek
right before the bushites drop a two thousand pound bomb
or two on your innocent neighbor next door? Done for
nothing but feeding the bushmob?, as unarrested buford
blount contends in God's presence? Then to think,
buford blount figures I as a real man will not seek him
out one to one to the ends of this universe for payback.
What can God do to help, if your refuse to help
yourself? The true danger to America increases with
American doubts on bush's blatant, true naked evilness,
or humoring God as Johnny, and betting on yourself for a
change by supporting me as the time being? Look, what
could you do for your freedom, when I demand the pursuit
of Justice by following evidence to truly protect this
World we share? Support my demand to raise the news
media's ignorance on what you shout even louder?
Think this: demon bush makes no public mention of where
almost half of the monthly 4 billion dollar tax payer
bill is quietly disappearing while grandma loses her
cable television, or only grandson? Is that Leadership
I ask every American Soldier to be brave and forward
this letter on terrorism to your fellow comrads
secretly. Then, we'll see...

Johnny Wizard

The money for reconstruction is being misplaced as stolen, while
corporate america demands bush not be held accountable.
American Soldiers, you'd think, wouldn't stand for it, right? It isn't
Art Bell, or Bill Hemmer who's paying with their lives, but a poor,
dumbass soldier along with the general tax payer, whos ignorance is
ignored, sacrificed, as not relevant to Art, or news worthy to Bill. I
will send this email like most others to Art, and maybe I'll phone up
Bill again to remind him that the FBI states bush's business partner,
General Ahmad funded Atta, the 911 mastermind. But you know what
they'll say as traitors to your America? Nothing but hang up on You,
while pretending we have no concern for the senseless murder of our
families, or the robbing of American principles.
The bushite soldiers don't steal the Humanitarian Aid for themselves,
or purposefully let the bushmob steal their parents pensions, no, they
do it blindly to please their false deity, the demon bush Jr., because
their weak and cowardly, stupid and truly dying... Not for America and
freedom they die, but for the antiChrist, Our Mr. bush Jr, the most
hated and despised war criminal of history.

GET BUSH

Officers fault air strategy as ‘timid‘
http://www.freerepublic.com/focus/f-news/842417/posts

/ / Jim Wilkinson, director of strategic communications
at Central Command, responded by saying, "We don't
discuss plan specifics for reasons of operational
security. However, I can tell you the plan is
comprehensive, modern and flexible, and Gen. FRANKS
continues to work closely with all the services."

...The officers said the plan deviates in significant
ways from the 1991 38-day air campaign during Operation
Desert Storm, in which telephone communications, power
systems and bridges were targeted from the first day to
isolate Saddam Hussein and his military forces.
The reason for the change: The Bush administration
wants to spare hardships to Iraqi civilians and to show
that the real target of the bombing campaign is Saddam. \ \
--

GET BUSH

So, to IRRATIONALLY target the telephone exchanges,
power grids, water dams, pipe lines, and residential
communities with thousands of toxic, radio-active
cluster bombs to blindly murder a person like You, (that
would later, blow up nazi bushite soldiers by landmine),
would be considered TRULY evil by demon bush standards
too?

Why does Johnny call the huge war criminal traitors puny
dumdum bushite soldiers? They die truly as cowards for
the demon bush liar, being enemies of God and Humanity,
because prior to the war, (as outlined on March 7th), we
had completely unrestricted access to go wherever in
Iraq, without delay. So, demon bush sabotaged America's
ability to effectively disarm Iraq, and to bring
peaceably, freedom in the region through JUST causes,
all so he could STEAL further the lives of AMERICANS by
continuing with his murder rampages against the
innocent. We remember, Saddam offered the demon
antiChrist, Our Mr. bush Jr. unfettered access to the
Iraqi national media to preach his deceit against God
and Humanity freely, but bush refused to publicly
condemn Universal health care and education, along with
what has been described as Humanity's greatest food
distribution network. Instead, bush sacrifices bushite
soldiers to steal OUR Humanitarian Aid, to double pay
commi Halliburton, an american company found repeatedly
by Our ARMED Police agencies, defrauding all Americans
in criminal contempt for the People payers. All the
while condoning the torture and enslavement of those
known innocent still, but beyond american borders as our

Humanity. Morally equating the rest of Humanity outside of Universal Justice as US fairly represented? Mr. bush tells God his plan is to victimize Humanity in America's name, by hiding behind who's flag again?

Destroy the war criminating, unarrested American cop killer, our offensive Mr. bush Jr. instead my friend, and be thanked by God in person.

Look, Mr. bush, rumsfeld, and franks have STOLEN food and medicine from Iraqi children by confiscating "Saddam's Money", and, it is now publicly understood that tommy franks, sabotaged the ORHA plan to create insecurity and chaos so to rob the central bank of billions. For tommy and his private banker friends to do this, he as a bushite had to sacrifice the lives of LEADERLESS American Soldiers as too weak and cowardly to say, "For God's sake, I'll wise up and destroy bush and rumsfeld myself instead to defend my loyal Brothers and Sisters I will, till the end, giving of everything for a life worth living", at least that is what a truly proud American Patriot who fights gloriously for a just battle as the good guys would. Instead as the dishonorable bushites, robbing blindly themselves and their own dying brethren, while bombing our homes with radio-active toxic waste, that contains among other things, deadly plutonium. Enemies of God as the bushite disciples. Wow! Wouldn't it be cool if America stoop UP and destroyed the war criminals bush and rumsfeld by simple supernatural Human Will power?
Tough luck so far for corporate news america continue to slog that America is so ungodly stupid as the uninformed, and have never heard of this Johnny Wizard artist taking center stage as makeshift creator antiChrist demon slayer.

Of course we should not forget to mention again, in addition, like the same, Saddam offered the demon antiChrist, Our Mr. bush Jr. unfettered access to the Iraqi national media to preach his deceit against God and Humanity freely, but bush refused, so too just like CNN and CBC censors do today by refusing communicating community interaction on our top priority war issues. Instead, we must, they claim, continue sacrificing bushite soldiers to steal Humanitarian Aid, to then double pay commi Halliburton, or WorldCom; companies found repeatedly defrauding all Americans in criminal contempt for the dying American tax payers. All the while watching now in real horror, as bush OPENLY steals almost all of the National Iraqi assets for his private auctions, but for the exception of the already claimed,

iraqi Halliburton oil reserves. Why?, Ho ho ho, because, he said so, in writing. 13303 states bush is the lawless demon from scriptural references, and why Christians don't stand in service for the cried mercy begged from God, the Son, and Humanity, I'll never understand, but Johnny'll tell You, he's gonna march home even if it means I'll do it all by my lonesome. My soul isn't for sale, nor are my righteous Universal principles stealable as a true Human defender to the last bushite standing who foolishly would choose to be my mortal enemy.

To my friends in Iraq, don't let corporate american media divide yourselves from community as equal participators. An Iraqi, is foremost, a member of our Humanity, and just like the rest of US, hate the God betraying anti-American demon antiChrist bush, more than anything else in the Universe for persecuting the innocent while killing coppers to steal our assets undefended without a leader to speak out everywhere for our living rights included. HUNDREDS, if not thousands of American soldiers have already DIED in Iraq stupidly as evil nazi vermin, GAME OVER MAN, for nothing but their cowardly ignorance on our ability to communicate FREELY for Freedoms thought died for already. Dying for bush as too cowardly to protect themselves as their own friends, and sacrificing families they silently watch criminally plundered further by their leaderless inaction on truly protecting America. Again, bush isn't America, America is America.

Justice for all, and let's name this time our own with my writing as a make believe King of Kings who's done it all already, just for the fun of it, whatdoyasay? Imagine this on a CNN spot speaking for our Justice as an equal to all beings, and like, wouldn't that be super interesting for everybody as the unjustly suffering and dying as victims under the demon bush dictates of criminal enslavement and global tyranny?

Christ, take care of yourself by killing bush, please?

Your true friend,
Johnny Wizard

Since they use very low-powered equipment, you're probably too far away at a half mile. If it's portable, try taking your scanner to the actual location and listen there. Don't advertise what you're doing but no need to hide it either (listening is not illegal but why draw unnecessary attention to yourself). If you still don't hear them, you have the wrong frequencies. Try scanning around the possible frequencies to see if you can find them. If you do hear them, but still don't hear them at home, try increasing the antenna at home to improve reception. If you're using a handheld with rubber antenna, almost any other type of antenna will be an improvement.

Listening can be fun depending on how confortable the employees are with the equipment. At some locations, the communications is all business (boring). At other locations, you'll hear them talking about the customers, dates, boyfriends, girlfriends, the manager, the food, other employees, vehicles driving through, work schedules, what they plan to do after work, and just about anything else.

I've "roughed" up the ends of nicads a bit - scratching them with a knife or sandpaper or whatever, then spot "soldered" or "tinned" them prior to adding any leads. I've had pretty good success doing that. Some cells do give trouble not wanting to take solder, but most have done ok. IF you're good at soldering, you should be able to do it with minimal heat to the battery. I've rebuilt more packs than I can remember. My earlier problem was - in experimenting - I used older cells with "some" life left. After a while they did die and had to be replaced, sooner than newer cells of course. But then I bought new cells and have had good luck with all packs. So, it isn't impossible! MNS

I forgot to mention one thing. I've torn apart many packs when I was scrapping for cells in a severe shortage. I had several packs here. I took a fine pair of dikes and cut/peel the straps off just under them from the battery. I reuse them to do other packs. THEY ARE SHARP... BE CAREFUL. They'll get you like a razor or paper cut. In a pinch, I also use regular wire as a strap. Small gauge, about 18 or higher. MNS

Sorry to be the one to tell you - DQ went encrypted long ago,and Sonic is
now on SatCom.
You would nned to invest in approx. $27,000 worth of equipment to monitor
them now.

E-mail them and tell them what you're looking to do, and they will tell you whether or not they can repair it. Be advised it took them a month for them to answer my e-mail, as they are apparently quite busy.

A "Google" search using keywords like wildlife tracking, bird tracking and antennas will yield alot of information on handheld directional antennas ... both home-built and commercially-purchased.

You guessed it.
All it took was a little inuendo about a 'dirty cone' - Then when word of

Don't ask me, Brian. Bill is the one who said it was free. As I said, I

Mike,

Here are several reasons we listen to fast food outlets and a suggestion to do so discreetly!

1) To us a phrase coined and copywriter by the folks at Monitoring Times
Its monitoring every thing that's □DC to Daylight□ to get an entry for your
radio log, its the fun of the chase, especially if the frequency found is not
in any known data base!

2) The accidental or with out a choice, monitoring of the fast food head sets!

Because they share frequencies, with other users, that are already programmed in the radio scanner!

When the head sets are on the VHF High band and us itinerant frequencies around 154.000 MHZ you're going to hear them inadvertently when driving by the outlet! If your monitoring the itinerant frequencies with the scanner. .Like road work traffic flag persons, who are switching to FRS handy talkies. You can find the itinerants here

<http://www.strongsignals.net/access/content/faf.html>

This is a great use for tone coded squelch. If your favorite business band VHF frequencies that are shared with the fast food industry uses tone squelch and if your radio has this feature you will not have to listen to the head sets.

With the Uniden tone code feature on some scanners, a tone can be locked out. When you find a fast food frequency do a tone search with your scanner radio, then lock out that freq.'s tone in order to here other business on the VHF itinerant frequency. Or tag the freq. /channel in the scanner with that tone code so you will only hear the order window headsets.
A check of < http://www.cityfreq.com> for your area may show fast food frequencies along with many other business. If the fast food outlet is on VHF the license may be outdated.

They may also have headsets on the non licensed 900 MHz band 902-929 MHz
Using wide band FM (WFM) you can sill hear them with a regular scanner
In narrow FM (nFM) it will just sound tinny and distorted.

Do a frequency search with the radio scanner, concentrate on
920 MHZ to 928 MHz. I haven't herd the order boards here, just WFM headsets.
The range at 900 MHz is ½ mile or just around the parking lot. 460-470 MHz range under a mile, VHF at 154 MHz will get out several miles.
Also search around 461.00-462.500, 463.700-465.00 MHz and 467.730 to 470.00 MHz

also on VHF around 154.500 to 155.00 MHz. and the order board may be down on the VHF-low band .

The Uniden BC250D preprogrammed SPECIAL service search works well. On a highway with lots of fast food outlets, watch for cars in the drive up then listen for the head sets. Take the antenna off your scanner and if you still hear that head set freq. then it's probably the correct one. In a rural setting a signal is enough to narrow it down. If your lucky they may greet the folks with the name of the outlet!

When posting frequencies please include the TONE CODE along with the operator and location so all of us can use them!
It really helps even, if a radio can do a tone code search, it's much more simple
to have them available. This helps identify stations who don't give out call signs much, with out having to do a tone search! This is something to look for in frequency
directories.

In several states and foreign countries its illegal to monitor in a vehicle or even own a
radio (other than broadcast band receivers) let a lone a ☐police scanner☐ capable of receiving government signals!
Check this web site for more information and the states where its outlawed

If all of the commercial radios manufactures can make them for public
safety vehicles, there is no reason uniden can't make them available at

There are MANY sources on the web to find frequencies in your area, but ONE of the best I have found is the FCC. Go to http://svartifoss2.fcc.gov/reports/st_cty_freqrange.cfm

Enter your State, your County, and then the frequency range. If you have a dial-up connection, be cautious of the frequency range that you enter. It can take a little while to search a large data base, and also display the results.

Happy Hunting!!

Hi Rob!

Sorry for the late reply. As others have mentioned, these adapters are quite common. You'll need something close to 12~13.8vdc, @ 700ma. Possibly Radio Shack Cat #273-1776. Make SURE the center pin is positive, and the outer barrel is negative. As for the antenna, Radio Shack has them also. Cat #20-034 would be a good choice. They also have the 90 degree, BNC adapter that you might need.

The same equivalent in Canada is Industry Canada's Strategis TAFL web site:

http://sd.ic.gc.ca/pls/eng_alpha/web_search.geographical_input

You need to key in the latitude (example: 490000) and longitude (example:
1230000) for Vancouver BC regional searches and also key in a radius
(example 50 km or 20 km). This will give locations within 'x' km radius from
the
position provided. There is no "city" search, but this link will provide a
regional search. It's not Industry Canada's but has been
programmed to feed in appropite field data. You can search by provincial
region.

http://neon.polkaroo.net/~darkwing/tafl/index.html

Industry Canada does not disclose RCMP, OPP or other police agency used
frequences. The results from Industry Canada
can be complex and very detailed.

## 1340. Bearcat 145XLT problems

I have a problem with low volume on my old 145XLT. I did a Google search and found similar problems on other models, so I expect I need to replace a capacitor, but none of the information I found delt with the 145XLT. Some posts refrenced blown output IC's but I'm guessing I would get no sound at all if that were the problem.

I have no electronics knowledge so I need help identifying what capacitor needs replacing. I believe I can remove and replace the capacitor if I can identify it. Any help would be appreciated.

^ I am looking for a good source of information on Vertical Dipole
^ Antennas and their construction.

Sorry but I can't point you to a source but I can give you details here. The construction of a receive-only dipole is very simple. All you need is some coax of practically any type and two pieces of wire, also of almost any type. Separate and expose the two conductors of the coax and attach one piece of wire to each conductor. Cut each wire to the same length, the length calculated for a frequency near the center of the listening area and as per the following formula:

LENGTH IN METERS = 75 / MEGAHERTZ

For example, if I'm listening to VHF civil aircraft frequencies, roughly 118MHz to 136MHz, I'll cut the wires for roughly 120MHz with the formula:

75/120 = 0.625 meters

The orientation of the feedline, the coax, is not important. Just tape the wire that is attached to the shielding back along the coax and leave the other wire coming straight out. You can tape the whole thing to a wood, plastic, fiberglass, or other non-conductive stick for stiffness.

Since this is a receive-only radio group these instructions are for a receive-only antenna. The antenna does not need to be matched to a transmitter so a matching transformer is not necessary.

Thanks guys. I do quite a bit of soldering but never tried doing batteries.
I couldn't imagine them being any harder than anything else, but I wasn't
sure. I suppose some people might skip the tinning process, but that is what
makes most jobs easier.
$100. plus tax sure scares me into trying a homebrew approach.

Yeah, $100 is a nice drop of cash. The cells can probably be had for about $10 depending on quantity and size you're in need of. IF you go to a hamfest and find a few junkers laying around, some will no doubt have some good cells left. I'm not implying you use those. My point here is to use the OLD packs for "practice" AND parts, like the straps. There are insulators as well in some packs. MNS

Unless you mean the 4 x AA cells there is no internal Nicad battery.
There is a 5.5v, .22f backup capacitor for CPU/memory retention.

Word of caution: Do NOT forget the warning on the side of the nicads. While I've yet to see one explode from heat, I've felt a couple get pretty damned hot - while working with them. I guess it depends on their internal state. And that was when trying to put solder on the ones that seemed to resist taking it. IF the battery is going to take the solder at all, it should flow on to it, like it would onto a piece of wire or a component lead and likewise - be a quick hit with the iron. So, be careful with the heat... if too much of it doesn't make the cell burst, it can fry it to render it useless.
It's not impossible to do, but there are precautions.

As to nicads getting hot and bursting otherwise, I've seen it happen. I know a guy who had a few spares in his pocket for an HT at a hamfest. He was walking around, felt his trousers getting hot, then smelled smoke. They caught his trousers on fire. He had some keys or change in his pocket and well you know the rest of the story!

Or, to put that in American, L in feet = 468/MHz.

468/120 = 3.9 feet. This is, of course, the length of the entire dipole.
For each leg, you'd use 234/120 = 1.95 feet, or simply divide the 3.9 by 2.

To convert the tenths of feet into inches, multiply by 12. .9 X 12 = 10.8
inches.

The problem is most likely the cable you're using. Coax cable has a lot of loss at 800MHz. Depending on what cable you're using, and how long it is, you might do better using the supplied telescoping whip antenna, on the scanner itself.

What are you using, and at what length?

^ Or, to put that in American, L in feet = 468/MHz.

I did use Amurican. Amurica is part of the international community and the meter is the international standard measurement of length. Besides, it's much easier to measure 0.625 meters on a bilingual yardstick, or meter stick, then it is to measure 2.05 feet. It's also easier then doing the additional math that you suggest.

^ 468/120 = 3.9 feet. This is, of course, the length of the entire dipole.
^ For each leg, you'd use 234/120 = 1.95 feet, or simply divide the 3.9 by 2.

Note that the formula I gave produces the length of each leg. The relationship is that electromagnetic energy travels at three hundred million meters per second (300,000,000 m/s) and a megahertz is one million cycles per second (1,000,000 1/s). To find meters (the length of one cycle) divide 3,000,000 by the frequency in MHz:

300,000,000 m/s
------------------
120,000,000 1/s

The seconds divide out and 'm/1' becomes just 'm', and the resulting value is the length of one wave in meters. Note that the 000,000 also divides out so the math can be abbreviated as 300/120. To find a half or quarter wavelength it is generally easier to first divide the 300 by two (150) or four (75), which are easily remembered, then it is to perform the second division on the resulting value.

To be more precise the resulting value for a quarter wavelength would be multiplied by the velocity factor of the wire being used, but since these antennas are normally intended for receiving a wide frequency range such precision is generally wasted effort.

I think you would loose about 99% of your signal, @ 800MHz, though 100' of 9913. You might want to consider a mast mounted preamp.

While you loose about 60% of the signal, you gain much more than that by
getting an antenna outside and up in the air. The 4 db is not relally as
much as it seems . It just looks like a big loss on paper. Take a
flashlight and point it at a wall at one step back, then take another step
back and see how little the light on the wall changes. This is about 3db of
differance. Take another step back and this will be somewhere between 4 and
5 db, not 6.

Oh sure PH - You fell for the oldest trick in the books.
They want you to THINK that your hearing them,with all the talk of sugar
cones and such,while they enjoy complete security with the really juicy

The Japs tried the same thing in 41,making fake transmissions from the
homeland seas,and all the while their carriers were heading where ... ?
Pearl Harbor - Thats where.
So don't be lulled into a false sense of security just because you hear
some minimum wage bozo yacking - They hire clowns like that just to fool
the public.
Rest assured,you'd need connections in the NSA to monitor DQ comms.

I have a feeling the 900 Mhz head sets may be hard wired form the order board

mike to a speaker back inside, at the window. The headset would only be for
the clerk to
talk to the order board and the antenna for this may be inside at the order
window also.

## 1374. Balun question...

Hi,

I am cleaning up and putting back into service my old Channel Master
antenna. This antenna is similar to the Scantena

http://users.cis.net/kingpop/Scanner/Scantenna.htm

My question has to do with the Balun. I plan to use RG-6 cable with
this Balun from Radio Shack (standard TV type 300 ohm to 75 ohm):

http://www.radioshack.com/product.asp?catalog%5Fname=CTLG&product%5Fid=15-1140

Does anyone see a problem using this Balun? The original Balun that
came with the Channel Master was a more heavy duty looking one..

Thanks for any advice on this!!

yha I know I am going to get some loss on the coax but its always better to have a antenna on the outside on the roof and the coax is LMR 400 ultra flex not belden opus I thought it was belden but there the same any ways
I still wanted to know if there was any good scanner base antennas out there I have the coax taking care of now I just need a base antenna that was my original question before coax came up

Doubling the distance will cause another 3dB of loss every time you
double(!) Very simple. A loss of 6dB will show one S-unit less on the
signal meter. And running 100' of RG213,AirComm+ and lowloss
TV-cable(75Ohm) to my antennas in the attic 6th floor is a GREAT
improvement in comparison to the same antennas 10' over ground in my 1st
floor appartment with less than 15' of cable to put the antenna outside
on the balcony.

Mr D'Amato,

Unfortunately we have no plans to develop a remote head in the near future. There was one being developed by another source outside Uniden, but it never came to pass.

Here in Taiwan, a news reporter told me they take their receivers to the National Police Bureau to have the police frequencies (485... Mhz) recorded into the memories as a convenience to scanning. Sure they might leave out some frequencies, but there is nothing stopping reporters from adding them too.

This is in contrast to the otherwise inaccessibility of such frequency lists, or even vague ranges, to the public thru official routes.

^ ... I just need a base antenna ...

Start out by making a multi-element dipole antenna cut the legs of the dipole according to the discussion in this group on vertical dipoles one pair for each band that you want to listen to solder one end of one leg from each pair together then solder those to the coax the final product will appear similar to cat whiskers if you have any questions just ask here after you have used this inexpensive antenna for a while you will know if you need to spend more money on an expensive one

# 1389. West Windsor, NJ - Police Codes

Does anyone have a list of the codes used by the police in West Windsor Township, NJ? They do not use 10-codes...they use a 2-digit code. I've figured a few out so far: 48 is equivalent to "10-4", a 57 is a disabled vehicle (or a wrecker on call, I forget which now), and a 58 is a motor vehicle accident. I'm hoping to find a comprehensive list, but none of the online resources I've found so far include this code system.

TIA,
Doug

They tried that here in the early 1980's, didn't work. We're too used to

W's Reality Gap
http://www.alternet.org/mobile/story_mobile.html?StoryID=17907

/ / Whenever President Bush is now confronted with an
unacceptable reality, he either changes the subject -
is steroid use really more important than the environment?
- or expresses confidence in his certainty. "I'm absolutely
confident that..." he'll say, as if the issue is his
determination rather than his conclusion. \ \

It's his faith infinitive as the antiChrist, where he
has hypnotized the dopey with merely the power of
suggestion, that has brought him to US as foolishly not
conceiving, or most importantly, truly understanding.
So, do we feel sorry for his ignorance as fallibility we
are all prone to own as the human rendition? No. But
for stupidity thinking he could murder US as the
innocent to steal our free values, and just get away
with it by lying to no one continually, is where the
Lord makes our stand for God unseen as miraculous.

The demon bush dictate is not exceptable for my just
little man universe. I knows too much about freedom to
go on dying in bush's forsaken place as innocent
sacrifice. With corporate america's unarrested demon
bush forcing my hand, I would decide to defend by
concluding, he is truly, the enemy of all America.
America: weak without leadership, yes, but not as dumb
as some would have us believe. When is it that we feel
sorry for the thousands of lives bush's deliberate
actions of mass murder have taken for no good reasons?
Their ain't nobody to defend america's overlord, but
through corporate censorship of the reality of who's
really dying for the demon bush liar. I'm the one
anyone would ever have a legitimate fear of getting on
the wrong side of, and if your not in the process of
attempting to get away with murdering some defenseless
family for nothing but to rob from, to each, his or her
own, mostly, right?

'Five Lies' Lives On
http://www.alternet.org/mobile/story_mobile.html?StoryID=17912

/ / Why, then, had the reports become so shrill on the topic
[of Iraq] after Bush's inauguration, presenting the same
intelligence with a completely different interpretation? After
all, the CIA even had the same director under Both Clinton
and Bush.

..."You had senior American officials like Condoleezza Rice
saying the only use of this aluminum really is uranium
centrifuges. She said that on television. And that's just
a lie." \ \

Uncle Sap Suckered Again
http://antiwar.com/justin/?articleid=2023

/ / "We are heroes in error.... As far as we're concerned we've
been entirely successful. That tyrant Saddam is gone and the
Americans are in Baghdad. What was said before is not important.
The Bush administration is looking for a scapegoat. We're ready
to fall on our swords if he wants."

So we lied. So shoot us. Who cares what the Americans say,
anyway: they're stuck in Iraq, and there's no backing out
of it now. \ \

http://www.antiwar.com/justin/?articleid=1996

/ / While Perle was confidently concurring with fellow Defense
Policy Board member Ken Adelman's prediction that the conquest
and occupation of Iraq would be a "cakewalk," a State Department
study (shelved by the neocons) accurately foretold the mess we
find ourselves in today.

So, tell me again why it is that Tenet has to step down.

Perle is right when he says:

"I think, of course, heads should roll. When you discover that
you have an organization that doesn't get it right time after
time, you change the organization, including the people."

Heads should roll, alright: starting with Perle's, and don't
think he doesn't know it. That's what the chutzpah strategy is
all about: brazening it out.

...But if you look at the National Intelligence Estimate,
a document prepared by the White House with input from all

agencies, the section on Iraq, which postulates a whole arsenal of active WMD, is filled with dissenting footnotes authored by the very agencies Perle would purge:

....Dick Cheney's henchmen were feeding both the President and the country a strict diet of pure science fiction and fantasy authored by the Office of Special Plans: in a very short time a whole new genre of speculative fiction was spawned by the neocons.

...Mired in scandal, and hardly a team player of the sort that is supposed to be typical of Team Bush, here is someone who openly calls for the resignation of top officials and refuses to take any responsibility for the failure of policies that he championed. \ \

W's Reality Gap
http://www.alternet.org/mobile/story_mobile.html?StoryID=17907

/ / [of bush's falsehoods to Freedom's America] his policy process is more catechismic than empiric ï¿½ instead of facts leading to conclusions, conclusions lead to "facts."

Second, he is openly uninterested in learning and reading ï¿½ the Bushes "aren't serious, studious readers" he has said, also admitting that he now reads headlines, not articles. The point is not that he's stupid, only that he knew less about policy and the world as a presidential candidate than the average graduate student in government. Lacking Eisenhower's worldliness or JFK's intellect, however, Bush is prone to grab onto a politically useful intellectual framework like a life preserver and then not let go ï¿½ whether it's Myron Magnet's sour interpretation of the 60s in "The Dream and the Nightmare" or Paul Wolfowitz's Pollyannaish analysis of the likely consequences of an American invasion of Iraq.

The result: the most radical, messianic and misleading presidency of modern times.\ \

When the ï¿½Big Lie' Becomes the Truth
http://www.globalresearch.ca/articles/CHO402B.html

/ / What these revelations suggest is that President Bush has now been exposed as an outright liar and war criminal `from within', by several of his trusted appointees and close collaborators. And that he's going to be running for office, in November 2004, with this record. \ \

It's like some ultimate battle of faith between
freedom's true as life call censored, and the criminal

intentions of flagrant bushite evil, as though bought
for already by news programing. There ain't no real
King and Lord of Creation who calls the media up alone
as John again to protect our throne, so instead, give
your life and country unjustly in silence to the lawless
bushmob in unholy sacrifice for plunder, as your,
un-chosen dictator.

King Johnny wants America's mass murderers, demon bush
and dummy rummy immediately arrested for public trial,
or executed for nearly escaping the crimes starting on
9/11 in New York City.

It will be done, in our kingdom to come. ..or.. maybe

The letter appeared to contradict denials made last year

How the war on terror has become a war on freedom
http://www.theherald.co.uk/features/10493.html

/ / From the moment we followed George Bush into war, our certainty as a future target was assured. So, eternal vigilance is little more than common sense. Expenditure on sound intelligence is clearly essential. Diluting legal rights and dispensing first and second-class justice is is not just totally unacceptable but, in truth, another victory for terrorism. \ \

Terrorism of the worst kind for God's America. GET BUSH NOW!

--

Falling for You

Brahimi said. "We need to organize elections as early as possible but not as early as impossible."

Help me understand: Why can not Iraq start on the process of

O R G A N I Z I N G E L E C T I O N S

NOW to work towards gaining accountability for soon as possible? After June? What the... Can't we people talk while walking? Look, the future is likely coming no matter what, and what ever illegitimate government is embarrassingly stalled by evil WMD proliferator baathist bremer to steal unaccounted American tax dollars from

the "willing" victims dying, (like by bush bitch cluster dud) will still necessitate the need, to have started on the process of fair elections for our Iraq before hand. Corporate america might not care of sacrificing America to rob from, but real People are honorable, and won't reserve the scourge of nazi bushitizm a place to suffer any further if we can help it.

The bushites are sorrily, simply not qualified under the dire circumstances they've assaulted ourselves into for mugger war profitizing, as leading US to be dying undefended while failing miserably on my behalf to demand Justice as freedom is truly.

Now, it has been vaguely suggested that a, steven "you can't have public health care or he'll murder whomever for thinking" russell, or a buford "bush bitch" blount as treasonous evil nazi bushwhore, to undermine freedom and democracy everywheres in our world might cowardly attack defenseless innocent families at the polls while leaving "bin Laden" fingerprints, criminally warring to kill more American dumdums for commi Halliburton et al, continuing committing as unaccounted massive waste in America by over billing the dying People. Why would bushites do this? Evil is blind irrationality, disguised as thought out faithfully by fascists. The, nothing to fear suggestible absolute nature of non-linerality, is 99.9 percent, super fractal wowy miraculous as crazy about the fringes, (or is that bridges?). But, without Justice ruling our stay, we leave for a Heaven waiting, on a sea of madness as enemies of life to all things eternally being. Translated: We need to arrest these specific war criminals at the end of our, ready to fire rifles. Done to stop them personally, from robbing or murdering America indiscriminately as enemies to everyone. But in addition to that, (like at the same time) who says the polls can't be stretched out over several days or a week, with multiple options on submitting votes registered through the oil-for-food program? I want to know where Annan is on this., why it can't be done., and what his position is on returning the Iraqi Humanitarian aid stolen by Halliburton, or Iraqi Central Bank deposits cashed by HAS TO BE, current pirates. Annan, be a man, an acknowledge our presence as relevantly important for our world's living sake.

We had 100 percent access throughout Iraq prior to allowing bush, rumsfeld, and franks to sacrifice literally thousands of innocent lives. Who are now DEAD or DYING NEEDLESSLY as first degree murder victims, in

some bastardized Lord's name apparently.

(Quick, somebody call upon everyone to get up off their knees, God's coming to read as one person today of the unbound wonder of what it is to be uniquely ourselves within a nude sunrise grinning. To make some progress forward for a better future, we're not meant to just pray for someone else to come and stop whom from cheating who of Liberty? What is it that you can't think of? Every wonder? Who wouldn't do God a favor if they could imagine so brightly. Who's stopping you from defeating tyrant bush as war criminal, but for only yourself contained by his continuing bad example? Tell you what: let's together find ourselves of one mind on putting the bushmob behind bars awaiting immediate public trail, and I'll promise to try visiting them every year, just to see how things are developing. Or instead just shoot bush and rummy for almost escaping Operation Infinite Justice of a real American Patriot soldier's undying love for his soul brother.)

Any improvements of the current situation in Iraq today, are going to be less that what would have costed to not kill innocent people for nothing but evil bushite war profitizing at it's level worst in this history ever of all Humanity recorded. The demon antiChrist of corporate america has got to go, and he's got to go immediately as arrested or shot dead by the Patriots for treason, before he causes US anymore needless losses and grief to our friends and family. Like for the next fifty or so generations what with the plutonium being fed blindly as willed to cowardly, weak, American teen enemy bushite soldiers presently. (If we could seperate the bushites from the rest of US, this might be a good thing, but they have no real leadership to speak about freely as the dying stupidly.(PRINT THIS PAPER AND MAIL IT EVERYWHERE))

DYING like those from 9/11 did, or dying slower, like with NYC air quality as best Oz has to offer. (Harmless corporate TV tells US without opinion.) Either or even in other ways, the demon bush is truly killing God's America in Your name not heard from. Help me you idiot. You! Yes you there, reading here. I am your secret friend see?, and.. well.. the Universe needs your help desperately pal. Please? For me? ..Oh God help me your really dumb without you aren't I too? Listen: we need to talk.

We are here to save all of creation from needless death. Big deal. Your are of a real eternal nature, that

exists also, (as understood scientifically) timeless. For real. (The big bang is now. (All mass is also of not as seperate energy, then there's our gravity...)) Our possibilities for a great, better future are staggering, if we are capable collectively as individuals to defeat the "kindness" of George W. bush, the dying embodiment of evil as the very true demon antiChrist of all biblical references ever mentioned. His lying isn't just deceitful, it is downright hellish.

You know what I think? The evil enemies of Humanity, don't want US People to be recognized from being victims under tyranny through corporate cult censorship. Without Justice ruling our ways under the irrational criminal bushmob dictate, we lose as losers cheating ourselves as not worth the consideration to be free individuals.

Granted, I am an actual god familiar with the rights present within the Constitution of America. THEE God's god, here to teach the world about needless sacrifice, caused primarily, for the effects of inflated egg shell egos. As Creator, I goofed somewhere in the, order to chaos mixer. I didn't plan (it was a mistake) for Americans to be so cowardly and weak when it comes to defending their very own selves from needless death and sorrow through blatant, naked, how can you miss it, evil criminal enterprises. So, perhaps, now if I stop writing, and fake I flied off vamoosed into the unknowable, a couple people on the planet might go 'hmpht', and decide to carry on bravely, the real, honest to death struggle for freedom living without me as sorrily missed. (I as John am not anything special paradoxically.) This is fear itself, ain't nobody nowhere as terrifyingly terrifiable as this is just truly super terrific being only my simple written taughts, yet, ... I'm like.. just fiction writer, big dreamer Johnny Wizard, looking for some happiness, human respect, and a good last supper before I check out from this made by the earthling "space explorers" dungeon cell.

But who cares about me, or my great, he thinks he's so brilliant ideas? Everything's seriously a pain to him sometimes, and he talks to himself like he's the, been here and gone as eons now, King of the Universe for the holy Word from the Heavens above or something. What a poor dying fool to chance that anyone would willingly help themselves by caring for someone. ..You know, I'm beginning to not be all that crazy about the demon bush liar continuing to war humanity in my own true name also

now that I think of life in this way honestly. H-e..Y -!
(Morningstar has been accused of a lot of things, but
you'll notice, always plays fair as your rules.))

What freedom in Iraq will come that allows a, buford
blount to walk unaccosted by 'legal' services? Or where
rummy's cluster dud advocates gain silent gratitude? A
nation high-jacked by bremer's buddies who illegally
sold Saddam WMD, then the product wisely gets destroyed
as functionally useless being primarily indiscriminate
warfare, then bremer's buddies come in again and murder
untold thousands upon thousands, all because your magic
TV is letting them get away with it as considered too
embarrassing to the billionaire private stake holders.
Fuk you corporate american Human haters for not
reporting the bushites as war crime supporters.

Where in the real world are the nazi bushites gonna
demand we go to allow 'them' to continue warring the
Constitution while wearing a bushite soldier's uniform
in their dying universes of Universe? Leaderless
corporate america?, injured and dying as the unjustly
starving? What can the bushites do now in Iraq, that
they couldn't do before the needless murder of untold
thousands upon thousands of innocent people with loving
families? Before dumping thousands of tons of
radio-active toxic waste as enemies of God's children?
Only to rob, maim, and destroy God's great work through
Love. We had complete unrestricted access throughout
Iraq, and Saddam was offering the national media for
bush to pontificate, while not refusing dialog for any
suggestions.

I ask:

Can not America invite me formally for brunch, by
somehow bypassing the war mongering nazi tyrant held up
in the Oval office? I'd invite you all, but my place is
still a mess, and I'm stuck eating for survival just
now. I don't qualify for help, because surely, a person
with your talents, should have someone willing to stave
you off the, who cares about saving the world for you
buddy, laughing in all seriousness shtick. (cool eh?)

I give you my world:

To save humanity from tyranny will be accomplished
through the value of these free ideals recognized.

Isn't life grand sometimes when the bushites aren't
needlessly murdering our innocent families in your name?

I again,
will now leave
you without me,

forever loved,

Johnny Wizard - Your "other" parent or guardian advising you to immediately, by Citizen Right, arrest the President's 'cabal' in the name of the Lord, who already died for this once already god damn it, and I'm not sacrificing any longer unknown as forgotten in the absence of any true reason to our existence, I want to celebrate. I want to afford a cold brew to nuzzle on a warm sunny afternoon, at a hideaway somewhere, lost in my comforts of having few real worries, but for unintentionally offending someone for not having the time to except their generous support, or gratitude.

/ / "We need to find a mechanism to create a caretaker government and then help prepare the elections later - sometime later in the future," he added. Mr Annan said that there was "wide agreement" \ \

Unelected care taking government? What is the group their now supposedly doing? Where in the process is corporate america to simply fix the Russian generators they've been paid over and over again already for as doing nothing in The People's interests?, As unaccounted to? Where is corporate america to fly in the emergency food and provisions for the innocent as victimized? Who's care will this continuing robbery of America through war crimes further fail to serve? How can Annan gain "wide agreement", with no poll on the issue? Who personally did he talk to, agreeing to leave Iraq without working for an elected government of the People?, and who consented to give up on such dire needs? Where is Annan on the thousands of tons of radio-active toxic waste dumped by rotten rummy? Is it not an issue he should personally be addressing for Humanity, to demand an immediate clean up paid for by those responsible? Imagine that: Truly toxic as dying, American Patriot soldiers making it up to God's great Creation, by hunting down the actual bad guys, who done did crossed the wrong family this time.

Wow, now that would be a war worth televising!

...I mean, these people have total disrespect for the Constitution. We swear an oath, military officers and NCOs alike swear an oath to uphold the Constitution. No End to War

The Frum-Perle prescription would ensnare America in endless conflict.

By Patrick J. Buchanan
http://www.informationclearinghouse.info/article5712.htm

/ / And if God accepts the existence of evil, how do Frum and Perle propose to ``end'' it? Nor can any nation ``win the war on terror.'' Terrorism is simply a term for the murder of non-combatants for political ends.

...If it is America we defend, An End to Evil makes no sense. The Perle-Frum prescription for permanent war makes sense only if it is the mission of the armed forces of the United States to make the Middle East safe for Sharon--and here we come to the heart of the quarrel between us. \ \

As you can probably guess, me and Patrick might have some good politics to debate on that I would disagree with him about, but I can't save enough praise for reading this most recent informative and often entertaining take, while reviewing about the Frum-Perle controversy.

I think we can all agree, both Perle and Frum are now clinically deranged by hanging on to George W. Bush for so long in dumbness. Do they qualify for some sort of special treatment programs under their respective health care plans? Strange days where we see the limited words of a mind bound for slavery. All I wants is the war mongering mass murders arrested for treason against the flags of Freedom everywhere, is that to much to ask from ourselves still God asks? (You know?, I think, i'm getting better at this!)

To steal public utility services paid already as owned
completely by IRAQI, (America dying for the bushite
American pension thieves at WorldCom or Britain's
"Dutch"-Shell,) ain't gonna change the business
locations. The evil unAmerican cop killing bushites
think they're gonna party in Manhattan on our dime in
apartments for around $15,000 a month, while sneering at
a homeless beggar on the streets, who thought he was
still in Vietnam.

An oil-for-Iraq program needs to be reestablished, but
transparent to all as addressing the immediate emergency
needs of Iraqis. Private, in the secret back room with
the bushmob nazi bankers, and their private inept
collaborators flustering as international fraudulent
behaviors, just wont do., try as bush might to murder
perhaps millions of Americans uncovered by his
criminally enforced, reduction in health care coverage
extravaganzas.

THE ROVING EYE IRAQ AND AL-QAEDA
Part 1 - The usual suspects
http://www.axisoflogic.com/artman/publish/article_5146.shtml

/ / This latest US intelligence, though, makes little
sense. For starters, al-Qaeda pigeons are highly unlikely
to move around with computer discs in their briefcases:
since early 2002 a disabled al-Qaeda has used women
couriers to deliver strictly verbal messages. \ \

Kimmitt in collusion with the bushmob perhaps? To cover
up an investigation set up to encourage the blind murder
of America as bushite by attempting to divide all the
People of Iraq as Iraqi?, na... not in a tribal based,
enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all
the bad guys for thinking, the blind bushite bigots
would conclude illegitimately., and I would say to
yourself: no, the People with equal rights to stay
united for good times, are a people sworn to uphold law
that serves our freedom's best. Iraqi assets are not
bush and bremer's right to steal without question, nor
either, American generosity swindled by WorldCom, Enron,
Dutch-Shell or Halliburton is the final, be all answer

to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. The evil bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

Perhaps, he is.

Another American soldier owes me a beer, or will be dying to steal life from themselves as sacrificed for the evil criminal dictate of Their Mr. bush Jr.. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good

guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi Halliburton pocketed Humanitarian Aid? Go ahead, ask'em?! Then ask'em why they die as cowards by rummy cluster dud for the bushmob to rob their own direct families left unprotected? Ask'em! You know what they'll tell you? They're not happy about these bushmob war crimes truly destroying America in America, "freedom", "democracy", Johnny Wizard or otherwise., Or instead they'll mumble something incoherently while jaunting away to murder some one found defenseless, or innocent to pay further while dying to slave under the criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring the innocent by stealing your human values truly.

We need to see an apology to come from America, an apology to Humanity for this carnage waged unnecessary, but for these contemptible war profiteering practices as direct assaults to all as God is. Assaults that we have been unable to remedy by openly communicating to bush's secret White House, rumsfeld's secret Pentagon, or Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest of US, by arresting bush and rumsfeld immediately for high treason?, or will they cower and DIE as the innocent, in false gratitude to the lying traitors bushmob? To with their dying breath proclaim unattested, to be ridding the Universe of their continuing criminal behavior.. a.k.a. evil?

Evidence is a must to establish a crime scene provocateur, to deny such privilege is to deny freedom

be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no struggling democracy entirely.

Look, the thing about God coming down, and having it out with humanity on some various critical issues, isn't like going to happen, it is doing.

We had complete unrestricted access throughout Iraq prior to murdering any innocent child in america's name.

These verbs will strike that antiChrist demon down for ever and a day, and if I've gone, faded away, these words will still remain,

1) We call for an end to U.S. occupation, and withdrawal

of the U.S. forces should be followed by a temporary combined mandate for the United Nations, Arab League, and OIC (Organization of the Islamic Conference) to provide direct support for Iraq's reclaiming of sovereignty. That would include election assistance, humanitarian and reconstruction aid (including control over all international funds, including those coming from the U.S. Congress, designated for Iraqi rebuilding), and peacekeeping/security deployment. \ \

Ann Coulter - "Liberals just call Republicans names."

Her suggestion is against the common sense of a literate segment of humanity who knows something is a farce about this tart, and for me, entertains for words to gain a better understanding for proper acknowledgment.

Coulter is bigot rousing on purpose I think, just to get all the american corporate monetary gratitude, in selling herself not present as a significant baitor unaddressed publicly in our corporate news circles. She sells excuses to cowards, of not addressing specific acts of treason committed by individual traitors, like rummy or Ashcroft, and instead, suggests all people have no ability through bushite america to recognize themselves being robbed their freedoms or murdered directly for the furthering of the evil bush demon war lies.

Interesting.

A repuglicon nazi bushwhore, who will say anything to allow bush to steal further from America, is not a tried and true Republican blue collar. Is it in Ann's contention, that all Republicans can't imagine themselves having any independent opinions? Or, is Ann saying that every Liberal blames Republicans of every stripe throughout History instead lawless bush personally for sacrificing the nation as evil incarnate?, committing to murder individual New Yorkers as America sacrificing, then further acquiescing to needlessly feed toxic waste to all American soldiers, while loyally blowing themselves up dead as individuals to pieces with sexy rummy cluster dud, all for being blind disciples of the unAmerican bush demon antiChrist, their ungodly evil false-deity as enemies of God's love, America, and our good names?

Naming the repuglicon demon bush a terrorist recruiting cop killing heroin pusher, who played a central part in

the murder of thousands of New Yorkers is well established factually, and publicly confessed as all planned to act upon before hand. Who says? MSNBC's Jim reported with the White House, as a 'top secret' [Oops, deceived America wasn't suppose to read this one Condi] strategy of not following the 9/11 crime scene evidence, and confessed as 'fully implemented'. A General Ahmad plan to blame bin Laden as innocent of to secure invasion of Afghanistan. For Enron et 'al, the treasonous g-e-t-t-i-n-g . . . a-w-a-y. ... Pension thievers. Robbing from American Patriots as lead worthless in value with. Dying.

Remarkable to say the least.

Anyway, solid, documented evidence including the circumstantials, like cheney's "The Dabhol Working Group", Niaz Niak, and the quietly contacting of allies publicly to attempt legitimacy of faked collusion, as such, with rummy's Pentagon arranging a same-time, what if a 9/11 occurred plan involving everyone misled, like also dummy rummy's P2OG, where dummy rummy writes to commit terrorist acts against our innocent families, he prefers if any connections have to be made, they be made with the widest banner of "The Pentagon", as to hide himself from corporate american news scrutiny, who instead will report it as, the Pentagon isn't speaking about only rumsfeld's high office involved in blatant treason, and naked evil doing. (Also, to succeed in assisting in robbing the Central Bank, and museum, the nuclear facilities containing radio-active contaminants were left unguarded, as not centrally relevant to franks why soldiers were told they're still sacrificing their lives for. "Duh, why are we here to kill good people needlessly so the bushmob back home can further rob our undefended families bro? Bro?")

--

This is for all to agree settled as official History.

America devolving into the criminal tyranny of the evil bushmob is happening. All the while, we witness, the LEADERLESS nazi bushite soldier cowering as cowardly sell outs to their very own friends and family being robbed back home, left undefended through blatant over billing as UNACCOUNTED, leaving their own sons and daughters to dutifully eat plutonium, and going further silent when it comes to rumsfeld and franks needlessly dropping thousands of land mine cluster bombs to murder us people indiscriminately, which, kills their own

aplenty, in a more way than one knows. Karma. (rummy's pentagon is misleading soldiers on how many have so far died to allow Halliburton to criminally steal humanitarian aid from The People, as one example,) Again, as bushite fascist nazi vermin, they let those responsible for destroying America through the bushmob war crimes, still sit in the, for sale freedom captain's chair, high-jacked from US true Loyalists, attempting to get away the bushmob is doing from 9/11, by going real fast .. nowhere.

Second, if Liberals include whomever, how could Ann possibly assess that all would consider calling ourselves anything but, unique as individuals? Bizarre.

The American Constitution is our souls included in those timeless thoughts of Justice for all as The People. The bushmob is destroying freedom by persecuting the innocent as terrorists, when they, in AMERICA'S NAME, throw out the concepts of Justice for any. No publicly understood evidence to form our conclusions, is a corporate demand your faith be in the unjust bushmob 'cabal', and not in Freedom for all through establishing the actual "bad guys". Closing the public criminal investigations on 9/11, is a critically essential part documented as the evil cabal's "top secret" criminal treason plans, put together prior to the murder of thousands of American citizens. Prior to the event as hidden question, and, confessed as never considered. Ya, right.

Playing to Win

Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power."

So, there was indeed no imminent threat posed by Saddam to Amerka, and inspectors had complete unrestricted access throughout Iraq without delay prior to the, bush demon's further war crimes. So, what was the reason for all the pointless mass murder and destruction again? Oh right.. to sacrifice American soldiers so terrorist bush's war profiteering can feed off themselves as family without leadership present as spoken for. Hey no problem if Bechtel or Halliburton never actually gets anything done, or at a good price after their magic trick "pay here for what?" commissions eat up most of the investment, it's only the dummy American People bid payers again left unaccounted to DIE intentionally. The bushites could make more killings for decades to come, while flogging the now desecrated American flag as the new bushmob's being intolerance, greed and true contempt for all US as Humanity. US, a dying dream that once was the great American way of living; now war crime bush's personal enslavement for global tyranny.

The devote bushites tell a Loyal but dumb Soldier to quietly eat plutonium and get blowed up by rummy cluster dud, because, it's harmless. Again the marines have got to come in and save our day, by arresting bush and rummy for 9/11 now, with truth as the all time word of God exists within yourself included. Look, don't think I'm gonna fly down to Washington like some comic hero, and arrest the entire bush administration, going through them, one by one from their holding cells, on where all the stolen cash and American values went all by myself.

GOD NEEDS YOU

All the deaths of American Soldiers in Iraq today, (like the People who died for the bushmob's 9/11), are caused from their leaderless weakness to not face bremer and the bushmob as war criminals continuing to transgress in America's name high-jacked.

Mr. bremer fired Iraqi school teachers, and hired up Saddam's secret service, those, who if any, would have closer relationships to charges of criminal impropriety in the name of the baathist banner, than any other group would be. If an American soldier in Iraq today, feels those from the Saddam Baathist regime should face American Justice (the real way by thinking) why then, is bremer not behind bars awaiting his public court appearance? Mr. bremer as the director of Kissinger Associates, is as, directly tied to "CRIMINALLY"

providing Saddam his WMD knowhow. The first
"Iraqgate".. [I apologize as Creator for being
partially responsible for this worse than B movie but
true plot line scenario, however, looky here!, there
is so much more to believe!!!]

The bushmob tricks are too cunning to comprehend, see?
Again, for those who can, bush must be stopped from
murdering American Patriots for no good cause, because,
it's really getting US royally miffed way up here also
as the true beings actually committed to Justice as
Freedom for all. That's all folks.

Once the document was declassified after the war it became
known that it contained 40 caveats - including 15 uses of
"probably", all of which had been removed from the previously
published version. Tenet further ingratiated himself by
remaining silent about the OSP. "That's totally unacceptable

Imagine this is why the bushite soldier states the Humans must not be allowed to disagree with anything the bushmob in Iraq does, because then we'll all know together how pathetically weak and cowardly they truly appear as criminally acting with such betrayals as an ungodly evil tyranny, without any true leadership to speak about. Robbing their own nation of America as immediate family in the process. Dying. All for intolerant war monger bush's hatred for the American dream, and contempt for all human good will as kindness.

Just another PUBLIC bushmob act of sedition against the old red, white, and blue, to sacrifice an American Patriot as measured worthless with. So American Soldier, what are you going to do for US payers being robbed in the open by the bushmob in Your dying brother's name like that?, as one American Citizen censored from speaking publicly at length like all the rest of US are also in corporate america? Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

/ / Steven Russell said that "protests are not authorized and that participation in protests is punishable." \ \

/ / Steven Russell. "These People have always hated US in this area. It is not surprising that they hate US." \ \

He ain't kidding me he is completely unqualified to hold any leadership position. A real de-generative paranoid delusionist, mared likely early on from corporate neglect he suffers still from. He is what is referred to as a bigot, and likely therefor, a probable racsist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the

People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too, Amerka. Haven't you heard? Bush's Amerka will be freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

/ / commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." \ \

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?
An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)
Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even

baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian Aid giving illegally to double biller commi Halliburton. But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11. You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. -ba)

Communicating knowledge is powerful stuff let me tell you. (Roar) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with

perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and implements to not work for public criminal investigations regarding the murder of thousands of American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly,

and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

This whole Britain Blair thing is so disturbing when parlayed with the facts outlaid. Look, MI6 (C)

confesses the 45 minute thane was really just based on how long it might conservatively take for the Iraqi military to get small caliber weaponry, like grenade launchers, to anywhere along the Iraqi border. (With an additional report alleging MI6 obtained those timings from an out of date Russian military manual. (Likely therefor, a bit of a brag)) If that is not 'sexing up' by the devote bushite Blair warranting his immediate resignation he promised, nothing is. Huge penis shaped nuclear warheads, as apposed to a sweet pea shooter aimed at space invaders? Hutton should be considered for treason when you think about the time spent privately reading the 45 minute, Weapons of Mass Destruction thane over and over again, never mind the fact he is blatantly, nakedly, attempting to cover up the murder of a Brit. (The British can't be played as stupid collectively as bush's America, because they're not. Kinda like Canadians, Norwegians, the Swedes, Belgians, France, and most other developed, and semi-developed nations. Hundreds of countries, comprising near 7 billion People. (Thousands of millions wiser together, than Americans without public heath care) US: that Ashcroft, bush and rumsfeld dictate by ungodly decree, are not of true Human values when talking about protecting our Justice and Freedom ruling our ways.. into the mystic. With King Johnny somewhere partying not stop with women, wine, and song.) snp

I ask Humanity, shouldn't Annan, if anyone, be speaking up scientifically on American soldiers eating rummy's radio-active depleted plutonium, while being blowed up by landmine cluster dud? now that I come to think of it... how is this to fit in any public American school text book without mentioning the dying for nothing as evil bushites part? Can't fit without some revolutionary process of evolution to the betterment of America as dreamt of by big picture planning, no?

Now, can someone, at least, lend me some credit for the time being?

To you, for now,
I bid,
adieu.

have dreamed of crystal clear drinking water, good food, and further, committing ourselves politically to a better world for all persons included. How? Arrest bush and rumsfeld for 9/11 as starters, and we'll take also the bonus of ending the fight of further terror wars for the war mongering evil, George Bush Jr. and twisted rotten rummy; who instead, will be behind bars awaiting public trial., for the murder of thousands of God's People in New York City. / / ...Mr. bush indicates he knows nothing of economics, or the important function of law to protect our societies, so what if he should kill Saddam, and maybe a million Iraqi people, then what? He hasn't thought that far, and clearly, due to his evilness we witness daily, couldn't care less. CNN and

other corporate professionals refuse to tell the blood sucking, carcinogenic, corporate American real fast news blips, of causes they as a nation in total celebrated televised ignorance, have committed against the Iraqi struggling to survive People, and indeed around our world likewise. As was the bush regime's unreported support of the overthrow of democratically elected Chavez in Venezuela, who incidentally, as one of the very few, holds a perfect human rights record, unlike America, who is the only nation, the World Court has convicted by factual documented evidence, to be a terrorist state. \ \

/ / Except that the United States has absolutely no intention of actually getting out of Iraq. It wants its troops to remain, and it wants Bechtel, MCI and Halliburton to stay behind and run the water system, the phones and the oil fields. \ \

Never ever land more like. Imagine that: Arabic WorldCom phone bills, Halliburton gas bills, with the only store "legally" open to US public will be Bechtel, who will demand through bushite tyranny, you pay your wages for something unjustly over billed as, but put together at less than five dollars a day wages offered, being as the only jobs available through not publicly accounted bushite middleman directly chancing the whole country of America as undefended financially., extending "their" risk to do nothing; by the further needless SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly dying WORTHLESS WITH as da dumdums. Armed American Soldiers should be bravely going after Baathist bremer with DEMANDS for immediate democratic elections and the immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to

ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)
God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi savages, while desecrating all of Humanity by fighting against a just rule of Law, (instead of protecting America's America), forces the continued REAL WORLD sacrifice of true Liberty, until the bushmob gang is brought up by US for war crimes., as the 9/11 perpetrating, super evil as ungodly, demon antiChrist in disguises. (I very much would feel welcomed to play my part in those public proceedings.) Hmmm.. maybe CNN or CBC can become publicly convinced we should have our own news programs on what's truly happening?, to compete against the 'evil bushites' in this competitive free market place of ideas? Who knows..

Take care of the business, by getting US in on our news-casts., as these principles here standing in words, are a dreamers dreams, just waiting for You to bring to

reality., by standing proud, strong, and forever free as
a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America
is America. You, as an American, have a sworn right to
demand for America, bush not be allowed to further
miscarriage Justice blindly back to the dark ages, by
not correcting himself on behalf of established
publicly, where American intelligence stood, stands, and
ultimately strives. Freedom is not protected by letting
the "bad guys" go, to further toll more innocent lives
for criminal sacrifice. Sometimes, the real simple
things are over looked as profound meaning. The Magna
Charta of 1215 states that a freeman should not be
imprisoned. Simple right? Not for the bushites who
side instead to faith in pope bush, who deliberately
unminds a timeless universal principle that exists also
in the 1700 B.C's, Code of Hammurabi, where all
individuals are to be found equally under the Law, to be

fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition. The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or

don't side to help a plead for mercy regarding yourself
truly included.

Can the bushites possibly think, we're all not ever
possible to stand together without a true Loyal
President, or, make believe King named Johnny, on the
facts firmly established regarding the treasonous war
monger antiChrist lying to Patriots dying US as victim
for?

America, I will now leave the rest of Our job in your
hands for the time being.

Yours again,

The Real National Security Threat: The Bush Economy
http://www.alternet.org/story.html?StoryID=17547

/ / While it is unlikely, it is not totally impossible that the Bush
administration's policy of locking up anyone called Mohamed and
favoring Israel might drive the Arab countries to try an oil embargo
again. It is, however, quite feasible that they may simply decide to
follow in the footsteps of Saddam's Iraq and demand payment in Euros
in the future. The math is simple: if they had done so a year ago,
for every 85 cents (one Euro, at the time) they put in the bank,
they would now have earned a $1.30. \ \

Your State-of-the-Union Address

/ / It is important that you be completely clear on timing. While the Newsweek report of February 24, 2003 was the first to publicize Kamel's testimony that the weapons had been destroyed, US and British intelligence (as well as UN officials) had had that information since August 1995. If you were not given a full account of what Kamel said before it appeared in Newsweek, your advisers should certainly have given you the whole truth when Newsweek did break the story three weeks before you sent US troops into Iraq to destroy those same weapons. If they did not tell you, heads should roll. If they did, it becomes necessary to explain why the information from Kamel had no apparent effect on your decision to launch the invasion. \ \

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

All for our ability to communicate freely

There is one thing that is strangely absent from our news coverage as unbiased bushwhores who are actually devaluing under the tyranny of the evil antiChrist, Our Mr. Bush Jr., and that is..

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

I think Patriot Americans would be thankful for Canadian friends and family who are supporting American troops by pointing out with no contention but for censorship, that American soldiers are being sacrificed for no known good reason under the demon antiChrist, Our Mr. Bush Jr., again. The bushites tell US they wish to bring freedom on the premise that Saddam wasn't dis-arming or cooperating with US, a naked blatant lie, an attempt to excuse bush's murder rampages as a terrorist against Our families as the innocent, Ourselves represented by thieves that are doing US harm by stealing our value.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

Does a bushwhore devolving society where we murder ourselves on irrational suspicions to steal our worths to give to the bushmob as victims, sound like a bad preposition to you too friend? What is bush's panacea of packaged eternal freedom absent Justice mean truly as measured to you judged unfairly as the general Public unawares? How EXACTLY is the bushmob going to liberate the oppressed and disenfranchised without expressing public knowledge on the subject on indivisibility? See? If bush actually had evidence to truly believe Saddam does in our present day have control as in political possession, weapons of mass destruction, sold to Saddam illegally by America to gas the enemy with the then, full blessings from the great satan, bush would have provided as such to the UN to be legitimately concerned for "The People" in Uzbekistan included, right? He would need to know where abouts he comes to understand so, no? Mr. Bush Jr. couldn't be sure enough otherwise to toss cowardly American soldiers as worthless without meanings, to be sacrificed as he is doing for financial private profit paid for by the

victimized public, could he? Soldiers so valueless to Bill Hemmer, to not even speak out for themselves dying at CNN headquarters. See, Bill knows bush's private business partner, Amad, provided funding to 9/11's Atta, to criminally secure Enron's pipeline through Afghanistan by murdering highly successful American business people. But we can suppose Bill is scared as a cowardly unAmerican bushwhore, and would rather see the true evil doers hiding in America behind the flag, get away un-apprehended to further toll good Americans for sacrifice.

All the actual evidence we have concludes, Iraq worked directly to have the stock piles of WMD destroyed, provided the paper work, the destruction sites, and the individuals involved in that process. Inspectors had 100 percent access, to go anywhere bush, the false accuser might suggest without having to murder anyone from our family. Now, the disarmament process has been sabotaged, and the terrorist threat against America has increased. So, Iraq was in compliance, and because of that, the bush demon, in violation of article 2 of the UN Charter, has murdered thousands with war crimes as a terrorist recruiter. Making matters worse, incompetent bush even had an opportunity to liberate Our Iraqi family on world wide television, with what he and tommy franks would fantasize for our ailing economy by someone else to do the clean up chores. But, is it the Universal health or educational system, or public banking in Iraq that is not down to par as the american nazi fancy that bothers bush so much?, such as laws against discrimination for all persons, and evidential findings being a requirement to determine the measurement of Freedom for Justice to work. The People in Uzbekistan, are the People in Iraq, are too the People in America where Ashcroft and rumsfeld tell US publicly, they wish to factually deprive Justice for ourselves as equals. When questioned, both, Ashcroft and rumsfeld have reiterated the demand that foreigners, like illegally tortured innocent prisoners, don't deserve the same protections that the American Bill of Rights grants to all People, therefor, they as bushwhores wish to treat others unjustly by letting themselves, as would be nazi criminals, get away unpunished in devolving bush's america. Right? American war criminals are treated too good by the bush administration in all honesty then? Karma is real world existence, as life is politics ordered through chaos. If the right is Just as organized deduction, the system would treat all as equal principles. But again, bush

spew Iraq could be prosecuted for destroying their own infrastructure, but those same laws don't apply to him being above God, or anyone else in his administration of wrong doers. It was on publicly verifying the Justice process when the bushmob, as war criminals, turned against the UN, indeed the world community, and began murdering our families globally as war criminals with depleted uranium dust for the next 4 million years or so as bush victims, who will die suffering the criminal bushite assault for generations, if an American Patriot victim were man enough to execute the unarrested American cop killer, our Mr. Bush Jr. yesterday. If bush isn't even destroyed by the Love for Life in godless talkradio america, he, as demon will as MSNBC reported, unjustly continue to murder millions in sixty countries as the Son of Man's enemy being the antiChrist, the most hated and despised excuse for human existence this planet will ever know factually. Just ask Buddha. While the demon bush supporters, who advocate blindly murdering our families like US teachers and students through the censorship of our screams for Justice as Humanity, who also advocate poisoning American soldiers with cancer and warmed soft drinks, would only simply tell us cheaply, it is because their false deity bush, secretly knows better than everybody else put together, including the FBI and CIA, (Better than the mighty You even on everything?), therefor, they don't have to THINK(!!!) And see?, alas, the mindless bushwhore SLAVES neglect to mention as chatty personal failures grasping for the authority of blind generalized denouncements of our unique, independent selves, that when their bush demon does go public in their devoted namesake, (what with bush's evidence Saddam was six months away from owning a nuke, Laden and Saddam soirees, or Saddam gassed his own people) he, as demon antiChrist, exposes his true contempt for human life while falling as traitor protected by the always doubtful, intolerant, ignorant, cowardly and criminal, as censor advocates to stop life's will. I've been telling loyal dumb functionally illiterate Police officers and Soldiers to destroy the two prime 9/11 suspects, the unarrested, bush and rumsfeld, ever since the bushmob declared Omar's interest in nabbing the 9/11 suspects by following the criminal leads, as a hatred for American Freedom unthinking, and then continued on to murder approximately 100,000 innocent people in Afghanistan, now with the lucky survivors left worst still off, with bush's commitment to not offer any aid in nourishment, but as terrorist students, heroin dealers, or Enron propagandists left forgotten by

American, er... CNN interests as dictated through bush ratings.

MOHAMED ELBARADEI: "At this stage, the following can be stated: One, there is no indication of resumed nuclear activities in those buildings that were identified through the use of satellite imagery as being reconstructed or newly erected since 1998, nor any indication of nuclear-related prohibited activities at any inspected sites. Second, there is no indication that Iraq has attempted to import uranium since 1990. Three, there is no indication that Iraq has attempted to import aluminum tubes for use in centrifuge enrichment. After three months of intrusive inspections, we have to date found no evidence or plausible indication of the revival of a nuclear weapon program in Iraq."

Now we witness american nazi soldiers using Iraqi human shields just outside of Basra, committing further war crimes by blowing up powerplants, residential buildings, and bombing surrendering Iraq forces lying dead in a ditch with white flags sticking up. Indiscriminately murdering US good honorable people, and for what? When the nazi soldiers finally stop murdering our families irrationally as criminals, then what? If the nazi bushwhores know the dictums for Freedom, why don't they express them now instead of unjustly hurting God as all people? These bushwhore acts are crimes against ALL PEOPLES, and should be recognized publicly a such. The evil bushwhores can't vocalize their mindless support as cowardly betrayers to the human cause, and instead, censor our voices on the public airwaves while they freely propagandize our communities on the benefits of pillage and murder as terrorists under the antiChrist, Our Mr. Bush Jr... The war profiteers have already taken billions from the American People. Cost is paid by the uneducated illiterate tax payers as collateral damaged, and the war profits go into the private pockets of the smirking bush mobsters while killing dumbfuked american soldiers, as traitors to the American cause, freedom and Justice for all. God's son as creator included. Anyone who supports evil bush's war crimes against our family by censorship, then murder, is the enemy of America, and on all that she stands strong united by God unheard from still suffering.

Johnny Wizard

Hello,
I am looking for a scanner case vinyl or leather for my Pro-95 scanner
It looks like Radio Shack is no longer selling them?
Can anyone point me in the direction of where to get one of these or
knows a good aftermarket one that fits well at a reasonable price?
Could you please e-mail me directly as I don't get a chance to check the

Unfortunatly Scan Control does not control the 895, it just programs it (I know 'cause I was one of the beta testers). The only trunking control programs out there for the 895 - and running them on XP is dicey at best - include Scancat, Winscan, Radio Manager/Trunk Manager. The 2004 edition of Radio Manager is interesting; it works just fine in the trunking mode, but doesn't work at all on my early firmware 895 in conventional mode. PC895 is the grandfather to Winscan, and there's another one - Freetracker - that's available on the 895 Yahoo groups. But if PC895 is working for you, it *might* be interesting to try Winscan 2.1. In fact, I'd post some queries about Winscan and XP compatibility on the BC895 Yahoo groups and see what gives. Personally, I think Winscan is about as good as it gets. 73s and GL...Mike

Frank, you need to lighten up.

No one is being forced to pay $20 for the item. The seller is free to ask whatever price they like and the buyer is able to make up their mind as to what they want to pay.

What is so crooked about that? The seller hasn't tried to deceive anyone. Please point out the crooked part of the original post? I'm just unable to follow you.

Honestly, I thought $20 + shipping was a little high but maybe he's starting high and will take the best offer.

He didn't say "give me $20 plus shipping or I'll come kill your family!"

Folks,

I am relatively new to scanners, so please bear with me. I am interested in purchasing a scanner for use primarily in the car while highway driving in California (especially I-5, I-80, I-10, and I-15). I would like to be able to identify police cars.

I am also interested in using it in my home (I live in LA) to monitor police activity in the neighborhood. I understand scanners are useful for this task.

In particular I'm looking at the Uniden BCT8. Is this a useful scanner for my needs? How effective are scanners in alerting the driver to highway patrol cars while driving?

Would the BCT* scan the frequencies that I need. I notice that it doesn't cover digital, but I'm not sure if that is a problem or not.

Any info is appreciated.

Regards

Greg

My guess would be that a scanner would be off little value in alerting
you to where a HP car might be unless you happened to hear that he was
working an accident at a certain location.

A CB radio transmission from a trucker will keep you better informed
as to the "20" of a smokey.

That's a big ten-four good buddy.

The Uniden BCT8 would be good for a mobile scanner as it has less depth than
the BC780XLT, but their alert technolgy
is a bit questionable. A patrol car could be off the highway on a side road,
or just parked in an area in a rest stop for work,
and working an accident, or just on the side of the road at the rest stop,
the patrol officer busy conducting an investigation of
a fresh box of Krispy Kremes and coffee.

How effective are scanners in alerting drivers to highway patrol cars? It
depends on how you listen, as you'll need to listen
for unit numbers and locations.The BC8 wouldn't be that dependenable.

As for the scanner itself get a Uniden BC780XLT or a Radio Shack Pro-95
portable. I have both and have one or other with me when I travel.

And keep within +1 to no more than +10 MPH of the speed limit.

There's a bear out there.

I agree.

The 780XLT is a great scanner.
Very sensitive and has many options.
The BCT8 seems very low grade.

Of course you're free to warn people. It was the name calling that seems to have received the biggest reaction.

To quote Frank:

a crook."

You were calling the original poster a crook. He might call you an uptight asshole. If he were that sort of person. I shouldn't speak for other people though.

Sadly Frank, you and I have more in common than is appears. I've complained for years that Amateur Radio and Scanner hobbyists are the biggest tightwads in the world when it comes to selling their used gear. You need to come to the local HAM Radio flea market we have here in the summer and call all those people names as well Frank. That's where you're needed. You could get a bullhorn and just yell at everyone from the roof of the hotdog stands. Those guys will charge $10 off full-retail for 10 year old used gear. I just think they're going to be hauling all that old gear back home at the end of the day. You could help these people by calling them names and telling them exactly what they're allowed to charge. You'd be the hit of the flea market in no time!

Plus it will get you out of the house and away from you "radio" friends. It's time to let sunlight reach your skin and make contact with other humans.. in person.

/ / Whenever President Bush is now confronted with an
unacceptable reality, he either changes the subject -
is steroid use really more important than the environment?
- or expresses confidence in his certainty. "I'm absolutely
confident that..." he'll say, as if the issue is his
determination rather than his conclusion. \ \

It's his faith infinitive as the antiChrist, where he
has hypnotized the dopey with merely the power of
suggestion, that has brought him to US as foolishly not
conceiving, or most importantly, truly understanding.
So, do we feel sorry for his ignorance as fallibility we
are all prone to own as the human rendition? No. But
for stupidity thinking he could murder US as the
innocent to steal our free values, and just get away
with it by lying to no one continually, is where the
Lord makes our stand for God unseen as miraculous.

The demon bush dictate is not exceptable for my just
little man universe. I knows too much about freedom to
go on dying in bush's forsaken place as innocent
sacrifice. With corporate america's unarrested demon
bush forcing my hand, I would decide to defend by
concluding, he is truly, the enemy of all America.
America: weak without leadership, yes, but not as dumb
as some would have us believe. When is it that we feel
sorry for the thousands of lives bush's deliberate
actions of mass murder have taken for no good reasons?
Their ain't nobody to defend america's overlord, but
through corporate censorship of the reality of who's
really dying for the demon bush liar. I'm the one
anyone would ever have a legitimate fear of getting on
the wrong side of, and if your not in the process of
attempting to get away with murdering some defenseless
family for nothing but to rob from, to each, his or her
own, mostly, right?

study (shelved by the neocons) accurately foretold the mess we
find ourselves in today.

So, tell me again why it is that Tenet has to step down.

Perle is right when he says:

"I think, of course, heads should roll. When you discover that
you have an organization that doesn't get it right time after
time, you change the organization, including the people."

Heads should roll, alright: starting with Perle's, and don't
think he doesn't know it. That's what the chutzpah strategy is
all about: brazening it out.

...But if you look at the National Intelligence Estimate,
a document prepared by the White House with input from all

agencies, the section on Iraq, which postulates a whole arsenal of active WMD, is filled with dissenting footnotes authored by the very agencies Perle would purge:

....Dick Cheney's henchmen were feeding both the President and the country a strict diet of pure science fiction and fantasy authored by the Office of Special Plans: in a very short time a whole new genre of speculative fiction was spawned by the neocons.

...Mired in scandal, and hardly a team player of the sort that is supposed to be typical of Team Bush, here is someone who openly calls for the resignation of top officials and refuses to take any responsibility for the failure of policies that he championed. \ \

W's Reality Gap
http://www.alternet.org/mobile/story_mobile.html?StoryID=17907

/ / [of bush's falsehoods to Freedom's America] his policy process is more catechismic than empiric ï¿½ instead of facts leading to conclusions, conclusions lead to "facts."

Second, he is openly uninterested in learning and reading ï¿½ the Bushes "aren't serious, studious readers" he has said, also admitting that he now reads headlines, not articles. The point is not that he's stupid, only that he knew less about policy and the world as a presidential candidate than the average graduate student in government. Lacking Eisenhower's worldliness or JFK's intellect, however, Bush is prone to grab onto a politically useful intellectual framework like a life preserver and then not let go ï¿½ whether it's Myron Magnet's sour interpretation of the 60s in "The Dream and the Nightmare" or Paul Wolfowitz's Pollyannaish analysis of the likely consequences of an American invasion of Iraq.

The result: the most radical, messianic and misleading presidency of modern times.\ \

When the ï¿½Big Lie' Becomes the Truth
http://www.globalresearch.ca/articles/CHO402B.html

/ / What these revelations suggest is that President Bush has now been exposed as an outright liar and war criminal `from within', by several of his trusted appointees and close collaborators. And that he's going to be running for office, in November 2004, with this record. \ \

It's like some ultimate battle of faith between
freedom's true as life call censored, and the criminal

intentions of flagrant bushite evil, as though bought
for already by news programing. There ain't no real
King and Lord of Creation who calls the media up alone
as John again to protect our throne, so instead, give
your life and country unjustly in silence to the lawless
bushmob in unholy sacrifice for plunder, as your,
un-chosen dictator.

King Johnny wants America's mass murderers, demon bush
and dummy rummy immediately arrested for public trial,
or executed for nearly escaping the crimes starting on
9/11 in New York City.

It will be done, in our kingdom to come. ..or.. maybe
I'll decide to just give up on this whole show for now,
and go back to the rehearsal stage... Doh!

U.S. pays millions to discredited Iraqis
http://www.twincities.com/mld/twincities/news/nation/8010694.htm

/ / The letter, a copy of which was obtained by Knight Ridder,
said the information went directly to "U.S. government
recipients" who included William Luti, a senior official
in Secretary of Defense Donald H. Rumsfeld's office, and
John Hannah, a top national security aide to Cheney.

The letter appeared to contradict denials made last year
by top Pentagon officials that they were receiving
intelligence on Iraq that bypassed established channels
and vetting procedures. \ \

Bypassing America as undefended freedom,, sacrificed to
die for slavery under the unconstitutional as blatant
evil, bushite decrees. Demon bush tells America, and
indeed the World, since 9/11, evidence will no longer be
a requirement to convince US who is a mass murderer, and
corporate news america sells on without the human
opinion present evaluating his true asking price. Man,
that demon bush is sure one true evil bastard when you
think of what he, rummy, and Ashcroft is stealing in our
names censored through nazi fascism. [Granted, I am
literate.]

God or no God, I don't like that demon antiChrist, Our
Mr. bush Jr. very much.

Democracy How?

/ / "The database is comprehensive, extremely detailed, and at least 97 percent accurate, with every safeguard possible to cross-check the records," said Ahmed al-Mukhtar, a Trade Ministry official who is overall director of the ration system. "If you gave me one month and enough paper, I could open registration to anyone who was exiled, allow them to register, and then I would give you a complete electoral roll." Even British occupation officials in southern Iraq have reportedly endorsed this proposal. \ \

By Annan not publicly addressing this very serious issue, will not be fooling me he hasn't heard it mentioned. The families of Iraq are accounted almost entirely by "comprehensive, extremely detailed" measurements. So what the hell is going on about supporting our world community by not condemning war crimes?, Just where is Annan on the issue of an international commitment kept I want asked religiously across this world. Now.

Boy, if I were make believe King...

How the war on terror has become a war on freedom
http://www.theherald.co.uk/features/10493.html

/ / From the moment we followed George Bush into war, our certainty as a future target was assured. So, eternal vigilance is little more than common sense. Expenditure on sound intelligence is clearly essential. Diluting legal rights and dispensing first and second-class justice is is not just totally unacceptable but, in truth, another victory for terrorism. \ \

Terrorism of the worst kind for God's America. GET BUSH NOW!

--

Falling for You

Brahimi said. "We need to organize elections as early as possible but not as early as impossible."

Help me understand: Why can not Iraq start on the process of

O R G A N I Z I N G E L E C T I O N S

NOW to work towards gaining accountability for soon as possible? After June? What the... Can't we people talk while walking? Look, the future is likely coming no matter what, and what ever illegitimate government is embarrassingly stalled by evil WMD proliferator baathist bremer to steal unaccounted American tax dollars from

the "willing" victims dying, (like by bush bitch cluster dud) will still necessitate the need, to have started on the process of fair elections for our Iraq before hand. Corporate america might not care of sacrificing America to rob from, but real People are honorable, and won't reserve the scourge of nazi bushitizm a place to suffer any further if we can help it.

The bushites are sorrily, simply not qualified under the dire circumstances they've assaulted ourselves into for mugger war profitizing, as leading US to be dying undefended while failing miserably on my behalf to demand Justice as freedom is truly.

Now, it has been vaguely suggested that a, steven "you can't have public health care or he'll murder whomever for thinking" russell, or a buford "bush bitch" blount as treasonous evil nazi bushwhore, to undermine freedom and democracy everywheres in our world might cowardly attack defenseless innocent families at the polls while leaving "bin Laden" fingerprints, criminally warring to kill more American dumdums for commi Halliburton et al, continuing committing as unaccounted massive waste in America by over billing the dying People. Why would bushites do this? Evil is blind irrationality, disguised as thought out faithfully by fascists. The, nothing to fear suggestible absolute nature of non-linerality, is 99.9 percent, super fractal wowy miraculous as crazy about the fringes, (or is that bridges?). But, without Justice ruling our stay, we leave for a Heaven waiting, on a sea of madness as enemies of life to all things eternally being. Translated: We need to arrest these specific war criminals at the end of our, ready to fire rifles. Done to stop them personally, from robbing or murdering America indiscriminately as enemies to everyone. But in addition to that, (like at the same time) who says the polls can't be stretched out over several days or a week, with multiple options on submitting votes registered through the oil-for-food program? I want to know where Annan is on this., why it can't be done., and what his position is on returning the Iraqi Humanitarian aid stolen by Halliburton, or Iraqi Central Bank deposits cashed by HAS TO BE, current pirates. Annan, be a man, an acknowledge our presence as relevantly important for our world's living sake.

We had 100 percent access throughout Iraq prior to allowing bush, rumsfeld, and franks to sacrifice literally thousands of innocent lives. Who are now DEAD or DYING NEEDLESSLY as first degree murder victims, in

some bastardized Lord's name apparently.

(Quick, somebody call upon everyone to get up off their knees, God's coming to read as one person today of the unbound wonder of what it is to be uniquely ourselves within a nude sunrise grinning. To make some progress forward for a better future, we're not meant to just pray for someone else to come and stop whom from cheating who of Liberty? What is it that you can't think of? Every wonder? Who wouldn't do God a favor if they could imagine so brightly. Who's stopping you from defeating tyrant bush as war criminal, but for only yourself contained by his continuing bad example? Tell you what: let's together find ourselves of one mind on putting the bushmob behind bars awaiting immediate public trail, and I'll promise to try visiting them every year, just to see how things are developing. Or instead just shoot bush and rummy for almost escaping Operation Infinite Justice of a real American Patriot soldier's undying love for his soul brother.)

Any improvements of the current situation in Iraq today, are going to be less that what would have costed to not kill innocent people for nothing but evil bushite war profitizing at it's level worst in this history ever of all Humanity recorded. The demon antiChrist of corporate america has got to go, and he's got to go immediately as arrested or shot dead by the Patriots for treason, before he causes US anymore needless losses and grief to our friends and family. Like for the next fifty or so generations what with the plutonium being fed blindly as willed to cowardly, weak, American teen enemy bushite soldiers presently. (If we could seperate the bushites from the rest of US, this might be a good thing, but they have no real leadership to speak about freely as the dying stupidly.(PRINT THIS PAPER AND MAIL IT EVERYWHERE))

DYING like those from 9/11 did, or dying slower, like with NYC air quality as best Oz has to offer. (Harmless corporate TV tells US without opinion.) Either or even in other ways, the demon bush is truly killing God's America in Your name not heard from. Help me you idiot. You! Yes you there, reading here. I am your secret friend see?, and.. well.. the Universe needs your help desperately pal. Please? For me? ..Oh God help me your really dumb without you aren't I too? Listen: we need to talk.

We are here to save all of creation from needless death. Big deal. Your are of a real eternal nature, that

exists also, (as understood scientifically) timeless. For real. (The big bang is now. (All mass is also of not as seperate energy, then there's our gravity...)) Our possibilities for a great, better future are staggering, if we are capable collectively as individuals to defeat the "kindness" of George W. bush, the dying embodiment of evil as the very true demon antiChrist of all biblical references ever mentioned. His lying isn't just deceitful, it is downright hellish.

You know what I think? The evil enemies of Humanity, don't want US People to be recognized from being victims under tyranny through corporate cult censorship. Without Justice ruling our ways under the irrational criminal bushmob dictate, we lose as losers cheating ourselves as not worth the consideration to be free individuals.

Granted, I am an actual god familiar with the rights present within the Constitution of America. THEE God's god, here to teach the world about needless sacrifice, caused primarily, for the effects of inflated egg shell egos. As Creator, I goofed somewhere in the, order to chaos mixer. I didn't plan (it was a mistake) for Americans to be so cowardly and weak when it comes to defending their very own selves from needless death and sorrow through blatant, naked, how can you miss it, evil criminal enterprises. So, perhaps, now if I stop writing, and fake I flied off vamoosed into the unknowable, a couple people on the planet might go 'hmpht', and decide to carry on bravely, the real, honest to death struggle for freedom living without me as sorrily missed. (I as John am not anything special paradoxically.) This is fear itself, ain't nobody nowhere as terrifyingly terrifiable as this is just truly super terrific being only my simple written taughts, yet, ... I'm like.. just fiction writer, big dreamer Johnny Wizard, looking for some happiness, human respect, and a good last supper before I check out from this made by the earthling "space explorers" dungeon cell.

But who cares about me, or my great, he thinks he's so brilliant ideas? Everything's seriously a pain to him sometimes, and he talks to himself like he's the, been here and gone as eons now, King of the Universe for the holy Word from the Heavens above or something. What a poor dying fool to chance that anyone would willingly help themselves by caring for someone. ..You know, I'm beginning to not be all that crazy about the demon bush liar continuing to war humanity in my own true name also

now that I think of life in this way honestly. H-e..Y -!
(Morningstar has been accused of a lot of things, but
you'll notice, always plays fair as your rules.))

What freedom in Iraq will come that allows a, buford
blount to walk unaccosted by 'legal' services? Or where
rummy's cluster dud advocates gain silent gratitude? A
nation high-jacked by bremer's buddies who illegally
sold Saddam WMD, then the product wisely gets destroyed
as functionally useless being primarily indiscriminate
warfare, then bremer's buddies come in again and murder
untold thousands upon thousands, all because your magic
TV is letting them get away with it as considered too
embarrassing to the billionaire private stake holders.
Fuk you corporate american Human haters for not
reporting the bushites as war crime supporters.

Where in the real world are the nazi bushites gonna
demand we go to allow 'them' to continue warring the
Constitution while wearing a bushite soldier's uniform
in their dying universes of Universe? Leaderless
corporate america?, injured and dying as the unjustly
starving? What can the bushites do now in Iraq, that
they couldn't do before the needless murder of untold
thousands upon thousands of innocent people with loving
families? Before dumping thousands of tons of
radio-active toxic waste as enemies of God's children?
Only to rob, maim, and destroy God's great work through
Love. We had complete unrestricted access throughout
Iraq, and Saddam was offering the national media for
bush to pontificate, while not refusing dialog for any
suggestions.

I ask:

Can not America invite me formally for brunch, by
somehow bypassing the war mongering nazi tyrant held up
in the Oval office? I'd invite you all, but my place is
still a mess, and I'm stuck eating for survival just
now. I don't qualify for help, because surely, a person
with your talents, should have someone willing to stave
you off the, who cares about saving the world for you
buddy, laughing in all seriousness shtick. (cool eh?)

I give you my world:

To save humanity from tyranny will be accomplished
through the value of these free ideals recognized.

Isn't life grand sometimes when the bushites aren't
needlessly murdering our innocent families in your name?

I again,
will now leave
you without me,

forever loved,

Johnny Wizard - Your "other" parent or guardian advising you to immediately, by Citizen Right, arrest the President's 'cabal' in the name of the Lord, who already died for this once already god damn it, and I'm not sacrificing any longer unknown as forgotten in the absence of any true reason to our existence, I want to celebrate. I want to afford a cold brew to nuzzle on a warm sunny afternoon, at a hideaway somewhere, lost in my comforts of having few real worries, but for unintentionally offending someone for not having the time to except their generous support, or gratitude.

/ / "We need to find a mechanism to create a caretaker government and then help prepare the elections later - sometime later in the future," he added. Mr Annan said that there was "wide agreement" \ \

Unelected care taking government? What is the group their now supposedly doing? Where in the process is corporate america to simply fix the Russian generators they've been paid over and over again already for as doing nothing in The People's interests?, As unaccounted to? Where is corporate america to fly in the emergency food and provisions for the innocent as victimized? Who's care will this continuing robbery of America through war crimes further fail to serve? How can Annan gain "wide agreement", with no poll on the issue? Who personally did he talk to, agreeing to leave Iraq without working for an elected government of the People?, and who consented to give up on such dire needs? Where is Annan on the thousands of tons of radio-active toxic waste dumped by rotten rummy? Is it not an issue he should personally be addressing for Humanity, to demand an immediate clean up paid for by those responsible? Imagine that: Truly toxic as dying, American Patriot soldiers making it up to God's great Creation, by hunting down the actual bad guys, who done did crossed the wrong family this time.

Wow, now that would be a war worth televising!

/ / She would soon conclude that the OSP -- a pet project of Vice President Dick Cheney and Defense Secretary Don Rumsfeld -- was more akin to a nerve center for what she now calls a "neoconservative coup, a hijacking of the Pentagon."

...I mean, these people have total disrespect for the Constitution. We swear an oath, military officers and NCOs alike swear an oath to uphold the Constitution. These people have no respect for the Constitution. The Congress was misled, it was lied to. At a very minimum that is a subversion of the Constitution. A pre-emptive war based on what we knew was not a pressing need is not what this country stands for. \ \

No End to War

The Frum-Perle prescription would ensnare America in endless conflict.

By Patrick J. Buchanan
http://www.informationclearinghouse.info/article5712.htm

/ / And if God accepts the existence of evil, how do Frum and Perle propose to ``end'' it? Nor can any nation ``win the war on terror.'' Terrorism is simply a term for the murder of non-combatants for political ends.

...If it is America we defend, An End to Evil makes no sense. The Perle-Frum prescription for permanent war makes sense only if it is the mission of the armed forces of the United States to make the Middle East safe for Sharon--and here we come to the heart of the quarrel between us. \ \

As you can probably guess, me and Patrick might have some good politics to debate on that I would disagree with him about, but I can't save enough praise for reading this most recent informative and often entertaining take, while reviewing about the Frum-Perle controversy.

I think we can all agree, both Perle and Frum are now clinically deranged by hanging on to George W. Bush for so long in dumbness. Do they qualify for some sort of special treatment programs under their respective health care plans? Strange days where we see the limited words of a mind bound for slavery. All I wants is the war mongering mass murders arrested for treason against the flags of Freedom everywhere, is that to much to ask from ourselves still God asks? (You know?, I think, i'm getting better at this!)

...Mr. May's assertions raise some troubling questions. Exactly who were the "insiders" for whom this was "something of an open secret?" How did they obtain this information and why did they pass it on so readily to someone like him?

...Moreover, the information was not given to him under any formal agreement of confidentiality, the likes of which exists between a reporter and his source. Washington Post defends Bush, Iraq war against Paul O'Neill's

public claiming that he had not ``made up his mind'' about war
with Iraq, that diplomacy would be pursued, that military force
would only be a last resort when all other options were exhausted,
etc., etc. O'Neill's exposures, including the existence of
documents, prepared months before the September 11 terrorist
attacks, that outlined plans for a ``post-Saddam'' Iraq and the
handing out of lucrative contracts, reveal Bush's performance as
a charade filled out with falsehoods. \ \

New Moon

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the business locations. The evil unAmerican cop killing bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

An oil-for-Iraq program needs to be reestablished, but transparent to all as addressing the immediate emergency needs of Iraqis. Private, in the secret back room with the bushmob nazi bankers, and their private inept collaborators flustering as international fraudulent behaviors, just wont do., try as bush might to murder perhaps millions of Americans uncovered by his criminally enforced, reduction in health care coverage extravaganzas.

THE ROVING EYE IRAQ AND AL-QAEDA
Part 1 - The usual suspects
http://www.axisoflogic.com/artman/publish/article_5146.shtml

/ / This latest US intelligence, though, makes little sense. For starters, al-Qaeda pigeons are highly unlikely to move around with computer discs in their briefcases: since early 2002 a disabled al-Qaeda has used women couriers to deliver strictly verbal messages. \ \

Kimmitt in collusion with the bushmob perhaps? To cover up an investigation set up to encourage the blind murder of America as bushite by attempting to divide all the People of Iraq as Iraqi?, na... not in a tribal based, enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all the bad guys for thinking, the blind bushite bigots would conclude illegitimately., and I would say to yourself: no, the People with equal rights to stay united for good times, are a people sworn to uphold law that serves our freedom's best. Iraqi assets are not bush and bremer's right to steal without question, nor either, American generosity swindled by WorldCom, Enron, Dutch-Shell or Halliburton is the final, be all answer

to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. The evil bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

Perhaps, he is.

Another American soldier owes me a beer, or will be dying to steal life from themselves as sacrificed for the evil criminal dictate of Their Mr. bush Jr.. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good

guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi Halliburton pocketed Humanitarian Aid? Go ahead, ask'em?! Then ask'em why they die as cowards by rummy cluster dud for the bushmob to rob their own direct families left unprotected? Ask'em! You know what they'll tell you? They're not happy about these bushmob war crimes truly destroying America in America, "freedom", "democracy", Johnny Wizard or otherwise., Or instead they'll mumble something incoherently while jaunting away to murder some one found defenseless, or innocent to pay further while dying to slave under the criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring the innocent by stealing your human values truly.

We need to see an apology to come from America, an apology to Humanity for this carnage waged unnecessary, but for these contemptible war profiteering practices as direct assaults to all as God is. Assaults that we have been unable to remedy by openly communicating to bush's secret White House, rumsfeld's secret Pentagon, or Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest of US, by arresting bush and rumsfeld immediately for high treason?, or will they cower and DIE as the innocent, in false gratitude to the lying traitors bushmob? To with their dying breath proclaim unattested, to be ridding the Universe of their continuing criminal behavior.. a.k.a. evil?

Evidence is a must to establish a crime scene provocateur, to deny such privilege is to deny freedom

be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no struggling democracy entirely.

Look, the thing about God coming down, and having it out with humanity on some various critical issues, isn't like going to happen, it is doing.

We had complete unrestricted access throughout Iraq prior to murdering any innocent child in america's name.

These verbs will strike that antiChrist demon down for ever and a day, and if I've gone, faded away, these words will still remain,

till now we meet again,

as you were,

Johnny Wizard

/ / So, What Do We Call For?

1) We call for an end to U.S. occupation, and withdrawal
of American troops. Because the U.S. invasion destroyed
the governing capacity in Baghdad and undermined security
for civilians throughout much of the country, the withdrawal

of the U.S. forces should be followed by a temporary combined mandate for the United Nations, Arab League, and OIC (Organization of the Islamic Conference) to provide direct support for Iraq's reclaiming of sovereignty. That would include election assistance, humanitarian and reconstruction aid (including control over all international funds, including those coming from the U.S. Congress, designated for Iraqi rebuilding), and peacekeeping/security deployment. \ \

Ann Coulter - "Liberals just call Republicans names."

Her suggestion is against the common sense of a literate segment of humanity who knows something is a farce about this tart, and for me, entertains for words to gain a better understanding for proper acknowledgment.

Coulter is bigot rousing on purpose I think, just to get all the american corporate monetary gratitude, in selling herself not present as a significant baitor unaddressed publicly in our corporate news circles. She sells excuses to cowards, of not addressing specific acts of treason committed by individual traitors, like rummy or Ashcroft, and instead, suggests all people have no ability through bushite america to recognize themselves being robbed their freedoms or murdered directly for the furthering of the evil bush demon war lies.

Interesting.

A repuglicon nazi bushwhore, who will say anything to allow bush to steal further from America, is not a tried and true Republican blue collar. Is it in Ann's contention, that all Republicans can't imagine themselves having any independent opinions? Or, is Ann saying that every Liberal blames Republicans of every stripe throughout History instead lawless bush personally for sacrificing the nation as evil incarnate?, committing to murder individual New Yorkers as America sacrificing, then further acquiescing to needlessly feed toxic waste to all American soldiers, while loyally blowing themselves up dead as individuals to pieces with sexy rummy cluster dud, all for being blind disciples of the unAmerican bush demon antiChrist, their ungodly evil false-deity as enemies of God's love, America, and our good names?

Naming the repuglicon demon bush a terrorist recruiting cop killing heroin pusher, who played a central part in

the murder of thousands of New Yorkers is well established factually, and publicly confessed as all planned to act upon before hand. Who says? MSNBC's Jim reported with the White House, as a 'top secret' [Oops, deceived America wasn't suppose to read this one Condi] strategy of not following the 9/11 crime scene evidence, and confessed as 'fully implemented'. A General Ahmad plan to blame bin Laden as innocent of to secure invasion of Afghanistan. For Enron et 'al, the treasonous g-e-t-t-i-n-g . . . a-w-a-y. ... Pension thievers. Remarkable to say the least.

Anyway, solid, documented evidence including the circumstantials, like cheney's "The Dabhol Working Group", Niaz Niak, and the quietly contacting of allies publicly to attempt legitimacy of faked collusion, as such, with rummy's Pentagon arranging a same-time, what if a 9/11 occurred plan involving everyone misled, like also dummy rummy's P2OG, where dummy rummy writes to commit terrorist acts against our innocent families, he prefers if any connections have to be made, they be made with the widest banner of "The Pentagon", as to hide himself from corporate american news scrutiny, who instead will report it as, the Pentagon isn't speaking about only rumsfeld's high office involved in blatant treason, and naked evil doing. (Also, to succeed in assisting in robbing the Central Bank, and museum, the nuclear facilities containing radio-active contaminants were left unguarded, as not centrally relevant to franks why soldiers were told they're still sacrificing their lives for. "Duh, why are we here to kill good people needlessly so the bushmob back home can further rob our undefended families bro? Bro?")

--

This is for all to agree settled as official History.

America devolving into the criminal tyranny of the evil bushmob is happening. All the while, we witness, the LEADERLESS nazi bushite soldier cowering as cowardly sell outs to their very own friends and family being robbed back home, left undefended through blatant over billing as UNACCOUNTED, leaving their own sons and daughters to dutifully eat plutonium, and going further silent when it comes to rumsfeld and franks needlessly dropping thousands of land mine cluster bombs to murder us people indiscriminately, which, kills their own

aplenty, in a more way than one knows. Karma. (rummy's pentagon is misleading soldiers on how many have so far died to allow Halliburton to criminally steal humanitarian aid from The People, as one example,) Again, as bushite fascist nazi vermin, they let those responsible for destroying America through the bushmob war crimes, still sit in the, for sale freedom captain's chair, high-jacked from US true Loyalists, attempting to get away the bushmob is doing from 9/11, by going real fast .. nowhere.

Second, if Liberals include whomever, how could Ann possibly assess that all would consider calling ourselves anything but, unique as individuals? Bizarre.

The American Constitution is our souls included in those timeless thoughts of Justice for all as The People. The bushmob is destroying freedom by persecuting the innocent as terrorists, when they, in AMERICA'S NAME, throw out the concepts of Justice for any. No publicly understood evidence to form our conclusions, is a corporate demand your faith be in the unjust bushmob 'cabal', and not in Freedom for all through establishing the actual "bad guys". Closing the public criminal investigations on 9/11, is a critically essential part documented as the evil cabal's "top secret" criminal treason plans, put together prior to the murder of thousands of American citizens. Prior to the event as hidden question, and, confessed as never considered. Ya, right.

Playing to Win

Bush declared, "and he wouldn't let them in. And, therefore, after a reasonable request, we decided to remove him from power."

So, there was indeed no imminent threat posed by Saddam to Amerka, and inspectors had complete unrestricted access throughout Iraq without delay prior to the, bush demon's further war crimes. So, what was the reason for all the pointless mass murder and destruction again? Oh right.. to sacrifice American soldiers so terrorist bush's war profiteering can feed off themselves as family without leadership present as spoken for. Hey no problem if Bechtel or Halliburton never actually gets anything done, or at a good price after their magic trick "pay here for what?" commissions eat up most of the investment, it's only the dummy American People bid payers again left unaccounted to DIE intentionally. The bushites could make more killings for decades to come, while flogging the now desecrated American flag as the new bushmob's being intolerance, greed and true contempt for all US as Humanity. US, a dying dream that once was the great American way of living; now war crime bush's personal enslavement for global tyranny.

The devote bushites tell a Loyal but dumb Soldier to quietly eat plutonium and get blowed up by rummy cluster dud, because, it's harmless. Again the marines have got to come in and save our day, by arresting bush and rummy for 9/11 now, with truth as the all time word of God exists within yourself included. Look, don't think I'm gonna fly down to Washington like some comic hero, and arrest the entire bush administration, going through them, one by one from their holding cells, on where all the stolen cash and American values went all by myself.

GOD NEEDS YOU

All the deaths of American Soldiers in Iraq today, (like the People who died for the bushmob's 9/11), are caused from their leaderless weakness to not face bremer and the bushmob as war criminals continuing to transgress in America's name high-jacked.

Mr. bremer fired Iraqi school teachers, and hired up Saddam's secret service, those, who if any, would have closer relationships to charges of criminal impropriety in the name of the baathist banner, than any other group would be. If an American soldier in Iraq today, feels those from the Saddam Baathist regime should face American Justice (the real way by thinking) why then, is bremer not behind bars awaiting his public court appearance? Mr. bremer as the director of Kissinger Associates, is as, directly tied to "CRIMINALLY"

providing Saddam his WMD knowhow. The first
"Iraqgate".. [I apologize as Creator for being
partially responsible for this worse than B movie but
true plot line scenario, however, looky here!, there
is so much more to believe!!!]

The bushmob tricks are too cunning to comprehend, see?
Again, for those who can, bush must be stopped from
murdering American Patriots for no good cause, because,
it's really getting US royally miffed way up here also
as the true beings actually committed to Justice as
Freedom for all. That's all folks.

/ / But active and retired CIA officers kept warning the public and
media (including this writer) that intelligence on Iraq had been
deeply manipulated and politicized by a cabal of pro-war
neo-conservative ideologues in the Pentagon and the vice
president's office.\ \

/ / But the Pentagon's OWN energy support center pointed
out that it also was delivering some gasoline to Iraq -
for only ABOUT $1.00 a gallon. THE PENTAGON'S audit
agency then asked halliburton officials for internal
documents to justify its pricing - but the officials
refused. \ \ (Not Democracy)

Imagine this is why the bushite soldier states the
Humans must not be allowed to disagree with anything the
bushmob in Iraq does, because then we'll all know
together how pathetically weak and cowardly they truly
appear as criminally acting with such betrayals as an
ungodly evil tyranny, without any true leadership to
speak about. Robbing their own nation of America as
immediate family in the process. Dying. All for
intolerant war monger bush's hatred for the American
dream, and contempt for all human good will as kindness.

http://www.alternet.org/story.html?StoryID=17671

/ / The Corps unilaterally issued a waiver of
Halliburton's requirement to provide "any cost and
pricing data." The Corps says it issued the waiver at
the request of Halliburton. How convenient. \ \ (N.D.)

Just another PUBLIC bushmob act of sedition against the old red, white, and blue, to sacrifice an American Patriot as measured worthless with. So American Soldier, what are you going to do for US payers being robbed in the open by the bushmob in Your dying brother's name like that?, as one American Citizen censored from speaking publicly at length like all the rest of US are also in corporate america? Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

/ / Steven Russell said that "protests are not authorized and that participation in protests is punishable." \ \

/ / Steven Russell. "These People have always hated US in this area. It is not surprising that they hate US." \ \

He ain't kidding me he is completely unqualified to hold any leadership position. A real de-generative paranoid delusionist, mared likely early on from corporate neglect he suffers still from. He is what is referred to as a bigot, and likely therefor, a probable racsist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the

People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too, Amerka. Haven't you heard? Bush's Amerka will be freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

/ / commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." \ \

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?
An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)
Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even

baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian Aid giving illegally to double biller commi Halliburton. But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11. You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. -ba)

Communicating knowledge is powerful stuff let me tell you. (Roar) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with

perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and implements to not work for public criminal investigations regarding the murder of thousands of American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly,

and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

This whole Britain Blair thing is so disturbing when parlayed with the facts outlaid. Look, MI6 (C)

confesses the 45 minute thane was really just based on how long it might conservatively take for the Iraqi military to get small caliber weaponry, like grenade launchers, to anywhere along the Iraqi border. (With an additional report alleging MI6 obtained those timings from an out of date Russian military manual. (Likely therefor, a bit of a brag)) If that is not 'sexing up' by the devote bushite Blair warranting his immediate resignation he promised, nothing is. Huge penis shaped nuclear warheads, as apposed to a sweet pea shooter aimed at space invaders? Hutton should be considered for treason when you think about the time spent privately reading the 45 minute, Weapons of Mass Destruction thane over and over again, never mind the fact he is blatantly, nakedly, attempting to cover up the murder of a Brit. (The British can't be played as stupid collectively as bush's America, because they're not. Kinda like Canadians, Norwegians, the Swedes, Belgians, France, and most other developed, and semi-developed nations. Hundreds of countries, comprising near 7 billion People. (Thousands of millions wiser together, than Americans without public heath care) US: that Ashcroft, bush and rumsfeld dictate by ungodly decree, are not of true Human values when talking about protecting our Justice and Freedom ruling our ways.. into the mystic. With King Johnny somewhere partying not stop with women, wine, and song.)
snp

I ask Humanity, shouldn't Annan, if anyone, be speaking up scientifically on American soldiers eating rummy's radio-active depleted plutonium, while being blowed up by landmine cluster dud? now that I come to think of it... how is this to fit in any public American school text book without mentioning the dying for nothing as evil bushites part? Can't fit without some revolutionary process of evolution to the betterment of America as dreamt of by big picture planning, no?

Now, can someone, at least, lend me some credit for the time being?

To you, for now,
I bid,
adieu.

/ / Except that the United States has absolutely no intention of actually getting out of Iraq. It wants its troops to remain, and it wants Bechtel, MCI and Halliburton to stay behind and run the water system, the phones and the oil fields. \ \

Never ever land more like. Imagine that: Arabic WorldCom phone bills, Halliburton gas bills, with the only store "legally" open to US public will be Bechtel, who will demand through bushite tyranny, you pay your wages for something unjustly over billed as, but put together at less than five dollars a day wages offered, being as the only jobs available through not publicly accounted bushite middleman directly chancing the whole country of America as undefended financially., extending "their" risk to do nothing; by the further needless SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly dying WORTHLESS WITH as da dumdums. Armed American Soldiers should be bravely going after Baathist bremer with DEMANDS for immediate democratic elections and the immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to

ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)
God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi savages, while desecrating all of Humanity by fighting against a just rule of Law, (instead of protecting America's America), forces the continued REAL WORLD sacrifice of true Liberty, until the bushmob gang is brought up by US for war crimes., as the 9/11 perpetrating, super evil as ungodly, demon antiChrist in disguises. (I very much would feel welcomed to play my part in those public proceedings.) Hmmm.. maybe CNN or CBC can become publicly convinced we should have our own news programs on what's truly happening?, to compete against the 'evil bushites' in this competitive free market place of ideas? Who knows..

Take care of the business, by getting US in on our news-casts., as these principles here standing in words, are a dreamers dreams, just waiting for You to bring to

reality., by standing proud, strong, and forever free as
a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America
is America. You, as an American, have a sworn right to
demand for America, bush not be allowed to further
miscarriage Justice blindly back to the dark ages, by
not correcting himself on behalf of established
publicly, where American intelligence stood, stands, and
ultimately strives. Freedom is not protected by letting
the "bad guys" go, to further toll more innocent lives
for criminal sacrifice. Sometimes, the real simple
things are over looked as profound meaning. The Magna
Charta of 1215 states that a freeman should not be
imprisoned. Simple right? Not for the bushites who
side instead to faith in pope bush, who deliberately
unminds a timeless universal principle that exists also
in the 1700 B.C's, Code of Hammurabi, where all
individuals are to be found equally under the Law, to be

fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition. The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or

don't side to help a plead for mercy regarding yourself
truly included.

Can the bushites possibly think, we're all not ever
possible to stand together without a true Loyal
President, or, make believe King named Johnny, on the
facts firmly established regarding the treasonous war
monger antiChrist lying to Patriots dying US as victim
for?

America, I will now leave the rest of Our job in your
hands for the time being.

Yours again,
Johnny Wizard

/ / Condoleeza Rice, speaking to reporters aboard Air

written into the National Intelligence Estimate:
"The NIE ...has the yellowcake story in it, had the
aluminum tube story in it. Now, if there were doubts

The Real National Security Threat: The Bush Economy
http://www.alternet.org/story.html?StoryID=17547

/ / While it is unlikely, it is not totally impossible that the Bush
administration's policy of locking up anyone called Mohamed and
favoring Israel might drive the Arab countries to try an oil embargo
again. It is, however, quite feasible that they may simply decide to
follow in the footsteps of Saddam's Iraq and demand payment in Euros
in the future. The math is simple: if they had done so a year ago,
for every 85 cents (one Euro, at the time) they put in the bank,
they would now have earned a $1.30. \ \

Caveat Preemptor!
http://www.commondreams.org/views03/0127-09.htm

/ / On January 3, to the well-rehearsed cheers of our troops
at Fort Hood, you stated three times that Iraq is a "grave threat"
to the United States. But for our allies, and for an increasing
number of Americans, repetition alone does not enhance credibility.
They are looking for proof. (You are, after all, talking war.) \ \

Memo for the President:
Your State-of-the-Union Address

/ / It is important that you be completely clear on timing. While the Newsweek report of February 24, 2003 was the first to publicize Kamel's testimony that the weapons had been destroyed, US and British intelligence (as well as UN officials) had had that information since August 1995. If you were not given a full account of what Kamel said before it appeared in Newsweek, your advisers should certainly have given you the whole truth when Newsweek did break the story three weeks before you sent US troops into Iraq to destroy those same weapons. If they did not tell you, heads should roll. If they did, it becomes necessary to explain why the information from Kamel had no apparent effect on your decision to launch the invasion. \ \

Nine hundred and Eleven Missing Pieces
What don't we know, and why don't we know it?
http://www.axisoflogic.com/artman/publish/printer_4315.shtml

/ / Condoleezza Rice's preposterous May 16, 2002, statement that no
one could have foreseen this scenario was particularly ironic given
that Pacifica Radio identified her that day as the source of San
Francisco Mayor Willie Brown's "airport security" call warning him not
to fly on Black Tuesday. \ \

Remember: Condoleezza is competing for the title of, the wicked witch
of the world. (She worked directly with bush on the General Ahmad 9/11
plan, (to criminally invade Afghanistan for the American pension
thieves Enron. (Enron, who managed to walk away with the loot anyway
as, maybe the bushites will learn for next time suckers, as use to be,
a massively CRIMINAL bankruptcy [stolen money is in the Caymen
Islands] as reported by Jim at MSNBC.)

Iraq reconstruction's bottom-line

And here perhaps lies the solution to the mystery of how the world's superpower and the world's biggest corporations can't even begin to put Iraq together again after almost nine months: The reconstruction is less about reconstruction than about making the most money possible. \ \

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

All for our ability to communicate freely

There is one thing that is strangely absent from our news coverage as unbiased bushwhores who are actually devaluing under the tyranny of the evil antiChrist, Our Mr. Bush Jr., and that is..

Blix nor Elbaradei, nor Kofi, suggested, implied, or stated, that Iraq had failed to comply with the newest U.N. resolution: 1441.

I think Patriot Americans would be thankful for Canadian friends and family who are supporting American troops by pointing out with no contention but for censorship, that American soldiers are being sacrificed for no known good reason under the demon antiChrist, Our Mr. Bush Jr., again. The bushites tell US they wish to bring freedom on the premise that Saddam wasn't dis-arming or cooperating with US, a naked blatant lie, an attempt to excuse bush's murder rampages as a terrorist against Our families as the innocent, Ourselves represented by thieves that are doing US harm by stealing our value.

HANS BLIX: "And at this juncture, we are able to perform professional no-notice inspections all over Iraq and to increase aerial surveillance..."

Does a bushwhore devolving society where we murder ourselves on irrational suspicions to steal our worths to give to the bushmob as victims, sound like a bad preposition to you too friend? What is bush's panacea of packaged eternal freedom absent Justice mean truly as measured to you judged unfairly as the general Public unawares? How EXACTLY is the bushmob going to liberate the oppressed and disenfranchised without expressing public knowledge on the subject on indivisibility? See? If bush actually had evidence to truly believe Saddam does in our present day have control as in political possession, weapons of mass destruction, sold to Saddam illegally by America to gas the enemy with the then, full blessings from the great satan, bush would have provided as such to the UN to be legitimately concerned for "The People" in Uzbekistan included, right? He would need to know where abouts he comes to understand so, no? Mr. Bush Jr. couldn't be sure enough otherwise to toss cowardly American soldiers as worthless without meanings, to be sacrificed as he is doing for financial private profit paid for by the

victimized public, could he? Soldiers so valueless to Bill Hemmer, to not even speak out for themselves dying at CNN headquarters. See, Bill knows bush's private business partner, Amad, provided funding to 9/11's Atta, to criminally secure Enron's pipeline through Afghanistan by murdering highly successful American business people. But we can suppose Bill is scared as a cowardly unAmerican bushwhore, and would rather see the true evil doers hiding in America behind the flag, get away un-apprehended to further toll good Americans for sacrifice.

All the actual evidence we have concludes, Iraq worked directly to have the stock piles of WMD destroyed, provided the paper work, the destruction sites, and the individuals involved in that process. Inspectors had 100 percent access, to go anywhere bush, the false accuser might suggest without having to murder anyone from our family. Now, the disarmament process has been sabotaged, and the terrorist threat against America has increased. So, Iraq was in compliance, and because of that, the bush demon, in violation of article 2 of the UN Charter, has murdered thousands with war crimes as a terrorist recruiter. Making matters worse, incompetent bush even had an opportunity to liberate Our Iraqi family on world wide television, with what he and tommy franks would fantasize for our ailing economy by someone else to do the clean up chores. But, is it the Universal health or educational system, or public banking in Iraq that is not down to par as the american nazi fancy that bothers bush so much?, such as laws against discrimination for all persons, and evidential findings being a requirement to determine the measurement of Freedom for Justice to work. The People in Uzbekistan, are the People in Iraq, are too the People in America where Ashcroft and rumsfeld tell US publicly, they wish to factually deprive Justice for ourselves as equals. When questioned, both, Ashcroft and rumsfeld have reiterated the demand that foreigners, like illegally tortured innocent prisoners, don't deserve the same protections that the American Bill of Rights grants to all People, therefor, they as bushwhores wish to treat others unjustly by letting themselves, as would be nazi criminals, get away unpunished in devolving bush's america. Right? American war criminals are treated too good by the bush administration in all honesty then? Karma is real world existence, as life is politics ordered through chaos. If the right is Just as organized deduction, the system would treat all as equal principles. But again, bush

spew Iraq could be prosecuted for destroying their own infrastructure, but those same laws don't apply to him being above God, or anyone else in his administration of wrong doers. It was on publicly verifying the Justice process when the bushmob, as war criminals, turned against the UN, indeed the world community, and began murdering our families globally as war criminals with depleted uranium dust for the next 4 million years or so as bush victims, who will die suffering the criminal bushite assault for generations, if an American Patriot victim were man enough to execute the unarrested American cop killer, our Mr. Bush Jr. yesterday. If bush isn't even destroyed by the Love for Life in godless talkradio america, he, as demon will as MSNBC reported, unjustly continue to murder millions in sixty countries as the Son of Man's enemy being the antiChrist, the most hated and despised excuse for human existence this planet will ever know factually. Just ask Buddha. While the demon bush supporters, who advocate blindly murdering our families like US teachers and students through the censorship of our screams for Justice as Humanity, who also advocate poisoning American soldiers with cancer and warmed soft drinks, would only simply tell us cheaply, it is because their false deity bush, secretly knows better than everybody else put together, including the FBI and CIA, (Better than the mighty You even on everything?), therefor, they don't have to THINK(!!!) And see?, alas, the mindless bushwhore SLAVES neglect to mention as chatty personal failures grasping for the authority of blind generalized denouncements of our unique, independent selves, that when their bush demon does go public in their devoted namesake, (what with bush's evidence Saddam was six months away from owning a nuke, Laden and Saddam soirees, or Saddam gassed his own people) he, as demon antiChrist, exposes his true contempt for human life while falling as traitor protected by the always doubtful, intolerant, ignorant, cowardly and criminal, as censor advocates to stop life's will. I've been telling loyal dumb functionally illiterate Police officers and Soldiers to destroy the two prime 9/11 suspects, the unarrested, bush and rumsfeld, ever since the bushmob declared Omar's interest in nabbing the 9/11 suspects by following the criminal leads, as a hatred for American Freedom unthinking, and then continued on to murder approximately 100,000 innocent people in Afghanistan, now with the lucky survivors left worst still off, with bush's commitment to not offer any aid in nourishment, but as terrorist students, heroin dealers, or Enron propagandists left forgotten by

American, er... CNN interests as dictated through bush ratings.

MOHAMED ELBARADEI: "At this stage, the following can be stated: One, there is no indication of resumed nuclear activities in those buildings that were identified through the use of satellite imagery as being reconstructed or newly erected since 1998, nor any indication of nuclear-related prohibited activities at any inspected sites. Second, there is no indication that Iraq has attempted to import uranium since 1990. Three, there is no indication that Iraq has attempted to import aluminum tubes for use in centrifuge enrichment. After three months of intrusive inspections, we have to date found no evidence or plausible indication of the revival of a nuclear weapon program in Iraq."

Now we witness american nazi soldiers using Iraqi human shields just outside of Basra, committing further war crimes by blowing up powerplants, residential buildings, and bombing surrendering Iraq forces lying dead in a ditch with white flags sticking up. Indiscriminately murdering US good honorable people, and for what? When the nazi soldiers finally stop murdering our families irrationally as criminals, then what? If the nazi bushwhores know the dictums for Freedom, why don't they express them now instead of unjustly hurting God as all people? These bushwhore acts are crimes against ALL PEOPLES, and should be recognized publicly a such. The evil bushwhores can't vocalize their mindless support as cowardly betrayers to the human cause, and instead, censor our voices on the public airwaves while they freely propagandize our communities on the benefits of pillage and murder as terrorists under the antiChrist, Our Mr. Bush Jr... The war profiteers have already taken billions from the American People. Cost is paid by the uneducated illiterate tax payers as collateral damaged, and the war profits go into the private pockets of the smirking bush mobsters while killing dumbfuked american soldiers, as traitors to the American cause, freedom and Justice for all. God's son as creator included. Anyone who supports evil bush's war crimes against our family by censorship, then murder, is the enemy of America, and on all that she stands strong united by God unheard from still suffering.

I am,
Johnny Wizard

^ guys it's just an antenna.

It doesn't matter what the object is, it's the behavior that's being discussed. But I've made my point and I am not going to engage in a game of perpetual ping-pong with that clown so I'm removing myself from this discussion.

Retail originally was $39.95. To my knowledge, Max System's no longer makes this antenna. It is worth exactly what someone who wants it, is willing to pay. This is demonstrated countless times on eBay, where people often pay much more than something is worth....because to them, it is worth what they paid.

Mike is simply stating he is "asking" $20.00, plus shipping. Not too unreasonable, considering many have paid more for brand new ones, and this type of antenna doesn't burn out, or wear out.

When someone says, "asking", it's usually an indication that they're open of offers as well. Someone has to start somewhere.

You will need a digital scanner for LA.
My suggestion would be the Pro-96.

Unfortuantly, that's no longer available. It's been migrated into
Spectrum Explorer, and I could never get that one to work either. I'm
pretty sure it doesn't do trunking, though, so at least for me, here in
Maryland, it wouldn't be quite as useful as it could be.

He did (on Yahoo), but he didn't like what people were posting, so he took

Still, according to Frank The Price Cop you can't charge more than 50% of retail.

That would be $19.97... in Frank's sad sad world that's still 3 cents too much.

Hello to the group. I have just purchased a Uniden 796D for home use and need your valuable input. I've just purchased an Antenex 3db 800 meg omni-directional base antenna, that I plan on installing on my roof, for optimum reception (and Belden 9913 cable as well). I already have a VHF/UHF base antenna up on the roof and I would like to run both antennas to the 796D. Can I get by with just using a T-connector for both antennas or do I need to go with some kind of duplexer? If any of you have done something like this, I would like to hear your ideas.

Thank You,

Chris

You're right, it is asinine to drag up 30-year old foolishness. People change, mature, and grow.

Looking at "experience," if we were voting for which guy we thought would be better to lead a platoon through a rice paddy, Kerry would be the guy, hands down.

Unfortunately, we're debating which guy should lead the whole country as Commander in Chief, and Kerry's record over the last decade in Congress indicates that he's simply a "tax and spend" liberal that has the bad judgement to vote against every major defense program that is currently in place. The Stealth Fighter, B1 Bomber, and numerous other assets have saved countless American lives in battle, making our fighting forces something that our enemies fear. Thank God we have these programs in place now!

Nobody did a "cut and paste" on Kerry's record, but I'm sure the Kerry campaign would love to try! ;^)

I notice even the National Journal sees him has having the "most liberal roll call votes, outranking even Kennedy and Clinton," using a process developed at CNN, and done by the Brookings Institiution:

http://www.drudgereport.com/mattjk11.htm

Honestly, I see this as a good thing, as it will make everyone's choice more clear, either way, and that's what our representative democracy is all about.

Actually, I have seen, even on Faux News Channel, that "all those votes"
against those defense systems were but a single vote on a single
appropriations bill, and that he voted against that appropriations bill
because of all the pork in it, not because of those defense systems. The
RNC is spinning it to sound like he consistantly voted against defense, when
such was not the case.

Sorry, Brenda Ann, but you are mistaken -- these votes, campaigns, and
(thankfully failed) Kerry-introduced bills happened over his 19-year tenure
in Congress.

Here's a quick partial digest from the last decade, taken from multiple
congressional sessions of votes to weaken national security:

1995: Proposed Bill Cutting $1.5 Billion From Intelligence Budget. Kerry
introduced a bill that would "reduce the Intelligence budget by $300 million
in
each of fiscal years 1996, 1997, 1998, 1999, and 2000." There were no
cosponsors of Kerry's bill, which never made it to the floor for a vote. (S.
1290, Introduced 9/29/95)

1995: Voted To Slash FBI Funding By $80 Million. (H.R. 2076, CQ Vote #480:
Adopted 49-41: R 9-40; D 40-1, 9/29/95, Kerry Voted Yea)

1994: Proposed Bill To Gut $1 Billion From Intelligence And Freeze Spending
For
Two Major Intelligence Programs. Kerry proposed a bill cutting $1 billion
from

the budgets of the National Foreign Intelligence Program and from Tactical Intelligence, and freezing their budgets. The bill did not make it to a vote,
but the language was later submitted (and defeated - see below) as S. Amdt. 1452
to H.R. 3759. (S. 1826, Introduced 2/3/94)

1997: Kerry Questioned Growth Of Intelligence Community After Cold War. "Now that that [Cold War] struggle is over, why is it that our vast intelligence apparatus continues to grow even as Government resources for new and essential
priorities fall far short of what is necessary? ." (Senator John Kerry Agreeing
That Critic's Concerns Be Addressed, Congressional Record, 5/1/97, p. S3891)

When His Bill Stalled In Committee, Kerry Proposed $1 Billion Cut As Amendment Instead. Kerry proposed cutting $1 billion from the National Foreign
Intelligence Program and Tactical Intelligence budgets, and freezing their budgets. The amendment was defeated, with even Graham, Lieberman and Braun voting against Kerry. (Amdt.. To H.R. 3759, CQ Vote #39: Rejected 20-75: R 3-37;
D 17-38, 2/10/94, Kerry Voted Yea; Graham, Lieberman And Braun Voted Nay)

After all the above, he has the nerve to say this, after 9/11

12 Days After 9/11: Kerry Questioned Quality Of Intelligence. "And the tragedy
is, at the moment, that the single most important weapon for the United States
of America is intelligence. . And we are weakest, frankly, in that particular
area. So it's going to take us time to be able to build up here to do this properly." (CBS's "Face The Nation," 9/23/01)

: That's a big ten-four good buddy.
:
: The Uniden BCT8 would be good for a mobile scanner as it has less depth
than
: the BC780XLT, but their alert technolgy
: is a bit questionable. A patrol car could be off the highway on a side
road,
: or just parked in an area in a rest stop for work,

He was asking about an antenna not a radio.

For that wide a range of frequencies I would recommend a discone.
Diamond makes a nice sturdy one, but it needs a type "N" connector at
the base of the antenna. They ("N" connectors) are a pain to assemble
(to this inept technician, at any rate). Beyond that, the Diamond
discone isn't cheap. There will be others who suggest that it is a poor
choice (no gain) but discones have worked satisfactorily for me. RS used
to sell a "Scantenna" clone that works well enough (flimsy though) - I
am using one right now as a matter of fact. They got closed out at about
$9.95 a couple years ago. Don't know if there any more around.

Yes you can just T them but you may loose some signal in the T connector.
The losses will be minimal if at all. A duplexer is for connecting 2
transmitters to 1 antenna but serves no purpose for receivers.

I wouldn't normally advertise here, but I seen a post or two in recent times looking for an antenna.

Have 2 types available. A Discone and a Ground Plane. Both good for 25 - 1000 MHz. Both have a 1 year Factory Warranty. Both have a UHF Female Connector, the latter model having an 18" lead.
The discone is an Antenna Specialist MON 64, the Ground Plane is a MONR-31

Should you wish more information, please feel free to write to CLFURENT15483@Yahoo.com

Patrick AFB Area Log - Friday, 27 Feb 2004

We heard from the Dutch F-16s today; so they are still TDY at
Cecil.
The exercises of the USS JFK acft continued; more Hawkeye
callsigns than normal. So much comms traffic that it is nearly impossible to
log. I am just posting some of it now.
Scott AFB 126ARW and WI-ANG 128ARW tankers have been working acft
participating in the USS JFK exercise; the tankers are TDY at Macdill, and I
believe that is the reason that MacDill's 292.1 freq has been up. This freq
was formerly the MacDill Global Office freq when MacDill had a USAF GHFS
station. Now the freq seems to be used only for special purposes and TDY units.

Hi Chris.
Using a T-connector might work or might not. Just give it a try.
Maybe it will cause some loss or improvement depending on interaction or
interference between the antennas in some frequency ranges....
Otherwise I would recommend a manually antenna switch to feed 2 or more
antennas to one (T)RX. It's a common part on the HAM-market.
Cheaper ones use PL-connectors better ones N-connectors. I've not seen
swirtches with BNC.
For RX only a divice-switch witch RCA/cinch connectors for audio will
work fine. With that you need only to use the left or the right channel
connectors. Or feed another pair of antennas to another RX.
In all cases you may need some adaptors or the right connectors fitted
to your cables.

On technical reason a ground plane antenna can NEVER work as a broadband antenna. It is limited to some frequencies or relatively small frequency ranges with acceptable gain.

A discone has some gain above 0dBi on the wohle specified range up to 2 dBi. A groundplane has some gain up to 3 or 4 dBi on resonant frequencies and dramatic loss down to -(!)15dBi on nonresonant ranges.

I'm not saying I "disagree" - though I've never fully gotten into the design basics/performance, but "I" didn't "design" them - I only sell them! The last customer who bought a discone from me was very pleased with it - for whatever that is worth. I have the previous version of the ground plane I now handle, it didn't cover past 400 MHz, but it seemed to work well. I was just answering a need of sorts. Trying to be helpful. CL

Bad enough that you believe in the sheet (=shit) of the manufacturer. A
professional seller you should know the technical basics on the products
he sells.
Never(!) believe in the "specs" a manufacturer gives, without some
verification of plausibility on it. Name these "broadband groundplane"
antennas JUNK and send them back to the manufacturer. Or keep them on
1/20 of the price and sell them as 'groundplane with gain some*where*
between 25 and 1300Mhz' at 1/10 of the original price. This should
satisfy everybody but the manufacturer :-)

Volker

Eh, I did say I had tried a "previous" version of the ground plane. It did "seem" to work ok. At that time, I didn't have 1/4 of the equipment I now have. I've not really had time or space to prove anything in or out. I'm preparing to move to a new location, then I can play all I want. More room for antennas and so on. Here, there hasn't been room for much of anything. No, I do "not" agree with all they write. There is always room for disagreement. I suppose it comes down to the point of IF that is the only product out there, and you need it, what choice do you have ESPECIALLY if you're not capable of building antennas like some of us are? Not much of a choice from that perspective. It's up to the individual. I'm not "pushing" anything. If they want to buy - they will, if not - so be it! That is their choice. CL.

Not a bad price, but the BC780XLT described as on your page:

"is APCO P-25 Capable with 500 channels, 10 banks, 10 priority channels and
continuous band coverage.
PRODUCT FEATURE LIST

a.. APCO 25 Digital Ready - Requires the installation of Uniden's 780XLT
Digital Card in order to monitor APCO P-25 Digital Systems,

It's not. The BC785D is APCO-25 / digital ready. The BC780XLT is an analogue
type scanner, but with Trunktracker III.

The BC780D also has 1000 channels while the BC780XLT has 500.

The picture you have on your page is of a BC785D.

You are bidding on a Radio Shack Pro-2006 base scanner with the Optoelectronics OPTO 456 board installed. This scanner is in excellent condition. I recently had a new LCD panel installed. Also, it has some holes in the front where a mod used to be (see picture below). I had the mod removed as it did not work. I also had a discriminator output installed. If you have specific questions on this item, please e-mail me before bidding. This is the FULL OPTO 456, NOT the Lite version. Software and cables ARE NOT included. Manual for the 456 IS included.

I DO handle equipment (seller) but though I may tend to agree with you in your point, if that equipment is the only game in town and someone is in need, what are they going to have a choice of? Some antennas do work better than others. That is a given. I've just not had space to experiment on my own to find out for my self - their claims. Very little room here for antennas and most of my area is all aluminum siding, high voltage lines and no way to go above it or away from it. "I" am not "pushing" any particular product. I merely mentioned I have them. I did say a previous customer had good results with the discone model. So, that is as far as I'm going. As I said, if someone wants to buy - ok, if not, that is ok too. I'm a bit more educated than the average RS sales person, but I am NOT going to get into a war of technicalities over designs "I" had nothing to do with. I don't have time for that. CL

You might want to post this request on Jim Fordyce's site

Note I've had some issues with that site lately. I haven't been able to

I'm considering one of these for my Radio Shack 2050, for a couple of reasons.

First, it's about the right price.

Second, it's a whole lot less ugly than any number of antennas I've looked at. Sure, many of those are probably superior to the Firestik for this reason or that, but I'm not about to argue that.

I'm just wondering if anyone has owned one of these and/or had any good/bad things to say about it before I actually commit myself to buying one.

Thanks in advance,

Keith.

MAKE THOUSANDS!!!

I found this on a bulletin board and decided to try it: I don't care about the useless pre-fabricated crap this message usually says. All I say is, it works. Continue pre-fab crap.

WELL GUESS WHAT!!!

Within five days, I started getting money in the mail!! I was shocked!! I figured it would end soon, but the money just kept coming in. In my first week, I made about $63.00 By the end of the second week I had made a total of $1873.00!! In the third week I had made a total of $9,612.00 and more mail kept coming in!! This is now my fourth week and I have made a total of $35,165.00 and it's still coming rapidly. It's certainly worth $6.00 and six stamps, and I have spent more than that on the lottery without ever winning!!!
My mailman asked me what was with all the mail , and when i showed him this system he was amazed and got going at it . Everyday he thanks me , it feels good to know your helping make other pepole have more time and money to do the things they care about most .(Dont let this pass you buy , it so easy and it realy does work)
Let me tell you how this works and most important, why it works.....
also make sure you print this out NOW, so you can get the information off of it, as you will need it. I promise you that if you follow the directions exactly that you will start making more money than you thought possible by doing something so easy!!

Suggestion: Read this entire message carefully!! (Print it out or download it)

IMPORTANT:

This is not a rip-off, it is decent; it's legal; and it is virtually no risk - it really works!! If all the following instructions are adhered to, you will receive extraordinary dividends.

PLEASE NOTE:

Please follow the directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and

happy to pay big bucks for quality lists. However, the money made from the
mailing lists is secondary to income which is made from people like you and me asking to be included in that list. Here are the four easy steps to success.

STEP ONE:

Get six separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 U.S. $1.00 bills and place ONE inside of EACH of the six pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the six envelopes and seal them. You now should have six sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service.

most of us I was a little skeptical and little worried about the legal aspects
of it all. So I checked it out with the U.S. Post Office (1-800-238-5355) and they
confirmed that it is indeed legal!!

Mail the six envelopes to the following addresses:

1) G. Burrows
1/264 Tor St
Toowoomba QLD
4350 Australia

2) J. Safian
6950 W. Forest Presrv. Dr., #115

6) Jack Burke
220 Kingsbury Drive
Aptos,Ca. 95003-5003
U.S.A.

STEP TWO:Now take the #1 name off the list that you see above, move the other names up (six becomes 5, 5 becomes 4, and etc.) and add YOUR NAME as number 6 on the list.

STEP THREE:
Change anything you need to but try to keep this article as close to original as possible. Now post your amended article to at least 200 news groups. :
(I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make!! This is perfectly legal!! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal Lottery laws. Keep a copy of these steps for yourself and whenever you need money, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to directions. Look at it this way. If you were of integrity, the program will continue and the money that so many others have received will come your way.

NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft). So, as each post is downloaded and the directions carefully followed, all members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for only $6.00 ( $1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business!!!

*****DIRECTIONS FOR HOW TO POST TO NEWS GROUPS!!!*****

STEP ONE: You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your
cursor to the bottom of this document, and select 'copy' from the edit menu. This

will copy the entire letter into the computer's memory.

STEP TWO:
Open a blank 'notepad' file and place your cursor at the top

paste a copy
of the letter into the notepad so that you will add your name to the
list.

STEP THREE:
Save your new notepad file as a text file. If you want to do your
posting in different settings, you'll always have this file to go back
to.

STEP FOUR:
You can use a program like "postXpert" to post to all the newsgroups
at once.
You can find this program at <http://www.download.com>.

Use Netscape or Internet Explorer and try searching for various new
groups (on- line forums, message boards, chat sites, discussions.)

STEP FIVE:
Visit message boards and post this article as a new message by
highlighting the text of this letter and selecting paste from the edit
menu. Fill in the subject, this will be the header that everyone sees
as they scroll through the list of postings in a particular group,
click the post message button. You're done.

It's a shame that there's no real competition for the win96 software yet, because it is a good piece of software, but the licensing scheme is a definite problem. Don Star should be flat-out ashamed. I couldn't believe my eyes when I read it. I'm glad I noticed that the license is tied to the hardware before I purchased it, because this information is mentioned only as an afterthought on the site. I guess it's fine for people who use the same windows box for years on end, but it's not fine for others.

I write software for a living, so I fully understand the anti-piracy reasoning for this license. But if you don't know how to make money from software without licensing it this way, you shouldn't be in the business.

Intuit's Turbotax switched to a licensing scheme like this last year, and so many customers fled to TaxCut (myself included) that they changed the licensing back. Now I'm a Turbotax customer again.

Well, at least I got the initial freqs into the radio with the win96 demo last year. Until something else halfway decent comes out for the pro96, I'll just continue to make changes by hand. I'd gladly pay double for a normal license and not have to consider this one piece of relatively low-use software every time I want to change boxes. RIDICULOUS.

I won't buy TrunkStar without a demo, so here's hoping ARC96 might be decent when it arrives.

You set an unreachable standard, Volker. There is no antenna made that is not more resonant on some frequencies and less resonant on others. Certainly some do perform better than either the ground plane or discone, but these antennas have their place also. Few antennas can beat the utter bandwidth of a discone and the ground plane is ideal where an even less intrusive antenna is desired. Indeed, I've had success with a simple wire that is probably not directly resonant on any desired frequency. In other words, any antenna is clearly better than nothing.

Giving a specification(!) on a groundplane from 25-100Mhz is taking a
customer for a ride. An antenna specified(!) for a frequency *range*
implies at least that it has gain over an isotropic radiator wich is
simply not true for a groundplane "25-1000Mhz".
It would be a different thing in konjunktion with some active elctronics
-wich is not the case-.
And yes, you can have very much success on a simple antenna design. A
CB-whip with top loading coil (in europe known as DV27S -length of
1.4mtr-) is known to be a good performer on _some_ "interesting"
frequency ranges. It works on the same principle like the mentioned
groundplane when installed on a metal sheet ...at a fraction of cost
(less than 10EUR/ 13US$).

I have a Bearcat BC 145XL that has a very low volume output. After searching Google, I found that some people have had the same trouble with BC 800XLT models that were traced to bad caps.

The caps were identified for the BC 800XT in the posts, but my scanner doesn't use the same IC and cap numbers, so I'm not sure which parts to replace. I'm green when it comes electronics, so if anyone could guide me to the audio output IC and capacitor, I would be grateful.

MAKE THOUSANDS!!!

I found this on a bulletin board and decided to try it: I don't care about the useless pre-fabricated crap this message usually says. All I say is, it works. Continue pre-fab crap.

WELL GUESS WHAT!!!

Within five days, I started getting money in the mail!! I was shocked!! I figured it would end soon, but the money just kept coming in. In my first week, I made about $63.00 By the end of the second week I had made a total of $1873.00!! In the third week I had made a total of $9,612.00 and more mail kept coming in!! This is now my fourth week and I have made a total of $35,165.00 and it's still coming rapidly. It's certainly worth $6.00 and six stamps, and I have spent more than that on the lottery without ever winning!!!
My mailman asked me what was with all the mail , and when i showed him this system he was amazed and got going at it . Everyday he thanks me , it feels good to know your helping make other pepole have more time and money to do the things they care about most .(Dont let this pass you buy , it so easy and it realy does work)
Let me tell you how this works and most important, why it works.....
also make sure you print this out NOW, so you can get the information off of it, as you will need it. I promise you that if you follow the directions exactly that you will start making more money than you thought possible by doing something so easy!!

Locate C52 next to IC2 (TBA820M) audio chip. This is a 470uF 10 volt electrolytic capacitor connected to pin 8 of IC2. Change C52 to a 470uF 25 volt and be sure to put it in the same way as the original (+ marking in the same direction). This will probably restore the audio.

As "I" had stated, if those antennas are the only game in town and people are wanting to buy them, not knowing how to make one, what choice is left? Though I can build one myself and have, most people won't want a "homemade" antenna. SO..... No antenna is "perfect". Antennas for the most part are tested in a set of conditions usually fixed, whereas their use out side those conditions can vary greatly. Type of cable, length, height of installation, surroundings, etc... NO antenna can work "as" the factory suggests, even if there are good points to the antenna. You're setting the bar way too high. If you've got ideas for better antennas, I'm sure they'd love to hear from you. CL.

As I already stated. This Antenna is good for _some_ frequency *ranges*.
Bad enough, the manufacturer(!) does not tell it in the specs.
There are _very_ few designs for passive omnidirectional broadband
antennas. But all of theem need relatively much of space. Physics can
not be cheated.
Not better in performance the CB-antenna I mentioned works nearly equal
for a much better value.

That is a good question. When I first started newsgroups (many years ago) it was almost all top posting. It was sort of assured that the poster had read the previous email so why bottom post and make everyone, who also read the post scroll through known territory? It really never bothered me a whole lot where the post was placed. However, I don't like those replies that are mixed in with the previous post. I find them hard to read. Especially when the replies have the > smeared all over the page by bad acting news readers.

Now please, lets not have top or bottom post police <grin>.

Depends. 780D will only work on APCO-25 non-encrypted systems. But does have
1000 channel capability. It will
not work on Pro-Voice type systems. Check Radioreference.com to see what
trunked systems are in your metropolitan
area.

What was going on in that scene was that the disk with the NOC list
(the secret agent spy list) supposedly had a transmitter in it so that when
it was used it could be tracked. They had the scanner sitting by the disk
drive in hopes of picking up the bug transmitter.
I never understood the comment the woman made about "it's nothing, it
could just be the hard drive warming up" because the scanner never stopped
on a frequency to indicate a carrier if I remember correctly.

# 1516. Scanning in the Phoenix, Arizona metro area

I've been kind of a passive scanning enthusiast for a while now. I currently own an AOR AR8000 that I've had for a very long time. The only annoying thing about it is that it doesn't know anything about the digital trunking data channel and since that channel changes usually every day it's a real pain to lock that channel out and unlock the channel it was on previously. So I'm looking to get a more modern scanner that handle the analog and digital trunking that's in use in the Phoenix area here. Is there a way to tell what kind of system is in use?
I was looking at the Pro-96 for my new scanner. Any opinions on this model? I'm a little confused on all of the different manufacturers of the different trunking systems. I'd like to get a scanner that covers all of them (or most of them as pratically possible).
Thank you in advance for any advice and opinions offered.

Just let everyone know that I have uploaded some of my scanner files for the PRO-92 and the PRO-2067. They both in Spg and Excel Formats.

They include frequencies for many Counties/Parishes for the following states : Arkansas, Illinois, Mississippi, Missouri, Tennesse, and Texas.

They contain mostly frequencies for EMS, Fire, Law Enforcement(PD/SO/State PD)for county/Parish covered.

Anyone would to use to them. Please do so. All I ask if you do use them please please send a copy of them

They are the following yahoo Groups

PRO-92 http://groups.yahoo.com/group/pro92
SEMO Radio http://groups.yahoo.com/group/semoradio

So enjoy. I just wanted to try and do my part. Any questions just e-mail ne off list @ wpfd7fa@yahoo.com

I just picked up an MVT-7200 which seems to be working well. It's quite a nice little receiver, and in the country away from the urban/suburban noise level, it even gives good account on HF CW and SSB. For a small, do-everything receiver, it's quite impressive.

I've been using AA alkaline batteries and was wondering how long the memories would be safe with the batteries out while changing them.

The other concern is the audio quality on CW. It seems like a single tone would be produced pretty cleanly, but CW has quite a bit of distortion to it. Is this normal for a 7200? Voice (SSB/AM/FM) actually sounds cleaner.

The 780XLT is an excellent receiver for this range. I have 7 780's just for MilAir scanning. I also have several of the newer 250D's, and 785D's. The 785D's are junk in this range, the 250D's are pretty good, just one step below the 780.

I also have PRO-2006's, PRO2035's, PRO26, PRO2052, and PRO2045's, all of which are older scanners and go well in this range. But from what I've seen so far in the shack the 780XLT has a slight advanage for pulling out the weak sigs and rejecting interference. As you can see my my shack photos I really like the 780XLT ->

Hello,

I'm new to scanning and would like to hear O.P.P. and Sudbury Regional radio transmissions. What kind of scanner do I need, and is there a recommended website for those new to scanning?

Thanks

What about the Uniden BC-895XLT? I have read a few reviews that say it is a good airband receiver.

AMERICA. IMPEACH BUSH. THANK YOU.

http://www.madison.com/captimes/opinion/column/guest/69163.php

The president of the United States shall be removed from
office on impeachment for, and conviction of, treason,

/ / But the Azerbaijan dictatorship has granted billions
of dollars in oil contracts to ExxonMobil, ChevronTexaco
and BP-Amoco. Last December, U.S.Defence Secretary Donald
Rumsfeld visited Azerbaijan, where he brushed aside reporters'
questions about democratic deficiencies. "The United States
has a relationship with this country. We value it."

But to the democratically elected Haitian government, which has
nothing to offer the U.S. but the anguished cries of its people,
Washington apparently sees nothing of value. \ \

the population created popular tribunals. The tribunals would call on
Tonton Macoutes and Duvalierists, ask them questions and try to get
justice. This is a formula that was very active, very vibrant, but
does
not fall within the U.S. concept of democracy. \ \

/ / Heather Williams: Haiti as Target Practice

First, no one bothered to ask who the rebels were and
why they were advancing on major cities. If in fact they
represented a broad opposition, as reporters readily implied
or stated openly, why were the rebels unable to furnish the
barest credible details of their demands, their civilian
bases of support, and their connections to leaders of civil
society groups?

..."All sides," he wrote in a very fine article last fall
in Dollars and Sense, "concede that Aristide won the
presidential ballot with 92 percent of the vote. The sole
disagreement is over run-off elections for seven senators
from Aristide's part who obtained pluralities but not
majorities in the first round. The seven senators eventually
resigned, making way for new elections." Nonetheless, these
electoral "abuses" were grounds for the Bush administration
and pliant international partners in Europe to suspend
hundreds of millions of dollars in credit lines and aid to
Haiti. \ \

/ / The most visible in recent weeks on Haiti has been
Assistant Secretary of State for Western Hemisphere Affairs
Roger Noriega, a man who has had Aristide in his gunsights
for over a decade. As senior staff member for the Committee
on Foreign Relations of the U.S. Senate, and advisor to
Senator Jesse Helms and John Burton, he was party to a
three-year campaign to prevent to defame Aristide and prevent
his return to power; all the while CIA-backed thugs left
carnage in the streets daily in Port Au Prince. \ \

US Sponsored Coup d'Etat: The Destabilization of Haiti
http://globalresearch.ca/articles/CHO402D.html

/ / The Minister of Finance had sent the amended budget to the
Parliament on December 14th. Donor support was conditional upon its
rubber stamp approval by the Legislature. While Aristide had promised
to increase the minimum wage, embark on school construction and
literacy programs, the hands of the new government were tied. All
major decisions regarding the State budget, the management of

the public sector, public investment, privatization, trade and monetary policy had already been taken. They were part of the agreement reached with the IMF on November 6, 2000.

...In an utterly twisted logic, Haiti's abysmally low wages, which have been part of the IMF-World Bank "cheap labor" policy framework since the 1980s, are viewed as a means to improving the standard of living. In other words, sweatshop conditions in the assembly industries (in a totally unregulated labor market) and forced labor conditions in Haiti's agricultural plantations are viewed by the IMF as a key to achieving economic prosperity, because they "attract foreign investment."

...While a humanitarian catastrophe is looming, the collapse of the economy spearheaded by the IMF, has served to boost the popularity of the Democratic Platform, which has accused Aristide of "economic mismanagement." Needless to say, the leaders of the Democratic Platform including Andy Apaid, who actually owns the sweatshops are the main protagonists of the low wage economy. \ \

--

/ / The United Nations should help restore Mr Aristide to power for his remaining two years in office, making clear that yesterday's events were an illegal power grab. Second, the US should call on the opposition, which is largely a US construct, to stop the violence immediately and unconditionally. Third, after years of literally starving the people of Haiti, the long-promised and long-frozen aid flows of Dollars 500m should start immediately, These steps would rescue a dying democracy and avert a possible bloodbath. \ \

United Press International: Bush accused of supporting Haitian rebels

opposition forces, Kim Ives, an activist and journalist
working in Haiti, said that he had proof of collaboration

Forever Hold Your Peace

"I feel depressed," she said after leaving the theatre.
"He (Gibson) went overboard with the cruelty and
violence, and I think Mel Gibson is a bit of a sadist."

It's not the great artist Gibson, but corporate american
cult news who sit back bushiting "It's harmless, now
shut up dummy", knowing sadistic "sexy" rummy dumped
thousands of tons of radio-active toxic waste, along
with land mines to commit senseless, gratuitous mass
murder in residential communities housing the God of
Revelations.

It is bushite america who call themselves Christian, who
fund the Likud with American sweat and labor, to
criminally assault innocent Christians as accused of
nothing but being Christian. They do this as enemies of
Justice and God, to tell US as unbelievers, to
quickening the coming of the Lord, who will in turn,
condemn the individuals responsible, straight to hell
where they rightly belong. (Or prison whichever comes
first)

It is America who sit bushiting "Freedom", while wording
nothing to blindly enslaving whomever, to torture or
murder for whatever by bombing Nations of People
irrationally. No reason., For law. (But to maybe
secretly sell drugs, or steal assets to victimize
Humanity. a.k.a. Jesus forsaken, or WMD bemer's Iraq)

And it is toxic cult corporate america, who let
traitors, bush and rummy murder thousands in New York
City, ("The People") and then escape forever, operation
infinite justice. I don't think so. I as John would
destroy every nazi american bushite happily, to save the

life of one child in any third world country.

The played passion of the Christ for God exceeded his understanding of the people holding political power through censorship as barbaric. (Christ, at the time, didn't have the telephone, or the Internet.) Ideology faced reality, and his hopes and dreams as a middle easterner, were crushed by the evil lying bushites of that time. (so the 'story' goes.) Those, like in today's militarized corporate america, who's every drive is to take a much as can be stolen through murder, to deprive others their freedom to live peacefully as Good believers in Justice for all, especially our God. (Christ, we're almost like a living person represented timelessly through written scriptures. Wow I say.) Christ consciousness is of all relativities to consider, and so, in his devote love for Love, (pretty boring otherwise) took a fall like humanity as God is, (jumped really) and in his hope through teaching the dumdums, and learning, would come to create this Universe as it always has been. It'a been no cakewalk. Killing people for no good reasons really sucks. I hate bushites.

Let's get the Patriots together and bag US some Rumsfeld

I just so much hate that demon antiChrist bush, and his cabal of war mongers, it hurts. Let's just kill George W. Bush for being qualified to lead but only himself and Rumsfeld directly up to our NRA's firing squad, for almost foolishly thinking they would actually escape the planned murder of US thousands in New York City on 9/11, then continuing by sacrificing dumdum nazi soldiers on a cross in a completely unnecessary war against civilization. What is it that the evil bushites can do now in Iraq, before murdering untold thousands and thousands, but for stealing even more of God's good will towards all Mankind as loved?

[ S I L E N C E ]

No words from the bushites who rule our communications through corporate news censorship, while Christian parents call out unheard: why has corporate america allowed forsaken soldiers to eat plutonium to murder God for a measly few dollars the bushmob will pocket for the up coming "unbiased" re-election news campaign? As I suggested before, (If there are no real men in the marines) why not just give the unarrested bushmob all the money they want, so we can forgo all the needless death and suffering against our friends and family?

[Look, usenet's us.military.army can be the place anyone
in the world can offer any irrational thought on why
bush shouldn't be immediately arrested or executed as
traitor, but guess what? bushite nazi brethren, either
mostly don't exist in our real world, or can't think to
save themselves as bushwhore nazi dumdums. Dumdums who
advocate the senseless murder of innocent People, and
the continuing destruction of America's America.]

Destroy the demon bushmob, and all day long you'll have
good luck, I swear! Johnny says "give living a try!"

--

This next story is what the cruelty of america against
Christ is all about. Funding with their lives under the
leadership skills of the, corporate profit at all costs
form of american brutality, a government, of People,
under the Likud that persecutes the innocent as God is,
while they celebrate all as drunken bushite wannabe,
private banker billionaires. Drinking our wine, while
secretly calling God fiction.

http://zgrams.zundelsite.org/pipermail/zgrams/2003-July/000542.html

/ / The annual burden may well exceed $3 billion ï¿½ details are
very sensitive and thus kept secret. Under the Free Trade
Agreement Israel is allowed to export to the US freely, even
though US exports to Israel are very much constrained. That
trade-aid deficit, a loss to the US, now hovers around $9
billion per year.

Private Jewish aid from the US has contributed another $50-plus
billion to the burden. Much of this is a ``tax expenditure,''
because the donations are tax deductible in the US, but the
whole amount is a deadweight cost to the US economy, since Israel
tends to use aid money not to purchase from the US, but, instead,
buys from the EU. \ \

Haiti

http://www.commondreams.org/views04/0226-03.htm

/ / Citing the flaws in those elections, the United States
and other foreign governments refused to monitor the
presidential election that followed, later in 2000, which
Mr. Aristide won handily. The opposition boycotted the
affair and still claims that the election was illegitimate,
but it does so against the weight of the evidence. This
includes a Gallup poll commissioned by the United States
government but never made public. (I obtained a copy last
year.) It shows that as of 2002 Mr. Aristide remained far

and away the most popular political figure in Haiti. \ \

/ / Moreover, those eight contested Senate seats didn't affect the balance of power in Parliament. Even if it had lost them all, Mr. Aristide's party would still have had a clear majority. \ \

What is the opposition's position on health care funding, or a progressive tax system? Just what is it that is being fighted for if the rebels want to keep it secret? If Aristide has no military, nor large, broad based police force, how do allegations of a police state ring through, done by a militarized force looting and killing? And, who's funding these war actions?, could it be, the bushmob again? To maybe, publicly turn our way from George W. Bush's continuing criminality against America's better name? Likely, but I don't know for evidence yet. But, what does it matter, if Americans can't stand up now to arrest or kill the bush demon and "sexy" rummy for the crimes of 9/11 I ask you?

/ / Hidden from the Headlines sums up many of the Haitian government's worthy accomplishments, which the U.S. corporate press effectively whites-out. ``More schools were built in Haiti from 1994-2000 than between 1804 and 1994,'' the authors point out, ``many in rural areas where no schools existed previously.'' They also cite progress made in agriculture, public transportation, infrastructure, health care, AIDS prevention and treatment, and defending children's rights. ``Clearly, these programs represent a progressive agenda, initiated under the most trying conditions,'' the booklet says. \ \

/ / The multi-millionaire central banker insisted that it was better public policy to cut benefit levels and increase the age of eligibility for Social Security and Medicare--an action that would hurt millions of working people--rather than reverse tax cuts that overwhelmingly favor a thin layer of the super-rich. \ \

Someone should ask Greenspan to consider taking out the middle US all together, and tax Americans to just give

their earnings hand over fists, straight to the bushmob partners for nothing. Then, the economy will really take off., something else. Hell is what America is becoming with that ungodly bush demon escaping our police authority. As for Greenspan, he has always been a liability. 2% is what he gets for America's Social Security. Then, he gets loans for America, from America at interest, paid to him and his band of debt profiteers stupidly. Can You, as an American, borrow someone billions that you don't have, charge them interest for the privilege, then take their homes if they fail to pay you PERSONALLY back money you didn't have to begin with? I want to SERIOUSLY ask now, when are the pirate bankers going to pay back the money they borrowed from America? The treasury department, on behalf of America lent them the money to begin with, so most the national debt, is the total, Greenspan and his private banker nazi war buddies owe all Americans. No?, how so? Teach me. I'm listening.

/ / Bush's support for Social Security privatization has nothing to do with solving a presumed financial crisis of the old-age pension system. The administration aims, rather, to use scare tactics about an impending crisis to legitimize the biggest robbery of the federal treasury in history, as trillions in Social Security payroll taxes are made available to the stock exchange. \ \

Free Wheeling

/ / Why is it so far-fetched to imagine God's unhappiness about denying civil rights to any man or woman? \ \

Okay, I'm going to free wheel my writing. I may change my positions tomorrow on what I will for you today. I am human, and as such, I grow through learning experiences. The issue before US, of the demon bush a 'mending' the written words of the American Constitution, infuriates me to no end of course, and as such, compels me to dabble in a issue I would rather not as public figure, but, ahh.. what the hell here we go again about my care for gay men as a straight guy who goes love wow about freedom as anyone, (all cute boys most definitely included), and dreams about females,

more often than I think of my own "manness".

Demon bush knows now that Americans do not support him by democratic poll, yet, he is taking a position of currupting the American Constitution, that he in almost every other way, has left ignored as irrelevant.

Whom a person loves completely, or what they personally desire, cannot be morally mandated through government by written law. Protections are placed for the rights of an individual. So; what rights are denied bush's america, when two faithfuls decide together, to mutually tie the knot as soully devoted? [Is demon bush, as evil incarnate, tyranting again with his betterer way than Freedom's way for all People as equals still?, or are you now completely alone on thinking, that demon bush has no right as your business on who you may, or may not want as a love held dear, that feels just the same when your near? As a partner you would love until death found you parted, you will give to your false deity demon bush, to make that decision for You now as the unspoken? Demon bush, the antichrist, is going to change the American Constitution, so you can't mutually love with God, someone of God? And, lawless bush, the demon antiChrist, is going to enact the he is greaterer and betterer that All US innocent People he wishes to deprive our equal rights to say, no thanks?]

Complete love can be made through any individuals. Marriage is a union celebrating complete devotion, that does not exclude an emotional, so as, relative of absolutes measurement. The infinity Of God's unbound glory to wonder what it is to be of ourselves as Love everlasting. Two self aware conscious gay people can experience all the fundamentals of expression, that any other once sad people could.

For the lawless bush law to follow through thwarting sharing God's love freely, we'd all be forbidden to do anything., For, we would not exist even as living sexual beings. Demon bush's unknown experiences I don't want to know any more of, but look, he's touching Your Constitution!!

Will masturbation be the next target for banning by moral bush mandate? And., I thought bush already was at least bi? Didn't he have several flings with pretty boy Scott? (So, let's all take bush's case: What rights are denied US if sore ass bush went down on the gang in a whore house of lethal promiscuity?) Instead of banning Gay marriage we should be encouraging it, as an effort to try to find someone for everyone to truly love

and cherish.

Demon bush is fcuekd up. I guess it comes with being the antiChrist, and killing all them American coppers, has got his purpose all wacky, and out of order with the rest of our world liberating.

You can protect a person's right to be, but not pass laws to deny free loving of the godly humans. But guess what?, bush'll do it anyway by saying, he dunt read papers with words on rights of dem People, cause we're all together too opinionated when it comes to him mass murdering thousands, like in New York City.

Now I plead again, care about Your reality in his flagrant falsehoods, before he takes US all unwillingly further as unjustly heard from!!! When an actual god such as myself, comes around to say destroy war monger George W. Bush in everyway you can before he destroys more of our America's America left undefended, speaking as I am, along with all of Creation as the true Son of Man, we're all really dead serious about it this time. Gawdd...

It's not far-fetched. It's that the tv and radio bushite cultists forbid public dialog on things relevant and important to human survival. But trying and failing is all it takes. However, I can't be the only person here in North America who phones american talk radio stations to be hung up on as caring for a soldier's grandmum, You must try also. YOU READING THIS. Yah, that's right, you you dummy. Why don't You love life like America, or Freedom and Justice for All as so present in the American Constitution and go baby go, you won't regret it for as long as you live. Look, don't fear the antiChrist, the evil American cop killer George W. Bush, or corporate america's "sexy" rummy, the cluster dud dropper, fear me as the Son of Man becoming legitimately concerned with a falling AaaAaAmerica, trying to force US all, God as Humanity, to sacrifice as bound slaves to be robbed for by private nazi bankers, [hitler's financiers], or murdered by evil american war mongers who command weak and cowardly nazi teen bushites who willingly eat plutonium while bombing whomever for whatever cause they're truly dumfuked as traitors. Though, as leaderlessly dumb as they are being blind devote bushite, demon bush would have to take them out of this world entirely, before they started worshiping purposefully as an organized military, to like bush, kill good American coppers as blinder than the fates will allow. So, Supreme Universal Justice, as an actual

property of three dimensions is truly rooted on your side, if you would only try. Take this from me as the dead guy, who will now be vacationing officially. If you guys in America can't simply help yourselves over your fears of traitor George W. Bush, then who needs who as a friend to the stars? Come on, lend a hand. Give living for something greater a try, and email this to your favorite news personalities. Stand up and be counted for something more important than how much the bushmob can steal from ourselves as Universal Family. GOD LOVES MAN, MAN LOVES GOD, AND GOD... OH MAN... HELP US.

The Jews had it right

Demon bush recently commenting on his vast superior knowledge of matrimony, spewed forth "millennia of human experience,"

Imagine a corporately successful American divorce lawyer, taking what he can get away with, and the marriage experience for America we'll be like that sometimes.

Just where is the "human experience"? I don't yet know all the answers, but, why is it that the happy couple can't just have a religious ceremony sanctifying their marriage, and be done with the rest of the, I might screw you over in the legal ease later part of it? If done so, I'm sure marriages would more easily stand the test of time. The strength of marriage is recognized for what it symbolizes in love ever lasting union. (as God is, or as with Nature, or just as all the dedicated one on one playtime)

The divorce lawyers take half your life's assets through pressing subtly for, doing so as he/she plans, to be sweetly bittered out of settlement as far as the lingo can commiserate the arbitrator of commissary charges on every forthwith therefore, stuffed for your(s), petty pity parties into their glorious big fat wallet.

Marriages don't truly hold together through love by expensive paper work done by hearty bureaucrats, but by a personal life commitment to love, cherishing one.. blah blah blah... Now, how could anyone, anywhere, as "The State" say to two people who express a mutual caring love, (as anyone else could), are forbidden to express love through sharing freely with one another as

something truly beautiful? A celebrated relationship that makes their time together something treasured? Time of the newer old world along with all the ancient newborn stars above orchestrating for their everyday ra-ra pom-pommed humdrum of roughing it through the bad times to revel in the good? Couples who have committed to life long sharing, live longer on the average, than anybody else does. It's a fact Jill.

(As for me, and my own little Universe that revolves around myself starving for attention as almost penniless performer, leaves me with my one liner, "no I'm actually playing the Son of Man as Creator for real to packed live auditoriums", really kinda, makes things difficult...but hey! Things could change. God is free Love man!, don't you guys remember the 60's? Look, I'll even show you how i do some of my best card tricks, if you get me on for an hour or two with Aaron Brown. He's on that CNN channel. The News channel. Or perhaps my secret nemesis, Art Bell, why don't you give him a call?)

snpd

God but, the Marriage thing is really a big something in America, as it does seem amiss, though I'm honestly not qualified to offer much more insights, until I can get off the, why is bush getting away with murdering US as the antiChrist first. (Maybe it is all my fault why no girl wants to give her love to me in between my swashbucklin'.. oh well then, I guess that's one of the mysteries I pose as the average chicken coop's "holy God cock")

Anyway, I think it's time we'd be getting the deviant George W. Bush annulled from our wills.

/ / MK Ahmed Tibi (Hadash) said he does not think Boim should resign because the deputy defense minister acts as valuable evidence for those who think the Israeli government embraces a group of fascists. \ \

As I've written, since i took up this challenge, areil sharon is the furthest thing from a Jew one could imagine. No really, that's the most disturbing quality of racism, and or bigotry practiced in our governments as Institutionalized. (A fault found that is genuinely unfair as those who practice it.) (of which so very none get truly wealthy from.) Resulting in an individual monster named ariel sharon: enemy of every Jew since the dawn. To, as a representative government, publicly, in the People's name, ACT deliberately unfair as criminals, denigrating some labeled group of innocent

people for cheating and victimization, or murdering like hitler did, is as of, unfair to the God of Christian, Pagans, the Buddyhas, along with a great many others even including the, "no thanks", they have all the answers already to life's big question innocent Atheists, DOES NOT preclude including the "Jews" of the old new testament, that sharone (in contempt of all People as God, as in his own life left rejected 'unfairly') would have left unread. For the bonuses of american tax taking from an "other" less fortunates to not have anti-Semites (Semite=Arab) with nazi american mk-47s around ariel sharon always to protect himself from a true Kingly Jew. For, what else is in this life, but to make people suffer like Jesus did. Right ariel sharon? It's this, it's so simple, the corporations wont let US say so thing again. FRONTLINE did a show once, several years ago on the actual individual people that the Jew-haters funded by nazi america victimize, but repeated since?,.. rarely never in AMERICA. Why? Because anyone with any sense would immediately see, who was the bad guy, and who was the Jew. Not good for the repuglicons who take money on the, won't go away issue though, played unknowable on "unbiased" commercial corporate american TV news broadcasts. They're stayed to f-o-r-c-e US neutral by, in a evil cult like bushite trace, find irrational excuses to except silently: concentration camps, torture, and first degree murders against innocent Christians or Jews, paid for committed in our names as illegitimate.

What ever happened to the 50 year Jewish Jubilee where all Jews give up on what is their now stolen land, to acknowledge God's Holy teaching from the Tora? Is the Jubilee just a myth? If you build a house, on the property you share, would it be wrong for ariel sharon to steal it, while america was left unaware? American tv doesn't even play what their being truly taxed to death for under the demon antiChrist, their Mr. bush Jr., so what can we expect in all honesty, right? (Demon bush murders good guy American police officers, and it's just far to embarrassing for corporate america to immediately arrest or execute the traitor.)

Mr. ariel sharon has been on the Jewish hit list, since a Jew met a Jew in the park and said, "that ungodly bastard sharon just murdered my Palestinian Jewish friend, who he called innocent of all things." Demon anti-Jew ariel sharon knows what his consequences are, for, that's all he is as the ungodly. Knows nothing of democracy, knows nothing of freedom or Jewish religious teachings, he just keeps killing Jews so they won't

catch him, while he does things like, oh I don't know, desecrates the third holiest of holies. Again, ariel sharon is not Jewish. Deal with it. PRIME EXAMPLE: The evil Jew-hater, ariel sharon, was caught directly involved in the cover up, of the failed attempt for his partners in crime to blow up some could be Jewish People in the Mexican congress, then likely finger Laden as innocent of as terrorists. To incredible to believe? Believe it. Didn't see it splashed on CNN as important on where American tax dollars are being funneled as Christ killers though did you? Now, I as John's Universal fascist informing destroyer of bad will might actually have something to say in stone on this matter, before he need show yOu mY sUpeR COoL, A-KEY- ..doh. Your greatest fear ever should be not knowing love matters. Neat how this factors in the big picture when you get to meet eternal life as the dreamy, actual standing Creation of love and disorder in the causeless cosmos, first hand, as just another, Nature's secret agent for the little big man.

Women can be more wonderful than anything.

I have so inclined to wonder myself not a gay guy who plays in secret with himself nearly too often than he would admit.what?) But as for the females spotted in Nature, as God's of this world to become born to what we always were truly about, I.. I just don't know, but to say, they're different as the Holier than holy. If manly men would start being more manly, we might find a softness worth sharing. Is it that all children are beautiful, and some adults get complicated in their willingness to comfort, or nurture ourselves all as kids in heart? I'm the toughest of the tough tough guys see, and I care immensely for living happily. If a person is "gay", and they're happy sharing their "gayness" with someone they love and care for, all the best to them, no? What does it bother anyone, to have God live gayly? I once had a gay suggestion made to me, wasn't my personal kinda communicating, told the fool so, and we remained distant, but good friends to this day. However, I'm willing to contend, It might all be though because, I haven't yet met, a real special someone. (A effeminate, and bodacious babe with a charm of splendor uncatagorizable to my human heart, along with the rest of the moody caboodle without a dangling noodle.) What's the problemoe when freedom is the rule? Love, or desire is not something any government should or could preach us on. It's emotional to each individual.

After curiously reading some of much the sexual underworld of fantasy freely makes available, I find myself not personally yearning to actually demoralize myself beyond self respect, but that's just kooky me.

Now, I'm hoping, your beginning to understand what our world we share is about as individuals, but the corporate cultists insist there never be anything, we should ever get our dander over, because looky here!, here comes another soothing commercial on how you should take your happy pills and drift quietly back to sleep while the bushmob further comforts you with all the thinking you need not do. ...pay back the billionaire private banker for money he lent you on behalf of your neighbor, shhh... that's how banking works.. Don't worry, feeding plutonium to strong American 'Freedom' teens is harmless, besides our great fearless health care leader might earn a dime or two extra on the deal for his re-election campaign sloganing these same very facts. ...nourishing us all so well, shhh.. lay back.. bumble is creamking of the interstate, hogjow, they made it going further than you could ever even realize, your never clever, never clever.. your dummer is taking up two lot spaces besides, you have it already balled. Confused?, I am.

But simply put, the more Jews ariel sharon gets murdered, the more money from repuglicons comes by taking Christians for Christ helpless on the cross, but without any 'real' God. Then anti-Jew ariel sharon puts money back into the private pockets of 'wealthy' repuglicons for funding true terrorism on the sly. The Likuds steal people's homes, life savings, shoot to death innocent Christians, Atheists, whomever, while they then send off the surviving victims with only what can be carried quickly, to suffer in some ghetto camp. Hitler, revisited. What "Jews" since whenever have suffered from, now without God in Government, made fearful to stand for their rights against bigot murderer ariel sharon's mk-47s., they then under tyranny, falsely, try to condemn all themselves as forsaken without G's leadership found in Mr. ariel sharon. The Jews had it right on me never actually personally getting up on a cross by God's inability to communicate through silence, it is more of a metaphor on the true state of humanity, but no more so graphically illustrated by today's Likude Israel that condemns all the People as God. One more example on many: Demon sharon, funded by nazi bushite america, will have Jewish Israeli teens arrested that disagree with murdering innocent people to steal their land as God from. It's a fact Jack. Mr. areil sharon is not Jewish. Live with

it suffering without speaking, or shout to the high heavens that your fed up, and we're not going to take it any longer. The King has returned!

/ / Whenever President Bush is now confronted with an unacceptable reality, he either changes the subject - is steroid use really more important than the environment? - or expresses confidence in his certainty. "I'm absolutely confident that..." he'll say, as if the issue is his determination rather than his conclusion. \ \

It's his faith infinitive as the antiChrist, where he has hypnotized the dopey with merely the power of suggestion, that has brought him to US as foolishly not conceiving, or most importantly, truly understanding. So, do we feel sorry for his ignorance as fallibility we are all prone to own as the human rendition? No. But for stupidity thinking he could murder US as the innocent to steal our free values, and just get away with it by lying to no one continually, is where the Lord makes our stand for God unseen as miraculous.

The demon bush dictate is not exceptable for my just little man universe. I knows too much about freedom to go on dying in bush's forsaken place as innocent sacrifice. With corporate america's unarrested demon bush forcing my hand, I would decide to defend by concluding, he is truly, the enemy of all America. America: weak without leadership, yes, but not as dumb as some would have us believe. When is it that we feel sorry for the thousands of lives bush's deliberate actions of mass murder have taken for no good reasons? Their ain't nobody to defend america's overlord, but through corporate censorship of the reality of who's really dying for the demon bush liar. I'm the one anyone would ever have a legitimate fear of getting on the wrong side of, and if your not in the process of attempting to get away with murdering some defenseless family for nothing but to rob from, to each, his or her own, mostly, right?

Terrorism of the worst kind for God's America. GET BUSH NOW!

Falling for You

Brahimi said. "We need to organize elections as early as possible but not as early as impossible."

Help me understand: Why can not Iraq start on the process of

O R G A N I Z I N G E L E C T I O N S

NOW to work towards gaining accountability for soon as possible? After June? What the... Can't we people talk while walking? Look, the future is likely coming no matter what, and what ever illegitimate government is

embarrassingly stalled by evil WMD proliferator baathist bremer to steal unaccounted American tax dollars from the "willing" victims dying, (like by bush bitch cluster dud) will still necessitate the need, to have started on the process of fair elections for our Iraq before hand. Corporate america might not care of sacrificing America to rob from, but real People are honorable, and won't reserve the scourge of nazi bushitizm a place to suffer any further if we can help it.

The bushites are sorrily, simply not qualified under the dire circumstances they've assaulted ourselves into for mugger war profitizing, as leading US to be dying undefended while failing miserably on my behalf to demand Justice as freedom is truly.

Now, it has been vaguely suggested that a, steven "you can't have public health care or he'll murder whomever for thinking" russell, or a buford "bush bitch" blount as treasonous evil nazi bushwhore, to undermine freedom and democracy everywheres in our world might cowardly attack defenseless innocent families at the polls while leaving "bin Laden" fingerprints, criminally warring to kill more American dumdums for commi Halliburton et al, continuing committing as unaccounted massive waste in America by over billing the dying People. Why would bushites do this? Evil is blind irrationality, disguised as thought out faithfully by fascists. The, nothing to fear suggestible absolute nature of non-linerality, is 99.9 percent, super fractal wowy miraculous as crazy about the fringes, (or is that bridges?). But, without Justice ruling our stay, we leave for a Heaven waiting, on a sea of madness as enemies of life to all things eternally being. Translated: We need to arrest these specific war criminals at the end of our, ready to fire rifles. Done to stop them personally, from robbing or murdering America indiscriminately as enemies to everyone. But in addition to that, (like at the same time) who says the polls can't be stretched out over several days or a week, with multiple options on submitting votes registered through the oil-for-food program? I want to know where Annan is on this., why it can't be done., and what his position is on returning the Iraqi Humanitarian aid stolen by Halliburton, or Iraqi Central Bank deposits cashed by HAS TO BE, current pirates. Annan, be a man, an acknowledge our presence as relevantly important for our world's living sake.

We had 100 percent access throughout Iraq prior to allowing bush, rumsfeld, and franks to sacrifice

literally thousands of innocent lives. Who are now DEAD or DYING NEEDLESSLY as first degree murder victims, in some bastardized Lord's name apparently.

(Quick, somebody call upon everyone to get up off their knees, God's coming to read as one person today of the unbound wonder of what it is to be uniquely ourselves within a nude sunrise grinning. To make some progress forward for a better future, we're not meant to just pray for someone else to come and stop whom from cheating who of Liberty? What is it that you can't think of? Every wonder? Who wouldn't do God a favor if they could imagine so brightly. Who's stopping you from defeating tyrant bush as war criminal, but for only yourself contained by his continuing bad example? Tell you what: let's together find ourselves of one mind on putting the bushmob behind bars awaiting immediate public trail, and I'll promise to try visiting them every year, just to see how things are developing. Or instead just shoot bush and rummy for almost escaping Operation Infinite Justice of a real American Patriot soldier's undying love for his soul brother.)

Any improvements of the current situation in Iraq today, are going to be less that what would have costed to not kill innocent people for nothing but evil bushite war profitizing at it's level worst in this history ever of all Humanity recorded. The demon antiChrist of corporate america has got to go, and he's got to go immediately as arrested or shot dead by the Patriots for treason, before he causes US anymore needless losses and grief to our friends and family. Like for the next fifty or so generations what with the plutonium being fed blindly as willed to cowardly, weak, American teen enemy bushite soldiers presently. (If we could seperate the bushites from the rest of US, this might be a good thing, but they have no real leadership to speak about freely as the dying stupidly.(PRINT THIS PAPER AND MAIL IT EVERYWHERE))

DYING like those from 9/11 did, or dying slower, like with NYC air quality as best Oz has to offer. (Harmless corporate TV tells US without opinion.) Either or even in other ways, the demon bush is truly killing God's America in Your name not heard from. Help me you idiot. You! Yes you there, reading here. I am your secret friend see?, and.. well.. the Universe needs your help desperately pal. Please? For me? ..Oh God help me your really dumb without you aren't I too? Listen: we need to talk.

We are here to save all of creation from needless death. Big deal. Your are of a real eternal nature, that exists also, (as understood scientifically) timeless. For real. (The big bang is now. (All mass is also of not as seperate energy, then there's our gravity...)) Our possibilities for a great, better future are staggering, if we are capable collectively as individuals to defeat the "kindness" of George W. bush, the dying embodiment of evil as the very true demon antiChrist of all biblical references ever mentioned. His lying isn't just deceitful, it is downright hellish.

You know what I think? The evil enemies of Humanity, don't want US People to be recognized from being victims under tyranny through corporate cult censorship. Without Justice ruling our ways under the irrational criminal bushmob dictate, we lose as losers cheating ourselves as not worth the consideration to be free individuals.

Granted, I am an actual god familiar with the rights present within the Constitution of America. THEE God's god, here to teach the world about needless sacrifice, caused primarily, for the effects of inflated egg shell egos. As Creator, I goofed somewhere in the, order to chaos mixer. I didn't plan (it was a mistake) for Americans to be so cowardly and weak when it comes to defending their very own selves from needless death and sorrow through blatant, naked, how can you miss it, evil criminal enterprises. So, perhaps, now if I stop writing, and fake I flied off vamoosed into the unknowable, a couple people on the planet might go 'hmpht', and decide to carry on bravely, the real, honest to death struggle for freedom living without me as sorrily missed. (I as John am not anything special paradoxically.) This is fear itself, ain't nobody nowhere as terrifyingly terrifiable as this is just truly super terrific being only my simple written taughts, yet, ... I'm like.. just fiction writer, big dreamer Johnny Wizard, looking for some happiness, human respect, and a good last supper before I check out from this made by the earthling "space explorers" dungeon cell.

But who cares about me, or my great, he thinks he's so brilliant ideas? Everything's seriously a pain to him sometimes, and he talks to himself like he's the, been here and gone as eons now, King of the Universe for the holy Word from the Heavens above or something. What a poor dying fool to chance that anyone would willingly help themselves by caring for someone. ..You know, I'm beginning to not be all that crazy about the demon bush

liar continuing to war humanity in my own true name also now that I think of life in this way honestly. H-e..Y -! (Morningstar has been accused of a lot of things, but you'll notice, always plays fair as your rules.))

What freedom in Iraq will come that allows a, buford blount to walk unaccosted by 'legal' services? Or where rummy's cluster dud advocates gain silent gratitude? A nation high-jacked by bremer's buddies who illegally sold Saddam WMD, then the product wisely gets destroyed as functionally useless being primarily indiscriminate warfare, then bremer's buddies come in again and murder untold thousands upon thousands, all because your magic TV is letting them get away with it as considered too embarrassing to the billionaire private stake holders. Fuk you corporate american Human haters for not reporting the bushites as war crime supporters.

Where in the real world are the nazi bushites gonna demand we go to allow 'them' to continue warring the Constitution while wearing a bushite soldier's uniform in their dying universes of Universe? Leaderless corporate america?, injured and dying as the unjustly starving? What can the bushites do now in Iraq, that they couldn't do before the needless murder of untold thousands upon thousands of innocent people with loving families? Before dumping thousands of tons of radio-active toxic waste as enemies of God's children? Only to rob, maim, and destroy God's great work through Love. We had complete unrestricted access throughout Iraq, and Saddam was offering the national media for bush to pontificate, while not refusing dialog for any suggestions.

I ask:

Can not America invite me formally for brunch, by somehow bypassing the war mongering nazi tyrant held up in the Oval office? I'd invite you all, but my place is still a mess, and I'm stuck eating for survival just now. I don't qualify for help, because surely, a person with your talents, should have someone willing to stave you off the, who cares about saving the world for you buddy, laughing in all seriousness shtick. (cool eh?)

I give you my world:

To save humanity from tyranny will be accomplished through the value of these free ideals recognized.

Isn't life grand sometimes when the bushites aren't needlessly murdering our innocent families in your name?

I again,
will now leave
you without me,

forever loved,

Johnny Wizard - Your "other" parent or guardian advising you to immediately, by Citizen Right, arrest the President's 'cabal' in the name of the Lord, who already died for this once already god damn it, and I'm not sacrificing any longer unknown as forgotten in the absence of any true reason to our existence, I want to celebrate. I want to afford a cold brew to nuzzle on a warm sunny afternoon, at a hideaway somewhere, lost in my comforts of having few real worries, but for unintentionally offending someone for not having the time to except their generous support, or gratitude.

Unelected care taking government? What is the group their now supposedly doing? Where in the process is corporate america to simply fix the Russian generators they've been paid over and over again already for as doing nothing in The People's interests?, As unaccounted to? Where is corporate america to fly in the emergency food and provisions for the innocent as victimized? Who's care will this continuing robbery of America through war crimes further fail to serve? How can Annan gain "wide agreement", with no poll on the issue? Who personally did he talk to, agreeing to leave Iraq without working for an elected government of the People?, and who consented to give up on such dire needs? Where is Annan on the thousands of tons of radio-active toxic waste dumped by rotten rummy? Is it not an issue he should personally be addressing for Humanity, to demand an immediate clean up paid for by those responsible? ...I mean, these people have total disrespect for the Constitution. We swear an oath, military officers and NCOs alike swear an oath to uphold the Constitution. These people have no respect for the Constitution. The Congress was misled, it was lied to. At a very minimum that is a subversion of the Constitution. A pre-emptive war based on what we knew was not a pressing need is not what this country stands for. \ \

No End to War

The Frum-Perle prescription would ensnare America in endless conflict.

By Patrick J. Buchanan
http://www.informationclearinghouse.info/article5712.htm

/ / And if God accepts the existence of evil, how do Frum and Perle propose to ``end'' it? Nor can any nation ``win the war on terror.'' Terrorism is simply a term for the murder of non-combatants for political ends.

...If it is America we defend, An End to Evil makes no sense. The Perle-Frum prescription for permanent war makes sense only if it is the mission of the armed forces of the United States to make the Middle East safe for Sharon--and here we come to the heart of the quarrel between us. \ \

As you can probably guess, me and Patrick might have some good politics to debate on that I would disagree with him about, but I can't save enough praise for reading this most recent informative and often entertaining take, while reviewing about the Frum-Perle controversy.

I think we can all agree, both Perle and Frum are now clinically deranged by hanging on to George W. Bush for so long in dumbness. Do they qualify for some sort of special treatment programs under their respective health care plans? Strange days where we see the limited words of a mind bound for slavery. All I wants is the war mongering mass murders arrested for treason against the flags of Freedom everywhere, is that to much to ask from ourselves still God asks? To steal public utility services paid already as owned
completely by IRAQI, (America dying for the bushite
American pension thieves at WorldCom or Britain's
"Dutch"-Shell,) ain't gonna change the business
locations. The evil unAmerican cop killing bushites
think they're gonna party in Manhattan on our dime in
apartments for around $15,000 a month, while sneering at
a homeless beggar on the streets, who thought he was
still in Vietnam.

An oil-for-Iraq program needs to be reestablished, but
transparent to all as addressing the immediate emergency
needs of Iraqis. Private, in the secret back room with
the bushmob nazi bankers, and their private inept
collaborators flustering as international fraudulent
behaviors, just wont do., try as bush might to murder
perhaps millions of Americans uncovered by his
criminally enforced, reduction in health care coverage
extravaganzas.

THE ROVING EYE IRAQ AND AL-QAEDA
Part 1 - The usual suspects
http://www.axisoflogic.com/artman/publish/article_5146.shtml

/ / This latest US intelligence, though, makes little
sense. For starters, al-Qaeda pigeons are highly unlikely
to move around with computer discs in their briefcases:
since early 2002 a disabled al-Qaeda has used women

couriers to deliver strictly verbal messages. \ \

Kimmitt in collusion with the bushmob perhaps? To cover up an investigation set up to encourage the blind murder of America as bushite by attempting to divide all the People of Iraq as Iraqi?, na... not in a tribal based, enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all the bad guys for thinking, the blind bushite bigots would conclude illegitimately., and I would say to yourself: no, the People with equal rights to stay united for good times, are a people sworn to uphold law that serves our freedom's best. Iraqi assets are not bush and bremer's right to steal without question, nor either, American generosity swindled by WorldCom, Enron, Dutch-Shell or Halliburton is the final, be all answer to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. The evil bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

Perhaps, he is.

Another American soldier owes me a beer, or will be dying to steal life from themselves as sacrificed for the evil criminal dictate of Their Mr. bush Jr.. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi Halliburton pocketed Humanitarian Aid? Go ahead, ask'em?! Then ask'em why they die as cowards by rummy cluster dud for the bushmob to rob their own direct families left unprotected? Ask'em! You know what they'll tell you? They're not happy about these bushmob war crimes truly destroying America in America, "freedom", "democracy", Johnny Wizard or otherwise., Or instead they'll mumble something incoherently while jaunting away to murder some one found defenseless, or innocent to pay further while dying to slave under the criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring the innocent by stealing your human values truly.

We need to see an apology to come from America, an apology to Humanity for this carnage waged unnecessary, but for these contemptible war profiteering practices as direct assaults to all as God is. Assaults that we have been unable to remedy by openly communicating to bush's

secret White House, rumsfeld's secret Pentagon, or
Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest
of US, by arresting bush and rumsfeld immediately for
high treason?, or will they cower and DIE as the
innocent, in false gratitude to the lying traitors
bushmob? To with their dying breath proclaim
unattested, to be ridding the Universe of their
continuing criminal behavior.. a.k.a. evil?

Evidence is a must to establish a crime scene
provocateur, to deny such privilege is to deny freedom
be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no
struggling democracy entirely.

Look, the thing about God coming down, and having it out
with humanity on some various critical issues, isn't
like going to happen, it is doing.

We had complete unrestricted access throughout Iraq
prior to murdering any innocent child in america's name.

Ann Coulter - "Liberals just call Republicans names."

Her suggestion is against the common sense of a literate segment of humanity who knows something is a farce about this tart, and for me, entertains for words to gain a better understanding for proper acknowledgment.

Coulter is bigot rousing on purpose I think, just to get all the american corporate monetary gratitude, in selling herself not present as a significant baitor unaddressed publicly in our corporate news circles. She sells excuses to cowards, of not addressing specific acts of treason committed by individual traitors, like rummy or Ashcroft, and instead, suggests all people have no ability through bushite america to recognize themselves being robbed their freedoms or murdered directly for the furthering of the evil bush demon war lies.

Interesting.

A repuglicon nazi bushwhore, who will say anything to allow bush to steal further from America, is not a tried and true Republican blue collar. Is it in Ann's contention, that all Republicans can't imagine themselves having any independent opinions? Or, is Ann saying that every Liberal blames Republicans of every stripe throughout History instead lawless bush personally for sacrificing the nation as evil incarnate?, committing to murder individual New Yorkers as America sacrificing, then further acquiescing to needlessly feed toxic waste to all American soldiers, while loyally blowing themselves up dead as individuals to pieces with sexy rummy cluster dud, all for being blind disciples of the unAmerican bush demon antiChrist, their ungodly evil false-deity as enemies of God's love, America, and our good names?

Naming the repuglicon demon bush a terrorist recruiting cop killing heroin pusher, who played a central part in the murder of thousands of New Yorkers is well established factually, and publicly confessed as all planned to act upon before hand. Who says? MSNBC's Jim reported with the White House, as a 'top secret' [Oops, deceived America wasn't suppose to read this one Condi] strategy of not following the 9/11 crime scene evidence, and confessed as 'fully implemented'. A General Ahmad plan to blame bin Laden as innocent of to secure invasion of Afghanistan. For Enron et 'al, the treasonous g-e-t-t-i-n-g . . . a-w-a-y. ... Pension thievers. Robbing from American Patriots as lead worthless in value with. Dying.

Remarkable to say the least.

Anyway, solid, documented evidence including the circumstantials, like cheney's "The Dabhol Working Group", Niaz Niak, and the quietly contacting of allies publicly to attempt legitimacy of faked collusion, as such, with rummy's Pentagon arranging a same-time, what if a 9/11 occurred plan involving everyone misled, like also dummy rummy's P2OG, where dummy rummy writes to commit terrorist acts against our innocent families, he prefers if any connections have to be made, they be made with the widest banner of "The Pentagon", as to hide himself from corporate american news scrutiny, who instead will report it as, the Pentagon isn't speaking about only rumsfeld's high office involved in blatant treason, and naked evil doing. (Also, to succeed in assisting in robbing the Central Bank, and museum, the nuclear facilities containing radio-active contaminants were left unguarded, as not centrally relevant to franks why soldiers were told they're still sacrificing their lives for. "Duh, why are we here to kill good people needlessly so the bushmob back home can further rob our undefended families bro? Bro?")

--

This is for all to agree settled as official History.

America devolving into the criminal tyranny of the evil bushmob is happening. All the while, we witness, the LEADERLESS nazi bushite soldier cowering as cowardly sell outs to their very own friends and family being robbed back home, left undefended through blatant over billing as UNACCOUNTED, leaving their own sons and daughters to dutifully eat plutonium, and going further silent when it comes to rumsfeld and franks needlessly dropping thousands of land mine cluster bombs to murder us people indiscriminately, which, kills their own aplenty, in a more way than one knows. Karma. (rummy's pentagon is misleading soldiers on how many have so far died to allow Halliburton to criminally steal humanitarian aid from The People, as one example,) Again, as bushite fascist nazi vermin, they let those responsible for destroying America through the bushmob war crimes, still sit in the, for sale freedom captain's chair, high-jacked from US true Loyalists, attempting to get away the bushmob is doing from 9/11, by going real fast .. nowhere.

Second, if Liberals include whomever, how could Ann possibly assess that all would consider calling ourselves anything but, unique as individuals? Bizarre.

The American Constitution is our souls included in those timeless thoughts of Justice for all as The People. The bushmob is destroying freedom by persecuting the innocent as terrorists, when they, in AMERICA'S NAME, throw out the concepts of Justice for any. No publicly understood evidence to form our conclusions, is a corporate demand your faith be in the unjust bushmob 'cabal', and not in Freedom for all through establishing the actual "bad guys". Closing the public criminal investigations on 9/11, is a critically essential part documented as the evil cabal's "top secret" criminal treason plans, put together prior to the murder of thousands of American citizens. Prior to the event as hidden question, and, confessed as never considered. Ya, right.

Deliberate undercounting of "coalition" fatalities
http://www.amin.org/eng/paul_de_rooij/2004/jan25.html

/ / One thing is certain, there is ample dishonesty creeping into the
counting of the death toll by refusing to count those dying at
hospitals such as the Walter Reed Medical Center in Washington.

...Soldiers are forced to work in a toxic soup [7] and when soldiers
die of horrible diseases this will likely be in the US, and thus
will not be counted.

These dogs of war are safely ensconced in their air-conditioned
think tanks, not really giving a damn about who is being killed

Playing to Win

Bush declared, "and he wouldn't let them in. And,
therefore, after a reasonable request, we decided to
remove him from power."

So, there was indeed no imminent threat posed by Saddam
to Amerka, and inspectors had complete unrestricted
access throughout Iraq without delay prior to the, bush
demon's further war crimes. So, what was the reason for
all the pointless mass murder and destruction again? Oh
right.. to sacrifice American soldiers so terrorist
bush's war profiteering can feed off themselves as
family without leadership present as spoken for. Hey no
problem if Bechtel or Halliburton never actually gets
anything done, or at a good price after their magic
trick "pay here for what?" commissions eat up most of
the investment, it's only the dummy American People bid
payers again left unaccounted to DIE intentionally. The
bushites could make more killings for decades to come,
while flogging the now desecrated American flag as the
new bushmob's being intolerance, greed and true contempt
for all US as Humanity. US, a dying dream that once was
the great American way of living; now war crime bush's
personal enslavement for global tyranny.

The devote bushites tell a Loyal but dumb Soldier to
quietly eat plutonium and get blowed up by rummy cluster
dud, because, it's harmless. Again the marines have got
to come in and save our day, by arresting bush and rummy

for 9/11 now, with truth as the all time word of God exists within yourself included. Look, don't think I'm gonna fly down to Washington like some comic hero, and arrest the entire bush administration, going through them, one by one from their holding cells, on where all the stolen cash and American values went all by myself.

GOD NEEDS YOU

All the deaths of American Soldiers in Iraq today, (like the People who died for the bushmob's 9/11), are caused from their leaderless weakness to not face bremer and the bushmob as war criminals continuing to transgress in America's name high-jacked.

Mr. bremer fired Iraqi school teachers, and hired up Saddam's secret service, those, who if any, would have closer relationships to charges of criminal impropriety in the name of the baathist banner, than any other group would be. If an American soldier in Iraq today, feels those from the Saddam Baathist regime should face American Justice (the real way by thinking) why then, is bremer not behind bars awaiting his public court appearance? Mr. bremer as the director of Kissinger Associates, is as, directly tied to "CRIMINALLY" providing Saddam his WMD knowhow. The first "Iraqgate".. [I apologize as Creator for being partially responsible for this worse than B movie but true plot line scenario, however, looky here!, there is so much more to believe!!!]

The bushmob tricks are too cunning to comprehend, see? Again, for those who can, bush must be stopped from murdering American Patriots for no good cause, because, it's really getting US royally miffed way up here also as the true beings actually committed to Justice as Freedom for all. That's all folks.

Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

/ / Steven Russell. "These People have always hated US in this area. It is not surprising that they hate US." \ \

He ain't kidding me he is completely unqualified to hold any leadership position. A real de-generative paranoid delusionist, mared likely early on from corporate neglect he suffers still from. He is what is referred to as a bigot, and likely therefor, a probable racist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too, Amerka. Haven't you heard? Bush's Amerka will be

freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

/ / commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." \ \

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?
An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)
Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian

Aid giving illegally to double biller commi Halliburton. But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11. You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. -ba)

Communicating knowledge is powerful stuff let me tell you. (Roar) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence

must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and implements to not work for public criminal investigations regarding the murder of thousands of American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly, and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady

paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

/ / When seeking reasons for the cuts and bruises on the scalp, chest and mouth, why is murder-made-to-look-like-suicide not properly explored? Presumably pathologists employed by the Home Office know better than to mention such a scenario. \ \

This whole Britain Blair thing is so disturbing when parlayed with the facts outlaid. Look, MI6 (C) confesses the 45 minute thane was really just based on how long it might conservatively take for the Iraqi military to get small caliber weaponry, like grenade launchers, to anywhere along the Iraqi border. (With an

additional report alleging MI6 obtained those timings from an out of date Russian military manual. (Likely therefor, a bit of a brag)) If that is not 'sexing up' by the devote bushite Blair warranting his immediate resignation he promised, nothing is. Huge penis shaped nuclear warheads, as apposed to a sweet pea shooter aimed at space invaders? Hutton should be considered for treason when you think about the time spent privately reading the 45 minute, Weapons of Mass Destruction thane over and over again, never mind the fact he is blatantly, nakedly, attempting to cover up the murder of a Brit. (The British can't be played as stupid collectively as bush's America, because they're not. Kinda like Canadians, Norwegians, the Swedes, Belgians, France, and most other developed, and semi-developed nations. Hundreds of countries, comprising near 7 billion People. (Thousands of millions wiser together, than Americans without public heath care) US: that Ashcroft, bush and rumsfeld dictate by ungodly decree, are not of true Human values when talking about protecting our Justice and Freedom ruling our ways.. into the mystic. With King Johnny somewhere partying not stop with women, wine, and song.) snp

I ask Humanity, shouldn't Annan, if anyone, be speaking up scientifically on American soldiers eating rummy's radio-active depleted plutonium, while being blowed up by landmine cluster dud? now that I come to think of it... how is this to fit in any public American school text book without mentioning the dying for nothing as evil bushites part? Can't fit without some revolutionary process of evolution to the betterment of America as dreamt of by big picture planning, no?

Now, can someone, at least, lend me some credit for the time being?

To you, for now,
I bid,
adieu.

/ / Except that the United States has absolutely no intention of actually getting out of Iraq. It wants its troops to remain, and it wants Bechtel, MCI and Halliburton to stay behind and run the water system, the phones and the oil fields. \ \

Never ever land more like. Imagine that: Arabic WorldCom phone bills, Halliburton gas bills, with the only store "legally" open to US public will be Bechtel, who will demand through bushite tyranny, you pay your wages for something unjustly over billed as, but put together at less than five dollars a day wages offered, being as the only jobs available through not publicly accounted bushite middleman directly chancing the whole country of America as undefended financially., extending "their" risk to do nothing; by the further needless SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly dying WORTHLESS WITH as da dumdums. Armed American Soldiers should be bravely going after Baathist bremer with DEMANDS for immediate democratic elections and the immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists

publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)
God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi savages, while desecrating all of Humanity by fighting against a just rule of Law, (instead of protecting America's America), forces the continued REAL WORLD sacrifice of true Liberty, until the bushmob gang is brought up by US for war crimes., as the 9/11 perpetrating, super evil as ungodly, demon antiChrist in disguises. (I very much would feel welcomed to play my part in those public proceedings.) Hmmm.. maybe CNN or CBC can become publicly convinced we should have our own news programs on what's truly happening?, to compete against the 'evil bushites' in this competitive free market place of ideas? Who knows..

Take care of the business, by getting US in on our news-casts., as these principles here standing in words, are a dreamers dreams, just waiting for You to bring to reality., by standing proud, strong, and forever free as a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America
is America. You, as an American, have a sworn right to
demand for America, bush not be allowed to further
miscarriage Justice blindly back to the dark ages, by
not correcting himself on behalf of established
publicly, where American intelligence stood, stands, and
ultimately strives. Freedom is not protected by letting
the "bad guys" go, to further toll more innocent lives
for criminal sacrifice. Sometimes, the real simple
things are over looked as profound meaning. The Magna
Charta of 1215 states that a freeman should not be
imprisoned. Simple right? Not for the bushites who

side instead to faith in pope bush, who deliberately unminds a timeless universal principle that exists also in the 1700 B.C's, Code of Hammurabi, where all individuals are to be found equally under the Law, to be fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition. The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any

further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder

New Yorkers for a fast dollar at your expense for
further keeping silent? These words are freely your own
to do as you will. Shout for Americans dying needlessly
under the TRULY incompetent bushite lawless rule, or
don't side to help a plead for mercy regarding yourself
truly included.

Can the bushites possibly think, we're all not ever
possible to stand together without a true Loyal
President, or, make believe King named Johnny, on the
facts firmly established regarding the treasonous war
monger antiChrist lying to Patriots dying US as victim
for?

America, I will now leave the rest of Our job in your
hands for the time being.

Yours again,
Johnny Wizard

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

## 1545. Pro-2004 battery question.

I have a Pro-2004 that seems to eat 9v back-up batteries.

Apparently the unit cannot be operated without a battery. Is this true?

The manual says the battery should last 6-9 months, but the BATT flickers on mine after about 3-4 weeks.

Anyone with a similar experience with the Pro-2004?

I had a 2004 once years ago. The memory back-up battery would last for a
very long time.

Same here ref 9v battery. It eats them alive. When you start
hearing double beeps for no good reason thats the indicator to
get a new battery in there. Make sure leave the AC switch on
while your doing the battery replacement so you dont have to
load up 200 chnls again.

Try this:

1) Press manual
2) Punch in the channel you want to program
3) Press manual again
4) Punch in the freq you want
5) Press E
6) Your done, you can press the Review button and it will show you the
freq you just entered (the . will look like a - when doing the
Review).

Come on, folks! It's a movie! There is _no_ connection with reality!
If they had bugged a hard drive, they would use a receiver tuned to the
bug's frequency, no? But it's a better visual to have numbers blinking

I believe I read something that Bill Cheek posted that it could be the voltage regulator for the battery backup that will cause that, the regulator is near impossible to find though.

Another thing you could check is the solder joints where the battery wires solder to the board, if they are cold soldered then they could be causing it to draw more power than it needs.

This is the highly sought-after Pre-Ban PRO-2006 programmable scanner. It covers frequencies from 25-520 MHz and 760-1300 MHz with no in between interruptions. The lighted liquid crystal display is bright and clear and comes from a non-smoker. It receives Wide FM (TV sound, FM broadcast), Narrow FM (Business, communications, HAM radio) and AM (Aircraft, CB Radio). It has 400 channels in ten banks, which will work in any band combination. It has two scanning rates, slow=13 channels/sec and fast=26 channels/sec. It has a 2 second priority sampling with a 2 second delay time. You can also lock out channels that you want to skip over. You can do a direct frequency search, which allows you to scan through every available frequency to find interesting broadcasts. Sound Squelch keeps the scanner from stopping on a channel that is only broadcasting a carrier, with no voice or other sound. A monitor bank allows you to save up to ten additional channels located during a frequency search. It has a 3" built-in speaker, tape out jack, external speaker jack, 12-volt dc power jack, 120-volt ac power cord, external antenna connector, new 9-volt backup battery, and antenna ATT switch.

This scanner is in excellent condition and comes with the stock antenna, original box and original owner's manual. Don't pass this one up, they don' t make 'em like this anymore.

Chris,

I have similar antennas to setup. I am going to try a solution I have thought up. Will be up on the roof doing it tomorrow. I am going to try two TV amps. One standard VHF/UHF one and then another which diplexes VHF/UHF and Band 5 UHF (ie. 600MHz +). The output of the VHF/UHF amp goes into the Band 5 amp on the VHF/UHF input. The two will be powered by the one inline power supply. They are GME Kingray devices. These are local Aussie amps. There are similar VHF/UHF and Band 5 ones in US and Europe.

Well it all sounds well in theory. The main thing is that I hope I don't get too much intermod etc with wrong signals being amplified. I might just not have the VHF/UHF amp but I would like to as mixing it in with the other amp takes about 1dB out.

So stay tuned.

Opus

# 1571. Bearcat Electra Compuscan 2100 Computer Controlled Scanner

Newsgroup: rec.radio.scanner

Email sent to me about the Bearcat Compuscan CP2100:

What do you think about this early computer controlled
scanner?

``````````````````````````````````````````````````

The Bearcat Electra Compuscan Computer controlled Scanning receiver
was original designed for the US Goverment/Military when they
approched Bearcat to design a "State of the Art Servanence
scanning communications receiver for the standard "FM" mode
bands 29 to 512 MHz" in the late 1970's or early 80's that
could be externally controlled and log useful information.
It was to be used for Military and Police Surveillance with
"Block Box Technology".

The US Goverment came to Bearcat because they were innovators
in Scanning receivers (one of the first to make a
programmable "Crystal less scanner"). Bearcat agreed but they
also wanted to make it available to the general public. The
Goverment wanted it exclusive for offical use and that slowly
soured the deal. Most people agree that it was years ahead of
it's time as shown by the ICOM PCR1000 and Winradio External
series radios today. Also the US military NOW use the ICOM
receivers in there remote control drones in Iraq and other
applications.

Only a few were manufacturard between 1983 and 1984 mainly for
Consumer shows including the prototypes but some were sold to
the general public. They were planning to add the 800 MHz band
and include more PC control interfaces/software. The Apple,
C64 and last the IBM PC interfaces did make it in production. It was
Rumored that it cost more to make the CP2100 then they were
selling it for (they were taking a BIG loss to promote new technology).
The US goverment dropped out of the deal leaving Bearcat in a
hard spot with a lot of money gone into R&D and no interest in both
goverment and public sectors. For a short time Bearcat advertied the
Radio to the general public but people were wondering what to do with
computers and didn't see the need for tying up an expensive computer
to run an expensive radio at home. It was like something out of SETI.
People at this time still didn't know what role computers would play
in the future.

Some Advanced Features the Compuscan Had:
``````````````````````````````````````````````````

* 200 Channels - load or save 200 at a time from disk, Virtual Unlimited.
* Alpha/numerical Info displayed with Frequency to ID Station/channel.
* Search and store between any frequency range.
* Channel activity counter.
* Everything controlled via software except Volume & Squelch but had
Auto Squelch like the NEW ICOM R3 Receivers.
* Squelch had Auto/Manual
* Software controlled external relays to control optional devices
like tape recorders, alarms, selectable by channel.
* Unlimited Possibilities with new software.
* Even the Volume control could be external mounted for complete
remote control. Place radio in trunk of car, rack room in radio
station, etc.

The Bearcat CP2100 is now a highly prized collectors item to
collectors of early scanner technology or communications receivers.
While prices are slowly increasing it is the hardest PLL scanning
receiver to find & collect. For such an old scanner it's still useful
to use especially with a GRE Super Converter to receive the 800MHz
band. I have had several people only recently seen it say they
thought it was a NEW product. While you find just about anything
on the web, very little on this radio can be found. I don't know
if a service manual was ever made for this radio but I've only
seen manuals for operation and software/Interface setup. I know of
atleast 2 different versions/redesigns of this radio with different
DIP switch configerations. Control commands are not well doctumented.

Sadly the Compuscan was not meant to be and when Uniden took over
Bearcat they dropped several models including the Compuscan 2100.
Even a Bearcat employee said it was something designed for the
21st century not the 20th Century. "We made something that you
would see on the Jetsons or James Bond and not what most people
think a radio should look like or function as in the real world".

Uniden Corporation acquired the Bearcat division of Electra
Company on May 28, 1984. According to an article in
Monitoring Times (July 1984, pg. 2):

"It is safe to assume that several new products,
including a BC-100XL with aircraft band, a BC-450 wide
coverage scanner, and a BC-210XLT with 800 MHz, will
never see the light of day."

"Presently manufactured products which have been
canceled include BC-250, BC-300, CompuScan 2100 and the
new TV satellite terminal."

"Sources close to the company revealed that
approximately 120 employees were laid off Friday,
June 1, 1984......"

I hope you find this information useful and will update any
errors or omissions found. I would like to know the exact amount

made of each model, if any service manuals exist and any other details you may know of this model. I Tried to contact people connected with the CompuScan project but had no luck to verify or Discover new details.

So ?
Whats your point - Its still a great scanner - Till this day blows most
anything away that blowcat offers - Wide freq range,mil air,highly
modifiable,huge consumer base,parts still readily available,and built to
last.
Its not like full 800 mhz is its only selling point,and here I'll agree
that to imply that it is is rather silly.
Bottom line - A $175 opening bid is highly 'realistic' ,and is right in
line with what they go for on resale.

I ordered a cable from them, got the cable. However I never received the email confirming receipt of my purchase of the software license - instructions for download etc.

I am pretty cofident that I entered my email address in the field correctly, when i ordered. I have tried to contact their sales depot with no luck. I am a bit anoyed, due to this with them, not getting fully what i paid for. I Ordered the Control Software key for the BC 780 XLT by the way.

I followed the instructions in the manual and turned off global attenuation. Now during scan the ATT- appears on line four of the display.

Was global attenuation on by default?

Did I do myself a favor or not?

I have a Radio Shack PRO-89 race scanner and the Radio Shack Scanner Loader software.

I have the software installed on Windows XP and Windows 98 (I can boot either OS on my system). Everything works perfectly on Windows 98. Everything *seems* to work on Windows XP except that it won't actually upload frequencies to the scanner. The only requirements listed on the CD are "Windows 95 or later".

I downloaded ProLink software and it loads the scanner correctly on XP. The only reason that I mentioned that is because to me it proves that there is nothing wrong with my hardware or XP.

I e-mailed Radio Shack and just got a reply that they know the software doesn't work on XP. According to RS the software "does not access the serial port properly and cannot therefore send data to the scanner". They went on to say that "We do not have a version of this software which will work with [Windows XP]".

Does anyone here know of a workaround or any way to get the software to work on XP? If not, what software (free?) do you recommend.

Thanks,
Nick

Well, lets see here. Huntress and Giant Killer are milair, use AM.
However, HF-GCS is the new name for the old Global HF system, and while
they primarily use USB on HF, they also use other digital modes as well.

--
When you put on 'Global ATT' you simply apply ATT 'on/off' to ALL
channels, which disregards INDIVIDUAL channel ATT assignments
you may have had.
If your pro-95 shows ATT- on line 4, ATT is OFF on all channels.
If you now press ATT, it will display ATTon, and ATT applies to ALL
channels.
I live about 100 feet away from several cell towers, so I have to have
ATT on on most 800MHz trunking and non-trunking channels,
otherwise I get a strong buzz-like interference. Of course there are
a few other frequencies that need the ATT applied as well.
When I take the scanner in my car, I activate Global ATT, which
removes all ATT assignments to various channels. -Ron

Your probably right about that - But its hard to feel sorry for an
uninformed idiot.
I'd say $250 would be worth it cell or no cell,but anything over that
wouldn't be a wise investment unless you happen to know it was just
listened to by a little old lady on Sundays.
I still got my trusty 2006 - And haven't cruised the cell bands in years so
don't know whats going on there, if anything.
I modified the shit out of it with at least 8-10 mods - Some I don't even
remember what they do anymore.
I don't know if that would be a + or - in an auction.
Alls I can say is it still works.

Huntress and GK are call signs,and as such can be heard on a variety of
modes - I've heard Huntress on AM in the UHF bands,and SSB[USB} on HF.
GK I've only ever heard on HF - Most likely because their Navy operating in
the Atlantic, and I live in Michigan.
They tend to 'go green'[encrypt] alot,but can be heard in the clear pretty
often.
GCS is all USB as far as I'm aware - It would kinda take the 'Global' out
of 'Global Communications System'if they operated in the VHF/UHF bands.

In the 80s, it was their steadfast opposition to creation of a codeless amateur license class.

In the 90s, it was Low Earth Orbiting Satellites (LEOs.)

Today, it is Broadband via Power Lines (BPL.)

In earlier times, hams were known for being on the cutting edge of technology. But in recent years, hams are known for repeatedly trying to stand in the way of new technology.

Sad irony, isn't it?

I agree. The 895 is probably the best bargain scanner, and it can also
be computer controlled. The 2006 isn't even in the same league as the
780, yet people pay the same price or more for the 2006 because they
think they're getting something special with an "unblocked" receiver.

Fair enough - I know nothing of their capabilities,so will give you the
benifit of the doubt.
Quick question - Do either or both of them cover mil air ?
If not,they are about as useful to me as a scanner as a hookless fishline.
Trunktracking is a feature that has so far not grabbed my interest - Is it
really that useful ?
CTCSS too - Really,have you actually garnered any use out of knowing what
numbers the little squeals represent ?

The 780 does, don't know about 895.

>Trunktracking is a feature that has so far not grabbed my

In areas where police, fire and other services have gone to trunked
systems, it's pretty essential, otherwise calls are almost impossible to
follow. Trunked systems change frequencies multiple times during a call.

> CTCSS too - Really,have you actually garnered any use out of knowing
> what numbers the little squeals represent ?

Yes, one of the state patrol channels in the area where I live has so
much noise that without the ability to filter using CTCSS the frequency
would unscannable.

Being able to use CTCSS tones is also handy for filtering out unwanted
signals in areas where different agencies use the same frequency and you
don't want to listen to one of them.

There are many interferance issues with BPL especially at shortwave
frequencies. It's not only amateur radio operators that use these
frequencies but the military and federal government do as well. Amateur
radio operators are sworn to provide emergency communications in times of
national disaster when other forms of communication are down or
overwhelmed. They are simply bringing to the regulatory agency's attention
the possibility of them not being able to fulfull their duties if they are
needed.
How would you feel if a hobby that you have spent a lot of time and
money in is suddenly rendered worthless?
Disclaimer: I am an amateur radio operator (N7ZVJ) but I don't
operate at shortwave frequencies.

Excellent condition. Works perfectly. Full 800 Mhz. Original box, manual, and will include 6 AA 2000 Ma NiMH rechargeable batteries with external charger.

Price is $175.00 shipped in CONUS.

Reason for sale: I use my MVT-7100 more and the PRO-43 hardly gets any use.

Troll. You obviously have not done your research on BPL, otherwise you'd realize that not only are hams pointing out the shortcomings of BPL, but so are many other groups. BPL is a poor compromise and there are plenty of alternatives to its use.

Well Me Jon, the only reason your are NOT on HF is your ham ticket.
It's a "TECHNICIAN" class.

There are many more operations on HF (shortwave) than you have stated.

I don't know how they give ham tests in AZ, but in the eastern part of
the country we are not "SWORN" in or take any kind of oath. And yes, I
agree that most ham do spend tons of hard earned money on their gear,
especially IF your on HF.

This radio has 10 scan channels plus weather search. 29-54, 136-174, and
406-412. Scan delay, one priority, channel lockout. No cellular, no
aircraft.

Turn it on.
Push the "manual" button to stop it from scanning.
Push numeral 1, then push "manual" again. This should leave you on channel
one.
Using the keypad enter the frequency you want to monitor, then push "enter"
or "E"
Push "manual" to step to channel number two. Enter the frequency. Push
"enter." Push "manual" to step to channel three.
Repeat this process until all the channels are full, or you've run out of
frequencies to enter.

Adjust the squelch control until the hiss goes away, then just a tiny bit
more in the same direction.

Push "scan" to start automatically scanning the frequencies. The radio will
stop when it hears someone talking, then resume scanning two seconds after
the conversation has stopped.

It is true I have a technician class license but that's all I wanted.
I live in a covenant-controlled community so I can't put up huge yagi
antennas to operate on HF. I know you can get smaller profile antennas that
fit in an attic but I am more than comfortable with my license now.
I wasn't "sworn" to do anything either. That was perhaps the wrong
term. What I should have said was that amateur radio's charter is to
provide emergency communications when needed (I don't know if that was a
condition of the FCC granting frequency space or something the ARRL came up
with).
What I'm worried about is that commercial interests seem to have
precedence over amateur radio interests. Ever since BPL has been talked
about the ARRL has been showing in their tests the harmful interference,
yet BPL has continued to move forward. The reason is because BPL has money
behind it; us amateur radio operators don't have lobbying groups (maybe the
ARRL does lobbying but I doubt it). I don't even operate in HF so this
issue doesn't affect me but I can see where it's going.

They are hard-wired to the recorder in the trunk of the car. Started at the beginning of watch, checked in at the end of the watch or shift.
Neither the audio or video are transmitted from the vehicle. This is for the regular patrol cameras.
For the "Covert" installations..thats a differant story. Law enforcement agencies can (and DO) use ***ANY*** frequency they please on a non-interfering basis with the primary licensee. That means if your local police dept wants to conduct a surviellance on the channel normally used for the school district's car to car channel they can.
Frequencies they wont use....HAM or Amatuer, CB..(27 and 462/467)all classes due to interferance.They will not use the 5 MURS channels due to interferance.They will not use FRS.They tend to NOT use any "IB" frequencies due to interferance and being overheard.Local Law Enforcement will not use the 136-143Mhz military band.
Frequencies they WILL use.....Federal assignments(see 406-420Mhz and 162-172Mhz),Aircraft channels from 118-136Mhz AM(high altitude surviellance), neighboring law enforcement's assigned channels.Local NON-USED television channels!!! yeah..you heard right. If TV channel 8 is not used in your area its a perfect place to hide a narrow band FM planted mike.( no high power stuff,typically 100mw.) TV audio is 25Khz wide and even if your on top of the mike...with it's 3-5Khz wide audio you wont hear much.
Hope this helps....happy monitoring!...Eddie

Hi Guys...

For those of you who are intrested in MPT-1327 Standard
Trunking Networks I have coded a little Programm for
Tracking these Networks with a Computer/Soundcard
and an (U)BC-780-XLT.
Simply connect the AF-Output from your Scanner to
the Soundcard of your Computer and connect the Serial
Port to your Scanner.
If the selfdiscribing .ini-File is set properly
you are able to Track the Calls....

The Software ist still beta, but of course for free :-)

FIRST OF ALL i WASN'T WATCHING ANY NEWS PROGRAMS AS THE SOURCE OF MY ASKING.

The mics are not hard-wired. The officer wears a microphone on his shirt with a wire that goes down to the tranmitter on his belt. The audible part is transmitted back to the car.

I ask because the local police stop cars in front of my residence alot enforcing the 25mph speed limit.

I just wanted to listen. I used to have it but lost the frequency when I moved.

Search in the 166-175 mhz range. They are usually low power (less than a watt). If that doesn't work, they may be of the 900 mhz variety.

It's an interesting link, Jochen, but not everyone reads German.
Could you code an English page for those folks that don't?

Be more specific; to do what? Trunking? Conventional? Both?
Logging? More details, please...

The article below was found in a modification handbook. I do not own a BC142 and have not tried this mod. Proceed at your own risk.

UNIDEN BC142XL 16 CHANNEL MODIFICATION

The BC-142XL is actually the same scanner as the BC-145XL. It is basically the same all the way down to the IC controller chip. Both scanners employ the UC1116 (16 channel Integrated Controller Chip) for this purpose. However the BC-142XLT is capable of only 10 channels, while the BC-145XL is capable of 16 channels.

So if both units are basically the same, why the channel difference? Answer: 1 small 1S1555 diode. This diode is located on the bottom of IC8 (UC1116), the controller chip. It is connected between pin 27 and pin 12 (the cathode connects to pin 27) of IC8. Once this diode has been removed the unit will now accept and scan 16 channels instead of 10. (Note: This modification will also work for the BC-140XL scanner.)

Carefully remove the housing screws and disassemble the unit. Remove the five screws that secure the circuit board to the plastic case. Once this is done carefully lift the circuit board enough to see the ground wire that connects the circuit board ground to the metal plate attached to the bottom of the plastic case and unsolder. Next unsolder the other ground wire that is connected to the Antenna connector ground. Now the board should lift out.

Next turn the board over and locate the metal shield cover soldered over the IC8 board area. Carefully unsolder all five solder connections and lift the plate off. You should now be able to see the small signal diode connected between Pin 27 and Pin 12 of IC8. Remove this diode. Once you have
removed this diode, replace the metal shield and resolder it back to the circuit board. Reconnect the ground wires and reinstall the circuit board. If all has gone well you will now be able program and scan 16 channels instead of 10.

Or you end up with a paper weight... that is WAY more than I would want to do for the 6 extra channels.. you can buy 16 (or more) channel scanners on ebay all day for ~$40.

I'm not familiar with the BC-780-XLT. Is the AF-Output a normal audio
output or is it a discriminator output?

If the output is normal audio, wouldn't any scanner work?

Thanks for your efforts.

The Micro Counter: A frequency counter so small that it's housed in a pager style case, yet still featuring the quality and performance customers expect from an Optoelectronics product. The Micro Counter has a frequency range of 10MHz - 1.2GHz. The Micro Counter has the ability to capture and store three frequencies in memory for later recall. Using the optional TMC100 antenna the Micro Counter can receive signals as far away as 125Ft.

Darn. I have the 145XL. I kinda wish I had the 142XL just so I could

BTW, thanks to Frank346 for helping me identify the bad audio output

Check this out Buddy, you don't know enough about me to make a comment like that.

It's not about the call sign, it's about the CLASS of license. I have had a one by three call for forty years, that doesn't mean I have had the same class of license all that time. I have friends that have two by three calls and are extra's.

And yes Jon, I do agree with you that commercial companies would most likely put in some big bucks to get there way with the government. Isn't that the way it's done all of the time. Money talks the loudest.

I would bet the ARRL is in someone's pocket at the FCC. How about FCC Chairman Michael J Powell, his father is the Secretary of State. Doubt me? Look it up. A lot of hand holding goes on in DC.

Just for decoding the Messages and have them on the Screen and in the
Log-File, you are right, any Scanner will work. But to tune the
Scanner automatically on the Frequency where the Voice-Communication
will take place you need a Scanner with an Computer-Remote-Control
Interface like the (U)BC-780 XLT. The Software in the Moment is only
able to Control this Model (ore the ones with famillary Remote
Commands), but I will add mode in future versions.

Hi Mike,
I will do so in the next few days, but try to download the
Programm, its in englisch, also the Config-File.

I have to agree that Hams can and do sometimes impede progress.

Having been one since 84 I still have to wonder why we are still using analog and have this phobia towards digital? Ok before you jump, yes APRS, Packet etc.. is digital..So why are we still using 1200 baud with very little 9600 (used for links) and why not go higher and use digipeaters as voice repeaters using IP or other transports that have been out there for quite some time?

All the ole timers that used spark gap transmitters are history, so lets at least try and keep up with the jones' or else the FCC is going to take the rest of the spectrum away from us.

Gotta wonder why they took 220?

Hi all,

a new version of my control software Ar86ctrl for
the AOR scanners AR8600 and 8200 is available
for download at

http://www.an-netz.de/home/kbo/index.html

In the new version v1.41 some bugs are removed.
There are no new features compared to v1.40

The software is free of charge.

Enjoy.

No antenna will work equally well over such a wide freq range. However,
antennas such as the discone are very good compromises. Little or no gain,
but wide frequency response.

Here's a biconical type antenna I built & used:

http://www.geocities.com/n2uhc/bicone.html

Seemed to work a little better than a discone.

That doesn't stop outlets such as Radio Shack from advertising 25 - 1300 MHZ
coverage from groundplane antennas. Of course it will receive SOME signal
over the entire band, but so will a paper clip.

If I'm not mistaken, a Firestik antenna is a CB antenna, correct?

Using an unmodified CB antenna as a scanner antenna will work, though you
will have better response with low-VHF signals than you will UHF signals.
You may think about shortening it somehow.

The Military is conducting fairly large exercises offshore northern
Florida today, and comms can be heard all over the 225-400 MHz range.
Beginning at 8:14am EST (1314z), AWACS "Darkstar Quebec" was up with
Sealord on 267.5 announcing the acft he would be controlling. First, there was
a four-ship vs a two-ship in ACM involving WARHAWK F/A-18s from Lemoore's
VFA-97 vs FANGs and HAWKs. At 1800-1900z a four-ship flight of Dutch Air Force
F-16s will be up; and from 1830z-1930z it will be FANGs vs HAWKs again.
The Lemoore boys are here from California and will be TDY for a while. Their
use of the WARHAWK callsign, instead of the HAWK callsign, will enable us to
distinguish them from the HAWK F/A-18s of Beaufort's VMFA(AW)-533.
DARKSTAR QUEBEC has also requested that Sealord relay to DOUBLESHOT (Shaw
AFB, SC). For their ACM vs FANGs, the WARHAWKs will be up with DARKSTAR
QUEBEC on 261.2. Other acft are being heard on 317.6
GOLIATH ALPHA, another E-3 AWACs (from Tinker AFB's 552ACW 960ACS) will be
working in the offshore W-158A, B, and C areas from 1630z to 1830z with SHARK
21 four-ship flight, MAKO 11 single acft, AKULA 31 flight of two out of
Homestead JARB, and LOBO 01 flight of four, and KC-135 tanker BOLT (from
MacDill AFB).
GOLIATH is now awaiting the acft to check in on 320.6. He is also up with
Sealord on 267.5.
Good time to be searching the 225-400 MHz range, guys. Buddies of mine are
hearing these comms all over Florida and into Georgia.

TurboTax hullabaloo, but I don't find that I have any reason to
switch back to TurboTax now. I guess my customer loyalty isn't so
easily regained, especially being that I don't think they're the
best product on the market anymore.

Extreme,

I think you are listening to the Winnipeg Ambulance Service. Some
codes you might hear:

Red - Life Threatening
Amber - Attention Required Immediately
Green - Stable

Romeo - Under Resuscitation
Charlie - Concious
Uniform - Unconcious

3 - Trauma Injury
5 - Illness
6 - Burns
7 - Maternity
9 - Heart

Green Charlie 5 = Stable Concious Illness

These codes are to the best of my recollection...I'm sure more
up-to-date codes are available on the 'net. Try Scanmanitoba.net, an
excellent source of info on scanning in Manitoba.

## 1678. Howard county

I am looking for a little help for Howard County,
Maryland.

Today when I turned on my scanner (RS Pro-37) all
the police channels where quiet. I am guessing they
went to a truncked system?

I did a quick search on the net and found the freq's
and talk groups, but at the bottom it said this:

Motorola Type II ASTRO(800)
Digital Type - ASTRO VSELP
SYSID - 7f06

Does that mean they went digital also?
What type of scanner would work for this?

I went to the RS home page and the Pro-95 is truncked,
but I really don't know much about the truncked systems.

Thank you for the help,

Kelly

Tuesday 09 March 2004

Several AWACS acft worked many many fighters all day long,
multiple tankers serviced the aircraft; it was possible to only log some of the
endless activity. All the inland ranges and offshore areas were active.
For the second consecutive day, bevies of NASA acft came and
departed the Shuttle Landing Facility, including the crew of the next shuttle:
STS-114.

AVON PARK RANGE CONTROL
8:08am; Comms between Avon Range Ctrl and mobile re permission to cross rnwys,
etc.
[149.225]
Might be atmospheric conditions, but this was a mobile unit talking to Avon
Park Range Control; I heard both sides of the conversation; this has happened
before; it occurs only about ten-twelve times a year.

DARKSTAR QUEBEC: E-3 AWACS, Tinker AFB 552ACW 965ACS
8:14am: Announces to Sealord the acft he will be controlling in a four-ship vs
two-ship ACM exercise: WARHAWKs (Lemoore VFA-97 F/A-18s) vs FANGs (FL-ANG
F-15s) and HAWKs (Beaufort's VMFA(AW)-533 F/A-18s] ; then at 1800-1900z a
four-ship flight of Dutch Air Force F-16s will be up; and from 1830z-1930z it
will be FANGs vs HAWKs again. DARKSTAR QUEBEC has also requested that Sealord
relay to DOUBLESHOT. Also has comms with AWACS Goliath Alpha.
[267.5, 261.2, 317.6, 364.2]

LIMA LIMA 83: P-3C, Jacksonville NAS VP-30 "Pro's Nest"
9:06am: Rqsts DARKSTAR relay too Sealord; working 6 Yankee Area. Sealord

## 1685. Time to buy a new scanner, I think..

Hey there,

I currently have two scanners. They are both Uniden BC200xlt's.

I have no complaints about this model. It has done what is was designed to do just fine for me.

No trunking though. I'd like to check that out.

No digital either. I don't know if this would be a benefit or not to me in my area.

First, I live in Santa Clara County, California. What am I missing that you enjoy monitoring? I currently monitor the local fire and police departments. Sometimes I'll check out the commercial flights at the local airports.

I'd like to check out the military air communications. Is there much to be heard in the Bay Area though? I think all the bases are gone now.

The latest Uniden is the BC296 so that's probably what I'd be looking to buy.

Thanks in advance!

Charlie

actually, they make a complete line of antennas for just about any type of service you want.
I have a 2 meter firestik (bought at apollo communications here in phoenix some 8 years ago) and its a real performer on the band. it also makes a nice vhf scanner antenna. They make a line of scanner only antennas for the car, truck or house. They are best known for their CB antenna line though.

Just my 2 cents worth.

Some of the Sheriff frequencies are digital BUT just because they are digital doesn't mean they can be listened to by a digital scanner. You need to know what type they use then see if the scanner you want can decode that type of transmission...

Senseless discussion. It's like saying that your big wheel 4x4 blows
his Ferrari away, and neglect to mention that you live in the
middle of nowhere surrounded by swamps.

The Pro-2006 are probably the worst scanner you have when it
comes to sensitivity. But the IM rejection compensates for that
when you use it at an RF rich enviroment or have an amplified
antennna. In a mild RF climate anyone of the other scanners
would beat the Pro2006 hands down.

There's a time and place for each scanner where it will shine more
brighter than the rest. Your 780 are probably overall the most
versatile scanner you have and handles most situation just fine.

Ubbe.

What does intermod sound like? I just bought a new antenna and I'm worried that it overloading my handheld scanner (Uniden SC-200) because I live in a very signal rich area. I hear the term all the time and know what it is caused by, but I have no idea of what it sounds like.

I'm in Santa Clara (city of) and use a PRO-96 to monitor:
* The city's 800 MHz Mot Type-II system (all police, FD, etc.).
* County sheriff (non-trunked digital). I mostly listen to the
operations in/around Cupertino.
* Moffett Field. There are still some Mil-Air operations going
on there.
* CHP - the "instant" CTCSS decode on the 96 is great for that.

I mainly listen to the city, but occasionally "un-lock-out" the
others.

/ / BYPASSING THE CIA: ...set up to purposely bypass "usual intelligence channels to make a case [for war] that conflicted with the conclusions of CIA analysts." The office presented unreviewed - and often uncorroborated - intelligence directly "to the offices of Vice President Dick Cheney and national security advisor Condoleezza Rice" without the knowledge of CIA Director George Tenet (yesterday, Tenet acknowledged that he only learned about these side briefings last week). \ \

For the demon bush Jr, as evil incarnate, this failure of his intelligence is nothing new. He trumpeted against Saddam, if someone should harm anything of value that he and his mob were to steal, he'd charge'em up for crimes against humanity, but not so [apparently] when he and "sexy" rummy sent in thousands of missiles to destroy public property. Or land mine cluster duds to kill leaderless American Patriots, along with tons of radioactive toxic waste to indiscriminately murder untold thousands of people for generations. All by the lawless demon antiChrist so to desecrate the American dream for everyone, by ungodly stealing our human values. (instead of going anywhere without restriction or delay, while granted free access also to national Iraqi broadcasts to say whatever about current deprived survival conditions.) See?, as corporate america's deity, the bushmob isn't accountable to the enslaved People under his evil tyrannical rule of godless dictatorship. That's why he is referred in biblical texts, as the lawless evil enemy of all the People, God, the Universe, and well... just everything. Humanity is in dire need of a god send just now, quick! somebody say someone somewhere said something somewhat similar, that you, like anyone, would want to be included like everybody else is too; committed to freedom from oppression, and to be our own person, like Christ is. Now, we just need a good King to run around the world for HELP to party it up like a wild animal for all of Creation as a Life spokesman. Hmmm? Sure I'm up for it.

I would request again, for a brave American Patriot to immediately arrest if possible, or simply destroy the unarrested, escaping from 9/11 demon antiChrist, Our Mr.

bush Jr., along with "sexy" rummy. Done for the sake of saving innocent lives not further sacrificed for leaderless America's inaction to protect Americans for themselves as Constitutionally legitimate. Bushites are too ignorant, bigoted, and plain stupid evil to remain corporately unchallenged by the documented evidence of the traitor bushmob's contempt for Law, or the Lord. To protect Justice as freedom through OUR news media programing, we're going to need to make a break through in communications. (I suggest cultist corporate news hounds consider using the Internet as a possible source of public information, and maybe legitimately converse with us as the concerned community.)

Big Sky

We, as glorious human beings, are wondrously effected by the nature's of perception, but as so 99.9 percent wondrous, we come with some recognizable universal draw backs. One: actual evidence as measurable, must be a requirement to convince us of something to deprive another of rights over by judicial action. True judicial action through democratic means. (The simplicity of "a freeman shall not be imprisoned" is being profoundly missed by the bushmob's America as played too dumb to comprehend through our media news channels censored.) Demon bush demands you faithfully blank your mind from his bad faithed dictate on how unspeakable 9/11 magically went down, but without most the established crime scene evidence that is freely uploadable. It's not, gee, I wonder when he'll really screw up, it is bush himself whom is committing the crime of 9/11 with rummy to begin with, then thinking, he could get away with it still by lying to EVERYONE. For all time. War crimes have no statute of limitations in my book, and the law has a mighty long reach my friend.

Bushite bremer hired Saddam's secret police, and fired school teachers. Mr. bremer, you'll remember, is the president of Kissinger Associates, the group that criminally provided Saddam the WMD knowhow. That's is evil for ya. His strategic defense, is that American soldiers, are too weak as slaves, and create doubt on what is firmly established in evidentiary proceedings already. Mr. bremer figures, since no person would willingly put themselves where he is, as certainly, it just can't be so.. (I'm sure he and rummy get alot of chuckles from conning US all as God to murder ourselves like that.) Doubt is an ever present property of a constantly changing, nothing is absolute universe. Substantiated evidence is ALL we got to go on, and sometimes, that can even get foggy. Similarly, with bush and rumsfeld. Their kind of treason is so blasphemous, people can't recognize that any real human being would willingly try to actually do such a thing for the windfalls of big corporate profit, and as such, a many god person, (as often the good natured and kind hearted), desperately look for any doubt, than to face such a human fear of real demon behavior in our World of worlds of every character. I as Lord hope, that over time, soon, recognizing war crimes will become almost second nature to US, and the fear of Human development as all good, will change to wicked fun and prosperity for all concerned. Currently, the lawless bushites are left to furthering with the barter of Your dying

existence, all done by Your inaction to simply help Yourself. Yeah, YOU left televised to be politically powerless over trying to raise some awareness on the true state of your being alive in this world.

Kimmitt "We certainly don't believe that this indicates the coalition is demonstrating weakness".

Who is this "we" the bushites keep referring to? Is bombing residential communities to murder US people indiscriminately with toxic cluster duds, (that kill aplenty dubya dubya's), not just one of the stupidest, most heinous, worthless war crimes ever that could be committed in anyone's name? Seriously. It purposefully gets killed American Patriots, and for what but a blind worship of bush as their ticking - - "Intel". - -

Where is Kimmitt to speak about feeding plutonium to the loyal troops? Something he doesn't wish them to learn of? Is that not weakness as a military leader refusing like a coward, to stand on defense of your own dying blood brothers? He instead wishes to decieve himself, than to fight bravely believing in Freedom and Justice for US all. Maybe he'll change his view, by accidentally arresting bremer for the WMDs sold to Saddam illegally by following the evidence trail himself. Then maybe helping me out to get those responsible for 9/11 in the bush administration. What do you say Kimmitt?, are you with yourself as true American Patriot, yea or nay?

http://www.khilafah.com/home/category.php?DocumentID=9176&TagID=2

" "When there is a security failure, the party responsible for security is to be blamed. And let us ask ourselves, who has the capability of launching such bombs in these circumstances? What story should we believe, should we believe and blame the figure that the Americans are drawing for us (Abu Musaab al-Zarqawi and al-Qaida fighters), or should we believe what we are seeing on the ground everyday?" he said. "

Well yah. It makes no sense for why bush's Laden, or the real Laden even, would be working directly for the bushmob to steal further more from Iraqi wealth, and the soldiering American tax payer, while not suggesting a kill shot to russell, blount, bremer, rumsfeld or bush. Or, speaking on the despicable war crimes, or where all the stolen loot is going to. (IT'S SEVENTEEN PAGES!!!) Then, guess who decided all of Iraq should get this criminal, let's do the bushmob another great idea? Bremer, or the CPA. (Reminds me of rummy's "pentagon" plan P2OG, a terrorist plan figured by rummy; that

since, he don't want found out responsible for treason, he'll orchestrate it himself to 'appear' [like as if by magic] as the Pentagon, or America, and that's only if, we were to be asking him directly about something he criminally planned personally. (but shhhh.. it's a written secret between just him and US apparently) Strange days of terrible tragedy, I know.. But fun!))

These crimes Kimmitt seems dead set on not investigating, ring more from his weak leadership, than from anything else. The bushite war crimes are as iligitimately premissed, and as so evil is always dumb and weak like Kimmitt is spotlighted as traitor to every American soldier out there truly dying needlessly as bushwhores so to rob from Iraqi and American. Kimmitt only lacks himself some manly courage to try saving US all by communicating for America's America. Will he, or.

Illiterate, irrational, all around dumb dubya had stated long before, that he knows that the, no plan to die for but getting bushite rich quicker scheme letter writing guy, is for sure, senior al-Qaeda, and I guess, he would know better than everyone else about the writer doing himself as the deceived pure evil nazi war criminating antiChrist so many favors? The bush liar as America's enemy kills ourselves as the innocent and undefended, needlessly but for stealing our human values, and so... accused Laden is a terrorist for what loyal causes again?

Being bushite victim just sucks for God as everyone.

I want to come down and party with you People, but the bushmob keeps trying to ruin our days, by destroying American lives not being spoken for. I don't like the bushite attitude about criminally ruling our ways, and I'm here to freely, demand Justice for Freedom as the Heaven's awakening. The problem is NRA members aren't acting to protect Justice left unrepresented by corporate mind control., Like Freedom of the living breathing good American Police investigating forces being denied as relevant news material witnesses. Demon bush's war mongering against God hasn't only recklessly murdered near two hundred thousand mostly defenseless, unarmed people, but has dumped with rummy, thousands of TONS of radio-active toxic waste to murder God for what will be greater than 50 generations of innocent human beings. Murdered in your name, my name, America's name, God's name. What beef does a bushite corporate america have with the Children of God? I beg the NRA, the CIA, the FBI, good guy bikers, and any other real Patriots to

stand up as men for the Family, and kill the unarrested enemy bushmob for 9/11 as traitors to our dying America, and for the war crimes they have committed in our names. War crimes while sacrificing to actually DIE, the dumfuk nazi teen soldiers whom have no leadership present to speak of. As I've stated previously, we will ask all American soldiers to either stand for America and the Constitution, as freedom and Justice for all, demanding evidence to convince US whom is suspected for criminal offences, or with the bushites, as enemies of themselves to self arillate.

Evil is just the deceived disguised. (Wow I AM Amazing)

I guess this is all quite a consideration to take and role through with for a couple thousand years, but look, evil incarnate antiChrist bush is back again fuking US around, harming our World as Humanity with flagrant war crimes continuing. His illegitimate power base comes from Americans thinking that because he is the President, he shouldn't be accountable to American Law like the rest of US, and that is where a bushite takes the fall while trying to bring down all of Americans through corporate censorship on his treason. Like unarrested fascist steven "he'll kill a bunch of US folk if you complain publicly about bush banking policy or bush health care premiums" russell, or unarrested bush bitch buford blount, who confesses the joy to see American soldiers die rightly for his irrational crimes against innocent civilians trying to defend ourselves. Fuk, who wouldn't destroy unarrested buford blount I ask all creatures great and small. Wouldn't you? I mean, come on, HONESTLY, THINK ABOUT IT, what real man, if he had to, wouldn't, to protect their innocent family? Steven russell and buford blount as steroided pill poppers have targeted innocent whomevers for being just alive, because they trust, in faith, that all America will think it makes the demon bush 'cabal' so scary and strong in a godless world that gets killed, not all so blind cowardly Patriots seen led leaderlessly as unAmerican like that forever. One or two Soldier's of Fortune in the American marines, willing to join up with US as true freedom fighters for America, is all I'm pushing for here as King of kings.

(Hey.. I know... I naturally spook myself, but I so enjoy living for something, and, there does seems to be room to believe here for you as anyone to freely be also. If Americans only knew how fantastic you could be as this living universe questing justice for freedom, You'd as anyone, think twice about silently letting the

bushmob take you as anyone else further to suffer unheard from. I urge soldiers to unite on our determination to take the bush administration out of our life and death business decisions, and straight behind bars, awaiting their open public trials for treason.)

The bushites who faithfully advocate the murder of innocent people blindly are our enemies, and I ask all able bodied men, to do what is right, and get the bushmob of terrorists before they take another American soldier as too weak to realize what is protected in the American constitution.

The Top 150 Subpoena list for the 911 Commission
http://post911timeline.org/article006.htm

Demon bush needs to be arrested, along with the rest of the 'cabal', and CNN has got to be infiltrated further by American intelligence. We need to get those responsible for 9/11, and if it means a boring hour long

TV news program with fewer commercials, with free, open dialog on the documented facts, and confessions made already by the White House, (that they had the plan before hand, and went completely with it, no lie, they did it,) we could get this wrapped up in say, two weeks, tops. I suggest, we get them good with the Law, cause it just makes right sense to every one concerned. What do you say?

I'll phone CBC and CNN, and tell them Our FBI says General Ahmad funded Atta, or that DU is measured radioactive as a toxic heavy metal containing also plutonium that oxidizes to microscopic particles, and you know what they'll do? They'll leave our families to die as further victims to the evil bushmob in criminal sacrifice. Celebrating their riches as terrorist harboring, corporate fascists, as true nazi collaborators. (Just try yourself, don't be embarrassed as scared of nothing.) I plead as the NRA, to get your guns loaded, and kill the unarrested bushmob for the sake of American family values. Your family values. The demon bush and "sexy" rummy are not only personally responsible escaping as perpetrators for 9/11, needlessly murdering near 200,000 innocent People, but in that process, they're sacrificing America's dumfuk teen soldiers, who don't have minds yet to think around. That is not what I'm all about. True, I'd happily kill any armed bushite who was threatening murder against my innocent family, but too, I know the marines, the true marines, would be standing 100 percent with me, if we could communicate about what these bushites are criminally doing in our names. With US as equals committed to freedom and justice for all, we do not want unarrested bush, rummy, cheney, or bremer as leaders. Tommy franks, buford blount, and steven russell, need to be also arrested for war crimes, or executed now in the name of America's America.

Iraq needs to have returned the money that has been stolen, organizing elections need to be started upon, and whomever at rummy's pentagon that is managing the disappearing American public fund trick, need to be tracked down, and found out as person or persons. We need American soldiers to commit to Justice ruling our ways, so together, we can nab the actual bad guys for attacking freedom in America defended by the almighty magical word of Justice as universal.

" Philippe declared, "The country is in my hands." He summoned 20 police commanders to meet with him yesterday and warned that if they failed to appear he would arrest them."

Philippe is accused by an American security firm as being a cop killer, a cop killer who hates freedom through law, democracy, now working for the Bushite americana tax payer. One: What I ask all American police officers, what, is this bushmobster Philippe going to arrest police commanders for? Two: why would the American marines not be interested in arresting him but for lack of real leadership where it counts? America. America will cowardly suffer the scourge alone with the planned "tax shelter" for american corporations in the new Haiti, and of financing cocaine addictions, that leave in it's wake criminal repercussions, all IF, the bushmob is allowed by America to get away with this further crime against God as our humanity. REAL criminal repercussions. God or no God, I HATE that enemy of all our Humanity, america's Mr. bush Jr..

" Other human rights activists, such as Lovinsky Pierre-Antoine, who fled Haiti for Miami yesterday fearing for his life, have previously pressed for the prosecution of other rebel leaders, including the current rebel commander, Guy Philippe, who allegedly led a murderous coup attempt in 2001 and is blamed for police killings in 2000. The first order of business for these U.S. supported

out all the 2000 prisoners there.

UNANSWERED QUESTIONS: The Bush Administration does
not deny that it rapidly changed its position and
helped force Aristide out, going so far as to issue
a "harsh statement" blaming the turmoil on the
Haitian president. The question that remains, however,
is why did the Administration back a rebel force made
up of "death-squad veterans and convicted murderers
over a democratically-elected government?

First, no one bothered to ask who the rebels were and
why they were advancing on major cities. If in fact they
represented a broad opposition, as reporters readily implied
or stated openly, why were the rebels unable to furnish the
barest credible details of their demands, their civilian
bases of support, and their connections to leaders of civil
society groups?

..."All sides," he wrote in a very fine article last fall
in Dollars and Sense, "concede that Aristide won the
presidential ballot with 92 percent of the vote. The sole
disagreement is over run-off elections for seven senators
from Aristide's part who obtained pluralities but not
majorities in the first round. The seven senators eventually
resigned, making way for new elections." Nonetheless, these
electoral "abuses" were grounds for the Bush administration

It's not the great artist Gibson, but corporate american

thousands of tons of radio-active toxic waste, along
with land mines to commit senseless, gratuitous mass

It is bushite america who call themselves Christian, who

Killing people
for no good reasons really sucks. I hate bushites.

Let's get the Patriots together and bag US some Rumsfeld

I just so much hate that demon antiChrist bush, and his cabal of war mongers, it hurts. Let's just kill George W. Bush for being qualified to lead but only himself and Rumsfeld directly up to our NRA's firing squad, for almost foolishly thinking they would actually escape the planned murder of US thousands in New York City on 9/11, then continuing by sacrificing dumdum nazi soldiers on a cross in a completely unnecessary war against civilization. What is it that the evil bushites can do now in Iraq, before murdering untold thousands and thousands, but for stealing even more of God's good will towards all Mankind as loved?

[ S I L E N C E ]

No words from the bushites who rule our communications through corporate news censorship, while Christian parents call out unheard: why has corporate america allowed forsaken soldiers to eat plutonium to murder God for a measly few dollars the bushmob will pocket for the up coming "unbiased" re-election news campaign? As I suggested before, (If there are no real men in the marines) why not just give the unarrested bushmob all the money they want, so we can forgo all the needless death and suffering against our friends and family?

[Look, usenet's us.military.army can be the place anyone in the world can offer any irrational thought on why bush shouldn't be immediately arrested or executed as traitor, but guess what? bushite nazi brethren, either mostly don't exist in our real world, or can't think to save themselves as bushwhore nazi dumdums. Dumdums who advocate the senseless murder of innocent People, and the continuing destruction of America's America.]

Destroy the demon bushmob, and all day long you'll have good luck, I swear! Johnny says "give living a try!"

--

This next story is what the cruelty of america against Christ is all about. Funding with their lives under the leadership skills of the, corporate profit at all costs form of american brutality, a government, of People, under the Likud that persecutes the innocent as God is, while they celebrate all as drunken bushite wannabe, private banker billionaires. Drinking our wine, while

secretly calling God fiction.

" The annual burden may well exceed $3 billion ï¿½ details are very sensitive and thus kept secret. Under the Free Trade Agreement Israel is allowed to export to the US freely, even though US exports to Israel are very much constrained. That trade-aid deficit, a loss to the US, now hovers around $9 billion per year.

Private Jewish aid from the US has contributed another $50-plus billion to the burden. Much of this is a ``tax expenditure,'' because the donations are tax deductible in the US, but the whole amount is a deadweight cost to the US economy, since Israel tends to use aid money not to purchase from the US, but, instead, buys from the EU. "

Haiti

http://www.commondreams.org/views04/0226-03.htm

" Citing the flaws in those elections, the United States and other foreign governments refused to monitor the presidential election that followed, later in 2000, which Mr. Aristide won handily. The opposition boycotted the affair and still claims that the election was illegitimate, but it does so against the weight of the evidence. This includes a Gallup poll commissioned by the United States government but never made public. (I obtained a copy last year.) It shows that as of 2002 Mr. Aristide remained far and away the most popular political figure in Haiti. "

" Moreover, those eight contested Senate seats didn't affect the balance of power in Parliament. Even if it had lost them all, Mr. Aristide's party would still have had a clear majority. "

What is the opposition's position on health care funding, or a progressive tax system? Just what is it that is being fighted for if the rebels want to keep it secret? If Aristide has no military, nor large, broad based police force, how do allegations of a police state ring through, done by a militarized force looting and killing? And, who's funding these war actions?, could it be, the bushmob again? To maybe, publicly turn our way from George W. Bush's continuing criminality against America's better name? Likely, but I don't know for evidence yet. But, what does it matter, if Americans can't stand up now to arrest or kill the bush demon and "sexy" rummy for the crimes of 9/11 I ask you?

--

" Hidden from the Headlines sums up many of the Haitian government's worthy accomplishments, which the U.S. corporate press effectively whites-out. ``More schools were built in Haiti from 1994-2000 than between 1804 and 1994,'' the authors point out, ``many in rural areas where no schools existed previously.'' They also cite progress made in agriculture, public transportation, infrastructure, health care, AIDS prevention and treatment, and defending children's rights. ``Clearly, these programs represent a progressive agenda, initiated under the most trying conditions,'' the booklet says. "

Ya, but what about the cocaine shipments aimed for distribution to New York City school districts?

Gimmi my Money

" The multi-millionaire central banker insisted that it was better public policy to cut benefit levels and increase the age of eligibility for Social Security and Medicare--an action that would hurt millions of working people--rather than reverse tax cuts that overwhelmingly favor a thin layer of the super-rich. "

Someone should ask Greenspan to consider taking out the middle US all together, and tax Americans to just give their earnings hand over fists, straight to the bushmob partners for nothing. Then, the economy will really take off., something else. Hell is what America is becoming with that ungodly bush demon escaping our police authority. As for Greenspan, he has always been a liability. 2% is what he gets for America's Social Security. Then, he gets loans for America, from America at interest, paid to him and his band of debt profiteers stupidly. Can You, as an American, borrow someone billions that you don't have, charge them interest for the privilege, then take their homes if they fail to pay you PERSONALLY back money you didn't have to begin with? I want to SERIOUSLY ask now, when are the pirate bankers going to pay back the money they borrowed from America? The treasury department, on behalf of America lent them the money to begin with, so most the national debt, is the total, Greenspan and his private banker nazi war buddies owe all Americans. No?, how so? Teach me. I'm listening.

The Jews had it right

Demon bush recently commenting on his vast superior knowledge of matrimony, spewed forth "millennia of human experience,"

Imagine a corporately successful American divorce lawyer, taking what he can get away with, and the marriage experience for America we'll be like that sometimes.

Just where is the "human experience"? I don't yet know all the answers, but, why is it that the happy couple can't just have a religious ceremony sanctifying their marriage, and be done with the rest of the, I might screw you over in the legal ease later part of it? If done so, I'm sure marriages would more easily stand the test of time. The strength of marriage is recognized for what it symbolizes in love ever lasting union. (as God is, or as with Nature, or just as all the dedicated one on one playtime)

The divorce lawyers take half your life's assets through pressing subtly for, doing so as he/she plans, to be

sweetly bittered out of settlement as far as the lingo can commiserate the arbitrator of commissary charges on every forthwith therefore, stuffed for your(s), petty pity parties into their glorious big fat wallet.

Marriages don't truly hold together through love by expensive paper work done by hearty bureaucrats, but by a personal life commitment to love, cherishing one.. blah blah blah... Now, how could anyone, anywhere, as "The State" say to two people who express a mutual caring love, (as anyone else could), are forbidden to express love through sharing freely with one another as something truly beautiful? A celebrated relationship that makes their time together something treasured? Time of the newer old world along with all the ancient newborn stars above orchestrating for their everyday ra-ra pom-pommed humdrum of roughing it through the bad times to revel in the good? Couples who have committed to life long sharing, live longer on the average, than anybody else does. It's a fact Jill.

(As for me, and my own little Universe that revolves around myself starving for attention as almost penniless performer, leaves me with my one liner, "no I'm actually playing the Son of Man as Creator for real to packed live auditoriums", really kinda, makes things difficult...but hey! Things could change. God is free Love man!, don't you guys remember the 60's? Look, I'll even show you how i do some of my best card tricks, if you get me on for an hour or two with Aaron Brown. He's on that CNN channel. The News channel. Or perhaps my secret nemesis, Art Bell, why don't you give him a call?)

snpd

God but, the Marriage thing is really a big something in America, as it does seem amiss, though I'm honestly not qualified to offer much more insights, until I can get off the, why is bush getting away with murdering US as the antiChrist first. (Maybe it is all my fault why no girl wants to give her love to me in between my swashbucklin'.. oh well then, I guess that's one of the mysteries I pose as the average chicken coop's "holy God cock")

Anyway, I think it's time we'd be getting the deviant George W. Bush annulled from our wills.

" MK Ahmed Tibi (Hadash) said he does not think Boim should resign because the deputy defense minister acts as valuable evidence for those who think the Israeli government embraces a group of fascists. "

As I've written, since i took up this challenge, areil sharon is the furthest thing from a Jew one could imagine. No really, that's the most disturbing quality of racism, and or bigotry practiced in our governments as Institutionalized. (A fault found that is genuinely unfair as those who practice it.) (of which so very none get truly wealthy from.) Resulting in an individual monster named ariel sharon: enemy of every Jew since the dawn. To, as a representative government, publicly, in the People's name, ACT deliberately unfair as criminals, denigrating some labeled group of innocent people for cheating and victimization, or murdering like hitler did, is as of, unfair to the God of Christian, Pagans, the Buddyhas, along with a great many others even including the, "no thanks", they have all the answers already to life's big question innocent Atheists, DOES NOT preclude including the "Jews" of the old new testament, that sharone (in contempt of all People as God, as in his own life left rejected 'unfairly') would have left unread. For the bonuses of american tax taking from an "other" less fortunates to not have anti-Semites (Semite=Arab) with nazi american mk-47s around ariel sharon always to protect himself from a true Kingly Jew. For, what else is in this life, but to make people suffer like Jesus did. Right ariel sharon? It's this, it's so simple, the corporations wont let US say so thing again. FRONTLINE did a show once, several years ago on the actual individual people that the Jew-haters funded by nazi america victimize, but repeated since?,.. rarely never in AMERICA. Why? Because anyone with any sense would immediately see, who was the bad guy, and who was the Jew. Not good for the repuglicons who take money on the, won't go away issue though, played unknowable on "unbiased" commercial corporate american TV news broadcasts. They're stayed to f-o-r-c-e US neutral by, in a evil cult like bushite trace, find irrational excuses to except silently: concentration camps, torture, and first degree murders against innocent Christians or Jews, paid for committed in our names as illegitimate.

What ever happened to the 50 year Jewish Jubilee where all Jews give up on what is their now stolen land, to acknowledge God's Holy teaching from the Tora? Is the Jubilee just a myth? If you build a house, on the property you share, would it be wrong for ariel sharon to steal it, while america was left unaware? American tv doesn't even play what their being truly taxed to death for under the demon antiChrist, their Mr. bush Jr., so what can we expect in all honesty, right? (Demon bush murders good guy American police officers,

and it's just far to embarrassing for corporate america to immediately arrest or execute the traitor.)

Mr. ariel sharon has been on the Jewish hit list, since a Jew met a Jew in the park and said, "that ungodly bastard sharon just murdered my Palestinian Jewish friend, who he called innocent of all things." Demon anti-Jew ariel sharon knows what his consequences are, for, that's all he is as the ungodly. Knows nothing of democracy, knows nothing of freedom or Jewish religious teachings, he just keeps killing Jews so they won't catch him, while he does things like, oh I don't know, desecrates the third holiest of holies. Again, ariel sharon is not Jewish. Deal with it. PRIME EXAMPLE: The evil Jew-hater, ariel sharon, was caught directly involved in the cover up, of the failed attempt for his partners in crime to blow up some could be Jewish People in the Mexican congress, then likely finger Laden as innocent of as terrorists. To incredible to believe? Believe it. Didn't see it splashed on CNN as important on where American tax dollars are being funneled as Christ killers though did you?

snpd the God is sometimes gay part

But simply put, the more Jews ariel sharon gets murdered, the more money from repuglicons comes by taking Christians for Christ helpless on the cross, but without any 'real' God. Then anti-Jew ariel sharon puts money back into the private pockets of 'wealthy' repuglicons for funding true terrorism on the sly. The Likuds steal people's homes, life savings, shoot to death innocent Christians, Atheists, whomever, while they then send off the surviving victims with only what can be carried quickly, to suffer in some ghetto camp. Hitler, revisited. What "Jews" since whenever have suffered from, now without God in Government, made fearful to stand for their rights against bigot murderer ariel sharon's mk-47s., they then under tyranny, falsely, try to condemn all themselves as forsaken without G's leadership found in Mr. ariel sharon. The Jews had it right on me never actually personally getting up on a cross by God's inability to communicate through silence, it is more of a metaphor on the true state of humanity, but no more so graphically illustrated by today's Likude Israel that condemns all the People as God. One more example on many: Demon sharon, funded by nazi bushite america, will have Jewish Israeli teens arrested that disagree with murdering innocent people to steal their land as God from. It's a fact Jack. Mr. areil sharon is not Jewish. Live with

it suffering without speaking, or shout to the high heavens that your fed up, and we're not going to take it any longer. The King has returned!

King of the Jews,

"I'm absolutely confident that..." he'll say, as if the issue is his determination rather than his conclusion. "

It's his faith infinitive as the antiChrist, where he has hypnotized the dopey with merely the power of suggestion, that has brought him to US as foolishly not conceiving, or most importantly, truly understanding. So, do we feel sorry for his ignorance as fallibility we are all prone to own as the human rendition? No. But for stupidity thinking he could murder US as the innocent to steal our free values, and just get away with it by lying to no one continually, is where the Lord makes our stand for God unseen as miraculous.

The demon bush dictate is not exceptable for my just little man universe. I knows too much about freedom to go on dying in bush's forsaken place as innocent sacrifice. With corporate america's unarrested demon bush forcing my hand, I would decide to defend by concluding, he is truly, the enemy of all America. America: weak without leadership, yes, but not as dumb as some would have us believe. When is it that we feel sorry for the thousands of lives bush's deliberate actions of mass murder have taken for no good reasons? Their ain't nobody to defend america's overlord, but through corporate censorship of the reality of who's really dying for the demon bush liar. I'm the one anyone would ever have a legitimate fear of getting on the wrong side of, and if your not in the process of attempting to get away with murdering some defenseless family for nothing but to rob from, to each, his or her own, mostly, right?

U.S. pays millions to discredited Iraqis
http://www.twincities.com/mld/twincities/news/nation/8010694.htm

" The letter appeared to contradict denials made last year
by top Pentagon officials that they were receiving
intelligence on Iraq that bypassed established channels
and vetting procedures. "

Bypassing America as undefended freedom,, sacrificed to
die for slavery under the unconstitutional as blatant
evil, bushite decrees. Demon bush tells America, and
indeed the World, since 9/11, evidence will no longer be
a requirement to convince US who is a mass murderer, and
corporate news america sells on without the human
opinion present evaluating his true asking price. Man,
that demon bush is sure one true evil bastard when you
think of what he, rummy, and Ashcroft is stealing in our
names censored through nazi fascism. [Granted, I am
literate.]

God or no God, I don't like that demon antiChrist, Our
Mr. bush Jr. very much.

How the war on terror has become a war on freedom
http://www.theherald.co.uk/features/10493.html

" From the moment we followed George Bush into war, our certainty
as a future target was assured. So, eternal vigilance is little
more than common sense. Expenditure on sound intelligence is
clearly essential. Diluting legal rights and dispensing first
and second-class justice is is not just totally unacceptable but,
in truth, another victory for terrorism. "

Terrorism of the worst kind for God's America. GET BUSH NOW!

Falling for You

Brahimi said. "We need to organize elections as early
as possible but not as early as impossible."

Help me understand: Why can not Iraq start on the
process of

O R G A N I Z I N G E L E C T I O N S

NOW to work towards gaining accountability for soon as
possible? After June? What the... Can't we people
talk while walking? Look, the future is likely coming no
matter what, and what ever illegitimate government is
embarrassingly stalled by evil WMD proliferator baathist
bremer to steal unaccounted American tax dollars from
the "willing" victims dying, (like by bush bitch cluster
dud) will still necessitate the need, to have started on

the process of fair elections for our Iraq before hand. Corporate america might not care of sacrificing America to rob from, but real People are honorable, and won't reserve the scourge of nazi bushitizm a place to suffer any further if we can help it.

The bushites are sorrily, simply not qualified under the dire circumstances they've assaulted ourselves into for mugger war profitizing, as leading US to be dying undefended while failing miserably on my behalf to demand Justice as freedom is truly.

Now, it has been vaguely suggested that a, steven "you can't have public health care or he'll murder whomever for thinking" russell, or a buford "bush bitch" blount as treasonous evil nazi bushwhore, to undermine freedom and democracy everywheres in our world might cowardly attack defenseless innocent families at the polls while leaving "bin Laden" fingerprints, criminally warring to kill more American dumdums for commi Halliburton et al, continuing committing as unaccounted massive waste in America by over billing the dying People. Why would bushites do this? Evil is blind irrationality, disguised as thought out faithfully by fascists. The, nothing to fear suggestible absolute nature of non-linerality, is 99.9 percent, super fractal wowy miraculous as crazy about the fringes, (or is that bridges?). But, without Justice ruling our stay, we leave for a Heaven waiting, on a sea of madness as enemies of life to all things eternally being. Translated: We need to arrest these specific war criminals at the end of our, ready to fire rifles. Done to stop them personally, from robbing or murdering America indiscriminately as enemies to everyone. But in addition to that, (like at the same time) who says the polls can't be stretched out over several days or a week, with multiple options on submitting votes registered through the oil-for-food program? I want to know where Annan is on this., why it can't be done., and what his position is on returning the Iraqi Humanitarian aid stolen by Halliburton, or Iraqi Central Bank deposits cashed by HAS TO BE, current pirates. Annan, be a man, an acknowledge our presence as relevantly important for our world's living sake.

We had 100 percent access throughout Iraq prior to allowing bush, rumsfeld, and franks to sacrifice literally thousands of innocent lives. Who are now DEAD or DYING NEEDLESSLY as first degree murder victims, in some bastardized Lord's name apparently.

(Quick, somebody call upon everyone to get up off their knees, God's coming to read as one person today of the unbound wonder of what it is to be uniquely ourselves within a nude sunrise grinning. To make some progress forward for a better future, we're not meant to just pray for someone else to come and stop whom from cheating who of Liberty? What is it that you can't think of? Every wonder? Who wouldn't do God a favor if they could imagine so brightly. Who's stopping you from defeating tyrant bush as war criminal, but for only yourself contained by his continuing bad example? Tell you what: let's together find ourselves of one mind on putting the bushmob behind bars awaiting immediate public trail, and I'll promise to try visiting them every year, just to see how things are developing. Or instead just shoot bush and rummy for almost escaping Operation Infinite Justice of a real American Patriot soldier's undying love for his soul brother.)

Any improvements of the current situation in Iraq today, are going to be less that what would have costed to not kill innocent people for nothing but evil bushite war profitizing at it's level worst in this history ever of all Humanity recorded. The demon antiChrist of corporate america has got to go, and he's got to go immediately as arrested or shot dead by the Patriots for treason, before he causes US anymore needless losses and grief to our friends and family. Like for the next fifty or so generations what with the plutonium being fed blindly as willed to cowardly, weak, American teen enemy bushite soldiers presently. (If we could seperate the bushites from the rest of US, this might be a good thing, but they have no real leadership to speak about freely as the dying stupidly.(PRINT THIS PAPER AND MAIL IT EVERYWHERE))

DYING like those from 9/11 did, or dying slower, like with NYC air quality as best Oz has to offer. (Harmless corporate TV tells US without opinion.) Either or even in other ways, the demon bush is truly killing God's America in Your name not heard from. Help me you idiot. You! Yes you there, reading here. I am your secret friend see?, and.. well.. the Universe needs your help desperately pal. Please? For me? ..Oh God help me your really dumb without you aren't I too? Listen: we need to talk.

We are here to save all of creation from needless death. Big deal. Your are of a real eternal nature, that exists also, (as understood scientifically) timeless. For real. (The big bang is now. (All mass is also of not as seperate energy, then there's our gravity...))

Our possibilities for a great, better future are staggering, if we are capable collectively as individuals to defeat the "kindness" of George W. bush, the dying embodiment of evil as the very true demon antiChrist of all biblical references ever mentioned. His lying isn't just deceitful, it is downright hellish.

You know what I think? The evil enemies of Humanity, don't want US People to be recognized from being victims under tyranny through corporate cult censorship. Without Justice ruling our ways under the irrational criminal bushmob dictate, we lose as losers cheating ourselves as not worth the consideration to be free individuals.

Granted, I am an actual god familiar with the rights present within the Constitution of America. THEE God's god, here to teach the world about needless sacrifice, caused primarily, for the effects of inflated egg shell egos. As Creator, I goofed somewhere in the, order to chaos mixer. I didn't plan (it was a mistake) for Americans to be so cowardly and weak when it comes to defending their very own selves from needless death and sorrow through blatant, naked, how can you miss it, evil criminal enterprises. So, perhaps, now if I stop writing, and fake I flied off vamoosed into the unknowable, a couple people on the planet might go 'hmpht', and decide to carry on bravely, the real, honest to death struggle for freedom living without me as sorrily missed. (I as John am not anything special paradoxically.) This is fear itself, ain't nobody nowhere as terrifyingly terrifiable as this is just truly super terrific being only my simple written taughts, yet, ... I'm like.. just fiction writer, big dreamer Johnny Wizard, looking for some happiness, human respect, and a good last supper before I check out from this made by the earthling "space explorers" dungeon cell.

But who cares about me, or my great, he thinks he's so brilliant ideas? Everything's seriously a pain to him sometimes, and he talks to himself like he's the, been here and gone as eons now, King of the Universe for the holy Word from the Heavens above or something. What a poor dying fool to chance that anyone would willingly help themselves by caring for someone. ..You know, I'm beginning to not be all that crazy about the demon bush liar continuing to war humanity in my own true name also now that I think of life in this way honestly. H-e..Y -! (Morningstar has been accused of a lot of things, but you'll notice, always plays fair as your rules.))

What freedom in Iraq will come that allows a, buford blount to walk unaccosted by 'legal' services? Or where rummy's cluster dud advocates gain silent gratitude? A nation high-jacked by bremer's buddies who illegally sold Saddam WMD, then the product wisely gets destroyed as functionally useless being primarily indiscriminate warfare, then bremer's buddies come in again and murder untold thousands upon thousands, all because your magic TV is letting them get away with it as considered too embarrassing to the billionaire private stake holders. Fuk you corporate american Human haters for not reporting the bushites as war crime supporters.

Where in the real world are the nazi bushites gonna demand we go to allow 'them' to continue warring the Constitution while wearing a bushite soldier's uniform in their dying universes of Universe? Leaderless corporate america?, injured and dying as the unjustly starving? What can the bushites do now in Iraq, that they couldn't do before the needless murder of untold thousands upon thousands of innocent people with loving families? Before dumping thousands of tons of radio-active toxic waste as enemies of God's children? Only to rob, maim, and destroy God's great work through Love. We had complete unrestricted access throughout Iraq, and Saddam was offering the national media for bush to pontificate, while not refusing dialog for any suggestions.

I ask:

Can not America invite me formally for brunch, by somehow bypassing the war mongering nazi tyrant held up in the Oval office? I'd invite you all, but my place is still a mess, and I'm stuck eating for survival just now. I don't qualify for help, because surely, a person with your talents, should have someone willing to stave you off the, who cares about saving the world for you buddy, laughing in all seriousness shtick. (cool eh?)

I give you my world:

To save humanity from tyranny will be accomplished through the value of these free ideals recognized.

Isn't life grand sometimes when the bushites aren't needlessly murdering our innocent families in your name?

I again,
will now leave
you without me,

forever loved,

Johnny Wizard - Your "other" parent or guardian advising you to immediately, by Citizen Right, arrest the President's 'cabal' in the name of the Lord, who already died for this once already god damn it, and I'm not sacrificing any longer unknown as forgotten in the absence of any true reason to our existence, I want to celebrate. I want to afford a cold brew to nuzzle on a warm sunny afternoon, at a hideaway somewhere, lost in my comforts of having few real worries, but for unintentionally offending someone for not having the time to except their generous support, or gratitude.

" "We need to find a mechanism to create a caretaker government and then help prepare the elections later - sometime later in the future," he added. Mr Annan said that there was "wide agreement" "

Unelected care taking government? What is the group their now supposedly doing? Where in the process is corporate america to simply fix the Russian generators they've been paid over and over again already for as doing nothing in The People's interests?, As unaccounted to? Where is corporate america to fly in the emergency food and provisions for the innocent as victimized? Who's care will this continuing robbery of America through war crimes further fail to serve? How can Annan gain "wide agreement", with no poll on the issue? Who personally did he talk to, agreeing to leave Iraq without working for an elected government of the People?, and who consented to give up on such dire needs? Where is Annan on the thousands of tons of radio-active toxic waste dumped by rotten rummy? Is it not an issue he should personally be addressing for Humanity, to demand an immediate clean up paid for by those responsible? Imagine that: Truly toxic as dying, American Patriot soldiers making it up to God's great Creation, by hunting down the actual bad guys, who done did crossed the wrong family this time.

Wow, now that would be a war worth televising!

No End to War

The Frum-Perle prescription would ensnare America in endless conflict.

" And if God accepts the existence of evil, how do Frum and
Perle propose to ``end'' it? Nor can any nation ``win the war on

non-combatants for political ends.

...If it is America we defend, An End to Evil makes no sense.
The Perle-Frum prescription for permanent war makes sense only
if it is the mission of the armed forces of the United States to
make the Middle East safe for Sharon--and here we come to the

New Moon

To steal public utility services paid already as owned
completely by IRAQI, (America dying for the bushite
American pension thieves at WorldCom or Britain's
"Dutch"-Shell,) ain't gonna change the business
locations. The evil unAmerican cop killing bushites

think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

An oil-for-Iraq program needs to be reestablished, but transparent to all as addressing the immediate emergency needs of Iraqis. Private, in the secret back room with the bushmob nazi bankers, and their private inept collaborators flustering as international fraudulent behaviors, just wont do., try as bush might to murder perhaps millions of Americans uncovered by his criminally enforced, reduction in health care coverage extravaganzas.

THE ROVING EYE IRAQ AND AL-QAEDA
Part 1 - The usual suspects
http://www.axisoflogic.com/artman/publish/article_5146.shtml

" This latest US intelligence, though, makes little sense. For starters, al-Qaeda pigeons are highly unlikely to move around with computer discs in their briefcases: since early 2002 a disabled al-Qaeda has used women couriers to deliver strictly verbal messages. "

Kimmitt in collusion with the bushmob perhaps? To cover up an investigation set up to encourage the blind murder of America as bushite by attempting to divide all the People of Iraq as Iraqi?, na... not in a tribal based, enduring practically timeless, inter-woven culture.

Those who ran public healthcare and university are all the bad guys for thinking, the blind bushite bigots would conclude illegitimately., and I would say to yourself: no, the People with equal rights to stay united for good times, are a people sworn to uphold law that serves our freedom's best. Iraqi assets are not bush and bremer's right to steal without question, nor either, American generosity swindled by WorldCom, Enron, Dutch-Shell or Halliburton is the final, be all answer to everything.

You as sure would know that unjustly victimizing the World in our name because "they" didn't believe in blindly worshiping with servitude, the war mongering mass murderer demon bush liar, is freedom stolen from any. Wide, across the board, ask anyone for comment on where the bombs dropped from. Needlessly in bush's name, but to war God's love, and my good life.

Demon bush is not America, America is America.

This is all I'm ever doing as King, but perhaps also, not going left hungry. If you can help me help you, we'll be set for something better.

Truth can pose serious problems, when we idolize blindly the evil demon antiChrist for criminal sacrifice, instead of arresting him for 9/11 along with cheney, and bummer rummy, the silent but radio-active cluster dud dropper who murders American Patriots for a nickel.

Too awe shock embarrassing is it to ameliorate for the sake of a dying American Patriot Kimmitt?

For, why would Laden want the bushites to stay to further rob America through creating instability within his own ranks? without denouncing the demon bush war lies, that are paying a very real price.. ? What would it cost commi Halliburton, to face public accountability (Democracy) in Iraq on where Iraqi money is being misappropriated for? Do you think they'll get to keep the oil business, to sell back to all of Iraq at uncontested mark up freely? To steal food aid to under pay the third world? Starving?

To steal public utility services paid already as owned completely by IRAQI, (America dying for the bushite American pension thieves at WorldCom or Britain's "Dutch"-Shell,) ain't gonna change the public business locations. The evil bushites think they're gonna party in Manhattan on our dime in apartments for around $15,000 a month, while sneering at a homeless beggar on the streets, who thought he was still in Vietnam.

Perhaps, he is.

Another American soldier owes me a beer, or will be dying to steal life from themselves as sacrificed for the evil criminal dictate of Their Mr. bush Jr.. Don't go silent as the unknown dying enemy to God and humanity, stand with Justice and freedom in America for Americans, and I swear, we won't kill ya as the good guys in the epilogue.

By the bushmob attempting to create unrest, so Halliburton at al, can continue in the tommy franks chaos to rob America blind with false billing, instead of cash paying, is costing the lives of American teen soldiers. Who god love'em or hate'em, don't have the intellect to strategize their way out of an open paper bag, never mind evil bush's false creeds without real leadership present as living for. Instead of bruising our egos, the bushites are dropping bombs illegally on the family.

Man.

Ask a dying soldier how it sits to know commi
Halliburton pocketed Humanitarian Aid? Go ahead,
ask'em?! Then ask'em why they die as cowards by rummy
cluster dud for the bushmob to rob their own direct
families left unprotected? Ask'em! You know what
they'll tell you? They're not happy about these bushmob
war crimes truly destroying America in America,
"freedom", "democracy", Johnny Wizard or otherwise., Or
instead they'll mumble something incoherently while
jaunting away to murder some one found defenseless, or
innocent to pay further while dying to slave under the
criminal dictate of the really evil demon bush Jr..

A proud bushite is a toxic bushite halting from warring
the innocent by stealing your human values truly.

We need to see an apology to come from America, an
apology to Humanity for this carnage waged unnecessary,
but for these contemptible war profiteering practices as
direct assaults to all as God is. Assaults that we have
been unable to remedy by openly communicating to bush's
secret White House, rumsfeld's secret Pentagon, or
Ashcroft's secret Justice Department.

Just who's running this show anyway, I wanna know.

A - g - a - i - n

Will Americans save themselves with help from the rest
of US, by arresting bush and rumsfeld immediately for
high treason?, or will they cower and DIE as the
innocent, in false gratitude to the lying traitors
bushmob? To with their dying breath proclaim
unattested, to be ridding the Universe of their
continuing criminal behavior.. a.k.a. evil?

Evidence is a must to establish a crime scene
provocateur, to deny such privilege is to deny freedom
be served as consented through any government.

Hint: Demon bush, rumsfeld and Ashcroft, they ain't no
struggling democracy entirely.

Look, the thing about God coming down, and having it out
with humanity on some various critical issues, isn't
like going to happen, it is doing.

We had complete unrestricted access throughout Iraq
prior to murdering any innocent child in america's name.

These verbs will strike that antiChrist demon down for
ever and a day, and if I've gone, faded away, these
words will still remain,

till now we meet again,

as you were,

Ann Coulter - "Liberals just call Republicans names."

Her suggestion is against the common sense of a literate
segment of humanity who knows something is a farce about
this tart, and for me, entertains for words to gain a
better understanding for proper acknowledgment.

Coulter is bigot rousing on purpose I think, just to get all the american corporate monetary gratitude, in selling herself not present as a significant baitor unaddressed publicly in our corporate news circles. She sells excuses to cowards, of not addressing specific acts of treason committed by individual traitors, like rummy or Ashcroft, and instead, suggests all people have no ability through bushite america to recognize themselves being robbed their freedoms or murdered directly for the furthering of the evil bush demon war lies.

Interesting.

A repuglicon nazi bushwhore, who will say anything to allow bush to steal further from America, is not a tried and true Republican blue collar. Is it in Ann's contention, that all Republicans can't imagine themselves having any independent opinions? Or, is Ann saying that every Liberal blames Republicans of every stripe throughout History instead lawless bush personally for sacrificing the nation as evil incarnate?, committing to murder individual New Yorkers as America sacrificing, then further acquiescing to needlessly feed toxic waste to all American soldiers, while loyally blowing themselves up dead as individuals to pieces with sexy rummy cluster dud, all for being blind disciples of the unAmerican bush demon antiChrist, their ungodly evil false-deity as enemies of God's love, America, and our good names?

Naming the repuglicon demon bush a terrorist recruiting cop killing heroin pusher, who played a central part in the murder of thousands of New Yorkers is well established factually, and publicly confessed as all planned to act upon before hand. Who says? MSNBC's Jim reported with the White House, as a 'top secret' [Oops, deceived America wasn't suppose to read this one Condi] strategy of not following the 9/11 crime scene evidence, and confessed as 'fully implemented'. A General Ahmad plan to blame bin Laden as innocent of to secure invasion of Afghanistan. For Enron et 'al, the treasonous g-e-t-t-i-n-g . . . a-w-a-y. ... Pension thievers. Robbing from American Patriots as lead worthless in value with. Dying.

Remarkable to say the least.

That was deleted and replaced with this: "The new samples confirm previous reports that ambient air quality meets OSHA standards and consequently is not a cause for public concern." "

(EPA tests showed levels of asbestos ranging from 2.1 to 3.3 percent. EPA views levels of 1.0 percent as the People's scientific definition of asbestos contamination. " The museum was No. 2 on a list of 16 sites that ORHA deemed crucial to protect. Financial institutions topped the list, including the Iraqi Central Bank, which is now a burned-out shell filled with twisted metal beams from the collapse of the roof and all nine floors under it. "

(Also, to succeed in assisting in robbing the Central Bank, and museum, the nuclear facilities containing radio-active contaminants were left unguarded, as not centrally relevant to franks why soldiers were told they're still sacrificing their lives for. "Duh, why are we here to kill good people needlessly so the bushmob back home can further rob our undefended families bro? Bro?")

--

This is for all to agree settled as official History.

America devolving into the criminal tyranny of the evil bushmob is happening. All the while, we witness, the LEADERLESS nazi bushite soldier cowering as cowardly sell outs to their very own friends and family being robbed back home, left undefended through blatant over billing as UNACCOUNTED, leaving their own sons and daughters to dutifully eat plutonium, and going further silent when it comes to rumsfeld and franks needlessly dropping thousands of land mine cluster bombs to murder us people indiscriminately, which, kills their own aplenty, in a more way than one knows. Karma. (rummy's pentagon is misleading soldiers on how many have so far died to allow Halliburton to criminally steal humanitarian aid from The People, as one example,) Again, as bushite fascist nazi vermin, they let those responsible for destroying America through the bushmob war crimes, still sit in the, for sale freedom captain's chair, high-jacked from US true Loyalists, attempting to get away the bushmob is doing from 9/11, by going real fast .. nowhere.

Second, if Liberals include whomever, how could Ann possibly assess that all would consider calling ourselves anything but, unique as individuals? Bizarre.

The American Constitution is our souls included in those timeless thoughts of Justice for all as The People. The bushmob is destroying freedom by persecuting the innocent as terrorists, when they, in AMERICA'S NAME, throw out the concepts of Justice for any. No publicly understood evidence to form our conclusions, is a

corporate demand your faith be in the unjust bushmob
'cabal', and not in Freedom for all through establishing
the actual "bad guys". Closing the public criminal
investigations on 9/11, is a critically essential part
documented as the evil cabal's "top secret" criminal
treason plans, put together prior to the murder of
thousands of American citizens. Prior to the event as
hidden question, and, confessed as never considered.
Ya, right.

Playing to Win

Bush declared, "and he wouldn't let them in. And,
therefore, after a reasonable request, we decided to
remove him from power."

So, there was indeed no imminent threat posed by Saddam
to Amerka, and inspectors had complete unrestricted
access throughout Iraq without delay prior to the, bush
demon's further war crimes. So, what was the reason for
all the pointless mass murder and destruction again? Oh
right.. to sacrifice American soldiers so terrorist
bush's war profiteering can feed off themselves as

family without leadership present as spoken for. Hey no problem if Bechtel or Halliburton never actually gets anything done, or at a good price after their magic trick "pay here for what?" commissions eat up most of the investment, it's only the dummy American People bid payers again left unaccounted to DIE intentionally. The bushites could make more killings for decades to come, while flogging the now desecrated American flag as the new bushmob's being intolerance, greed and true contempt for all US as Humanity. US, a dying dream that once was the great American way of living; now war crime bush's personal enslavement for global tyranny.

The devote bushites tell a Loyal but dumb Soldier to quietly eat plutonium and get blowed up by rummy cluster dud, because, it's harmless. Again the marines have got to come in and save our day, by arresting bush and rummy for 9/11 now, with truth as the all time word of God exists within yourself included. Look, don't think I'm gonna fly down to Washington like some comic hero, and arrest the entire bush administration, going through them, one by one from their holding cells, on where all the stolen cash and American values went all by myself.

GOD NEEDS YOU

All the deaths of American Soldiers in Iraq today, (like the People who died for the bushmob's 9/11), are caused from their leaderless weakness to not face bremer and the bushmob as war criminals continuing to transgress in America's name high-jacked.

Mr. bremer fired Iraqi school teachers, and hired up Saddam's secret service, those, who if any, would have closer relationships to charges of criminal impropriety in the name of the baathist banner, than any other group would be. If an American soldier in Iraq today, feels those from the Saddam Baathist regime should face American Justice (the real way by thinking) why then, is bremer not behind bars awaiting his public court appearance? Mr. bremer as the director of Kissinger Associates, is as, directly tied to "CRIMINALLY" providing Saddam his WMD knowhow. The first "Iraqgate".. [I apologize as Creator for being partially responsible for this worse than B movie but true plot line scenario, however, looky here!, there is so much more to believe!!!]

The bushmob tricks are too cunning to comprehend, see? Again, for those who can, bush must be stopped from murdering American Patriots for no good cause, because, it's really getting US royally miffed way up here also

as the true beings actually committed to Justice as
Freedom for all. That's all folks.

" The Corps unilaterally issued a waiver of Halliburton's requirement to provide "any cost and pricing data." The Corps says it issued the waiver at the request of Halliburton. How convenient. " (N.D.)

Just another PUBLIC bushmob act of sedition against the old red, white, and blue, to sacrifice an American Patriot as measured worthless with. So American Soldier, what are you going to do for US payers being robbed in the open by the bushmob in Your dying brother's name like that?, as one American Citizen censored from speaking publicly at length like all the rest of US are also in corporate america? Just try to air an American Patriots concern on american talk radio, and see how fast your rights are silenced by the witches, or bushite cultists Art Bell has no problem giving his National show over and over again to forbid any protest.

" Steven Russell said that "protests are not authorized and that participation in protests is punishable." "

" Steven Russell. "These People have always hated US in this area. It is not surprising that they hate US." "

He ain't kidding me he is completely unqualified to hold any leadership position. A real de-generative paranoid delusionist, mared likely early on from corporate neglect he suffers still from. He is what is referred to as a bigot, and likely therefor, a probable racist. The 'area' he forces through threats of murder, are to demand this vision be no greater than his own. His own of equality being freedom by Justice Supreme doesn't stand his scrutiny as aimed for target. Bible or Constitution, all trash. Innocent guilty, good guy bad guy, he couldn't divulge as devote blind bushite, war criminal 'mastermind'. Oh by the way, truly, he breeds

indiscriminate warfare as a bad soldier, while the bushmob are walking away with who's loyal investment. . . ? . . . The clock is ticking. If I can teach Buford and Steve with this breaker, they'll turn around and kill bush and rummy instead for 9/11 to make the newspapers. This is why a repuglicon doesn't like to feed early start programs, that way, Lt. Col. Steven Russell can pretend he's doing US in this world a favor, when really, he couldn't care to know if his ACTION would CAUSE the needless murder of yet another, Patriot American brother. Steven, you arrest Buford, and Buford, well you just go ahead and arrest Steven, and then... well, we'll take it from there.

Instead What?

Instead tell US as an antiAmerican bushite?, you'll murder US innocent for demon bush and rotten rummy?, regarding those free speechers who dare voice with FACT, that, Iraqi banking, university, or health care, is more intelligent to remain Universal as it was to serve the People's interests BEFORE baathist bremer sabotaged communications? The bushmob isn't bringing Freedom, but stealing it. And as such being consequence, so too, Amerka. Haven't you heard? Bush's Amerka will be freeer now that evidence is no longer a requirement to convince US who is evil incarnate, and protesters can be shot without CNN making the news over it. It's betterer I'm sure Ashcroft would say to torture or murder the innocent, that to arrest the culprits responsible for high treason in God's America. Right bushites?

" commander of the 1st Battalion, 22nd Infantry Regimen, Lt. Col. Steven Russell, as saying, "This is to remind the town that we have teeth and claws and we will use them." "

What an evil dumdum traitor to the town of New York City steven russell is eh?

Imagine this is why the evil dumdum bushite soldier states the Humans must not be allowed to disagree with anything the bushmob does criminally, because then we'd all know how they ungodly as cowards behave; treasonously acting in such a inhuman tyrannical manner without true leadership to speak about. Ask an American Soldier who proudly states they wouldn't kill unarrested buford "bush bitch" blount or steven russell instantly to save the life of one innocent defenseless child, and I'll show you an enemy of America as just another expendable soulless nazi bush whore. (ten cents per I'm paying..) Let's all hope and pray a sexy rummy cluster

dud dropped by bank robbing heroin pusher tommy franks does them in, instead of US good guys driving in the designated place at the right time bound for further criminal bushmob sacrifice as leaderlessly too weak and cowardly to stand up for 'the Human cause', eh?
An aside: Corporate Americans are publicly taxed twice as much per capita for their inhuman private health care exclusions, than Canadians do for public health care that measures every Canadian as Canadians. (The bushites are evil, and dumber than dumb I told you before the election, but your news agencies refuse to still listen to our top priority concerns regarding the demon antiChrist's murder rampages against American principles, and her citizens left uncapitalized.)
Think of it: the criminal bushmob will easily sacrifice a leaderless bushite nazi soldier, to steal from their own families back home undefended, maybe a nickel, while I, as a real man, beg them to be Soldiers from America's America, by getting to unarrested buford "bush bitch" blount, death squad recruiter tommy franks, or even baathist bremer as the actual enemies of true Patriots everywhere. At the same time, DEMANDING the start to promoting free fair elections, the solving of tommy's bank robbery, and the return of the stolen Humanitarian Aid giving illegally to double biller commi Halliburton.
But so far, they cower as cowards, afraid to protect their own family from further bushite tyranny that they don't have a mind to speak of. Nor, an Art Bell to learn from. (American Talk Radio don't wanta get political while advocating no concerns about dying soldiers led by the bushmob. Why? Americans seem to hate all of their humanity, or so the bushites would like you to think so through censorship of the dying victims. However, I'm still holding out on the chances of one or two in the Marines as loyal to America, who will if they have to, bravely be taking down bush and rumsfeld immediately for escaping arrest regarding 9/11.
You can fool some of the people some of the time, but bush can't fool all of the people as evil incarnate, for that would just be plain silly.)

Look, about all those bad names you thought I called you before, as a messed up son of a gun, listen, we all make mistakes, and... well, if your willing to work for the survival of Justice in America, somebody'll be proud to salute your Patriotism as Freedom truly reining. (Or perhaps the real Americans, to protect the lives of their blood brothers and sisters, will bravely demand the immediate arrest by gun point of the bushmob for 9/11, to be strong and brave, humane and godly. I guess

we'll ask who is the sea, the demon antiChrist bush, along with Ashcroft and rotten rummy, or still We. - ba)

Communicating knowledge is powerful stuff let me tell you. (Roar) A person can spend a lifetime of study in a branch of understanding, and write an illumination readable by another in just a few short hours, then take in a play or perhaps a movie, then the weekends over, and you better get back to work or you'll lose the house on this next late mortgage payment. I don't claim to have all the answers, but i do just about. Hidden in here somewhere...

Step Right Up

I know generally, American people ain't so politically aware, when it comes to huge amounts of living wasted by little scary, but far too distant as likely scenarios. Tell me what you think: can you imagine 10 billion dollars in one year spent to investigate Laden, (with perhaps only three officers in total working on those 'secret investigations'? [Connie Chung - CNN], instead of just dirt cheaply starting, with whom did what when where went why? (W199i and Barbara Bodine) Evidence must be crucial to convince US who is stealing literally, billions. Every year. (Where is some great King to wake up to this madness, and offer US an ever changing alternative I kept foolishly asking myself.) Look,. I know a bushite war monger's lying can spook me too, on how they manage to have no commitment to communicate honestly with the facts, while publicly advocating the indiscriminate murder of ourselves as the innocent., instead of SEEKING solutions to remedy things with intelligence bringing kindness as it's territory. God is all great, and I'm not so bad either.

Of the blind human condition trying to thrive, G is the last Word on lethal threats to the innocent. Threats made by war criminals who have high-jacked America's White House, protected by dying as evil bushite nazi teen terrorists angers everyone truly. Enemies of our Humanity whom is still living art within Heaven. I genuinely dislike devote bushite, American cop killing cultists with everything I am of honestly, and so too, it does appear also, the bushmob could care even less for its disciples. For the demon antiChrist, Your Mr. Bush Jr., fools all Patriots when he tells them evidence of his treason. What secrets? He secretly planned and implements to not work for public criminal investigations regarding the murder of thousands of

American People. Thousands. With Kissinger. What is it, that you as a bushite or otherwise, can't figure? None are seperate from this dying dream we call life's living end. Time to change your religious convictions on the true existence of a higher power maybe? (I am really very easy to believe in, and when speaking face to face, I leave little of no shadows to doubt I am simply a, super freak as Natural human Being. I scare few that shouldn't be, and I can't read anyone's mind, however, intention, is a whole other matter all together. You gotta be almost like a god to fool me into thinking one plus one doesn't equal two.)

Anyway.

America is still a work in progress, alive, willing, and almost able to defend by rule of individual rights by wHoly miGht. It makes absolutely no difference on what you think of me personally, (if you've finalized an estimation), I mean it, no difference. There are ideas as this Universe living would concur upon, timelessly, and see?, I know this as the Son of Man of anyone already, always have. (I don't need people to tell me I'm great as the Wisdom of Ages, I just need a few dollars to tide me over until I can get a steady paycheck.) I have no intentions of ever forcing the world against our ability, or getting elected as King for being just myself as a none-partisan, soft-spoken well mannered businessman. I am the actual make believe Lord and Creator of the bushite cesspool labeled America, and thanks for nothing is not what I'm demanding.

Letting the bushmob escape from committing the terrorist acts of 9/11, can not go further unanswered in this universe, I'm sorry. That's just not a world I as a defender of my living purpose would feel comfortable held up in chains and shackled ever. It's really not where I dream unbound along with the real world ways of life's struggle for true freedom, being my commitment kept honorably by doing some good for my sake is a virtue for all. God, American People are so ignorant, cowardly, and duped to not help ourselves sometimes, it destroys US, instead of the lying bush demon antiChrist. You know?, the enemy of all People, freedom and Justice? as a corporatist bushite cult deceiver would want US to not believe?

(nap break)

Can you believe that demon bush spewed last week that American Patriot Soldiers have been SACRIFICED because

Saddam, ""did not let us in." Now, if he is that uninformed on Our documented reality regarding TRUTH in America, along with his now completely confessed absent war rational, will You, as an American Soldier, watch yet another corporately unspoken for Brother or Sister sacrificed to DIE in servitude for that super evil bush's bullshit continuing in Your name unchallenged?

I ask Humanity, shouldn't Annan, if anyone, be speaking up scientifically on American soldiers eating rummy's radio-active depleted plutonium, while being blowed up by landmine cluster dud? now that I come to think of it... how is this to fit in any public American school text book without mentioning the dying for nothing as evil bushites part? Can't fit without some revolutionary process of evolution to the betterment of America as dreamt of by big picture planning, no?

Now, can someone, at least, lend me some credit for the time being?

Beautiful. As I wrote then, when I first learned of the
Arar relationship, I postulated that in fact, the
official RCMP, or CSIS, likely played no part in the
terrorist bush jinx. Now, I'm not saying their could
possibly be one blind devote bushite among the millions
of Canadians that make our nation great, but truly I
believe, we will get the enemy of freedom in America by
just being ourselves. Blind bushite ideology centered
on international criminality has it's downfalls in
context to our relative real world situations, as we
seem to be learning together, one way or the other.

we did, Kay offered, the bush administration could take

What does McClellan want us to tell him about? We
already do have a complete picture of betrayal by the
almost unbelievable, super evil bushite administration,
on their intentional lies of deceit to murder thousands

The enemy bushite falsely faiths that somehow, in time,
by forcing a continuing threat of our murders as the
innocent striving for Freedom through representation,
they as the enemies of You, America, Humanity, and God,
will as they are doing, provide US a "free" government

in this World that will permanently sell off all of our
Nations assets below wholesale, to give into the
convicted likes of a Halliburton, WorldCom, or five
dollar a day, worker wages Bechtel. Now what kinda
People's Democracy would that be then, where bush states
is now truly "free" for his war crime ilk to rob from in
Our stolen names dying? The demon bushmob 'cabal' has
freed Iraqis from access to clean water, electricity,

So, the lawless demon antiChrist bush along with bremer,
are pimping for bushites who will suit those who would
vote in our pirated names to rob ourselves by such
betrayals, TO SACRIFICE MORE AMERICAN PATRIOTS AS
WORTHLESS WITH.

Bush's Iraq: An Appointocracy

" Except that the United States has absolutely no intention
of actually getting out of Iraq. It wants its troops to remain,
and it wants Bechtel, MCI and Halliburton to stay behind and
run the water system, the phones and the oil fields. "

Never ever land more like. Imagine that: Arabic
WorldCom phone bills, Halliburton gas bills, with the
only store "legally" open to US public will be Bechtel,
who will demand through bushite tyranny, you pay your
wages for something unjustly over billed as, but put
together at less than five dollars a day wages offered,
being as the only jobs available through not publicly
accounted bushite middleman directly chancing the whole
country of America as undefended financially., extending
"their" risk to do nothing; by the further needless
SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly
dying WORTHLESS WITH as da dumdums. Armed American
Soldiers should be bravely going after Baathist bremer
with DEMANDS for immediate democratic elections and the
immediate return of ALL the stolen oil-for-food money to
be spent entirely on priority Iraqi needs, solving the
bank robbery, while considering to start printing up
millions of invites for Iraqis to stay in America until
the toxic waste dumped by rumsfeld can be partially

neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)
God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi

savages, while desecrating all of Humanity by fighting
against a just rule of Law, (instead of protecting
America's America), forces the continued REAL WORLD
sacrifice of true Liberty, until the bushmob gang is
brought up by US for war crimes., as the 9/11
perpetrating, super evil as ungodly, demon antiChrist in
disguises. (I very much would feel welcomed to play my
part in those public proceedings.) Hmmm.. maybe CNN or
CBC can become publicly convinced we should have our own
news programs on what's truly happening?, to compete
against the 'evil bushites' in this competitive free
market place of ideas? Who knows..

Take care of the business, by getting US in on our
news-casts., as these principles here standing in words,
are a dreamers dreams, just waiting for You to bring to
reality., by standing proud, strong, and forever free as
a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America

is America. You, as an American, have a sworn right to demand for America, bush not be allowed to further miscarriage Justice blindly back to the dark ages, by not correcting himself on behalf of established publicly, where American intelligence stood, stands, and ultimately strives. Freedom is not protected by letting the "bad guys" go, to further toll more innocent lives for criminal sacrifice. Sometimes, the real simple things are over looked as profound meaning. The Magna Charta of 1215 states that a freeman should not be imprisoned. Simple right? Not for the bushites who side instead to faith in pope bush, who deliberately unminds a timeless universal principle that exists also in the 1700 B.C's, Code of Hammurabi, where all individuals are to be found equally under the Law, to be fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition. The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't

really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax

givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or don't side to help a plead for mercy regarding yourself truly included.

Can the bushites possibly think, we're all not ever possible to stand together without a true Loyal President, or, make believe King named Johnny, on the facts firmly established regarding the treasonous war monger antiChrist lying to Patriots dying US as victim for?

America, I will now leave the rest of Our job in your hands for the time being.

Yours again,
Johnny Wizard

Intermod sounds just like regular radio transmissions, but you'll hear them
on frequencies they shouldn't be on. For example, you may hear an FM
broadcast station in the high VHF band, or you might hear pager transmitters
in the ham bands.

Early versions have firmware bug that causes alpha tags to be duplicated in
several banks. Press 3 while the display says "WELCOME TO DUAL TRUNKING",
and it will reveal the firmware version.

Version 1.0 is the only one affected, the newer ones aren't.

I have a Johnson Valiant that needs a low voltage transformer. I need a good receiver for my AM station. I also have a Icom R 71 receiver that I will throw in too it has real weak receive and I think that a diode crapped out before the ATT RF amp and straight through circuit. This is for pick up only because it would just be to coastly to ship.I will travel 75 miles away from Athens GA. I have the manauls for both units. I also have a HQ 110 that needs C 73 and a Halicrafters S-85 receiver that is a nice working SW receiver but has no s meter and isn't worth a darn for ham radio. I also have a realistic 1000 channel pro 2052 trunk tracking scanner. I also have a TR 7850 2 mtr moblie that used for a packet station. It needs a mic. Maybe we can work something out. 73 and thanks for reading

I believe he is talking about running it as a dual boot system. This does require special setup. I would require a minimum of type partitions on the hard drive, one for each operating system... It might also be possible to use two separate hard drives, but I have never tried that myself, so I can't really say for sure.

If you want more info, search the net, or the Microsoft Knowledge Base for information on "dual boot" systems, or similar terms...

You may also hear a signal riding on top of another signal. Basically, you are trying to receive the intended signal, but you will hear an unintended signal, from another frequency, in the background or it possibly might even completely cover up what you are trying to hear, depending on the signal strength.

Cityfreq, yeah, right...

Todd according to the Radioreference database, Prince William is on a
3600 baud Astro Trunk system, so it's likely Woodbridge is patrolled by
the county somehow. If no one answers, you might try posting a couple
of questions on the Virginia forum at Radioreference, or the various
Virginia based email lists.

Is anyone *controlling* his Icom R10 with an Icom OP-478 cable or RT Systems CT29A cable -- as opposed to programming the memory, which I know can be done?

It has been suggested that by putting a stereo to mono adapter on the stereo phone plug of the cable and plugging into the CI-V side jack of the radio that CAT control is possible without the $100 Icom CT-17 level converter. I am looking for confirmation before shelling out for this receiver.

Vertical polarization is preferred for land mobile applications. The FM broadcasters transmit both vertical and horizontal to better serve listeners in their cars.

My 74 year old father and I are trying to replicate our shacks of the past. One of the greatest little Public Service Band receivers I owned was by a company called Julliette(?). (No, not Lafayette.) Very sensitive little radio that was a simple two bander: AM and tunable PSB. Came with a nice carrying case. Similar in size to a paperback book. Also similar to Reaslistic dual banders of the time for Air and PSB.

Does the name ring any bells with anyone? The spelling? The model number?? Any info would be appreciated.

Hallicrafters also had two entries into the PSB market with tabletop low PSB and high PSB receivers. I don't believe they even had AM or FM. But they were also very good and I had the hi-band version of one of those, should you have a model number for that particular recevier, that would also be appreciated.

I'm not sure what you mean by "big." An antenna with a lot of gain or use
of a preamplifier will probably cause more intermod in popular areas than
using a simple antenna such as a ground plane.

You are correct, but it was due to the lack of usage by the amatuer
community that persuaded the FCC to consider giving that part of the
spectrum away.

With BPL on the way, its yet another attempt to tell us the hams that our
time has come unless we can start using what we have left wisely

hi all havin a few probs with the chain search let me see f i can word this so it can be understood.

i have chain search set to "on" so it scans all banks

i have banks 1-7 programed with ranges to search ,

while the scanner is actively scanning ranges i can hit "4" to take that range out from being searched. if i remove all except 1 i would hit 2 3 4 5 6 7

then rage 1 would be left to scan now if the scanner isnt actually scanning i am unable to turn on the other ranges again , like if it stoped on a freq hwo can i turn on the other ranges again without turning off chain search ?

hope ya follow , tx

Hello,
I have a Pro-2035 scanner with the box for sale.
25-1300 Mhz no gaps, Rotary dial for convenient dial tuning, Hyper scan.
The scanner is in very good cosmetic condition. A few of the bank
numbers on the display are dim but do not effect the scanners
performance. The display is very bright it's just the 1,5 and the 8 bank
numbers don't show up on the display although it does scan all the 10
banks?.. There may be an easy fix I don't know. Any ideas on how to fix it?

# 1742. Possible problem with a new Pro-96

Question for all of you out there -

I think that I might have a problem with a new Pro-96 that I just bought yesterday at Radio Shack.

I am using it to monitor the San Diego County RCS system which is an Apco 25 system. Sometimes everything works great and I get all of the talkgroups and everything comes in crystal clear. Other times, it will just sit there scanning forever and never lock onto a channel.

I know that there is activity going on because I can hit manual and go to the main freqs by themselves and I hear activity on them, but when I hit scan - it just scans without ever playing the transmissions.

Yes I have played with the squelch to try to adjust it.

Do you think it is defective and should I just take it back to exchange it or am I overlooking something here.

Thanks!

Bill

Greetings all,
I am relatively new to scanning and I want to purchase a scanner.
I know it may sound dumb, but does it make sense for a newbie to
purchase a high end digital scanner like the BC296D or the Pro 96?
Or would I still need to get a conventional scanner?

Are there any comparisons between the BC296D and the Pro 96 online?

I am trying to confirm / find out a couple of things.
1. What is the video downlink frequency from the NZ police auckland helicopter (eagle) - is it 2.7GHz?
2. I am told this is a standard unencrypted video signal, is this correct?
3. Apparently the audio channel trnsmits gps information of the helicopter. Has anyone tried to decode this?

Thanks

Both scanners are digital capable. You need to find out if the radio
systems you are interested in monitoring use digital APCO25 or
if they use analog simplex, repeater and/or trunked radio systems.
If the radio system you want to monitor are analog then a Radio Shack
Pro-95 or BC250D scanners should work fine for you and are a not as
expensive.
If you need the digital scanners I suggest you get the Uniden
because it has a lot more coverage and costs about $25 more then the
PRO-96.

If your scanner has an "attenuate" function, use it when scanning and see if you pick up signals that you cannot get without the attenuate. I have this exact problem with my Pro-95 and a Scantenna on the VHF band. I bought a FM Trap from Radio shack (part #15-577) that goes between the antenna and the scanner, which helps quite a bit. Still, when scanning VHF I have to use the attenuator or I simply won't pick up the signal. The good news is that when I use the FM Trap/Attenuator on VHF I get much more then just using the rubber duck anntenna alone. Also, the outdoor antenna picks up 800MHz (trunked frequencies) MUCH better then the rubber duck does.

Good luck!

I cant seem to see a carrier except for the usual vodafone stuff at 1810MHz.
The spectrum analyzer I'm using goes up to 2150MHz.

Any other ideas?
Can anyone think of a cheap way of getting 2.7GHz? I've been told something
about a MMDS downconverter - does anyone know where I could get one from??

Thanks

For comparison, I tested an
Aceco FC2002 counter in November 2003 Monitoring Times.

It displayed the frequency of a 146 MHz walkie-talkie up
to a maximum distance of 185 feet in a flat, open field.

At 446 MHz, the maximum distance was 161 feet for a walkie-talkie.

The range was only 7 feet when reading the frequency of a
low power wireless microphone near 171 MHz.

The range shrunk drastically to about one inch when reading a 49 MHz
baby monitor transmitter.

For maximum range, you must adjust the telescoping antenna to length,
depending on frequency.

I have a Radio Shack Pro-74 Race Scanner that I bought used recently. The manual says it has a built-in two second delay on each channel, but this one does not have any delay. I know my Pro-60 has a delay button so you can turn it on or off on any specific frequency. Is there a hack or override that could have been used to remove the delay on the Pro-74, and does anyone know how to turn it back on, if so? Much appreciated, Thanks. (I'll cross post this on alt.radio.scanner, also).

I am looking into setting up remote monitoring of a lab at my company using 2.4 GHz wireless cameras. The monitoring location would be in a nearby building (a few hundred feet away across a small parking lot). I know the range of those cameras is not very far, so I'm wondering if anyone has any experience using any directional antennas (such as those used for WiFi or the LPY2 "log periodic Yagi" from Ramsey Electronics) to increase range on the receiver end. Assuming the stock transmitter antennas are pointed toward the monitoring location, is there any chance I could get this to work? Recommendations for specific antenna models are also appreciated. I am planning on using an AOR AR-8600MkII receiver with NTSC decoder board since the cameras are of different makes and the channels they use vary across manufacturers.

TIA,
Doug

I have 4 Workman amplified extension speakers for sale.

3 are new in the sealed wrapper and one is out of the package.

Comes with mono plug that fits most scanners.

They run on 12 volts DC.

I am asking $12 each plus shipping.

Much of the stuff up at 800 MHz is digital but I can say that I have never heard it sound like, "wind blowing". The police in my town have moved to the bottom of the cell band and can't be scanned by most normal scanners. Plus they have gone encrypted, trunked digital. It could be what you are listening to but they did it the cheep way and went to the low end of the 800 MHz band outside of the frequency block.

don't use those 2.4 gig wireless cameras. they will only end up causing you grief. instead set up a standard WAP / wifi setup and transmit the pictures using the common ( and cheap on ebay ) remote web / net cameras. you can remote control those, access the cameras anywhere from your office or home network / router / or web , store the pics on your computer, and transmit the network long distances using standard , off the shelf , WAP / wifi equipment... available at best buy or good guys.

with this more desirable approach , no one can sit in your parking lot and watch everything YOU are seeing , thereby compromising your security and activities ...plus you avoid the EXTREMELY irritating circumstance of buying the equipment , installing the equipment and suddenly finding out that any tom dick or harry with a common 2.4 gig spread spectrum cordless phone will wipe out your entire wireless video system, and render it useless every time they power up the phone. ( they will sweep the camera receiver freqs and tear your video sync signals and make your video stream useless. )

the bubble of a common WAP net ( range ) can be from a few square blocks to 20 miles ..depending upon what you buy to install. stuff to do all of this is VERY affordable on ebay.

it's , simply put , a standard wireless office setup , using standard web cams ... ! also good for upgrading your office net too.

Don't mess with amateur toys if you are trying to do a real job.

Go to a commercial supplier such as Tessco or Tecom and get antennas
made for professional use.

>Assuming the stock transmitter
>antennas are pointed toward the monitoring location, is there any chance I

If there is *nothing* between the antennas other than atmosphere, a
few hundred feet is fine. Get a gain antenna for the receiver and
point it at the transmitter to null out as much of the many many other
signals you will find on the 2.4 ISM (Industrial, Scientific and
Medical) band, aka the garbage dump.

This will give you soft video.

The *make* of the camera doesn't matter. The frequency of the
transmitters and receivers do, and if you are running more than one
link you need a good bit of frequency separation.

I recommend equip and antennas from www.microtekelectronics.com. They
are reasonably honest with their specs, equip is about the best
quality without going to government spec, and they have some decent
antennas.

Put the transmitter and receiver right at the antenna and run the
video up and down from them. There is much less feedline loss at video
freqs than the 2.4 gig RF freqs. A few feet of antenna feedline is
about the max you can get away with. The Microtek stuff can withstand
the elements. Mount everything in a piece of PVC pipe to weatherproof

it.

I'm not affiliated with Microtek in any way.

You can buy Microtek from www.atvelectronics.com. Ask for Dan Potts.
They sell to dealers or to competent self maintaining end users who
will not need support.

There are some wireless video articles in the White Papers section of
our website which may be helpful.

Don't buy consumer junk or stuff from spy shops or you will be wasting
your money.

NP ..... I had a friend that owned an auto parts yard. he had 8
channels of professional , high powered, wireless 2.4 gig installed.
he had it for only about 4 months and a lady down the road , a
quarter of a mile, got a new ( $79 ) digital cordless phone for
christmas and completely ruined the system. made his entire
investment nearly useless. ( anytime her phone is plugged
into the wall and not being used , it sends out a channel scanning
signal that hops over a set of 50 different channels which acts as
beacon for the handsets to help them know which channels are clear
and ready to be used by the system . with-in these 50 channels are
the same channels ALL 2.4 gig cameras use too . when this signal
sweeps the video camera channels it causes the picture to destabilize
momentarily and makes a loud " psssst " in the audio channels,
every 3 or 4 seconds )
he offered to buy her a new 5 gig cordless phone with two
cordless remotes if she would surrender her 2.4 gig model.
she declined saying the 2.4 was a gift from her children
and wouldn't part with it. he had numerous other interference
problems , tho, and local teenagers started playing hide
and seek games in his lots ( full of cars ) using those
hand held video monitors ( like the icom ic-r3 ) and paintball
guns. he could never catch them, because they always knew
when he was coming ..... ha hahah h haha . ( parts thiefs would
have had the same advantage )

The receiver doesn't have the bandwidth for the extremely wide
(relatively speaking) video signal of several megacycles. At a minimum
you'd have to come off the I.F. and I still doubt you'd see decent
performance.

I don't know the receiver, but it needs to demodulate FM video to work
at all.

The various ICOM receivers with accessory video adapters stink, but
without something better to compare them to you wouldn't know.

'Soft' means loss of the high frequency component at the band edges,
which is contrast and sharp details. Take your TV, turn the control
down from sharp to soft, and drop the contrast way back and you'll
see. Colors, if you use color, will not be as crisp.

If you use a decent high gain/very directional antenna on the receive
end, you'll have a huge amount of fade margin and due to FM capture
effect you are very unlikely to see interference from any Wi-Fi or
cordless phone unless someone happened to be using the other device in
the path (unlikely) and close enough to the receive antenna (also
unlikely).

Using the standard FCC Part 15 transmitter with very low TX power and
making more system gain on the receive end where it's cheaper and
legal, will go a long ways towards others intercepting the signal.
It's not nearly as easy as the media likes to claim, or persons who
haven't really done it. If someone is within maybe 150 feet with an
average receiver they may get lucky. Anyone trying to intercept with
purpose-built equipment could do better, but I rather doubt that's a
concern.

I've done just what I described a zillion times all over the world and
had essentially no problems. I shot across the entire city of Seoul,
over 20 miles airline from high rise rooftop on the receive end with a
dish to a covert transmitter with patch antenna in another building
with a facing window. Other than having some difficulty aligning the
razor sharp patterned receive antenna with a compass and map it worked
perfectly. You won't have an alignment problem because you can see the
other end.

The directional antenna (acceptable for use on receive end only) gives you a much stronger pattern in the direction in which it is pointing, and tends to reject signals from above and below, sides and rear. Depending on the size/gain of the antenna, your pattern might be 60 degrees down to 10 degrees or so. The more the better. Antennas at 2.4 are relatively small and lightweight and little wind loading.

Read the antenna article in the White Papers section of our website for more info on antennas, gain, and why it matters.

Then the system was not professionally designed and installed.

Very VERY few are. There's a lot more to this stuff than buying black boxes from a spy shop or dealer and hooking them up.

There isn't enough space in the 2.4 ISM band to support 8 channels of video. 5 is the maximum, even with gain antennas to isolate. If there were 8 channels, they were spaced too closely, the receiver AFCs were fighting to decide between several channels and the effective sensitivity of the receiver would be reduced significantly.

I will acknowledge you can get more separation by going to circularly polarized antennas instead of linear, and making each adjacent frequency the opposite polarization, but you're talking a lot more engineering than nearly anyone would be capable of. Anyone putting in a system in an auto parts yard is not going to be doing military grade work and spending a few hundred dollars each for sixteen antennas.

The ready availability of wireless stuff has made every wannabee into a video and surveillance expert. If you don't believe they're an expert, ask them. They all think they are. The appropriate test equipment alone costs more than most of these companies will earn in a year.

I train government law enforcement and see what it takes to bring competent experienced professionals up to speed on wireless video. It's nearly impossible to find a website or catalog with honest specs. 250 milliwatts at 2.4 is insanely high power and virtually never needed. All the work in wireless video is done in the antennas, not with raw insane transmit power.

I've personally examined several alleged high power transmitters and not one was anywhere near rated spec. Jumping out the attenuator pads in the Wavecoms more often reduces ERP than increases it, because people screw up the impedance jumpering. You have to jumper with copper strap, not wire, and maintain the precise inductance as the SMD resistors you're replacing, or you lose signal instead of gaining it. Very easy to see on a spectrum analyzer.

>local teenagers started playing hide
>and seek games in his lots ( full of cars ) using those

> when he was coming

Another indication the system was not professionally installed, if true.

I owned an R3. Others have brought theirs over here too.

My home and shop are next door to each other, on adjacent properties. I test between buildings. I keep a Part 15 2.4 gig video transmitter running constantly with color bars modulating at the house, as a test source for receiver work at the shop. Antenna is a rubber duck about the size of a cigarette.

Proper equipment with simple rubber duck antennas makes it fine between the buildings, which are wood frame and only a few hundred feet apart. No foil backed insulation, just paper.

The R3 would not see the same transmitter through one adjacent wall in the next room, maybe fifteen feet airline. The professional receiver sees full quieting even in the pouring rain when you need a significant fade margin.

Anyone expecting the R3 to receive wireless video is likely to be disappointed.

Nextel is causing interference to 800 MHz Public Safety Radio systems,
there are two competing plans to solve the interference problem.

The balanced approach supported by Fix 800 MHz Now:
http://www.fix800mhznow.org/

and The Consesus Plan:
http://www.consensusplan.org/plugin/template/consensus/Welcome/*

Consensus Plan for Public Safety Spectrum Realignment(Microsoft PowerPoint)
http://www.consensusplan.org/plugin/template/consensus/22/127

Side-by-Side Comparison: Balanced Approach vs.Consensus Plan
http://www.fix800mhznow.org/index.cfm?fuseaction=main.comparison

-
The Consensus Plan includes 800 MHz, 700 MHz, 900 MHz, and moves
Nextel to the 1.9 GHz Band (1910-1915 MHz paired with 1990-1995 MHz)
which most of us can't get on our scanners anyway.

I support the Consensus Plan because in moves Nextel out of 800 MHz
and consolidates Public Safety into one continuous block of spectrum.
Nextel also gives back spectrum at 900 MHz and stays out of 700 MHz.
Opponents of the Consensus Plan claim that Nextel is getting 10 MHz
of "free" spectrum at 1.9 GHz. However Nextel gives up about 10.5 MHz
and also pays about $850 million for the rebanding effort.

No. It is a hand held and I listened to it on the way to work and it
has the noise. It's only on the 800's, not the low or high bands. It
isn't constant on any one freq.

60hz hum harmonics.

This is a simple solution to this:

1) FCC ENFORCES the REGULATIONS on the books now and FINES Nexhell $2 BILLION/day/violation/site for their flagrant violation of FCC rules. They are all gung ho to hand out fines for broadcast violations all of a sudden. So lets enforce the rules here too gang.

2) RELOCATION of nexhell to 1900mhz with a guard band for their slop to fall into between the present allocations for PCS here. You have 30 days. Too quick, oh well. Turn off the sites at 800MHz its been 30 days and 1 nanosecond. No I don't care to be realistic about this change over. Don't even ask. I am tired of dealing with their crap and hearing the damn chirping.

The above:

1) SOLVES THE PROBLEM
2) Puts the cost SQUARELY on the company causing the problem, nexhell. They have to replace their entire network and handsets. ZERO COST to public safety.

Problem solved.

Those who cause interference are RESPONSIBLE to CORRECT the problem. Going to cost nexhell money, oh well. Its not public safety or private industry licensees that caused this problem, its nexhell.

Why none of this will ever happen.

Guess who the BIGGEST GOVERMENT user of nexhell is?

Who would by a scanner in France then, instead of buying it in a
neighboring country before returning home?

Well, I suppose there must be some market, as Icom bothers to make a
French R5.

Hmmm, so far, that makes 1. US cellular blocked, 2. France most
everything blocked, as the only special editions manufacturers make in
addition to their unblocked worldwide version, as far as I know.

I suppose manufacturers could make many different versions to comply
with each little country's laws, but don't bother, as people will just
smuggle in the worldwide version anyway.

Has anyone else noticed what appears to be portable cell towers up and down the GSP? They are towers on trailors with a small box at the end, maybe a generator and most are placed in the center median, at the SP turnarounds. Are these part of some State Police communications network? Are they part of a commercial cellular network? Anyone have any idea?

Most likely if its in the median of the road, those are temporary cell towers.

While waiting to get easements and permits to build a new tower or to go on an existing tower, this is the temp solution to get customers the coverage they need.

Nextel finally got theirs up at the 131 mile marker not too long ago having to go the same route.

FOUND THIS IN ALT.FAN.ART.BELL - NOT CONFIRMED
IF THIS PROGRAM CHANGE IS VALID, BUT IF SO IT SHOULD
BE A GOOD PROGRAM FOR ALL RADIO AMATEURS...

"Occasional AB Listener" <iamnot@aol.com> wrote in message
news:405C9BD6.7DFD@aol.com...

Tonight (March 20, 2004), at 10:05 Pacific Time on "Coast to Coast A.M,"
late-night radio talk-show host Art Bell is going to take a breather
from the customary paranormal and conspiracy-related format and discuss
a topic that will interest most -- if not all -- radio amateurs,
shortwave radio enthusiasts and broadband users: Broadband Power Lines
(BPLs).

Now under development, BPL is a technology that will allow computer
users to access high-speed, broadband Internet connections just by
plugging the computer into the wall outlet. No need to pay hundreds of
dollars in installation, activation/deactivation and service fees for
Digital Subscriber Lines (DSL) or cable modems, just literally plug and
play.

Fans and supporters of BPL include the Federal Communications
Commission, Power Line Communications Association and local utility
companies. Since power lines are available in urban and rural areas,
while DSL and cable services are limited or inaccessible in some
sparsely populated areas, BPL is anticipated to be a major challenge to
the existing methods of high-speed access. But BPL is not without its
drawbacks.

The American Radio Relay League (ARRL) is concerned about the amount of
RF interference generated by BPL. According to their website
(http://www.arrl.org/tis/info/HTML/plc), "Studies done by amateurs and
regulators worldwide demonstrate conclusively that BPL that uses HF or
VHF spectrum will cause serious degradation of the communications
capability to nearby receivers on frequencies that BPL uses. HF is a
unique international resource that is in use by commercial radio
services, broadcasting, amateurs, government and military operators."

Early Saturday morning, about 2 a.m. PST on 3840kHz, Art himself (radio
amateur W6OBB) and his roundtable of fellow ham radio operators were
discussing the amount of interference -- especially from 2MHz to 80MHz
-- BPL can cause if service is implemented nationally. The hams

conversing with Art on the 80-meter band said that constant buzzing heard on those frequencies will anger shortwave listeners and hams alike if RF interference is constantly heard on those frequencies.

Another problem is the potential health risks associated. Could a substantial increase in RF exposure -- especially around the household -- contribute to the rise in cancer-related diseases? A very close friend of mine, who happens to be a ham radio operator living near Switzerland, explained to me that most of Europe has scrapped plans for BPL because of possible RF-related diseases, as well as RF interference in commercial and amateur/SWL communications.

Nevertheless, tonight's "C2C" is going to be extremely interesting and worthwhile to those who are interested in all forms of radio communications. My friends and I will definitely be listening.

In Massachusetts, the folks doing traffic reports on local TV refer to sensors that they say monitor the traffic flow. The sensors appear to be aluminum poles and wooden telephone poles forty feet high, and have gone up along side I 93 and Rt. 3 in the past month. They have two (2) solar panels and a small white box, with no TV camera lense, half way up the poles looking down at a 45º angle, facing the roadway! Below this is a junction box at chest level. It's too bad they couldn't just us the existing highway over head sight posts. That are just feet away form them!

It's possable the sensor post my have to be a certain distance apart to measure the traffic flow. Even so, one post could have been a traffic sign and the next a stand alone post! Also weather towers, in fenced in compounds are set up at interchanges along the highway.

But these are at regular intervals, every few miles, so I don't think it's a cell phone company waiting get build a new tower. I frequently travel between exit 80 and 128, and these are deployed the entire distance, every few miles.

I'm not any expert, but that has been my experience, also. After failing to pick up any 2.4 GHZ video on my R3, I gave in and bought a wavecom tramsmitter/reciever pair.

I transmitted from my bedroom, which was a very small room at the time. The r3 picked it up inside the room, but could not pick it up at all outside the bedroom (only about 3 feet away), while the Wavecom reciever picked up the same transmission from several rooms away.

And yes, I did expect the R3 to recieve wireless video (from all of the advertising hype about it), and yes, I was sisappointed with it as such.

As I said, I'm not any expert on this stuff.

So it's good to have experts like you in this newsgroup. so that I and others csn learrn about some of this stuff.

While checking for radio birdies on my scanner, I noticed that I swas able to pick up a few stations without an antenna. (some were voice, some were data).

I'm assuming this means that I'm close to these stations, signal-level wise.

Since I can pick these up without an antenna, would this mean that it's intermod or just the actual frequencies the stations are on? or could it be either one?

When using my scanner to listen to these particular frequencies,(with an antenna, of course) should I use the attenuator to null them out or not?

I ask because I'm not sure if it's intermod or the actual frequency of these stations that I am hearing.

On a slightly separate note, one station I hear that I now know is intermod thanks to this group is the 162.55MHZ weather station in the 200 MHZ range, but I didn't pick up this stationn at all on either frequency without an antenna.

My questions for this post concerns stations that I am picking up without an antenna. And I live in a "semi-rural area". (official description).

that's what I thought to. Unfortunately or fortunately, however you decide to look at it, I ended up buying the IC-R3.'

> have no complaints about this model.

However, I do about my model, sort of.

>It has done what is was designed to
>do just fine for me

Unfortunately, I can't say the same for mine. (regarding all the hype about how it could pick up wireless cameras and had "three tv modes, AM-TV mode, FM-tv mode, and Wireless Camera mode" on it.

When I got mine, it had only two tv modes on it, AM-TV mode and FM-tv mode. Where is the third mode (the "wireles camera mode") that the literature in the ads said that it had on it? It's not listed in the instructtion manual.

However, I read that the sensitivity on it in the regular scanner bands is good, but that the problem is the squelch control on it is set too high by the factory . (even at the minimum squelch level of one) (which then of course, renders it kind of useless for sensitive scanning).

I read that with the squelch turned all the way off, the R3 picked up stations as good as as other good scanners.

But as I was saying, what good does it do to have the squelch all the way off if you're trying to scan? It makes it kind of impossible to do so. ;0

As for picking up 2.4 GHZ video on it, my experience has been that it really is very insensitive in that area.

The review I was reading that I'm talking about in this thread said that the R3 is okay on frequencies below one gigahertz for picking up stations, but not good at frequencies above one gigahertz.

That the problem with it below one gigahertz is in the squelch settings as the factory set them.

However, from my own observation of te specs claimed in the manual, I'm going to have to slightly disagree with the article and I think the R3 is probably okay up to two gigahertz, but very terrible above two gigahertz.

I'm beginning to wonder if the law (FCC regulations or government reguations)
made them do that.

Because I read an archived newsgroup post that said something like

"make no mistake about it. This is by design so that you can not see these
frequencies".

How true that post is or not, I don't know.

But I can kind of imagine it being true.

and I don't really doubt that it's true.

lastly, i question the term you describe as intermod.

it's from poor IF design & filtering you are getting the problem - swamping it- a mixing product of two (or more) strong stations being 'up' at the same time.
though, ofcourse, the result is, you hear two or more conversations on one channel

You can use either with the OPC-478, no need for the CT-17. They are
both "level convertors".

Advantage of using a Stereo -> Mono adaptor on the OPC-478 in the CI-V

I have a Yupiteru 9000 that has a problem with the squelch cutting out too early. I used to be able to turn the dial from all the way to the left and then to about the 12 oclock position before the squelch would cut out, but now, if I turn all the way to the left and then turn just a little bit to the right, the squelch cuts out immediately. I can deal with it, but it seems like it could be fixed.

Also, if it's plugged in to the wall and you bump the scanner, the power cuts off. Tried a different power supply and still does it. Never cuts off when it's running on just batteries.

Any ideas would be appreciated...

i would say you have a couple of joints that by wear & tear & machanical
movement have failed.
sadly, a lot of the 'bits' to the outside world like the controls & power
plug have no strain relief on the PCB, the solder joint also hold them
machanically.
so over time they fail due to movement.

if you can solder, it's an easy job just to resolder them with fresh solder
where there pieces connect on the circuit board.

Just get a external battery charger. Look for a rapid charger and recharge the AA cells out side the 9000 and us tape to hold the battery compartment door closed on the radio. Because the door may become loose after switching the batteries out to recharge them every day or two. Have you upgraded to NiMH AA cells yet? The NiMH batteries last 1/3 longer than NiCads.

Been a while since I traveled the GSP, I am normally on the NJTP.

Sometimes they throw up the EZ-pass monitors to check on traffic conditions by monitoring the EZ Pass vehicles to determine speed and thus traffic conditions. But that would mean you should see the antennas pointing down at the roadway. If these have more of an OMNI positioning, beats me. I would have to drive up there. I sometimes frequent 131 to 145 so I may not see it if it does not head up that far.

These towers have antennas that appear to operate in the same frequency range as cell towers. They are placed in omni position, like cell towers, so I don't think they're watching ez-pass. I figured it was probably part of some state police communications network, but I'm not sure. I rarely travel above exit 128, so I am unsure if they continue up that way.

Well, don't UK licensed radio users pay for the BBC?

In any event, Replay Radio offers Coast-to-Coast for download without going through the show's website. Yes, Replay Radio is also not free, but it is reasonably priced and offers hundreds of other shows.

Perhaps of the week?

Was driving to the hardware store and heard the county sherrif call the local fire department notifying them of a grass fire right next to the freeway. Changed channels and listened to the local FD fight the fire while I drove over to look at it. Also listened to the truckers make comments on the CB. Wasn't a big fire, but pretty smokey.

Over winter while driving to go skiing I had a bunch of fire trucks come up from behind me ... hit the fire scan button and found the local channel. Turned out to be a fire in a hotel ... I parked in a nearby subdivision where I could observe from a distance and listened to the room by room search. Turned out to be an over cooked hot dog in a microwave.

# 1835. for better AM broadcast reception on the IC-R3

The IC-R3 has very poor sensitivity on the AM broadcast band. and I could hardly get any radio stations on it, except for my one local.

Well, this worked for me.

I decided to buy 75ohm F connector to BNC connector, and hooked my R3 into the roof antenna by simply screwing the antenna wire i(that I would normally use to watch tv) nside the trailer to the connector and screwing the other end of the connector onto the R3.

I did this to get better scanner reception on the VHF and UHF bands.

As expexted, it greatly improved reception on the VHF aircraft band and FM broadscast band, among others.

But to my surprise, it also improved reception on the AM broadcast band and shortwave bands (even though tv antennas aren't made for these frequencies).

I was able to get most all of the AM broadcast stations in the counties and two counties away from me on the IC-R3 with this method.

Unfortunately, I later had to move back here and there isn't any roof antenna here and I'm not allowed to put one up here, so I'm omnce again back to poor reception on the AM broadcast band when using the R3.

But the tv antenna worked great from AM broadcast band through normal tv frequencies.
I'm not sure how high in frequency the tv antenna would have worked on the R3.
I imagine that the tv antenna might not be good for 2.4 GHZ, but then again, it might.

Would a regular tv antenna (on the roof) improve 2.4 GHZ reception?

That is, would it be better for recieving 2.4 GHZ than using the supplied rod antenna that came with the radio?

I want to be able to monitor cellular and cordless phones using a scanner device that attaches to my PC. Can you tell me what is available and what frequency range I need to search to listen?

FYI - I'm an old 80's scanning hobbyist back when I believe the waves were more free and I used to capture cells on the 800 MHz, and cordless phones on the 40 or 48 MHz ranges, from what I remember. With all the newer frequencies since then such as 900 Mghz, 2.4 and 5 GHz ranges, I'm a bit out of date as to how capable we are of capturing these frequencies today. I'm also inquisitive as to what my wireless laptop devices are capable of, since I have a 2.GHz router (transmitter?) and laptop wireless card (receiver?). I wonder if these can be utilized for scanning as well. Can you tell me where the ranges fall for cordless and cell phones today, and if there exists such a device to scan using PC hardware and software? If you can guide me to a updated lesson on the web, I'd appreciate that too.

I have been experimenting with different external speakers for my communications receivers and I think I found one. Its the cobra HG S100
and it seems to work really good. I paid 24.00 at the local truckstop, but have seen it online for as little as 12.00(don't forget shipping is extra though). This is a 15 watt speaker and 4" speaker and really produces a good powerful sound. I think this is a pretty good deal for the money. I know that probably there is better ones on the market going for more money, however I think for the price this was a great speaker.

Icom makes a couple of units that connect to the PC--they are models IC-PCR100 and IC-PCR-1000. They go up to 1.3 GHz. There's also the WinRadio series, but I don't know anything about them.

Cell phones are still where you used to monitor them when it wasn't illegal, although they are mostly digital now. Nowadays, you are more likely to find cordless phone activity on the 900 MHz cordless phones in the range of 902 to 928 MHz. Cordless phones in the 2.4 GHz band and above tend to be digital, but even if they are analog, you'd need a more expensive receiver the reach up that high (Yaesu VR-5000 and AOR AR8600MkII are two examples in the $700 to $900 range that are very versatile DC-to-Daylight receivers). You might still find some 46 MHz cordless phone activity around, too. Of course, listening to cordless phones and cell phones is illegal, and generally quite boring, I'm told.

Any newer model of scanner bought in the US will be cell blocked, so you would have to import an unblocked model from another country (from places like Bandercom in Finland or Javiation in the UK and possibly even some Canadian distributors), which is, of course--say it with me-- illegal. If you're willing to risk importing one, you can get most any receiver or amateur transceiver in an unblocked version.

Just about all (if not all) newer models sold in or to the US are impossible to unblock because the blocking is done in firmware rather than in hardware, and US models generally use a different version of microcontroller than the international versions so that there's no chance of fooling it. On the other hand, there are still plenty of older models of scanners that are either already unblocked or are easily modified (one example is the Sony ICF-SC1, also known as the "WaveHawk", which is a damn fine scanner, but hard to find now). Can you say "eBay"?

A few minutes in Google will yield more sites for self-education in radio scanning than you could possibly have time to look at. Here's one to start you off: http://www.fordyce.org/scanning/

Pretty much any "Trunk Tracking" scanner will work with a basic Motorola SmartNet system. These are often called Type II trunking. You don't really need the more expensive 250D unless they also use digital modulation. This is usually referred to as an "Astro" system (i.e. Astro SmartNet).

The tones are set up via a pair of capacitors and tuning pots. Not an easy task with out equipment.. Been there done that. Did 13 of them. Have a manual can sell you a copy of if your in need at some point. There are 2 versions of this, one is Digital Squelch Activation, the other is more like just plain PL. The difference is the DSA units have no external squelch. Also, no external "monitor/alert" switch. The nice ones have this switch allowing you to listen to all on channel transmissions. I have 2 DSAs here. I've not really gotten into all the jumpering yet to see what they'll allow or not, but a pain in the ass compared to the regular units. Lots of luck! Lou

I used to work with a portly surgeon that looked remarkably like a butcher ...
an awfull pun for a surgeon !

But, I digress ... chasing med. choppers via scanner is my speciality ! :^]

When leaving or arriving an airport, you'll find them in the air band, so find
out where your local chopper's hanger is and listen to that airport's
frequencies for departure and arrival.

When in route, they will often keep in contact with the local Level 1 trauma
center. Here in Milwaukee, that is Froedert Medical Center and they use the
463.185 medical calling channel for the medical info (details about the
patient) but also use 129.495 (I think that's it) for non medical info.

As they approach the scene of the patient, they contact the local police or
fire department on their frequency. Often, you'll find out what freq. that is
as they are on route and talking to the trauma center.

THen it's back to the medical calling channel, or designated air band freq. as
they fly back to the hospital

WHat particular city are you interested in???

Here in Georgia we talk to them on the HEAR Channel at 154.34 MHz when they get on-scene, but often they come up on our county Fire repeater frequency while enroute. I would guess when enroute to the hospital they talk to the hospitals on the UHF medical frequencies or on the 800 trunking frequencies some of the hospitals use. These are pretty much the same frequencies used by the ground ambulances in the same situations.

Well, it sure isn't worth that much here. I bought a Pro-93 trunk tracking scanner for $90 about a year ago. Since all cell phone stuff around here is digital, that would be useless to me.

Probably not. Any RF the TV antenna could pick up on that band would be
lost through the coax on the way down to the scanner. You need some really
good coax and almost waveguide for that band. The rod antenna fully
collapsed would probably work better.
What is there to listen to up in that band? I don't have anything that can
listen up there.

# 1880. 99 Channel FRS on eBay - Interesting, thinking about bidding

99 Channel FRS (Family Radio Service) Extended Range Radios
New In Box ! Never Used !
Yes - you read right - 99 CHANNELS

Limited Edition FRS Radios by Drake - DISCONTINUED due to EXTENDED FREQUENCY COVERAGE

2 Radios
2 Charging Cradles with Red LED Charging Lights
2 Wall Transformers
2 DC Automotive Cigarette Lighter Charging Cables
2 Belt Clips (round metal button on back of radios also fits cellular phone clips)
6 NiMH Batteries (3 per radio)
Instruction Manual
Original Boxes and Packaging
Satisfaction Guaranteed
These compact (3.4" high x 2.1" wide x 1.2" deep) FRS radios have many features such as high power output for EXCELLENT RANGE (500 mW) and 38 CTCSS Privacy Codes... but what makes these the ultimate radios are the EXTRA 85 CHANNELS !

Imagine... being at your favorite ballpark, amusement park, luxury cruise liner, skiing, talking car-to-car, at the mall... any where people are using FRS radios. The interference is terrible, people can overhear you talking, and your range is limited.

Now imagine... that same situation using these Limited Edition Drake FRS radios... you press the "Channel UP" key and it keeps going and going and going... all the way to channel 99 ! Of course, you will want to be sure the frequency is clear of any business or police which share that band (extended frequencies shown below). These extra frequencies are for "export use only". I am not responsible for how you use these radios.

To change from US mode to Export Mode, just hold down the Function and PTT buttons, and turn unit on. To put back into 14 channel USA mode, do the same and it will toggle back.

Recently I was at professional baseball game, over 35,000 people in attendance. We have an extra pair of these radios, and I provided one to my wife and one to my son. Channels 1-14 were useless, they were totally filled with conversations. I simply tuned to channel 15 (just one up from the normal FRS frequency)... and WOW, it was COMPLETELY

quiet. Perfect communications. Apparently none of the other 35,000
people had these radios... what are the chances anyone else would ?

Additional tips ...

I have the airband freq. and the home hospital med channel freq. in the scan all the time. You can usually hear the chopper a ways out if you have a decent antenna. Once you hear them enroute someplace, then you can chase them around the spectrum (or in your car ... did that once ... ended up seeing TWO med choppers at a car accident scene). Some times you'll get lucky and catch choppers from nearby areas who are delivering critical cases over long distances for special treatment. I even saw a USCG chopper once, which is fairly rare around here.

I'm fortunate in that I only live 3 miles from a big local hosp. (not the level 1 trauma center though), and they often fly _ right over head_ when bringing in critical patients for emergent surgery. VvvvvvrrrrRRROOOOMMMMMMmmmmm .... !

I also catch many of the news choppers either on 123.05mhz or the local TV station frequencies (see your favorite database).

Happy chopper hunting

Not exactly an expert but ... The middle one appears to be a center tuning
indicater. Try tuning a signal with known accuracy like a noaa station
[162.55].
The center led should be lit. If you tune up,or down, .. Or scan up or down
shall I say,then the other leds will light accordingly,indicating you are
off frequency.

The one on the left ? I have a mod with 2 leds,and it simply indicates when a
station breaks squelch.

Why would ebay remove it if it was made that way?
The item is not breaking the TOS with EBay, or did you think that the item he is selling was opened up due to a MOD.
Should EBay remove the ICOM T90A's also for being able to TX in those given Freqs and also many, many other Freqs?

Making a report to EBay for this item would be the lamest thing anyone could do.

They'd remove it for the same reason they remove an unmodified RCI-2950. The radio would most likely be in violation of their posting guidelines since it isn't approved for use in the US.

No offence, but you need your head looking at for that, the 2006 aren't even
in the same league as the Icom.
Ebay the Icom and buy 2 2006's or a real radio like an AOR.

Would have been nice if you gave your location. Here in Calgary,
Alberta, Canada. Med choppers are heard on 122.450, 158.760,
406.5375, and sometimes on 411.6375 and 411.7375. They also at times
use the RCMP tac channels 155.640, and 155.670.

Oh sure AOR's are real allright - Until you need a spare part and vainly try
to find the faintest hint of customer support or a consumer base.
It was only through the grace of God that I ended up finding a new keypad for
my 1000 after months of searching - And this was years ago when they were
still top of the line.
Pretty much the same for Yupiteru from what I've heard.
Icom,I don't know,but I seriously doubt if they could match Realistics
support and availability - which should be a factor to consider when
investing in any electronic gizmo with parts prone to wear.

The PCR1000 go for around 200-250 on e-bay while the Pro-2006 with a Opto board (not to mention the other mods he wanted) are going for 250-350 on e-bay. How could he get two?

Hello there,
I am looking for a older style scanner antenna for my Uniden Bearcat BC560 mobile scanner.
I have lost the origional and need to get another, it has the white plastic and is a push in type (not BNC) If anyone can help me out It would be very much appreciated
Here is an e/bay listing with the type of antenna I am looking for.

Radio Shack part number 20-161
(http://www.radioshack.com/product.asp?catalog%5Fname=CTLG&category%5Fname=C
TLG%5F008%5F009%5F010%5F001&product%5Fid=20%2D161). This is a stock item.
Click or cut and paste the URL and you can enter your zipcode to see if a
local store has it in stock. You can also get an SO-239 to RCA adapter from
Radio Shack and hook up a mobile or base antenna to your scanner.

Last night someone donated some WX Sat equipment to our local club

A Timestep Prosat 4.1 Wx Rx
A UKW-Technik (rebadged as Microwave Modules) WeatherSatellite Rx
A Timestep Meteosat convertor

I'm a complete newbie to this but quite like the idea of playing so will build an antenna and try decoding. I'm assuming the Prosat is the best RX to use.

Anyone
got copies of manuals etc for any of the above they would care to share? (I will try emailing Timestep next week)

got any recommendations for the best sites to get a newbie like me started (including antenna design, best software etc).

If no-one else in the club is interested I may also offer the gear for sale, so if anyone is interested let me know and if I decide not to buy it myself then I'll look to a private sale possibly, rather than Ebay.

Thanks

Most of Europe and Asia is PAL. France is an exception with SECAM.

Most of Central and South America is NTSC.

The two are not compatible although there are various converters which

Why don't you try "Goldwave"? It's a general purpose audio recording program that produces .WAV files of audio quality you specify. The lowest quality (smallest file) should be fine for a scanner.

I most definatly agree on GOLDWAVE.. if you are recording satellite
stuff or satcom, there is a noise reduction filter to cut out some of
the static :)

You might also want to have a look at Audacity. Its open source and its free. Its available on Win, Mac & Linux.

http://audacity.sourceforge.net

It has similar features to Goldwave including plugin. It has a good interface and very easy to use. Although I have only had it for few days and have not done any long recordings, the performance looks promising. On my Athlon 900 its start very quickly (1 - 2 secs) and you can start recording imediately.

I say forget the PC and get yourself a MiniDisc recorder to hook up to your scanner. You'll be saving your hard drive that way and you'll still have digital addressable media to record to. I suggest Sony's MZ-R37. It's somewhat old, you might have to look for it on eBay, but it really does the job. I use mine on both my scanner and my shortwave radio (great for picking up station IDs in ham radio conversations).

A typical MiniDisc will hold up to 2-1/2 hours of audio.

I am looking for the best trunktracker base station under $400. US. I have motorola and EDACS trunked systems in my area, but no digital (yet). I figured that a BC785D would be my best bet without a digital card. Then if APCO-P25 ever rolls into the area I can get a BCi 25D digital card if needed. Any other ideas?

If you're looking for trunktracking capability only, another option would be the Pro 95 - under $200.

Put the leftover $$$ away for when the time comes to buy the latest / greatest generation of trunktracking scanners.

The Pro 95 offers good performance and alpha tagging ... at a good price. The only reason I hesitate to recommend it for conventional scanning is that it can't handle PL / DPL ... that's a personal preference.

Thanks, I hear you Jeff. I have looked at the Pro-95 also, but had my mind set on a base. I also want full functionality including PL/DPL and computer control is appealing. I read through many threads in this NG, and many folks recommend the BC780XLT over the BC785D. The main reason cited was FM overload and/or intermod problems on the 785D. These days they are very similar in price with a slight advantage to the 780. Anyone else have another recommendation?

# 1955. Problem with ACARS

From: Sir Scan-Alot <scanalot@yahoo.com>
Message-ID: <g8adnRfj-o7LBfXdRVn-gw@comcast.com>
Source record: 21645

About 5 years ago I had a Pro-2028 desktop scanner that I used with my PC to decode ACARS data with the Windows program WACARS. It worked excellent. The scanner stopped working around 2 years ago and I have since purchased both a Pro-95 & a Pro-79 handheld scanner.

The problem is I can't seem to decode ACARS with either of these two scanners. I have the same PC hooked up the same way to the handhelds as I did the desktop and although I recieve strong signals on the ACARS frequencies the WACARS program does seem to pick up the data and decode it.

Anyone have a similar problem and know a workaround?

TIA.

OK, first thing you need is your latitude and longitude (approximate is
OK). Go to:

http://sd.ic.gc.ca/engdoc/main.jsp

Scroll down a couple of paragraphs to "Radio Frequency Search" and
select the "Geographical Area" search. From here you will find all the
licensed frequencies in your area. You probably need to use NFM.

Another place to look is http://www.radioreference.com

Nobody, and I mean nobody uses CB anymore. We have one of these clubs in our area and I think they have been waiting 20 years to save some lives, and none yet. What does this have to do with scanning?

Louisiana State Police frequencies
Police/Sheriff's channels for Livingston and Tangipahoa Parishes
Railroad channel listings?

I've searched quite a bit and find nothing.
Please e-mail as I don't read this group much.

What are all those voices that I hear on the lower side of channel 38? Tons of people talking. Some claim from New York, Tennessee, Georgia, Florida.....

Since nobody uses CB anymore, then I'll bet those voices are ALIENS! Some other planet must be using those frequencies. Nobody here on earth is. Holy Cow, I talked to one of them one time. I'm going to be famous. I made contact with an extra-terristrial. Couldn't have been a human. Funny how well they speak english.

ok i found out my problem , i am useing a 800 mhz antennia on my roof for my scanner , if i disconnect that and use the extendable one that came with my 785 it picks up all the stations 100 %

now when i listen to a station i disconnect the factory antennia and hookup my 800 mhz one boom all i get is pure static

i slapped on a splitter onto the scanner so i can connect 2 antennias it works with the factory on it but soon as i hookup the 800 mhz antennia boom i loose all signal and hear nothing but a hiss of static , any idea why it is killing the signalor how i can get around this to work ?

What's the matter? you're old Bearcat III doesn't have 11 meter crystals? Most high end scanners include the CB band, which I
use to assist in monitoring. I haven't saved any lives on the CB, but I do give out alot of directions to lost truckers in my area, what's wrong with that? Just so you know, your negative, do nothing, sit on your ass and whine, comments had nothing to do with scanning, either.....piss off

Nobody, and I mean nobody uses CB anymore. We have one of these

lives, and none yet. What does this have to do with scanning?

Hey All,

I'm trying to find the best mobile antenna for receiving CHP transmissions (around 42Mhz). The antenna has to be mounted on my vehicle (camaro), so can't be too long (6ft max). An additional complication is lack of good ground plane, I have a targa roof and the hood & trunk are fibreglass.

My current thoughts are to locate a commercial base loaded 1/4 wave VHF whip and try and mount this to my towbar, but that's not really much of a groundplane.

Anyone got any good ideas? Been a long time since I've played around with antennas.

Thanks.

Try the Larson NMO-50. It's a base loaded 52Mhz antenna for the ham band. It will do pretty well if you dont cut it to frequency. Out of the box its around 45Mhz....
It will mount in the area between the removeable roof panels. The NMO mount requires a 7/8" hole. I have used for years on the 39 and 42Mhz CHP channels...Eddie

It sounds like you might have a bad feed line or a short somewhere.
What does an OHM meter read between the inside and outside of the coax
or between the two antenna leads.

I waited for over an hour for a tow truck once which I called from my cell phone. I finally remembered my CB packed away. Put up the magnetic antenna, plugged it into the lighter and in 5 minutes I had 3 trucks fighting for my business!!!

I've also found monitoring the CB frequencies usefull for avoiding traffic problems. On top of that, whenever I see a broken down vehical I put out a call to let everyone know it's there and to hopefully attract the attention of some help

Oh, and once I was sitting waiting for someone and watched as a fight broke out on the patio of a bar. I called out on 19 and in 30 seconds there were 3 cop cars there. I'm not sure if they were listening but they responded pretty darn fast if it was a regular 911 call!

Turn the dial to the 6 o clock position, from what I can see that should be the 200 Ohm mark in the Green. If you touch the leads together it will show 0.00, or no resistance for obvious reasons. If you leave the leads apart it will show infinity (not sure what that will look like. On some units it looks like --.-).

Now, assuming your antenna is coax, carefully put the one lead on the centre post of the coax wire going to your antenna and the other lead on the outside connector portion. If you have 0 ohms and your sure that you are holding the leads right, then you have a short somewhere in your antenna or in the cable.

When you say 800 Mhz antenna, are you saying that it is resonant at 800 Mhz or is it some sort of active antenna with a band pass filter on it? If it has a band pass filter only alowing 800 MHz through then it will never pick up your local FM stations! If it is just an antenna cut for 800 Mhz with no active components then it should still pick up your local FM stations without any problems.

I was considering a unblocked 780XLT to replace my PRO-2030. I have a unblocked Yaesu VR-500 which I really like to travel with. Has anyone bought one and is it truly unblocked? Most of the sites read continous coverage and then go on about the ranges of freq's it will bring in.

Frequency coverage: 25-512MHz, 806-956Mhz, 1240-1300MHz Either it is blocked or unblocked right?

I am assuming that a ubc780XLT is an unblocked version. I have bought from www.bander.com in the past and quite happy with them. They offer one that is "almost continous coverage" That is like saying the scanner is almost on. I sent them an e-mail a few mins ago and hope to get a response soon.

Anyone? The cell crap doesn't really interest me but I have heard activity on frequencies on my VR-500 I couldn't get on my PRO-2030.

If you are monitoring Mil action in Florida you had a huge day yesterday (Wednesday) and will have an even better one today.
Yesterday there were multiple AWACS acft controlling fighters in the Tarpon Range near Key West, in addition to the normal action at the other ranges and in the offshore Whiskey areas, including the Dutch Air Force F-16s who have been here for over a month.
Yesterday's AWACS acft are up again, but add some more visitors to the mix now.
Just when most of the annual Snowbirds are leaving Florida to return to their northern homes, a bevy of NY-ANG F-16s (174FW, Hancock ANGB, Syracuse NY) arrived at Patrick yesterday and will be remaining here for a week to work our ranges.
The "chicks" were accompanied to here by McGuire KC-10A tanker "Hoist 95" and big C-5A "Reach 8224" (#68-0224, Stewart ANGB 105AW). Hoist 95 departed this morning to Robins AFB, and Reach 8224 departed afterwards to Stewart.
I snagged comms from the F-16s this morning as two flights of them worked the offshore Whiskey Areas here, and one flight worked Avon Park Bombing Range.
Yesterday they arrived using the FAST callsign and air-air freqs 138.475, 141.575 and 141.7.
Today they used COBRA and APEX callsigns and air-air freqs 148.125, 141.7 and 141.75.
As I write this, Dutch Air Force F-16s "Spider 81 Flight" are arriving to work at Avon Park Bombing Range and are chatting away on their 141.7 air-air freq.

I've studied the manufacturers' literature, now I'm looking for user feedback regarding the more subjective differences between the Yaesu VR-5000 and the AOR AR8600MkII. Both are similarly-featured compact DC-to-daylight receivers...is there a clear winner irrespective of price?

Having owned both radios I'd say the AOR is by far the better radio
regarding build quality and sensitivity.
The nice LCD on the Yaesu is tempting and it's flashy etc but the AOR beats
it hands down.
The AOR hasn't any software bugs either.
Just my opinion.

I found the plastic packing bubbles in the Yaesu VR-5000 were of
higher quality than the cheap plastic peanuts used with the AR8600.

For the difference in price and the fact that the AOR doesn't have a real-time bandscope, I chose the VR-5000 and have never looked back. What bugs? Mine doesn't exhibit any peculiarities. If CONTROLLING the radio via computer is important, pass up the VR as all you can do is up/down load frequencies...

Hello,

I'm looking to purchase an Icom PRC1000 and just wondering if anyone knows where I may find one for the best price. I found it in a few places on google and the lowest price (so far) being $369.

I'm not trying to be an ultra cheapskate, but if I can find it cheaper I'd have a better chance of convincing my other half how badly I need this : )

Any help would be greatly appreciated.

I'm looking at a used Radio Shack Pro-76 scanner for $50. What should I check for
(before I buy) when I turn it on? Is this an adequate scanner for local fire/police/emergency/weather frequencies? Is it worth $50?

Thanks for any help! I really do appreciate it!

Do you know what frequencies you will be listening to? The Pro-76 doesn't go into the 800 mhz frequencies, which many agencies use. If the ones around you stay in the typical 500mhz or below frequencies, this scanner would probably be fine. You really need to find out what frequencies you'll be using. Also, many agencies are switching to either digital or trunked radio systems, which this scanner will not do.

Try going to http://wireless.fcc.gov/uls/ and click on Search Licenses.
There's an option to search for frequency licenses within a geographical
area. You can even select a frequency range and it will list licensed
frequencies in that range. When you find the scanner you want, do that,
typing in the frequency ranges of the scanner. It'll also help you find if
you need a scanner with 800mhz or not, because you can type in your address
and search within a distance of that, like 10 miles, or whatever you think
you'd be interested in hearing out to.

## 2013. Scanner recorder ?

I am looking for a piece of software I used to have which would record from my scanner in mp3 format. It would only record when the squelch was open on the scanner. It also had a timestamp on the file so i knew at what time the recording was made.

It's not 'Scanrec', although this is a good piece of software, but it had a similar name.

Any ideas what it was, or anything fitting the above ?

Cheers
Andy

Difference in price???

The VR-5000 suffered a major drop in price because it would not sell due to the many and varied technical issues with it.

Strangely enough that was never an issue with AR-8600
